S. 3454. A bill to authorize project grants for graduate training in public health, and for other purposes; to the Committee on Labor and Public Welfare.

By Mr. ELLENDER:

S. 3455. A bill for the relief of Ronald J. Cuny; to the Committee on the Judiciary.

By Mr. ELLENDER (by request):

S. 3456. A bill to amend the Agricultural Trade Development and Assistance Act of 1954; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. ELLENDER when he introduced the above bill, which appear under a separate heading.)

By Mr. SMATHERS:

S. 3457. A bill to authorize the Secretary of the Interior to sell reserved mineral interests of the United States in lands located in the State of Florida to the record owners of the surface thereof; to the Committee on Interior and Insular Affairs.

EXTENSION OF PROGRAM FOR UTILIZATION OF SALINE WATER

Mr. CASE of South Dakota. Mr. President, one of the programs which has

accomplished more results for the money expended than anything else is the program for the development and utilization of saline water. The authority of the present law will expire after the next fiscal year. I have prepared a bill to amend the act so as to permit a 5-year extension with the necessary appropriations.

I introduce the bill for appropriate reference, and I ask that it remain at the desk until Monday, May 2, so that other Senators who may wish to do so may add their names as cosponsors.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk as requested.

The bill (S. 3446) to amend the act of July 3, 1952, as amended, relating to research and development and utilization of saline water, introduced by Mr. CASE of South Dakota, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

AMENDMENT OF TITLE X OF SOCIAL SECURITY ACT

Mr. HARTKE. Mr. President, on behalf of myself and the Senator from Montana [Mr. MANSFIELD], the Senator from Rhode Island [Mr. GREEN], the Senator from Illinois [Mr. DOUGLAS], and the Senator from West Virginia [Mr. RANDOLPH], I introduce, for appropriate reference, a bill to amend title X of the Social Security Act to enable the States to provide more adequate financial assistance to needy individuals who are blind and to encourage and stimulate needy blind individuals to become self-supporting.

In determining the eligibility of a blind person for assistance this proposed legislation will:

First. Increase the earned exemption income from $600 to $1,000 plus one-half of the earnings in excess of $1,000.

Second. Permit the possession of real and personal property in the amount of at least $3,000, assessed valuation, plus additional property and income if necessary for the fulfillment of an approved plan for achieving self-support.

Third. Abolish the relative responsibility concept.

This proposed legislation will also:

First. Require the States to establish equal minimum payments.

Second. Raise the ceiling on the matching of State funds by the Federal Government.

Third. Prohibit encumbering property of recipients by liens or transfers in favor of State agencies as a condition for receiving aid.

Mr. President, we should not have a philosophy which treats blind individuals as public assistance cases—as wards of the States. We should encourage initiative. We should encourage rehabilitation. Certainly we are not doing this when our blind program contains such demeaning and demoralizing provisions which permit a State agency to encumber the modest possessions of a blind individual before they will give him assistance, or which will encourage a disruption of the family relationship by making a blind individual dependent upon a relative for support. The unfairness of such a philosophy is apparent.

We want to modernize this program and encourage and stimulate blind individuals to become self-supporting. We must permit them to use their talents. And above all we must permit them to possess and retain the dignity and self-respect to which any member of our democratic society is entitled. If we extend to them the great American principle of opportunity our country will be so much the richer.

I ask unanimous consent to have printed as a part of my remarks the full text of this bill, together with a brief explanation of it, and that the bill lie on the table until the close of business on Wednesday, May 4, 1960, in the event that other Senators may wish to cosponsor it.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and explanation will be printed in the RECORD, and the bill will lie on the desk, as requested by the Senator from Indiana.

The bill (S. 3449) to amend title X of the Social Security Act to enable the States to provide more adequate financial assistance to needy individuals who are blind and to encourage and stimulate needy blind individuals to become self-supporting, introduced by Mr. HARTKE (for himself and other Senators), was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) effective for the period beginning with the first day of the first calendar quarter which begins after the date of the enactment of this Act, and ending June 30, 1961, clause (8) of section 1002(a) of such Act is amended by adding before the semicolon at the end thereof the following: "and may disregard (A) not to exceed the first $1,000 per annum of net earned income increased by one-half of that part of net earned income which is in excess of $1,000 per annum, and (B) in the case of an individual who has an approved plan for achieving self-support, such additional amounts of other income and resources as may be necessary for the fulfillment of the plan".

(b) Effective July 1, 1961, clause (8) of section 1002(a) of such Act is amended to read as follows:

"(8) provide that the State agency shall, in determining need, take into consideration any other income and resources of an individual claiming aid to the blind; except that, in making such determination, the State agency shall disregard (A) the first $1,000 per annum of net earned income increased by one-half of that part of net earned income which is in excess of $1,000 per annum, (B) not less than $3,000 of the assessed valuation (less all encumbrances) of real and personal property, and (C) in the case of an individual who has an approved plan for achieving self-support, such additional amounts of other income and resources as may be necessary for the fulfillment of the plan;".

SEC. 2. Section 1002(a) of the Social Security Act is further amended by striking out the word "and" at the end of clause (12), by striking out the period at the end of clause (13) and inserting in lieu thereof a semicolon, and by adding at the end of the subsection the following new clauses: "(14) provide that equal minimum payments shall be made to all recipients of aid to the blind, except as such payments may be reduced as provided in clause (8) of this subsection; (15) provide that the State agency shall, in determining need, disregard the ability of a blind individual's family or relatives to provide for his support; and (16) provide that no individual claiming aid to the blind shall be required as a condition of such aid to subject any property to a lien or to transfer to the State or to any of its political subdivisions title to or interest in any property, and that no person shall be required to reimburse the State or any of its political subdivisions for any aid lawfully received by a blind individual."

SEC. 3. Effective on the first day of the first calendar quarter which begins after the date of the enactment of this Act, clause (1) of section 1003(a) of the Social Security Act is amended—

(1) by striking out "$65" and inserting in lieu thereof "$75";

(2) by striking out "four-fifths" and inserting in lieu thereof "six-sevenths"; and

(3) by striking out "$30" and inserting in lieu thereof "$35".

The explanation presented by Mr. HARTKE is as follows:

EXPLANATION OF S. 3449

Section 1: That the States may, before June 30, 1961, and must, after that date, disregard in determining need, the first $1,000 of net earned income, plus one-half of such income in excess of $1,000, plus not less than $3,000 of assessed valuation (less all encumbrances) of real and personal property. It further permits before, and requires after, June 30, 1961, that the States disregard, in the case of an individual who has an approved plan for achieving self-support, such additional amounts of other income and resources as may be necessary for the fulfillment of the plan.

Section 2: That a State's plan must provide for equal minimum payments for all recipients of aid to the blind; that relatives will not be required to provide support for aid to the blind recipients; that the State will not impose liens or other requirements of reimbursement for aid received.

Section 3: The bill changes the matching formula which determines the Federal and State share of aid to the blind payments so as to require the Federal Government to pay $30 of the first $35 paid on the average to blind aid recipients, and from 50 to 65 percent of the amount from $35 to $75.

AMENDMENT OF AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

Mr. ELLENDER. Mr. President, a few days ago the Vice President received a letter from the Department of Agriculture suggesting the introduction of a bill to amend the Agricultural Trade Development and Assistance Act of 1954. The purposes of the bill are:

First, to permit use of title I foreign currencies for transfer to the International Development Association;

Second, to make surplus food commodities available to underdeveloped countries under title I for national food reserves;

Third, to clarify title II authority to use commodities transferred under that title to meet the requirements of needy peoples and to promote economic development in underdeveloped areas; and

Fourth, to permit use of title II funds to pay general average claims arising from ocean transport of title II commodities.

Mr. President, I introduce the bill, by request, and ask that it be appropriately referred.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3456) to amend the Agricultural Trade Development and Assistance Act of 1954, introduced by Mr. ELLENDER, by request, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

AMENDMENT OF MUTUAL SECURITY ACT OF 1954—AMENDMENTS

Mr. FULBRIGHT submitted amendments, intended to be proposed by him, to the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes, which were ordered to lie on the table and to be printed.

PRINTING OF REPORT ON INTERIM REPORT ON MAIN STEM OF RIO GRANDE ABOVE ELEPHANT BUTTE DAM, N. MEX. (S. DOC. NO. 94)

Mr. CHAVEZ. Mr. President, I present a letter from the Secretary of the Army, transmitting a report dated March 25, 1960, from the Chief of Engineers, Department of the Army, together with accompanying papers and illustrations, on an interim report on main stem of the Rio Grande above Elephant Butte Dam, N. Mex., requested by a resolution of the Committee on Public Works, U.S. Senate, adopted June 28, 1956. I ask unanimous consent that the report be printed as a Senate Document, with illustrations, and referred to the Committee on Public Works.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from New Mexico? The Chair hears none, and it is so ordered.

COMMUNITY ANTENNA SYSTEMS

Mr. MANSFIELD. Mr. President, will the Senator from Texas yield to me?

Mr. JOHNSON of Texas. I yield.

Mr. MANSFIELD. I should like to ask the majority leader when Calendar No. 950, Senate bill 2653, to amend the Communications Act of 1934 to establish jurisdiction in the Federal Communications Commission over community antenna systems, will be brought up. This matter is very important to those of us who live in the Rocky Mountain West, and we think something should be done on this measure shortly.

Mr. JOHNSON of Texas. I shall be glad to review it with the Senator from Montana. Yesterday we discussed it thoroughly in the policy committee; and I shall be glad to review it with the Senator from Montana. It is a matter in which I did not participate.

THE COMMUNICATIONS INDUSTRY—COMMUNITY ANTENNA SYSTEMS

Mr. McGEE. Mr. President, from time to time I have had printed in the RECORD material relating to the communications industry of the Nation. At the present time, there is a dispute between the community antenna people and the live broadcasters; and in direct connection with this problem I have a series of letters and communications on the issue, which I ask unanimous consent to have printed in the RECORD. One letter is from the Columbia Broadcasting System; another letter is from the National Broadcasting System; and a third letter is from the National Association of Broadcasters.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COLUMBIA BROADCASTING SYSTEM, INC.,
New York, N.Y., March 7, 1960.

The Honorable GLEN AVERY,
Mayor, Scottsbluff, Nebr.

DEAR MAYOR AVERY: We have been informed that you are currently considering the question of community antenna systems in your area. As you may know, stations KFBC–TV and KSTF, of which Mr. William Grove is general manager, are two of our valued television affiliates, and those stations serve their coverage area with many of the CBS television network news, informational, and entertainment programs.

We, of course, recognize that the basic and difficult issue raised by community antenna operations and their relationship to normal free over-the-air television service supplied by local television stations is one especially for you and the people in your area to decide for themselves. Nevertheless, it occurs to us that it may be helpful to you for us at CBS to set out certain facts and circumstances which seem to us to bear on the problem.

First, I would like to emphasize that the CBS television network has certain property rights in the network programs which it transmits. We do not believe that a community antenna system can legally pick off the signals which comprise a CBS television network program without permission of CBS. And CBS has never yet granted such permission.

Second, I wish to emphasize that we at CBS deeply believe that the best system of television is one which gives all American people the widest possible choice of programs, both national and local, without the audience having to pay any sums in addition to what they paid for their television sets and for the maintenance of those sets.

It is our view that in the case of community antenna systems the objective of the widest possible choice of programs is in some respects achieved, while in other respects it is defeated. Thus, in a relatively small community which can economically support only one free over-the-air television station a community antenna system which picks up the signals of a number of different distant stations does increase the opportunity for choice among those in the community who subscribe to the system. Those subscribers, of course, thus obtain the choice of three or four programs at any given time, while those who do not subscribe are limited to the programs of the one television station in the community—so long as that station remains in operation.

On the other hand, however, the community antenna system may actually cut down the choice of the people in the area. This occurs because there may be people who cannot afford to subscribe to the community antenna system. Further, normally the community antenna system, as a matter of economics, usually can serve only subscribers living close in to the most heavily populated portion of the community; it becomes too expensive for the system to serve those living in outlying areas. Where the community antenna system duplicates programs carried on the over-the-air station, then, the choice is likely to be cut down for these two groups of people—those who cannot afford and those who are not reached by the community antenna system. This is because it becomes difficult for the television station economically to survive against a community antenna system which offers three or four programs, including those which the television station is carrying. As you doubtless know, the sponsor of a network program has a choice of which stations to order and which stations not to order. Often, if he does not order the station for a program which he sponsors, that program cannot be carried on the unordered station and, hence, the people served by that station do not see the program. An advertiser is not likely to order a station for which he has to make payment if the community antenna system, by picking off the signal of some distant station, is already carrying the sponsor's program to the viewer.

Thus, there is a tendency for community antenna systems which duplicate at least some of the programs carried by the local television station to deprive that local station not only of important programing, but also of the economic revenues which are necessary to permit it to survive. And if the television station cannot survive because of these circumstances, it will follow that all the people in the area served by the station who cannot afford to subscribe to the community antenna system or who are geographically beyond its reach will lose all television service.

Further, of course, if a community antenna system drives out the local over-the-air television station, the area served by that station will be deprived of all local programs dealing with news, local public affairs, and other means of local television expression.

Let me repeat again: We at CBS have no desire whatever to interfere with the difficult decision which faces you and the people in your community. But I hope that you do not think it presumptuous of us to call these factors to your attention so that you may have them before you in reaching your decision.

Of course, we are happy to furnish any additional information you wish or answer any questions you may have.

Yours sincerely,

RICHARD S. SALANT.

NATIONAL BROADCASTING CO., INC.,
New York, N.Y., March 25, 1960.

SCOTTSBLUFF CITY COUNCIL,
Scottsbluff, Nebr.

GENTLEMAN: KSTF, which is affiliated with the NBC television network in Scottsbluff, has informed us that you have under consideration the matter of permitting a community antenna system to duplicate its programs in your area. With the thought that it might prove helpful to you in your own resolution of the difficult questions raised by this proposal, we are enclosing a copy of NBC's comments filed with the Federal Communications Commission in connection with its inquiry concerning the effect of community antenna systems on the development of television broadcasting. The comments made these specific points, which have consistently represented NBC's position on the matter:

1. NBC has always supported Federal Communications Commission proposals to bring increased television broadcast service to smaller communities, and we have adopted special sales plans of our own which have

succeeded in enlarging the availability of NBC television network programs to our affiliated stations in these smaller communities.

2. The development of community antenna systems has raised conflicting public interest considerations. On the one hand, these systems can enlarge the amount and choice of television service within small communities; but on the other hand, they can adversely affect a local station within the community, and to this extent jeopardize not only its local community service, but also the service it furnishes to those portions of its coverage area which are not served by the community antenna system, and this can deprive the population in that area of its only available television service.

3. These conflicting public interest considerations in large part result from the fact that community antenna systems often disseminate programs without the consent of the stations whose signals they pick up and retransmit. We suggested that the Commission should and can act in the matter wherever microwave links are used to bring a signal from a distant TV station to a CATV system; in this situation the Commission should not authorize the microwave relay unless the consent of the television station has been obtained for the use of its signal on the CATV system.

It would seem to us that the public policy issue presented by the matter before you arises from the fact that the proposed community antenna system would duplicate the programs of the local station without its consent. As a result, sponsors of network programs may be less likely to order the station for their programs, since they would already be getting some exposure for these programs through the community antenna system. Such a situation could not only weaken the standing of the station as an audience attraction, but would reduce its economic ability to maintain an operation which not only serves all set owners in the immediate community, but additional viewers in the rest of the station's coverage area; and the weakening of such a service would adversely affect the local programs which the station offers the community—a type of programing which would not typically be provided by the community antenna system.

The policy issue then presented is whether the advantage to the potential community antenna system subscribers of having available to them a wider variety of programs—for which they are prepared to pay—outweighs the disadvantage to the larger number of people in the station's coverage area of weakening and jeopardizing the free service available from the station—a service offering local programs, although it may provide fewer national programs than the CATV system could pick up from various surrounding stations.

Apart from this public policy question, which you will have to judge in the light of the best community interests, a specific legal question is presented. It is our position that NBC has certain property rights in its network programs and that these property rights are violated if our programs are picked up, without our consent, by a community antenna system; just as they would be violated if our programs were picked up without consent by a broadcast station. We have not granted consent to the pickup of our programs by a community antenna system.

It was on this basis that we felt that one of the effective ways of dealing with the novel problems presented by the development of community antenna systems was for the FCC to condition grants of microwave facilities serving such systems by requiring consent of any station whose signals they pick up. Since our contracts with our affiliates provide that they may not agree to the use by others of our programs without our consent, under our proposal, the pickup of an NBC network program by a CATV system would require as a matter of FCC regulation both the consent of the affiliated station and that of the network, which we believe is proper. As you may know, the issue of a station's property right in its signal is now being litigated in a test case to obtain an adjudication on the legal issue involved.

You may also be interested in the status of Federal legislation regarding the control of community antenna systems.

The Federal Communications Commission has recommended to the Congress adoption of legislation which would require CATV systems to obtain the consent of the originating station for the redistribution of programs broadcast by such station; and in addition, would require the CATV system to carry the programs of television stations operating in communities where the CATV system had subscribers. These proposals were introduced by Senator MAGNUSON in S. 1801. Later, Senators Moss and MURRAY introduced S. 1886 which incorporated the FCC proposals, and also a plan for placing community antenna systems under the FCC's jurisdiction. Senator MONRONEY also introduced legislation which would establish jurisdiction of the Commission over community antenna systems.

These various bills were assigned to the Subcommittee on Communications, and after hearings, Senator PASTORE submitted to the Senate a report to accompany the original bill, S. 2653. This bill, which has the endorsement of the Senate Interstate and Foreign Commerce Committee, would require community antenna systems to be licensed by the FCC, and would subject them to the requirements of specified sections of the Communications Act.

The committee's report, page 11, stated:

"In order to prevent danger to an orderly development of a nationwide competitive television system and to assure the public of local television outlets wherever it is feasible, your committee, in the legislation reported herein, has specifically designed three significant criteria:

"1. That the Commission in awarding licenses to CATV systems must give due regard to facilitating the continued operation of a television station which is providing the only locally originating television program service;

"2. That the Commission is authorized to adopt appropriate rules in order to avoid duplication of programs broadcast by a television station which is assigned to a community in which a community antenna television system redistributes the signal of another or distant television station; and

"3. Permits the Federal Communications Commission to decide upon requests of a local television station whether a community antenna television system operating in the same area with the local television station should carry the local television station's programs."

I have written this letter for the purpose of placing before you background facts and considerations of policy in the hope that this material may be helpful to you in arriving at your judgment on the matter. The decision you must make is a difficult one and I am sure you will arrive at a conclusion which will be in the best interests of the people in your community.

Yours sincerely,

DAVID C. ADAMS.

NATIONAL ASSOCIATION OF BROADCASTERS,
Washington, D.C., April 27, 1960.

Hon. GALE MCGEE,
U.S. Senate,
Washintgon, D.C.

DEAR SENATOR MCGEE: The Senate Committee on Interstate and Foreign Commerce has reported out a committee bill, S. 2653, to amend the Communications Act so as to establish jurisdiction in the FCC over community antenna (CATV) systems. As you may know, such systems are designed to pick up television broadcast signals from distant stations and redistribute the same via cables to numerous subscribers throughout a community.

While these systems often do provide a service in bringing television to communities otherwise without TV, there are several public interest considerations which, in our view, make some regulation desirable. Committee hearings disclosed that by "piping in" the programing of distant stations, such systems have on occasion adversely affected the existence or operation of a local television broadcast service. The station was unable to garner either viewers or advertisers sufficiently to insure economic survival. Consequently, the community as a whole is denied the advantages of a full, free television broadcast service, and especially those rural areas which are outside the reach of the CATV service because of economic reasons.

The bill does not meet all of the objectives of the broadcasting industry, inasmuch as it does not require that the consent of the originating station be obtained by a CATV system which uses the program material broadcast and makes a charge for same to its subscribers. Nevertheless, at its last regular meeting on March 9, the Television Board of the NAB voiced its support of S. 2653, believing that the amendment is desirable in that it would help to effect one of the primary aims of the Commission: that is, to assure that every community will have, insofar as practicable, at least one full, free television broadcast service, with its attendant local community expression.

We appreciate your consideration of this proposal, and trust you will let us know if you have any questions or comments.

Sincerely,

THAD BROWN.

FEE TELEVISION

Mr. MCGEE. Mr. President, I ask unanimous consent to have printed at this point in the RECORD an article entitled "Television—The Future: Fee Vee," which was printed in Time magazine for April 25, 1960.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Time magazine, Apr. 25, 1960]

TELEVISION—THE FUTURES FEE-VEE

Pay TV will get a thorough test in the United States—and soon. The fact seemed inevitable last week, as another free but dismal TV season was running out, and more and more plans were firming up for what the phrasemakers in the trade are beginning to call fee-vee. Items:

Heartened by reports from the Toronto suburb of Etobicoke, where International Telemeter Corp. is trying to toll television (Time, Mar. 14) in competition with three regular channels from Buffalo and two from Toronto, Chicago's Zenith Radio Corp., in association with RKO General, is asking the FCC for permission to make a similar test in Hartford.

Oklahoma Entrepreneur Henry Griffing, who rushed wired fee-vee to Bartlesville 3 years ago, and failed, is ready to try again—this time with a network spread over three dozen towns in the Southwest.

West coast baseball teams, which have blacked out local broadcasts of home games, are anxiously awaiting a crack at pay TV.

Telemeter (a subsidiary of Paramount Pictures) is already planning another test, this time in the suburbs of Manhattan, and is preparing such packages as Gian Carlo

Menotti's "The Medium" on both film and tape. In charge: newly appointed Executive Producer Jean Dalrymple, Broadway veteran and director of the theater wing of New York's City Center.

FUTURE PROBLEMS

Toll TV's opponents, who tried to convince the FCC that even a test of pay TV must be avoided at all costs, could do little about Etobicoke. The Canadian town is not only outside FCC jurisdiction, but the Telemeter closed-circuit system uses leased cables, not the public air waves. Affirmative results are piling up. Of 13,000 homes that are potential fee-vee customers, close to 4,000 have subscribed (initial fee: $5). New installations of the coin boxes—they fit any standard TV set—are going on at the rate of 100 a day. With a choice of three pay channels, stay-at-home patrons are happily shelling out for first-run movies (a sampling: "A Summer Place," "The Gazebo," "Sink the Bismarck") at the rate of $1 for a 2-hour show every evening for the family (the cost of one ticket to a downtown movie). Children can chip in nickels and dimes toward the cost of their favorite shows, buy the likes of "Tom Thumb" and "Gulliver's Travels" for a quarter on Sunday afternoons. Father is staying home for sports events he cannot tune in free, and during the day Telemeter broadcasts music free.

"We're delighted," says one Canadian telemeter user, H. W. Wilcox. "We used to go to the movies about twice a year. Now we go twice a week and have all the comforts of home." Rare is the Etobicoke citizen who disagrees. Yet, despite the obvious novelty of the electronic gimmick, local movie houses so far report no drop in attendance. And no one yet has reported a wayward child's spending too much money for shows the family cannot afford—a favorite prediction of pay TV opponents.

There are problems ahead, admits Eugene Fitzgibbons, Telemeter's Canadian boss. The cost of collecting the cash from coin boxes in subscribers' homes is still uncertain; the reliability of the coin boxes themselves is still unproven. No one is yet sure of the public's long-run taste in home movies or sports shows, nor can anyone be certain how business will fall off when families move out of town for the summer.

DISMAL PREDICTION

U.S. experiments face similar uncertainties. The Hartford test, for example, will transmit its pictures over the air rather than by cable, requiring a complicated unscrambling device in each home. Instead of Telemeter's pay-as-you-see plan, there may be a charge account for home entertainment, a tempting feature that could cause trouble. Above all will programs freed from sponsor and ad agency control be better than the offerings of sponsor-supported networks? NBC President Robert Sarnoff argues that they will not, that pay TV will have to track down the mass audience just as the commercial networks do now, and in the end the home-bought product will be indistinguishable from the network's present offering.

Not so, counter pay-TV partisans: the toll system will allow quality shows to find their own markets, should be able to cover for its paying armchair audiences many topnotch attractions that have been inaccessible to TV so far—opera at the Met, Broadway shows, first-run movies. Sarnoff's dismal perdiction, say pay TV's supporters, merely represents a part of the networks' long lobbying against pay TV. Pay proponents have complained to the FCC that the networks have editorialized against them on the air, formulated a phony grassroots campaign to impress Congress, taunted kids with the prediction that Rin Tin Tin would disappear if pay TV were authorized.

But even as they are fighting, the networks are facing up to the probability that they will lose. In a statement implying that pay TV would corrupt the public interest for selfish purposes, CBS President Frank Stanton has nevertheless assured stockholders that if the worst happened, CBS is prepared to take the pay way too. And the trade nurtures the rumor that NBC has a toll system in the works. "If the pay system develops," said President Sarnoff early this year, "free television, as we know it, would face disintegration, and we would have no alternative but to join the coin collectors of the future."

SNEAKING IN

Speaking for the "coin collectors," Telemeter's West Coast spokesman, Paul MacNamara, is only too happy to agree. "If the networks want to survive," says he, "they're going to have to find a way to introduce material of high quality. Maybe we'll do the public a service by forcing them to do this. They will never do it voluntarily." But though he is convinced that pay TV is coming soon, MacNamara does not expect to see it on a national scale in the near future. It will sneak in, he feels, from the suburbs. "Nobody just comes in and says, 'I'm going to wire up New York or Los Angeles.' There isn't that much money in the world. You get at the big cities through satellites. If you want Los Angeles, you wire up Santa Monica, Pasadena, Long Beach, Anaheim. Then you move in gradually from there."

Actually, the coin collectors and the commercial pluggers may well coexist. Says Producer Dalrymple: "I think pay TV is wonderful, but I don't think it will take the place of TV as we know it. It will be an addition to what we have."

EFFECT OF TELEVISION PROGRAMS

Mr. McGEE. Mr. President, this morning there was published in the Washington Post an article about a doctor who explains a stabbing by a 13-year-old boy of an elderly woman; the doctor blames it on television and television programing. Such programs may have gone too far, according to the doctor's analysis, which is provocative, and I believe should be given due consideration by anyone who honestly is trying to probe the depths of this troublesome question today. Therefore, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 29, 1960]

DOCTOR CITES TV HABITS OF BOY HELD IN STABBING

A doctor who examined the 13-year-old Bethesda boy held for beating and stabbing a neighborhood widow Wednesday said yesterday there was a direct connection between the assault and the programs the youth watches on television.

The victim, Emily B. Hardestry, 60, of 5312 Allandale Road, remained in critical condition at Suburban Hospital with chest wounds from a 4-inch dagger and head injuries from blows with a mallet.

The doctor was one of two who questioned the youth before Montgomery County Juvenile Court Judge Alfred D. Noyes ordered the boy sent to a Maryland hospital for temporary detention and psychiatric tests. A hearing will follow.

The doctor said: "I strongly recommend that parents supervise what their children watch on television. Violence leads to violence, even if it is subconscious."

Asked then if there was a direct connection between the boy's TV habits and his crime, the doctor replied, "Yes."

He said questioning revealed the youth had some favorite detective programs.

Yesterday was a day of intense inquiry into the boy's motives.

He was variously described as a "good boy" and a "good student" from a "good family."

The doctor said: "He is a typical boy in that he goes to church but doesn't learn morality."

Judge Noyes said he heard nothing during the detention hearing to indicate the boy had any history of mental disturbance or any acute problems.

He was calm and composed, the judge stated, and showed no contrition.

Capt. Kenneth Watkins, chief of Montgomery detectives, also said the boy showed no remorse. He gave no reason for his acts to police. He has no police record.

Watkins theorized that fear of being caught housebreaking impelled the boy to hide behind the front door as Mrs. Hardesty entered, to knock her to the floor with two blows of a mallet he had laid on a nearby table and then to stab her repeatedly with a dagger he had taken from the extensive collection of Mrs. Hardesty's late husband.

Mrs. Hardesty was a friend of the boy and his family. He had been in her home before and had done small chores for her. His parents had a key to her home, police reported.

PROJECT ECHO SATELLITE—ADDRESS BY SENATOR JOHNSON OF TEXAS

Mr. DODD. Mr. President, a few days ago the distinguished majority leader [Mr. JOHNSON], chairman of the Committee on Aeronautical and Space Sciences, made a very important speech before the Junior Chamber of Commerce in Houston, Tex. In this speech, I believe Senator JOHNSON of Texas voiced the sentiments of all the members of the Space Committee when he said:

> During the last 2 months we have achieved many "firsts," and we can all be justly proud. We cannot, however, afford to coast or simply brag about what we have done. There is still much to be done.

The majority leader then went on to issue a "declaration of peace," urging all nations to join with America in using the peaceful development of space as a catalyst toward mutual understanding and cooperation.

To demonstrate the sincerity of our desire to foster international cooperation in the peaceful uses of outer space, the majority leader urged the Administrator of the National Aeronautics and Space Administration to notify the entire world as quickly as possible of our intention to launch a passive communications satellite on May 5, 1960.

This suggestion has been followed and the announcement of the launching of the Project Echo satellite was issued last Thursday.

Mr. President, I ask unanimous consent to have printed in the RECORD the address made by the majority leader at Houston on April 21, 1960, as well as the exchange of correspondence between him and Dr. Glennan, with respect to notifying the world promptly of the date of launching the Project Echo satellite.

There being no objection, the address and correspondence were ordered to be printed in the RECORD, as follows:

A DECLARATION OF PEACE

(Address by Senator LYNDON B. JOHNSON, at the Junior Chamber of Commerce statewide convention, Houston, Tex., April 21, 1960)

Today is a special day. On the 21st of April 1836, free men under the leadership of Sam Houston gave evidence of their belief of things beyond themselves by overcoming odds of great proportion. These men proved that idealistic goals can be attained only when we challenge, and challenge we must.

Today is a special day for me. I have looked forward to this occasion, because associating with the youth of America always imparts a renewed sense of pride and faith in the future of our country.

Your eagerness, your dedication, and your strength—your beliefs, your courage, and your convictions—are the true sinews of our country.

Most of you are at the beginning of your careers. The things you and the other youth of America do will have great and lasting impact upon the course of world events.

THRESHOLD OF A NEW AGE

It is because of this that I have chosen the subject I want to talk to you about. You stand on the threshold of a new age. It is called the space age.

The title is glamorous. But, as most things glamorous are quite often misunderstood, I thought I might discuss with you some of my beliefs as to the meaning of the space age.

History may record the advent of the space age as late as 1957 when the Russians hurled *sputnik* into orbit. Actually it has been in the minds of men for generations as a cherished dream and hope.

Therefore, it was only natural that we in America were rightfully chagrined when sputnik beat us into space. We had reason to be concerned.

It was a difficult period. There were those among us who knew that America's technology and talent gave us ample reason to believe we should have been first. We could have been.

Many of us sought prompt and urgent action, but somehow early decisions were not made.

That is past history. Mistakes are only valuable in retrospect.

ACHIEVED MANY FIRSTS

Our progress since then has not been without disappointments—but the seeds we planted then are now bearing fruit. During the last 2 months we have achieved many "firsts," and we can all be justly proud.

We cannot, however, afford to coast or simply brag about what we have done. There is still much to be done.

NOT THE TIME TO BOAST

We can still expect the Soviets with their present greater rocket thrust to attempt more spectacular feats—bigger objects in orbit—placing a man in space or further exploration in the vicinity of the moon. Therefore, now is not the time to boast or be complacent; but rather, with quiet and mature deliberation—take the necessary steps toward further and greater achievements.

On March 11 we dispatched our sun satellite Pioneer V to the remote regions of outer space. It is now more than 6 million miles from earth, and is setting long distance communication records with the passage of each mile.

On April 1 American scientists achieved another laudable accomplishment—one which crossed another threshold in the conquest of space. I refer to the television infrared weather observation satellite Tiros.

Today, at this moment, it is circling man's planet every 99 minutes at a speed of 18,000 miles per hour—crossing in less than 15 minutes the distance that Columbus took more than 2 months to conquer. Its TV lenses are recording weather data and sending its photographs back to earth from over 450 miles in space.

On April 13 the first operational navigation satellite called Transit was successfully orbited.

And on May 5 of this year we shall attempt to orbit a communications satellite called Echo.

GREAT PROMISE FOR MANKIND

These things—today's facts—yesterday's science fiction—are astounding enough in themselves, but they foretell far greater promise for mankind—if mankind will use them for constructive purposes.

Tiros, the weather observation satellite, means that for the first time man can record the ancient earth's surface—behold his home—visualize the globe as it really is.

For the first time man may be able to do something about the weather with all its attendant benefits for the protection of crops and property. Perhaps in the future man even may be able to change the course of hurricanes, provide rain to arid and parched regions—materially increase the food production of the world—and even talk more intelligently about the weather.

This alone—we are told—would more than pay the cost of all space explorations to come.

Transit, the navigation satellite, holds the promise of a revolutionary land, sea, and air navigation system. The ultimate goal is instantaneous and accurate positioning through the use of inexpensive radio receivers.

Echo, the communication satellite, if successful—and if it isn't we will keep after it until it is—will, when fully developed, completely revolutionize the methods of talking over great distances. This aluminum sphere, 100 feet in diameter, is designed to allow radio waves to be reflected or bounced from its surface back to earth—thus spanning heretofore impossible distances.

Project Echo is a step in a long-range program to develop the use of satellites to provide truly global communications.

Television, developed in your lifetime, which still today in all its glory provides only limited coverage to certain areas, can be expected to benefit greatly from the Echo satellite.

The day will come when one man—one program—can be seen, and heard—simultaneously in every living room of the world.

The eyes and ears of radio and television upon the earth will foster, God willing, understanding not suspicion, cooperation not frightened isolation, free exchange of knowledge not mutation.

SPACE AGE INVOLVES VISION

While this involves vision, it is far from visionary.

Just 2 years ago when the Congress passed the Space Act, I couldn't help but think that many Americans, including some Members of Congress, thought we were dealing with something more fitting a Buck Rogers comic strip than reality.

There were, and still are, those who called certain accomplishments of our space program "stunts." But when one looks closely—with vision and understanding—one realizes that a whole new environment is opening.

In 1807 Fulton presented the steamboat. Some called it "Fulton's folly." In 1899 Marconi sent the first wireless message. In 1903 the Wright brothers launched the air age. Each was met by skeptics. Those with vision knew better.

If you had seen and touched, as I have, some of the scientific instruments now circling the earth—you couldn't help but recognize the new arts involved. You couldn't help but share with those who dreamed, planned, produced, and accomplished.

But never mind: your generation of Americans will share these things—and greater things than these.

The steamboat, the wireless, and the airplane each opened the doors of man's environment and expanded his way of life. Each has been utilized for good and evil, peace and war, in consonance with man's character. So, of course, can space technology.

The military aspects should be obvious. The military value of space can be summed up basically by repeating the old adage that "he who commands the high ground commands the battle."

IMPACT ON MILITARY STRATEGY

Space already has had a tremendous impact on long-accepted doctrines of military strategy. The intercontinental ballistic missile—said once by some to be impossible—now exists. Potentials for military use have been vividly illustrated. Future uses are clearly predictable.

As long as there is a need for military strength, America must use all portions of its technology for that strength. But today I do not intend to dwell on things military.

TRUE HOPE FOR TANGIBLE PEACE

It is the much greater promise for mankind that I want to emphasize—to you and to all American youth—for it contains within it the germ of a growing seed—a true hope for tangible peace.

On July 29, 1958, the Congress of the United States, after due deliberation, passed the Space Act of 1958. In a single sentence the declaration of policy and purpose of the Space Act is described. It says:

"The Congress hereby declares that it is the policy of the United States that activities in space should be devoted to peaceful purposes for the benefit of all mankind.

Think seriously about these words. Did such a declaration accompany the steamboat, the wireless, or the airplane?

To my knowledge, no other nation in history has ever dared give birth to such declaration in the fields of technology.

This is a declaration of peace. It means what it says. If other nations will join with America and live by this declaration, as we are, good must result.

That is why we have made available to the world the more than 6,000 Tiros photographs—covering 60 percent of the earth's surface. That is why when I first heard that the communication satellite Echo was planned to be launched next month—and that our Government intended to announce 1 week in advance the specific launch date in order that the world could participate—I immediately suggested that the public notice and pertinent scientific details be released 2 weeks prior to launching. This would be to allow the world's scientific community more time to prepare adequately for tracking and communicating with the satellite—thereby increasing both its scientific value and its effectiveness as a step toward genuine international cooperation.

In answer to my suggestion, Dr. Glennan, head of our national space agency replied, saying:

"My colleagues and I are in agreement that your suggestion is an excellent one.

"In line with your suggestion, we are extending the time of announcement from 1 week prior to launch to 2 weeks. We will make this announcement in Washington through our normal press channels on Thursday, the 21st of April."

As a result—today, as I speak to you, the announcement is being made here and in Washington—telling the world of America's intent.

PEACE BASED UPON RESPECT

Basically to me there are only two fundamental conditions upon which mankind can achieve peace. Both are predicated upon respect.

The first is based on that respect akin to fear which is caused by a balance between weapons. The other is that higher and more enduring respect which stems from mutual understanding and cooperation—founded upon that spiritual strength which recognizes the dignity and value of man.

Mankind, to date, has never achieved either condition except for brief and all too fleeting moments in history. Space alone, of course, cannot accomplish this—but it does promise a means—uncluttered by past traditions and prejudices—which could well be the catalyst. And now is the time to act.

We were not the first in space, but we were the first to view space as a tangible means toward peace—our declaration of peace.

I believe we have learned the lesson that the struggle for men's minds includes many things. Our belief in the democratic way of life and our economic system must be supported by tangible accomplishments, both material and spiritual, in order that those nations still uncommitted will have not only the evidence of belief in our system but the evidence of what this belief can produce.

America gave the Declaration of Independence to the world. It was a new challenge both in idea and concept. It was founded on sound beliefs and spiritual courage.

NEW CHALLENGE IN IDEA AND CONCEPT

Now in our time we have a powerful new challenge in idea and concept—the declaration of peace.

The Soviets say they want peace. Well, the proof of the pudding is in the eating. Let's challenge them to do something about it.

Will the Soviets join us—

1. In developing space for peaceful purposes?

2. In a mutual attack on cancer and other crippling diseases?

3. In providing adequate foodstuffs for the millions of starving peoples throughout the world?

4. In solving the mysteries of the ocean floor?

5. In opening the communications barriers of the world on a free and equitable basis?

6. In developing the arid regions of the earth and providing life-giving water for the drought stricken?

7. In harnessing the atom for peaceful purposes?

8. In establishing a nuclear test ban in which all can have faith and confidence?

9. In nurturing the dignity and honor of man so that he can exercise his God-given right to self-expression?

I invite the Russian people to accept these challenges as major steps forward in the interest of peace.

I invite the Communists to demonstrate their good faith by actions.

I invite them to join the scientists of the Western World in opening new vistas of understanding.

If the Soviets decline these invitations, the world can judge for itself the worth of Communist good faith.

If the Soviets accept the invitations, the results will speak for themselves.

When people work together to face challenges like these, they tend to lose their suspicion of each other. They become absorbed in worthwhile tasks and then warfare as an instrument of national policy would fade from the picture.

For those who really desire peace, these are the true challenges of the future.

APRIL 15, 1960.

Hon. T. KEITH GLENNAN,
Administrator, National Aeronautics and Space Administration, Washington, D.C.

DEAR DR. GLENNAN: I greatly appreciate your informing me that May 5, 1960, is the specific date on which you intend to launch into orbit the first passive communications satellite, which will soon be more popularly known as Project Echo.

You have stated that you intend to announce this date publicly 1 week prior to launch, so that scientists throughout the world will be able to make preparations to participate in experiments with the Echo satellite.

I want you to know that I consider this advance notice to the world to be a sound and desirable step. Admittedly, there is always the possibility that the launching may have to be postponed for technical reasons, or that the 100-foot-diameter satellite may not go into orbit. Nevertheless, there can be no better demonstration of the sincerity of our desire to foster international cooperation in the peaceful uses of outer space than to notify the world in advance of the new star in the sky they will soon be seeing and using for the benefit of all.

As you may know, when Dr. Pickering testified before the NASA Authorization Subcommittee of this committee on March 29, he stated that the Goldstone tracking antenna was engaged in getting ready for the Echo program, "which will be launched within a month so so." These hearings will be published next week and will, in effect, pinpoint early May as the probable launching date for Project Echo.

I believe we should go further than this, however, and actually announce the specific launching date and pertinent scientific details next week, rather than wait until 1 week prior to launch. This would allow the world's scientific community more time adequately to prepare for tracking and communicating with the satellite, thereby increasing both its scientific value and its effectiveness as a step toward genuine international cooperation.

I would appreciate your considering this earlier release of the Project Echo launch date and informing me whether you consider such a change in your plans to be feasible.

Sincerely yours,

LYNDON B. JOHNSON,
Chairman.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION,
April 18, 1960.

The Honorable LYNDON B. JOHNSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR JOHNSON: Your letter of April 15 expresses, once again, your sincere interest in the effective development of this Nation's capabilities in the exploration and utilization of outer space for peaceful purposes for the benefit of all mankind. We share, I know, a strong desire that the activities of NASA be international in scope with wide participation by members of the scientific communities in our own and other nations. Most of our experiments lend themselves to such participation. A few seem particularly susceptible to widespread cooperation with a minimum of formal arrangements. In this category, we find the passive communication satellite, Project Echo, which we expect to launch early in May.

As you know, in December 1959, we announced that we would fly this satellite early in the spring of 1960. A rather complete description of the experiment was provided in the expectation that scientists the world over might be interested in developing experiments which would make use of Echo as a reflector of radio waves. We had planned to announce the exact date not more than 1 week in advance of the launch. In your letter you suggest that this launch date be announced without further delay in the belief that such an action would result in greater participation by the international scientific community.

My colleagues and I are in agreement that your suggestion is an excellent one. Subject to the possibility of brief postponements for technical reasons, it is our intent to launch the first passive communication satellite, the 100-foot sphere known as Project Echo on Thursday, May 5, from Cape Canaveral, Fla.

In line with your suggestion we are extending the time of announcement from 1 week prior to launch to 2 weeks. We will make this announcement in Washington through our normal press channels on Thursday, April 21.

I want to take this opportunity to express to you my sincere appreciation for the manner in which you have supported our space program and for the encouragement you have given to me personally. Your suggestion is indicative of the interest, continuing support and keen insight into the mission of the national space program which we of the NASA have learned to expect from the chairman of the Senate Space Committee. Our program is a sound one requiring the very best of all of us who are engaged in carrying out the mandate contained in the Space Act of 1958. Our success will depend to a very considerable extent on the understanding and continued interest of the Congress. To know of your vital concern in this matter is encouraging.

All good wishes.

Sincerely,

T. KEITH GLENNAN,
Administrator.

FISHTRAPS IN ALASKAN WATERS

Mr. GRUENING. Mr. President, on April 19 my able colleague, the senior Senator from Alaska [Mr. BARTLETT], made an excellent, comprehensive, and thoroughly documented statement, occupying some six pages in the CONGRESSIONAL RECORD, dealing with the subject of fishtraps in Alaskan waters. He was moved to do this because of a publication in the Federal Register on April 9, by the Secretary of the Interior, concerning the regulations which the Secretary announced he was issuing relating to Indian fishing in Alaska.

As my colleague demonstrated, with ample detail, there is no basis for the assertion of such rights, and that the action of the Secretary of the Interior is in conflict with the constitution of Alaska, contrary to Alaska law which bans fishtraps, contrary to the repeatedly expressed wishes of the people of Alaska, including the Indians themselves, and contrary to the Statehood Act passed by the 85th Congress. It was an attempted usurpation by a Federal official of authority vested in the State of Alaska.

I shall not repeat my colleague's arguments, because they were amply set forth by him, but I do fully associate myself with them, and commend him highly, not merely for his exposition of the facts, but for the excellence of his presentation.

In this connection, I ask unanimous consent to insert in the RECORD at the conclusion of my remarks three pertinent documents: One, a letter of protest to the Secretary of the Interior against issuing these regulations by the Alaska Department of Fish and Game, signed by

its eight members; a letter from the Governor of Alaska to the Secretary of the Interior, making a similar protest; and an article from the front page of the Alaska Daily Empire, published in Juneau, entitled "Republicans Protest Fish Regulations." I ask that they be included at this point in my remarks.

There being no objection, the letters and article were ordered to be printed in the RECORD, as follows:

ALASKA DEPARTMENT OF FISH AND GAME,
Juneau, Alaska, April 22, 1960.

The Honorable FRED A. SEATON,
Secretary of the Interior, U.S. Department of the Interior, Washington, D.C.

DEAR MR. SEATON: The Alaska Board of Fish and Game hereby issues a strong protest against all and each individual regulation of the Indian Fishing Regulations in Alaska as proposed by the Secretary of Interior on April 6, 1960. Not only are these regulations contrary to the intent of the constitution of the State of Alaska and the Constitution of the United States of America but they, if promulgated, will make a giant stride in introducing flagrant segregation in a presently well integrated State. Not only do the regulations set off Indians differently from whites, but even separate villages of natives apart.

However, the board wishes to protect these regulations particularly from the standpoint of the management of the fisheries resource. The State of Alaska was given control over its fish and game on January 1, 1960. The board of fish and game is the responsible agency of the State for promulgating the necessary regulations to properly manage these resources. Such regulations as the Secretary of Interior proposes and maintains he has the power to do could completely negate whatever successful program the State could set up.

Parts 88.2 and 88.3 pertain to the 21 native trapsites and set aside large water areas. For what reason are these large areas described, when previously the traps were described by site only? Is it possible the Secretary of Interior wishes to maintain areas in which he can permit more traps, once the southeastern Alaska salmon runs are built up to their former abundance? Surely the Secretary must realize that these open trapsites make the task of managing the southeastern fisheries much more difficult. Our regulations have been based entirely upon the use of mobile gear—purse seines; therefore, the use of numbers of the effective stationary fishcatcher, the trap, will render our regulations less effective. In addition, it will throw an additional burden upon our already undermanned staff, both from the management and enforcement standpoint.

Part 88.4 opens the Karluk River fishery only to the natives of the village of Karluk, at present containing about 25 fishermen. In the past this fishery has been open to all U.S. nationals, both white and native alike. The people from the other native villages of the Kodiak area all depend upon this fishery for part of their livelihood. The total number of fishermen participating in this single most important fishery of the Kodiak area usually number from 400 to 500. The catch will often exceed 1 million fish. It is not possible for the Karluk fishermen to adequately harvest this run in normal years. As you well know the United States, under terms of the International North Pacific Treaty, must demonstrate to the Japanese and Canadians that we are fully utilizing all our salmon runs. Surely it would be disastrous to fail to do so in a fishery as important and well known as Karluk.

Part 88.7 permits Indians, Eskimos, and Aleuts to take salmon and other species of fish for personal use in all waters of Alaska except where the State has a complete prohibition on all fishing. This proposed regulation is directly opposed to former U.S. Fish and Wildlife Service regulations which were in effect in Alaska for many years. In essence, it means the State cannot set aside either special areas or species for sport fishing only, as is the practice in all other States and as was done by the Fish and Wildlife Service in Alaska when they maintained jurisdiction over the fish and game. The State regulations also set aside certain areas and species to sport fishing only, especially in the heavily populated areas. Can you imagine the disastrous results if a group of natives decided they wished to personally fish for rainbow trout with set nets in some well-fished stream on the road system near Anchorage, or if five or six set nets were placed in the Anchor River near Homer to take king salmon and steelhead?

Part 88.8 is perhaps the most flagrant abuse of State control of fish and game contained within your proposed regulations. Within these regulations, you propose to maintain the right to modify the regulations however and whenever you may wish. The natives of Alaska must abide by these regulations or those of the State, whichever are least restrictive to the natives' fishing. We can only assume from this that you wish to retain the privilege of regulating means, methods, seasons, and fishing time.

The native of Alaska probably composes about one-half of the total resident fishing effort. In order to effectively manage any fishery, only one agency can have the responsibility. This and the other proposed regulation will have the effect of maintaining two fisheries in Alaska, one for natives and one for other groups, fishing the same gear and waters. All that can result is complete chaos.

Sincerely,

Alaska Board of Fish and Game: Richard Janson, Jr., Chairman; Arnold Brower; Oscar Dyson; Arthur H. Hayr; Robert A. Martin; Dr. Howard G. Romig; Roy Selfridge; ——— ———.

STATE OF ALASKA,
OFFICE OF THE GOVERNOR,
Juneau, April 14, 1960.

Hon. FRED A. SEATON,
Secretary of the Interior,
Washington, D.C.

DEAR MR. SECRETARY: I have your letter of April 6 which transmitted proposed regulations governing commercial fishing in 1960 by native Alaskans and native communities.

It must go without saying that the State of Alaska takes vigorous exception to any proposal whereby its citizenry is sought to be divided on racial considerations and whereby its fishery, long depleted by Federal mismanagement, would to a considerable extent remain under Federal control.

Alaska's purpose in the elimination of fishtraps is the rehabilitation of its once great fishery. Your Department's proposed regulations offer instead the prospect of additional traps to the detriment of any realistic conservation program.

Sincerely,

WILLIAM A. EGAN,
Governor.

[From the Alaska Daily Empire]

REPUBLICANS PROTEST FISH REGULATIONS

The Juneau Republican District Committee has urged the Interior Department to rescind its proposed 1960 Indian fishing regulations on grounds that the far-reaching proposal would cause discrimination and dissent.

The GOP committee sent telegrams to Interior Secretary Fred A. Seaton and President Eisenhower. Letters were sent to Vice President NIXON, the Republican National Committee, and Republican leaders in Alaska.

The text of the message said:

"Alaska's Fifth Legislative District Republican Committee, considerably disturbed at most recent interpretation of Alaska Statehood Act, section 4, which extends native fishing rights beyond 1959 ruling covering only traps operated by three villages.

"Our committee unanimously requests your department reconsider and rescind this action as such thinking can only divide Alaskans against each other, create discrimination and dissent, establish unequal privileges for one group."

It was signed by Clayton L. Polley, chairman of the committee. The committee said it was concerned with those portions of the proposed Interior Department regulations which would apparently exempt persons of Indian or native blood from the State fish and game regulations at the option of the Secretary of Interior in some areas and for some purposes. It also objected to closing the Karluk fishery to all persons not having Indian blood.

Earlier, Gov. William A. Egan, and former Attorney General John Rader had raised strong protests to the same provisions of the regulations. The State also has protested the operation of three native owned fishtraps in southeastern Alaska this season.

THE LATE DR. GEORGE GAVARIS

Mr. DIRKSEN. Mr. President, in the March–April 1960 issue of the magazine of the Greek American Progressive Association there was a eulogy to the late George Gavaris, of Chicago, Ill., the honorary supreme president of the Greek American Progressive Association, and its supreme president for a 12-year period. I wish to extend my deepest sympathy to Mrs. George Gavaris, to the members of his family, and to the Greek American Progressive Associations throughout the country.

I have known of the fine contributions Dr. Gavaris had made in his profession, and also to the many outstanding civic and charitable organizations in this country and to the Greek American communities throughout the United States and Greece. I ask unanimous consent that the eulogy to Dr. George Gavaris be printed at this point in the RECORD.

There being no objection, the eulogy was ordered to be printed in the RECORD, as follows:

EULOGY TO DR. GEORGE GAVARIS

The Americans of Greek descent felt a great loss in the death of Dr. George Gavaris, a past supreme president of the Greek American Progressive Association for a 12-year period and the honorary supreme president of the Greek American Progressive Association at the time of his death in Chicago, Ill.

Dr. Gavaris lead a fruitful life in his profession as a doctor and a dedicated life for all Americans of Greek descent. The deceased was an excellent scholar in the Greek letters and a master in the use of the Greek language. He was a great advocate of the Greek Orthodox Church in this country and was well versed in the orthodox teachings.

The decedent, George Gavaris, espoused the Greek culture, which was basic to world civilization.

Dr. Gavaris was born in Sparta, Greece, and brought with him to the United States his great love for the Greek language and

Greek culture. He began to espouse these attributes through the great organization known as the Greek American Progressive Association for which he served as supreme president for a 12-year period.

Dr. Gavaris was the son of Dr. Brokopios Gavaris, who practiced medicine in Sparta and Athens, Greece.

His mother, Paraskeve Kavaris, was the descendent of the great family Matala, which played such a prominent role in the independence of Greece in 1891.

The late Dr. Gavaris studied medicine in Athens and participated in the Balkan wars, after which he continued his advanced studies in Berlin. From there he migrated to the United States and made Chicago, Ill., his home. He returned to Berlin for further advance studies in medicine and from 1934 to 1937, he completed his advance studies at Vienna, Austria.

In 1946 he married Nora Mariotou, who was born in Chicago and attended colleges in Denver, Colo., and in Greece. She also became very active in the Greek American Progressive Association.

The character of this Greek-American doctor and civic leader will remain as a symbol to all members of the Greek American Progressive Association. He served the Greek-American communities in the United States with dignity and excellence.

FOOD—TO WIN THE PEACE

Mr. WILEY. Mr. President, it has been estimated that about one-half of the world's population of 2.7 billion people are undernourished and that almost one-third of the people of the world live on inadequate diets. Over the years the nations of the world, from time to time, have shared their food resources with needy people in order to supplement inadequate diets, stave off starvation in times of crises, natural disaster, or emergencies, and for other purposes.

Motivated by the humanitarian concept of sharing—which has traditionally been an instinctive and creative trait of the American people—and necessitated by the recognized need for a better program to utilize our mountainous stockpiles of surplus foodstuffs, our Nation has engaged in many programs designed to turn our food resources into economic assets instead of liabilities; to feed hungry people; and to give support to our international economic policies.

To assist in carrying out these objectives, we recall that in January of last year President Eisenhower advanced a food-for-peace program. I was pleased to recently learn that the Department of Agriculture is currently conducting an overall review of our export policies, programs, and activities as a basis for further expansion of Government-financed exports under this food-for-peace concept.

Earlier in this session of Congress, it may be recalled that I put forth recommendations for the establishment of a more effective national food policy in order to feed our hungry people at home, as well as to support our national policies abroad through the humanitarian and strategic method of helping people in less-developed countries who are subsisting on inadequate and starvation diets. As the leader of the free world, I believe the United States has a responsibility of attempting to assure that nations less fortunate—less rich in land, resources, and technical know-how for production—share, as much as possible, in the benefits of our modern civilization.

One of the very finest of programs engaged in sending food and tool packages to the hungry overseas is that conducted by the private, Government-approved, international relief agency known as CARE. Since 1946, this humanitarian organization has sent over $342 million worth of supplies overseas—92 percent consisting of food, a great part of which has been agricultural surplus. Since the early 1950's, CARE has also sent $13½ million worth of tools for the purpose of helping others to help themselves—ranging from such diversified items as plows, hoes, rakes, and shovels to sewing machines, school kits, and midwife kits. Headed by its executive director, Mr. Richard Reuter, CARE emphasizes help to the underdeveloped areas of the world—including 26 areas in Europe, Asia, Latin America, and the Middle East.

On a recent occasion President Eisenhower lauded CARE's activities; stating that—among the many efforts designed to strengthen the foundations of peace—CARE occupies an honored place through bringing help and hope to millions in ravaged lands around the world.

I was extremely gratified to recently learn from the energetic and personable public relations director of CARE, Kate Alfriend, that my own State of Wisconsin ranks 10th among the 50 States in the amount of contributions to CARE—having given over $4,125,000 since CARE's inception.

This week, meeting at their 12th annual convention here in the Nation's Capital, the Cooperative Food Distributors of America gave a truly commendable, humanitarian meaning to their 1,250-member organization by subscribing, in a short 48-hour period, over $10,000 to buy CARE food packages. The CFDA, a trade association organized and owned by some 24,000 independent grocers in the 50 States, kicked off their CFDA food-for-peace crusade at noon on Monday, of this week, and by noon, Wednesday, had oversubscribed their $10,000 goal. In accepting the CFDA pledge, Mr. Richard Reuter, the executive director of CARE, stated that it was one of the largest sums ever raised for CARE in such a short period of time by any group. On presenting the CFDA president, Mr. Mike Rabinowitz, with a plaque honoring the foodmen's generosity, Mr. Reuter added that he had never seen the membership of an organization assume their responsibility so seriously. The food distributors had been prompted to this voluntary contribution by the challenging question posed by the opening speech at the convention, "Will Food Win the Peace?" delivered by the editor of This Week magazine—Mr. Bill Nichols.

I take considerable pleasure in commending such outstanding humanitarian efforts as this achievement by the CFDA. As stated by their president, they have demonstrated their awareness of the need to feed the hungry peoples of the world as a basis for a permanent peace.

The PRESIDENT pro tempore. Is there further morning business? If not, morning business is concluded.

Mr. JOHNSON of Texas. Mr. President, the Senator from Alaska [Mr. GRUENING] has an amendment to offer to the pending bill.

The PRESIDENT pro tempore. The unfinished business will be laid before the Senate.

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. GRUENING. I send to the desk, Mr. President, four amendments to the Mutual Security Act. I am not sure in what order I propose to bring them up on Monday, but the first amendment—which bears Roman numeral I—is patterned after the amendment submitted by me last year and relates to defense support, technical cooperation, and special assistance. It would require, with respect to these programs, the submission of firm budgets within 90 days after the Mutual Security Appropriation Act is enacted. It is printed at page 628 of the Senate hearings on the Mutual Security Act of 1960. On the following page Senators will find the letter to me from the Comptroller General of the United States.

Senators will note that the Comptroller General would go even further. He would curtail the President's use of the discretionary funds permitted him under sections 451(a) or 501 of the act. These I do not propose to curtail, although I must admit that the Comptroller General has made a strong case for some revision of those provisions also.

The second amendment—which bears the Roman numeral II—and is to be found on pages 628–629 of the hearings—relates to military assistance only. It would require the submission, during the annual requests for authorizations and appropriations, a clear and detailed explanation, on a country by country basis, of the force objectives toward the support of which military assistance is proposed to be furnished and other data, enumerated in the proposed amendment, all designed to let the Congress know clearly where we are going and how much it will cost to go there.

I call this amendment the "required planning" amendment.

This amendment has been suggested by the Comptroller General, as will be seen by his statement in the middle of page 629 of the printed hearings. Of this proposal, the Comptroller General has said:

> Although the Department of Defense has taken measures to project the program costs 3 years into the future, the present budget justification submitted to the Congress by the executive agencies does not contain information which we consider necessary to provide the Congress with a fully informed basis for appropriating funds and for reviewing program performance.

My third amendment—which bears the Roman numeral III—is exactly the language contained in the House-passed bill; and this, I think, I will bring up first on Monday. I call my colleagues' attention to H.R. 11510—the House-passed Mutual Security Act of 1960—and to pages 10 and 11, where my proposed amendment appears as subsection (e).

It is a simple amendment.

It only requires for nonmilitary public works programs and projects abroad the application of the same standards as for domestic public works programs and projects as prescribed by the Bureau of the Budget.

My fourth amendment—which bears the Roman numeral IV—takes this concept one step further and requires specific congressional authorization for large foreign public works programs and projects and for such other large endeavors as airfields, highways, railways, and so forth. Large is defined in the proposed amendment as any program or project the total cost of which will be $1 million or more.

Mr. President, I ask that these amendments be received and printed and lie on the table, and that the texts of these amendments be printed in the CONGRESSIONAL RECORD at the appropriate points in my remarks.

The PRESIDENT pro tempore. The amendments will be received and printed, and will lie on the table; and, without objection, the amendments will be printed in the RECORD.

The amendments are as follows:

Amend section 401 by adding at the end thereof an appropriately lettered new subsection, as follows:

"Section 537(f) is amended to read as follows:

" 'Within ninety calendar days after the enactment of the Act making appropriations for the fiscal year 1960 and subsequent fiscal years for carrying out the purposes of this Act, there shall be submitted to the cognizant committees of the House and Senate detailed budgets on a country-by-country basis setting forth, with respect to defense support, technical cooperation, and special assistance, the specific purposes in detail by amounts for which the funds available will be obligated during the respective fiscal year, and such funds shall be available only for the purposes thus specified: *Provided,* That this subsection shall not apply to funds affected by the use of sections 451 (a) or 501 of this Act, or to reasonable variations in the use of funds within a country for purposes other than those specified in the detailed budgets.' "

Amend section 401 by adding at the end thereof an appropriately lettered new subsection, as follows:

"Section 537(f) is amended to read as follows:

" 'During the annual presentation to the Congress of requests for authorizations and appropriations of military assistance under this Act, there shall be submitted a clear and detailed explanation on a country-by-country basis of the force objectives toward the support of which such assistance is proposed to be furnished; the projected costs of equipping and the annual recurring costs of maintaining such force objectives, together with the estimated costs of present plans for modernizing such force objectives; an explanation of the degree to which such force objectives had been equipped, maintained, and modernized under programs already approved; the accomplishments to be achieved with the funds currently being requested, and estimates of the time-phased costs for carrying out the remainder of the program.' "

Amend section 401 by renumbering subsections e, f, g, h, and i as f, g, h, i, and j, respectively. Insert after subsection (d) the following new subsection:

"(e) Section 517, which relates to completion of plans and cost estimates, is amended as follows:

"(1) Insert '(a)' immediately after SEC. 517. Following section 517(a) as renumbered, insert the following new subsection:

" '(b) All nonmilitary flood control, reclamation and other water and related land resource programs or projects proposed for construction under titles I, II, or III (except section 306) of chapter II, under section 400, or under section 451 of this Act, shall be examined by qualified engineers, financed under this Act, in accordance with the general procedures prescribed in circular A–47 of the Bureau of the Budget, dated December 31, 1952, for flood control, reclamation and other water and related land resource programs and projects proposed for construction within the continental limits of the United States of America. In all cases the benefits and costs shall be determined, and a copy of the determination shall be submitted to the Speaker of the House of Representatives and the Foreign Relations Committee and the Appropriations Committee of the Senate. No such program or project shall be undertaken in which the benefits do not exceed the costs and which does not otherwise meet the standards and criteria used in determining the feasibility of flood control, reclamation, and other water and related land resource programs and projects proposed for construction within the continental limits of the United States of America as per circular A–47 of the Bureau of the Budget, dated December 31, 1952.' " (Language contained in House-passed bill, H.R. 11510—"Mutual Security Act of 1960"—on page 10, lines 8 through 25 and on page 11, lines 1 through 10.)

Amend section 401 by renumbering subsections e, f, g, h, and i as f, g, h, i, and j, respectively. Insert after subsection (d) the following new subsection:

"(e) Section 517, which relates to completion of plans and cost estimates, is amended as follows:

"(1) Insert '(a)' immediately after SEC. 517. Following section 517(a) as renumbered, insert the following new subsection:

" 'Each nonmilitary program or project for the purpose of flood control, hydroelectric power development, reclamation of land, highway construction or improvement, airport construction or improvement, railway construction or improvement, harbor construction or improvement, navigation improvement, housing or hospital construction and programs and projects related to such activities herein specifically enumerated which are proposed for construction under authority of title I, II, or III (except sec. 306) of chapter II, under section 400 or under section 451 of this Act and for which the estimated total cost is $1,000,000 or more shall be separately authorized by the Congress and no funds for such projects shall be appropriated without such prior authorization.' "

THE EISENHOWER ADMINISTRATION'S DOUBLE STANDARD

Mr. GRUENING. Mr. President, day before yesterday the newspapers front-paged the fact that President Eisenhower had decided to send a special message to Congress and to the Nation protesting what he referred to as "Democratic spending" and urging prompt action on his legislative proposals. The news story indicated that the Democratic proposals which he objected to, and threatened to veto if enacted, were a health insurance plan for the aged; a housing bill—which I note has just passed the House by a substantial majority; a depressed areas bill, a Federal employee pay increase bill, a Youth Conservation Corps bill, and a bill providing for an increase in the national minimum wage.

This warning to the Democratic majority in the National Legislature, this Presidential fingershaking at Congress, coincides with the very moment when the administration's mutual security bill, asking over $4 billion for foreign aid, is being presented to the Senate. As usual, during the Eisenhower years, this proposal to render aid in every conceivable form to a total of 104 foreign countries and areas—yes; the total has now risen to this figure of 104—is accompanied by the stern injunction from President Eisenhower that these foreign aid requests are all essential and must not be cut by a nickel.

Mr. President, during recent months I have repeatedly called attention to the striking contrast in the negative attitude of the Eisenhower-Nixon administration toward expenditures that will be beneficial to the American people and its fervently favorable attitude toward expenditures for the benefit of people in virtually every foreign land outside of the Iron Curtain, and including some lands within it.

While proposed legislation to combat the serious pollution of our American rivers, to eliminate sewage from the Nation's water supply, was vetoed by the President on the specious ground that this was a local responsibility, although the legislation provided only 30 percent Federal aid as against 70 percent State and it is obvious that our polluted rivers cross many State boundaries, thus making some Federal responsibility manifest; the administration's foreign aid programs provided vast sums of American dollars to combat water pollution abroad.

A bill designed to make a survey of our coal mining industry, which is in a serious plight, legislation designed to discover new uses for coal and help put back to work some of the unemployed coal miners in such States as West Virginia, Alabama, Colorado, Iowa, Illinois, Indiana, Kentucky, Montana, Ohio, Tennessee, Virginia, Missouri, Alaska, Utah, Pennsylvania, indeed in over half the States of the Union where unemployment and real hardship has struck hard at our own people, was vetoed by President Eisenhower. However, not only such surveys, but far more tangible aid to all kinds of mining in foreign lands were part of the President's "must" foreign aid program.

The day before yesterday, Mr. President, at the press conference held in the White House, May Craig, of the Portland Press Herald, one of the outstanding newspaper correspondents of our time, asked the President the following question:

Mr. President, for more years than you have been in the White House, the pitiful children of the West Virginia unemployed

coal miners have been starving for proper food. * * * While you and Congress talk about helping the needy in foreign countries, isn't there something that you could do for needy Americans in this rich America of our own?

The President replied as follows:

Well, Mrs. Craig, you say they haven't been helped. I thought they had. Now I'm not going to try to generalize here or make any alibis. I will find out exactly what has happened because in talking to the Secretary of Agriculture over the years, I assumed that for those people that were really destitute, that there were methods for helping them so that they got enough to eat.

I note on the floor the able senior Senator from West Virginia [Mr. RANDOLPH] who is doing so much to try to combat the unemployment and depression in his State, a task which is certainly not facilitated by the administration's lack of interest and concern in the plight of the people there, and its declared opposition to the very measures sponsored by the senior Senator from West Virginia and others to provide relief from the conditions from which his State and other depressed American areas suffer.

The PRESIDENT pro tempore. The Senator from Alaska should understand that time is running. Has the Senator offered an amendment?

Mr. GRUENING. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. GRUENING. Is the Senate not in the morning hour?

The PRESIDENT pro tempore. The unfinished business has been laid before the Senate.

Mr. GRUENING. Mr. President, I ask unanimous consent to continue for an additional 3 minutes.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Alaska? The Chair hears none, and it is so ordered.

Mr. GRUENING. I might suggest, Mr. President, perhaps a little facetiously, in the presence of my distinguished colleague, the Senator from West Virginia [Mr. RANDOLPH], that if West Virginia were to secede from the Union it might be the recipient of the kind of support it is denied as a State of the Union. Its depressed areas and its hungry children might then receive the attention that they have not received and do not receive from this administration.

When the aid to education bill was before the Congress and the Clark amendment to provide Federal aid not merely for classrooms but for teachers' salaries was defeated after a tie vote in the Senate, by the tie-breaking vote of Vice President NIXON, and it was made crystal clear that the administration was adamantly opposed to spending any Federal funds to help pay teachers' salaries in the United States, I pointed out that payment of teachers' salaries was included in some of our foreign aid projects, and sought to find out whether the Republican congressional leadership would follow the President and adopt a similar opposition toward salaries for teachers in foreign countries. I was unable to get a clear-cut answer, but it was obvious that the double standard which originates in the White House is pressed upon its loyal following in the Congress.

When an excellent bill to provide research in our American forestry resources and to discover new uses of wood was slashed by 70 percent by the administration in its budget, I listed the numerous very generous current provisions for forestry research, for afforestation, for reforestation in more than a score of foreign countries in the administration's must program.

The same double standard prevails in housing, in hydroelectric and other resource development, in highway and airport construction, and in every phase of human activity which spells welfare and progress for mankind.

We have now before us the so-called mutual security bill of 1960—Senate bill 3058. The Senate Committee on Foreign Relations, in its report on this bill, calls attention to the lack of public support for this legislation. The committee labels this public attitude a paradox, and on page 4 of the report points out that despite the support of the program by every President, every Secretary of State, every Secretary of Defense, and every Chairman of the Joint Chiefs of Staff and every Congress, as well as by citizens groups and numerous other entities, "yet," and I quote, "there is unmistakable evidence that the program is misunderstood and disliked by large numbers of the American people."

The committee report goes on to set forth its view that a part of the explanation for the public dislike undoubtedly lies in faulty administration of this foreign-aid program. I have no doubt that this is a part of the explanation, although I feel that the double standard, the callous disregard by this administration of the needs of the American people while insisting on steadily more and more aid for foreign lands, is no less responsible for the growing public resentment. It is thrown into high relief again by the contemporarily projected lecture by the President to the Congress over what is indicated will be made over a nationwide hookup, threatening vetoes, even before the Congress has enacted some of this legislation, on such measures as health insurance for the aged, adequate housing, relief for depressed areas, a minimum wage increase. This contrast, following the long line of vetoes and threatened vetoes of housing measures, airport and public-works construction, water-pollution control, resource development, aid to small business, and nearly everything vital to our own people, is increasingly disgusting them.

But taking the committee's explanation that the dislike by large numbers of Americans of the foreign aid program is due to faulty administration, one wonders why moves to improve such faulty administration are steadily opposed by it.

In the last session, Mr. President, I introduced an amendment prepared at my request by the Comptroller General of the United States, embodying his prescription for tightening up the program, which sought to apply the same budgetary standards to foreign spending that we apply to domestic spending. Instead of mere illustrative budgets, which is all the Eisenhower administration presents on foreign spending, with no obligation whatever to adhere to them, and which are, in effect, a blank check on foreign aid expenditures, my amendment urged that foreign appropriations be subject to the same congressional scrutiny, first by the authorizing committees, then by the appropriate subcommittees of the Appropriation Committees, and then by the full Appropriations Committees. Although this amendment had the opposition of the White House, of the leadership of both parties, and of the committees, it received 37 votes.

Again this year I presented this amendment before the Committee on Foreign Relations and it was rejected.

The House version of the mutual security bill—H.R. 11510—contains a number of excellent amendments designed to tighten up the program and to restore in part the congressional authority over appropriations which I believe is constitutionally its right and duty to exercise.

Mr. President, despite the disposition to rush through this mutual security authorization with great haste, I intend to offer several amendments—indeed, I have already offered them—all designed to improve the efficient administration of this program and to eliminate the shocking waste and the faults that have been committed again and again in the past. But I want to serve notice that whether successful or not, I shall continue to fight with all the energy at my disposal the policy of the administration, which is the first in our history to show a far greater concern for the welfare of the people in every foreign land than it does for the people of our own.

Mr. KEATING. Mr. President——

The PRESIDING OFFICER (Mr. MANSFIELD in the chair). The Senator from New York.

Mr. KEATING. Mr. President, if it is necessary to offer an amendment——

The PRESIDING OFFICER. Will the Senator please suspend.

The Chair wishes to inform the Senate that the mutual security bill is now before the Senate for consideration. Time is running on each amendment.

Mr. JOHNSON of Texas. Mr. President, does the Senator from New York desire time?

Mr. KEATING. I do.

Mr. JOHNSON of Texas. Mr. President, how much time do we have in opposition to the amendment?

The PRESIDING OFFICER. There is no amendment pending at the moment.

Mr. JOHNSON of Texas. Mr. President, I thought the Senator from Alaska had offered an amendment. I asked the Senator to offer one.

Mr. GRUENING. Mr. President, I have offered all four amendments.

Mr. JOHNSON of Texas. Will the Senator from Alaska call up an amendment, so that we can speak as to it?

Mr. GRUENING. Mr. President, I have called the amendments up, and I have spoken on them.

The PRESIDING OFFICER. The clerk will state one of the four amendments.

Mr. JOHNSON of Texas. Does the Senator from Alaska desire to have the amendments considered en bloc, or separately?

Mr. GRUENING. Mr. President, I should like to have the amendments considered and acted on separately. I call up amendment No. 3, identified as "4–28–60—I."

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. It is proposed to amend section 401 by renumbering subsections e, f, g, h, and i as f, g, h, i, and j, respectively, and insert after subsection (d) the following new subsection:

(e) Section 517, which relates to completion of plans and cost estimates, is amended as follows:

(1) Insert "(a)" immediately after "SEC. 517" and following section 517(a) as renumbered, insert the following new subsection:

"(b) Each nonmilitary program or project for the purpose of flood control, hydroelectric power development, reclamation of land, highway construction or improvement, airport construction or improvement, railway construction or improvement, harbor construction or improvement, navigation improvement, housing or hospital construction, and programs and projects related to such activities herein specifically enumerated which are proposed for construction under authority of title I, II, or III (except section 306) of chapter II, under section 400 or under section 451 of this act and for which the estimated total cost is $1 million or more shall be separately authorized by the Congress and no funds for such projects shall be appropriated without such prior authorization."

The PRESIDING OFFICER. In response to a previous question raised by the Senator from Texas, under the unanimous-consent agreement 1 hour is allowed on each amendment, 30 minutes to a side. Already 15 minutes have been consumed.

Mr. JOHNSON of Texas. Mr. President, I yield 15 minutes to the Senator from New York in opposition to the amendment.

Mr. KEATING. Mr. President, I appreciate the courtesy of the majority leader, but I do not intend to speak on the amendment.

Mr. JOHNSON of Texas. The Senator does not have to. There is no rule of germaneness.

THE SITUATION IN KOREA

Mr. KEATING. Mr. President, there can be no doubt that the situation in Korea today is grave. There is cause for concern not only for the future security of the people of that brave country, but for America's prestige and standing in Asia.

It will take the combined cooperation of all concerned—both in Korea and in the United States—if the crisis caused by post-election riots and President Rhee's resignation is to be surmounted. I am firmly convinced that America's stake in Korea is so important and our obligations to insure political stability there so firm, that we must play an active role in the days ahead as the search for new national leadership is pursued.

The tragedy in Korea has been compounded by the involvement in it of one of the outstanding figures of our time, Syngman Rhee. Unquestionably, this patriot is more responsible than any other man for the fact that the flame of Korean independence continued to burn bright during the long years of foreign occupation of his homeland. His perseverance in the face of adversity, and his determination that his beloved Korea would one day be free and independent, must not be overlooked in these dark days he is now going through.

Here in Washington, the Korean Government has been fortunate to have as its representative, Ambassador Yang, as well as his charming wife. He has served his country well and with distinction and has done much to strengthen the bonds of friendship between Korea and the United States. We hope it will be possible for Ambassador and Mrs. Yang to remain in our community, should it be determined that here he can best serve the interests of his nation.

Mr. President, there are those who have challenged the actions of our Government in recent days because they feel we have unfairly "intervened" in the affairs of Korea. I am sympathetic to those who voice these misgivings, but I believe they are missing the mark in this instance.

It is true, of course, that the United States has traditionally maintained a hands-off policy with regard to the internal affairs of other countries. In most cases that is a correct and necessary approach.

However, the situation in Korea is quite different from most others which confront us today. Our strictures against the repressive measures adopted there were well merited in the light of the violence and bloodshed which followed the Korean elections, and in the light of our deep involvement in Korea's defense and future. In speaking out against the brutality and excesses in the present tragic situation, the United States was giving voice to a new approach in our foreign policies which has been spearheaded by Secretary of State Herter. We were demonstrating that we intend to take the lead in promoting true democracy and independence among the nations of the world. Indeed, in the cases of Korea and South Africa, we have shown in recent weeks that we will speak out with great vigor for what we believe is right. This is a voice with real meaning for the emerging peoples of the world who yearn for freedom and independence and world support.

The State Department's warnings to the Korean Government must also be viewed in the context of the great numbers of Americans who lost their lives in saving Korea from invasion, and in the context of the large amounts of American military, economic and technical aid which has of necessity been furnished since the Korean conflict to insure the independence of the country. The blood of American boys and the dollars of American taxpayers must not be spent in vain in Korea. They were not spent there to continue the existence of a government based on tyranny. They were spent there to protect the independence and free choice of the people of Korea.

Thus, America's concern with the fate of this brave nation and its people is direct and immediate. In a strong sense, our concern is obligatory, and in no sense is their future to be regarded as a strictly internal affair.

Therefore, it is vital that national elections be held in South Korea as soon as possible. The people must be given an opportunity to express their will fully and freely.

If the present unrest continues and conditions warrant, it may be that United Nations representatives will be needed to monitor the election. In addition, the United States must not hesitate to put its troops—already there—at the disposal of Korean officials seeking to insure a tranquil and fair plebiscite.

It is my hope that through our State Department and its representatives, the United States will continue to manifest cautious but determined guidance with regard to the future of Korea. It is clear that at the present time the country is in a rudderless state, with no effective government and no clearly defined leaders to run the ship of state.

This lack of leadership is particularly disturbing in view of the continuing threat of Communist invasion from the north. That danger cannot be discounted at any time, especially now that South Korea has been shaken to its foundations by domestic strife. Prolonged disorder could lead to catastrophe.

Our own deep involvement in the security of Korea is manifest. There are presently 55,000 American troops, plus a few other U.N. forces, in Korea. They have been put on a 24-hour alert, and a special meeting has been held in Washington of representatives of the nations which fought to save South Korea from previous Communist aggression.

Mr. President, it may be that the United States, or the United Nations, will be obliged to send additional troops there to help shore up the interim government until internal peace and stability are firmly reestablished. Once again, the lack of a United Nations police force, which could step into such a breach as this in order to insure the continuation of peace, is felt.

The success of the United Nations Emergency Force in quieting tensions in the Middle East augurs well for the use of a permanent peace army such as this in many trouble spots around the world. Such a U.N. police force need not be huge and it need not draw too heavily on any one nation.

As a matter of fact, I envision the best possible U.N. peace army as being made up largely of representatives of the smaller nations of the world, thus preventing the drawing in of large, nuclear-possessing nations in any conflict into which the police force might be called.

Of course, the main power of a U.N. police force would be moral, rather than

military. As has been demonstrated in the Near East, such a force can throw a quieting blanket over areas of tension and can serve as a tranquilizer, a buffer against aggression, between belligerent nations.

Mr. President, the creation of a U.N. police force is long overdue. It could be of inestimable help in the troubled days ahead in Korea. I hope America's representatives at the United Nations will press forward with their efforts to have such a peace army established in the very near future.

We can take some hope from the fact that from all indications the leaders of the opposition to President Rhee are strongly anti-Communist and pro-American. According to reports I have studied, the overwhelming majority of the revolutionists are firm in the camp of the free world.

The nature of the opposition to the old regime gives rise to the hope that any new government which is formed will work for greater freedom and democracy for the Korean people. It is incumbent upon the United States to give hope and encouragement to all efforts which seek to achieve that goal. To that end, we must make sure that sufficient aid is continued under the mutual security program, which is now before the Senate for review.

Certainly, the revolution in Korea is all the more reason for the United States to insure a continued flow of assistance which is so vital to the internal stability and military strength of that country. Any effort to use the recent uprisings as an excuse to cut off such aid must be strongly opposed in Congress.

In conclusion, Mr. President, it is clear that the United States and indeed the free world must follow closely developments in Korea. We must by all appropriate means give assistance to the rising forces of democracy there. We must encourage an early and fair national election. At the same time we must make crystal clear to the Communists that any efforts to subvert the interim government in Korea, or any attempt to trespass onto the territory of South Korea, will be strongly opposed by this country.

Our duty, then, is to work by all possible means to insure the continued independence of South Korea in this difficult transition period, while at the same time encouraging the forces of political reconstruction and freedom inside the country. It is a task which is vital to the future of America, of Korea, and of the world. Upon the success of efforts to ward off the Communists and build internal democracy and stability in Korea may well rest the future peace of the entire world.

Mr. President, I ask unanimous consent to include at the conclusion of my remarks a number of editorials and comments by various columnists from some of the Nation's leading newspapers which generally support the action taken by the Department of State in South Korea and also reflect America's very deep concern about developments in that troubled land.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Rochester Democrat and Chronicle, Apr. 24, 1960]

AMERICA SPEAKS UP FOR JUSTICE

In one of the most severe protests ever made to an ally, the United States has accused Syngman Rhee's administration in Korea of adopting "repressive measures unsuited to a free democracy." Thus sharply did we react to postelection violence and bloodshed in Korea.

And only a few days ago, the United States told South Africa what it thought of that country for the apartheid-induced massacre of Negroes.

This is the American voice we delight to hear.

It is the voice of a great Nation which may finally be learning that it is no part of greatness or leadership to play the part of the doormat and the whipping boy. It is the voice of leadership; the voice speaking not for what is expedient, but for what is right. Above all, it is the voice speaking the language which can be understood by the emerging hundreds of millions of people on this earth; the voice that can be heard over Red propaganda. It is the sound of music.

By coincidence, this voice comes through clearly on the first anniversary—today—of Secretary of State Christian Herter's administration. Herter has been a quiet man; a man trusting his staff; a man compelled to speak from a different plateau than his predecessor. For whereas the late John Foster Dulles was dealing—at least initially—from a deck marked "massive retaliation," Herter has had to adjust to the reality of a maxim set forth by Walter Lippmann, who writes for this page, that in foreign relations a policy is formed "only when commitments and power are brought into balance."

It is partly because Herter has been a quiet man and an efficient man that our present firm voice has such a carrying tone.

"American diplomacy," Charles G. Dawes, U.S. Ambassador to the Court of St. James (1929–32) once remarked, "is easy on the brain but hell on the feet." For this Henry P. Fletcher, career diplomat, had the logical rejoinder: "It depends on which you use." Secretary Herter is using his head. He is giving this country reason to wish him a happy first anniversary.

[From the Rochester Democrat and Chronicle, Apr. 27, 1960]

THE CASE OF KOREA SHOULD BE LESSON

Most Americans were startled by the Korean riots and the subsequent warning by our State Department to Syngman Rhee. But those who had followed the news from Korea in recent years knew that all was not well in that harried nation.

Syngman Rhee has given great and prolonged service to his beloved country, but it has seemed clear for some time that a change in Korean leadership would be best. A righteous man of 85 can well be the last to recognize the damage to democracy that may be caused by refusal to pass the leadership to other hands. So it has been with Rhee.

In repeatedly urging Rhee to cease repressive practices in Korea, the United States has in this case at least allied itself with the cause of an entire people. This stands in contrast to our practice in many other cases, in which we have supplied arms and money to prop up dictators in the belief that defense of the free world makes this necessary.

It may have been necessary during some period of emergency while the United States built other sources of strength. But the ultimate source of American strength must be in its appeal to the love of liberty. All dictatorships come to be hated in the end, and if we become known as habitual supporters of strong-men types, our moral power will vanish.

The cold war seems slated to last for decades, if it doesn't turn into a hot one. Over a long period it is ideals that count and we shall have to practice ours abroad as well as at home if they are to remain believable.

Democratic government is the most difficult kind and not always possible. But we should always be active in urging and promoting conditions that make it possible and those peoples striving toward it should always be able to count us their friends. To do otherwise is to forfeit our claim to moral leadership and to betray our heritage.

[From the Rochester Times-Union, Apr. 27, 1960]

AMERICAN POWER IN KOREA USED TO SUPPORT DEMOCRACY

The United States can chalk up a solid victory in the battle to sway men's minds because of its resolute stand for freedom in South Korea.

HUNGARY CONTRAST

The American policy of backing a popular movement for greater democracy is in direct contrast with the tyranny that Soviet Russia showed in Hungary. The cases are comparable, although not exactly parallel, of course.

The Russians were in Hungary in 1956 as an occupying power. The two divisions of American soldiers are in Korea on the basis of a legitimate mutual defense treaty with a sovereign government.

Also, the government of President Syngman Rhee has not been totalitarian, although it has used some illegal and even brutal means to keep itself in power. But the Communist government in Hungary was (and still is) an unyielding party dictatorship.

But the Americans had the power to turn the tide against freedom, as the Russians did in Hungary, if they chose to. They chose not to, and that fact will ring throughout the world to America's credit.

Both revolutions, in Hungary and South Korea, originated with students who felt the fire of freedom. Both took the form of demonstrations which were first repressed by government police. Then both popular movements swelled and the police refused to fire on their compatriots.

From the beginning in Korea, the United States conceded that last month's election was rigged. Even though President Rhee has long been a stanch ally, America called for redress of grievances. American generals and diplomats backed up that position in Seoul until Rhee finally yielded and offered his resignation and a new, honest vote.

There's no telling now whether such a vote will return Rhee to power or bring a new leader who may be less friendly to the United States. But Washington prefers to risk that possibility rather than be tagged as a supporter of dictatorship. America has had that cross to bear too often in the past.

The Russians tricked the Hungarian freedom fighters into negotiating for what the rebel forces thought would be withdrawal of Soviet troops and an end to totalitarianism. But the rebel leaders were arrested. Soviet tanks attacked the people, whose Molotov cocktails and small arms were no match for tanks and armor.

OUR PROFIT

In both cases, powerful nations had great influence on the local government and troops on the scene. They were confronted with open rebellion against a ruling party which had long been on their side.

Russia's reaction in Hungary shocked men who had been fooled by communism. America's reaction in Korea raises a bright new standard for free men to cheer with pride.

[From the New York Herald Tribune, Apr. 27, 1960]

THE PROMISES OF DR. RHEE

Like so many rulers before him, Syngman Rhee thought he could outwait popular discontent, only to discover that the emotion originally directed against a specific act or institution now envelops him.

The outcry against the elections of March 15, which returned him to the Presidency of South Korea for a fourth term, could probably have been silenced by any one of the promises he made in the last few days had he made them in time. But as soon as it became plain that they were extracted by force they lost their value. It would be impossible for Dr. Rhee to regain his prestige among Koreans no matter what he promised them now.

Even when the promises came, they were uncertain. New elections—but when? An offer to resign as President "if the people want"—but how was that to be determined? It is true that he did bar Lee Ki Poong, the new Vice President, from public office and thus sought to remove one of the most heated causes of discontent. Yet the rioters in Seoul are quite aware that this is their decision and not his.

The truth is that Dr. Rhee does not like to be called to account for his behavior, nor does he think that there is any other Korean with better judgment. These are qualities often found in rulers, but such rulers are unlikely to last long in democracies. Unfortunately, Dr. Rhee's obstinate and haughty attitude has become as responsible for the rioting as the electoral irregularities which were its ostensible cause.

Dr. Rhee also paid no attention, or too little, to the extraordinary public interventions on the part of the United States bluntly requesting him to put his house in order. Some critics say that this country made a mistake in not exercising much greater control over the South Korean Government since we subsidized its economy and protected its territory. But that would have meant making a satellite out of South Korea in the way the Soviet Union has made a satellite out of Bulgaria, for example. It would have been most unwise, it would have been impossible.

Nevertheless, Dr. Rhee's behavior is obviously embarrassing to us. It is not only that the tumult may invite the Communists in North Korea to attempt a new adventure—a dangerous enough possibility. What is happening in South Korea damages the prestige of American democracy in all minds, especially in the minds of those we want most to value it.

Let us at least hope that the worst of the Korean crisis is past and that the political recovery of the Korean Government is about to begin.

[From the New York Times, Apr. 27, 1960]

REVOLUTION IN KOREA

In a particularly poignant tragedy for all concerned, South Korea, created under United Nations auspices as a free and democratic state, is now in the throes of a full-fledged revolution which seems to be toppling the regime of President Rhee and is leaving the country for the moment without effective government in the face of the continued Communist menace from the North.

Under the impact of the upheaval, which began with student demonstrations that soon grew into mass riots in the cities, costing more than 150 lives and injuries to 1,000, President Rhee has offered to resign "if the people desire it." But control of events is already being taken out of his hands by both the rioters and by the National Assembly, where a bipartisan majority, bowing to pressure from the street, has called for his immediate resignation, for restoration of parliamentary cabinet government and for new elections, both presidential and parliamentary.

Fortunately, except for Communist agitators attempting to give the riots an anti-American direction, the great majority of all the opposition and revolutionary elements and leaders remains strongly anti-Communist and pro-American. This gives hope that out of the present travail a new regime may be born firmly dedicated to freedom and democracy. But the gravity of the situation is clearly demonstrated by two facts: The United Nations forces, principally 55,000 American troops, which guard South Korea against a new Communist attack, have been put on a 24-hour alert, and the United States has held an extraordinary meeting with the 15 other allied nations that joined in repelling the previous Communist invasion.

The revolution is the outcome of developments for which President Rhee but also the rebelling opposition and the United States must each accept a share of responsibility. President Rhee has long been a popular idol as the "George Washington" of his country. But with advancing age he allowed a large degree of misrule, corruption, and police brutality climaxed by the rigging of the March 15 election that sparked the revolt. Whether the responsible and openly functioning opposition really exhausted all peaceful ways to change before joining the rioters is open to question. In any case the success of the revolt was assured when the United States, though releasing Korean troops from the United Nations command to enforce martial law in a vain effort to restore order, also published such severe strictures on President Rhee's rule and such urgent demands for reform as to undermine his authority and appear to side with the revolutionaries.

Under the circumstances it is difficult to see what other course the United States could have followed. But this intervention has not only brought hypocritical charges of interference from the Communists but has also caused misgivings among our allies in Asia, where Japan, for instance, is confronted with riotous student demonstrations against the mutual security pact with us. The only available solution now is obviously a rapid completion of the necessary changes urged by the American authorities, and it must be hoped that all Korean patriots will join in bringing them about before catastrophe overwhelms them all.

[From the New York Times, Apr. 28, 1960]

KOREA AFTER SYNGMAN RHEE

After weeks of revolutionary violence that overthrew President Rhee, South Korea is now trying to put a halt to further revolution, to bind up the nation's wounds, and to establish a new government that will assure national unity and freedom and democracy.

It is trying to do so under an acting President, Huh Chung, an independent former Premier once dismissed by President Rhee but recalled by him only a few days ago to the senior cabinet post of Foreign Minister in evident anticipation that he might become Mr. Rhee's immediate successor. But it is also trying to do so under the watchful eyes of North Korean Communists who seek to continue the revolution in their direction with charges that Mr. Rhee's resignation is only a maneuver of the American imperialists and that only a withdrawal of the American troops from Korea can solve the crisis.

In this situation, and also because the hated police are powerless, Mr. Huh continues to rule under martial law, pending establishment of a caretaker cabinet. But in his first pronouncement after taking power he also gave promise of a better day by pledging himself to restore constitutional government, to introduce political reforms that would, among other things, take the police out of politics and stop waste in American aid, to call new elections within the constitutional limit of 3 months, and to seek to improve relations with the United States and with Japan.

In that effort he can be assured of American sympathy and support. His request to President Eisenhower to go ahead with the plan of visiting Korea in June has immediately been accepted by the latter, who also deplored the resort to violence and paid high tribute to Mr. Rhee despite his old age mistakes.

If there is one doubtful point in the new regime's reform program it is the plan to abolish presidential government on the American model and to return to parliamentary government under which the President is only a figurehead and the cabinet is always at the mercy of Parliament. That system may work under the British two-party system, but it has brought only governmental instability and chaos to countries with less developed party traditions or a multiplicity of parties, such as Korea had in the past, with the result that it has often been replaced by military dictatorship, or by a presidential regime, as in France. The first function of government is to govern, and any government incapable of doing so will not long endure.

[From the Christian Science Monitor, Apr. 28, 1960]

AMERICAN POLICY TURNS A CORNER

The decision of the United States to support the democratic process in South Korea can be one of the great turning points of the postwar era. For a decade and a half, it has been considered necessary to recruit and support a great variety of regimes of special privilege and semidictatorship across the world, in order to contain communism.

In the earlier stages of the cold war American diplomacy had little other choice. If the West was to deny to Stalin the progressive victories it permitted to Hitler, it was necessary to throw up emergency defenses all around the Communist-bloc perimeter.

This system of containment, crude and hastily improvised, succeeded in holding the line against Moscow and Peking. But it was achieved at an increasingly heavy political cost as the years passed and the sense of emergency abated.

Around the arc from South Korea to Turkey domestic political repression was the rule rather than the exception in countries where the United States trained, supplied, and paid for armies equipped police and financed regimes. The various forms of corruption which flourish in an emergency situation with heavy inflow of money and goods from the outside, ranging from economic to political and social corruption, were quite naturally blamed on the United States whether justifiably or not.

The rising political opposition, which was bound to assert itself as time passed and "repressive measures," in the Herter phrase, increased, found itself staring up the business end of American guns in the hands of the local regimes. Facing riot weapons and tanks from the United States in the hands of the security forces, they became naturally enough, steadily more anti-American.

Lately, however, there have been quiet but accumulating signs that Secretary Herter is prepared to let support for the peoples of other countries, and the regimes which most broadly and effectively aid their peoples, become the discreet but primary aim of American policy. If this be called interference, it should be remembered that the United States is already involved to the hilt in most of these countries. The only sensible question is one of using the involvement to support American ideals openly and honorably,

rather than to have American resources utilized by repressive regimes to keep themselves indefinitely in power.

It took courage for Mr. Herter to act as he did when the youth of Korea rose against what everyone—young and adult alike, in Korea and in Asia generally—knew was a politically corrupt situation. The pessimists always argue that the alternative to strong-arm rule is communism. It is extremely important, therefore, that Korea stabilize itself and prove the critics wrong.

American words and actions in this case will ring magnificently across Asia and Africa and Latin America.

This is the first time that the United States has helped loosen the hold of a dictatorship which it was chiefly responsible for keeping in power under the doctrine of military necessity. Happily Washington has recognized that security lies more in the integrity of peoples and their fight for freedom than in regimes which keep their people on the far side of the police. The United States still needs strength but preferably quiet strength, and a voice which speaks with the power of American ideals.

[From the New York Herald Tribune, Apr. 28, 1960]

OUR KOREAN HEADACHE

(By Walter Lippmann)

If there is any criticism to be made of the State Department in its dealings with South Korea, it is that it might well have acted sooner. For years Korea has been an American headache. Dr. Rhee has played the despot and has carried on a regime which made a mean joke of the bloody struggle we waged to save South Korea for democracy and liberty. In his relations with Japan and with his powerful neighbors in East Asia he has been an irresponsible nuisance. With his war mongering he would have been a dangerous nuisance had we not kept a close watch on him.

After the brazen theft of the elections in March his dictatorship, which we had just managed to tolerate, became intolerable. For after the violence and dishonesty of the elections, rebellion broke out all over South Korea. His government had lost the final excuse by which dictatorships can be justified—that they are able to govern.

In all probability, the United States could not have saved Dr. Rhee had it wanted to do that. There was no reason why we should have wanted to save him. In taking its stand against Dr. Rhee and for a new deal, the State Department acknowledged the inescapable responsibility of the United States. It is that we are involved in Korea and are responsible for the maintenance of a stable and a reasonably liberal regime. It was an honest and a healthy thing to intervene openly. For the open intervention is a public acknowledgement of the real situation, which is that the South Korean state was created by American arms, is protected by American power, and is maintained by American subsidies.

All the world knows this and, therefore, all the world holds the United States accountable for the behavior of the South Korean Government. There is no way in which we could protect and support South Korea and, at the same time, act as if it were an independent country, like, for example, Switzerland or Denmark. The critics of the State Department's intervention cannot have it both ways. They must not ask us to underwrite South Korea and, at the same time, demand that we leave it entirely alone.

It would suit most of us in America much better if we could leave Korea alone, if we did not have to intervene, if we did not have to take a part in overthrowing a government, if we did not have to worry about its successor. But the only alternative to doing these disagreeable things is to withdraw from South Korea, and to stand aside, and to let it be sucked into the orbit of Red China.

As we have no intention of allowing South Korea to become a Chinese satellite, as South Korea is quite incapable of maintaining its own independence and its own liberty, it must continue to be—not to use the word "satellite"—our client and our ward.

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent that I may suggest the absence of a quorum, without the time consumed on the call being charged to either side.

Mr. DIRKSEN. Mr. President, I reserve the right to object, only that I may propound a parliamentary inquiry. Is the Gruening amendment the pending amendment?

The PRESIDING OFFICER (Mr. CHAVEZ in the chair). Yes; that is the pending amendment. Is there objection to the request of the Senator from South Carolina? The Chair hears none, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRUENING. Mr. President, I ask for the yeas and nays on my amendments numbered 3 and 4.

The yeas and nays were ordered.

Mr. DIRKSEN. Mr. President, will the Senator from Alaska yield 1 minute to me?

Mr. GRUENING. I yield 1 minute to the Senator from Illinois.

Mr. DIRKSEN. I do not want the RECORD to be closed at this point without indicating my vigorous opposition to the pending amendment. I think it is one of the most restrictive I have ever seen. Obviously, it would completely tie the hands of the Administrator of the mutual security program if it were necessary for him to return to Congress and secure a separate authorization for every project related to the activities mentioned in the Gruening amendment where the initial cost was $1 million or more.

I shall have something further to say on Monday, under the agreement, when we will have 5 minutes on a side, unless the distinguished Senator from Arkansas, the Chairman of the Committee on Foreign Relations, wishes to take the time.

Mr. FULBRIGHT. Is the Senator from Illinois talking about the Gruening amendment?

Mr. DIRKSEN. Yes.

Mr. FULBRIGHT. The committee considered this matter twice, last year and this year. I think it was unanimously, or at least by a very substantial vote, rejected. I certainly shall oppose the amendment.

Mr. DIRKSEN. I did not want the RECORD to be closed at this point today without indicating my own opposition to the amendment.

Mr. FULBRIGHT. I too, am opposed to it.

Mr. JOHNSTON of South Carolina. Mr. President, I understand that several Senators desire to make insertions in the RECORD.

Mr. DIRKSEN. Mr. President, will the Senator from South Carolina yield further, simply to permit me to close the record on this amendment, yielding back the remaining time?

The PRESIDING OFFICER (Mr. GRUENING in the chair). The Chair, speaking as the Senator from Alaska, yields back the remaining time on the amendment.

Mr. DIRKSEN. Then I yield back the time in opposition, under the rule, which means that there will be 5 minutes allotted to each side before the yea-and-nay vote on this amendment on Monday.

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent that Senators who wish to make insertions in the RECORD, and who did not have the opportunity to do so in the morning hour, may be permitted to do so at this time, without the time being charged to either side.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

JUDICIAL SUPERGOVERNMENT AND STATES RIGHTS

Mr. ERVIN. Mr. President, our Federal system of government was established by a Constitution whose provisions look to "an indestructible union composed of indestructible States." One of the most profound students of constitutional law in the United States is the Honorable Everett C. McKeage, who has had a most distinguished career as a practicing lawyer and superior court judge in California, and who is currently serving as president of the California Public Utilities Commission.

The Public Utilities Fortnightly for September 24, 1959, contained a most significant article entitled "Judicial Supergovernment and States Rights," which was written by Judge McKeage and merits the serious consideration of those who wish to preserve the America we have known and loved. For this reason, I ask unanimous consent that this article be printed in the body of the RECORD immediately after my remarks.

There being no objection, the article by Judge McKeage was ordered printed in the RECORD, as follows:

JUDICIAL SUPERGOVERNMENT AND STATES RIGHTS

(By the Honorable Everett C. McKeage, president, California Public Utilities Commission)

"The preservation of the States and the maintenance of their governments are as much within the design and care of the Constitution as the preservation of the Union and the maintenance of the National Government" (Supreme Court of the United States in the case of *Texas* v. *White* (7 Wall 700, 725, 19 L. ed. 227, 237), decided in 1869, following the close of the Civil War and arising out of that conflict).

Preliminarily, I desire to state that this article is written in the author's personal capacity, and any opinion expressed herein is his own and is not to be understood as necessarily representing the opinion of the State agency with which he is affiliated or the opinion of any member thereof.

So that the reader may understand the fundamental philosophy of the author of this article, I wish to state that I am not an admirer of the concentrationist governmental philosophy of John Marshall and Alexander Hamilton. I still believe, with Abraham Lincoln, that the principles of Thomas Jefferson are the definitions and the axioms of a free society. Time has not disproven Jefferson's statement that a truly consolidated government would constitute the greatest of all tyrannies, and that a heavy government is easy for the governors but subversive of the rights of the people; nor has time disproven the wisdom of his statement that asserted good motives and intentions of public officials are not to be trusted, but that public officials should be bound down by the chains of the Constitution. Old-fashioned it may be; nevertheless, I am still attached to the principles embodied in the 9th and 10th amendments to the Federal Constitution.

It is interesting to note that John Marshall, prior to his becoming Chief Justice of the Supreme Court of the United States, subscribed to the Jeffersonian philosophy that courts are incompetent to declare acts of the legislature unconstitutional.

Marshall so contended as counsel for the defendant in the celebrated case of *Ware* v. *Hylton* (3 Dallas 199, 211, 1 L. ed. 568, 573), which was decided by the Supreme Court prior to his becoming a member thereof.

Our political history teaches us that the Federal Government is a government of delegated powers and that the functions of that Government have been separated into three coordinate branches or departments.

No one can deny that the Constitution so intended. The debates in the Federal Constitutional Convention clearly indicate that to be the fact. However, time and circumstance have radically changed what the Founding Fathers definitely intended to create and did actually create.

GRADUAL ARROGATION OF POWERS

Over the years, the Supreme Court has gradually become a supergovernment and has undertaken to tell the executive and legislative branches of Government what they may or may not do. Gradually and imperceptibly—like the building of a coral reef—that Court has taken unto itself supervision over the two other coordinate branches of government, including the State governments, and now exercises, as Mr. Justice Holmes observed with regard to judges in general, the royal prerogative of choice. If this is not the destruction of equality, I am at a loss to know how such equality could be destroyed.

One does not have to go into literature of any kind other than that constituted by the dissenting opinions of the Justices of the Supreme Court to know that the decisions of that Court constitute the personal judicial views of the members thereof, based upon their wisdom, unwisdom, predilections, social viewpoints, and human natures. Mr. Justice Holmes, in several dissenting opinions, pointed that fact out as have several other members of that Court.

JUDICIAL LAWMAKING

In the Baldwin case (281 U.S. 586, 595, 596, 74 L. ed. 1056, 1061), Holmes said that there appeared no limit but the sky to the action of the Court in striking down State laws which happen to appear to a majority of the Court as, for any reason, undesirable.

He expressed a similar view in the *Lochner* case (198 U.S. 45, 74, 49 L. ed. 937, 949). In the *Springer* case (277 U.S. 189, 209–212, 72 L. ed. 845, 852–854), Holmes pointed out that, in fact, the Court legislates when it determines which of two competing public policies shall prevail.

That a legislative decision is a political one can hardly be denied. Therefore, when the Supreme Court legislates it makes a political decision.

Similar criticism was offered by Mr. Justice Black, as to the personal views of the members of the Court coloring their decisions, in the *Adamson* case (332 U.S. 46, 68–92, 91 L. ed. 1903, 1917–30), concurred in by Justices Douglas and Murphy.

This dissent is commended to all those interested in this vital subject.

At this point, I desire to confess an error which I committed in an address on section 13 of the Interstate Commerce Act, wherein I stated that Holmes had characterized the Supreme Court as a continuing constitutional convention. What he did say, along with Mr. Justice Brandeis in the Burns Baking Co. case (264 U.S. 504, 517–534, 68 L. ed. 813, 828–836), was that the action by the Court constituted "an exercise of the powers of a superlegislature—not the performance of the constitutional function of judicial review." This is even more startling than the "continuing constitutional convention" concept which actually was put forward by James M. Beck (not Holmes), an acknowledged authority on constitutional law and a former Solicitor General of the United States.

These critical dissents by members of the Supreme Court charging that Court with violating the judicial rule against a court legislating could be multiplied many fold. As a matter of actual fact, the Supreme Court, by its action, has seen fit to legislate in fields where the Congress has deliberately refused to enter. We have seen that Court imputing to the Congress intentions which the Congress never entertained.

NO COURT IS INFALLIBLE

The author does not subscribe to the spineless philosophy that courts can do no wrong. I believe that courts can break the law just as easily and as often as can the executive and legislative branches of government. The only difference is that, as applied to the Supreme Court of the United States, there is no one above that agency of Government to say, in an effective way, that it is wrong. Impeachment of the members of the Court is wholly unsuited to remedy this situation.

What is really needed is impeachment of the decisions of the U.S. Supreme Court.

Cardinal Richelieu stated that all power corrupts and that absolute power absolutely corrupts and breeds irresponsibility. Can any candid man doubt the truth of this statement who has read and understood history?

By quoting Cardinal Richelieu I do not imply that the Supreme Court has ever been or is now corrupt as that term is generally understood. What I do imply is that the exercise of absolute power tends to corrupt and distort a public official's point of view, discrimination, and discretion and tends to disable him from giving that type of responsible public service which the citizens of a free society are entitled to expect.

INVASION OF STATES' RIGHTS

History reveals that the Supreme Court has set the pattern for the invasion of the rights of the several States and, although followed in that course by both the Congress and the President, it must be admitted that the Court has been more responsible for the breach in the dike than the two other Federal branches put together.

It was the Supreme Court, in the Shreveport cases (234 U.S. 342, 58 L. ed. 1341), which established the unitary rule that the Federal authority could completely occupy the field of commerce, including both interstate and intrastate commerce. The Founding Fathers must have turned in their graves when that decision was handed down in 1914 by the Court. This Federal pre-emption process has accelerated in pace since that decision, until now the rights of the several States—whatever may be left—are enjoyed at the sufferance of the Supreme Court. So, I assert that the dream of the Founding Fathers that ours would be a government of laws and not of men has vanished like the snows of yesteryear in the crucible of judicial supergovernment.

This, for the reason that the decisions of the Supreme Court will depend upon the individual and changing views of its members who may come and go upon its bench.

DECISIONS MODIFY CONSTITUTION

The Supreme Court states it to be a rule of law that its decisions interpreting the Federal Constitution are the supreme law of the land, even though it be a decision overruling many prior decisions of that Court which were the supreme law of the land until overruled. Thus, good constitutional law today becomes heresy tomorrow because the Court has changed its mind, even though by a divided vote.

Volumes could be written on this particular subject, but space will not permit. However, the author invites those interested to read "The Supreme Court in the American System of Government," by the late Mr. Justice Jackson, Associate Justice of the Supreme Court, and "The Bill of Rights," by Judge Learned Hand, retired chief judge of the U.S. Court of Appeals.

These two works, based upon long judicial experience, will convince any candid mind, in my opinion, that the Supreme Court, by its decisions, does change, in fact, the meaning of the Federal Constitution just as though that Constitution had been amended by inserting new language therein. Which renders somewhat strained and old-fashioned the language of the Court in the relatively recent case (decided March 26, 1956) of *Ullman* v. *United States* (350 U.S. 422, 428, 100 L. ed. 511, 519), which reads:

"Nothing new can be put into the Constitution except through the amendatory process. Nothing old can be taken out without the same process."

Contrary to the ancient federalist doctrine that a good judge expands his jurisdiction, I believe that an able judge exercises wise restraint to keep within his jurisdiction; that type of restraint which all great religious and philosophical teachers have said is the mark of wisdom.

EXAMPLE OF USURPING STATE AUTHORITY

An outstanding and relatively recent example of the striking down of State authority by the Supreme Court (involving the State of California) is reflected in the case of *California Public Utilities Commission* v. *United States* (355 U.S. 534, 23 P.U.R., 3d 552, L. ed. 2d 470), which was decided March 3, 1958. The action of the Court affirmed the decision of a three-judge statutory U.S. district court for the northern district of California, rendered April 30, 1956 (14 P.U.R. 3d 300, 141 F. Supp. 168). The Court divided 6–3, Mr. Justice Douglas delivering the prevailing opinion and Mr. Justice Harlan delivering a dissenting opinion which was concurred in by the Chief Justice and Mr. Justice Burton.

Here is a perfect example of individual viewpoint interpretation of the meaning of the Federal Constitution. A reading of these two opinions places this subject in bold relief. On the same day, as pointed out by the dissenting opinion, the court rendered another decision (*Detroit* v. *Murray Corp.* (355 U.S. 489, 495, 2 L. ed. 2d 441, 460)) which, in the opinion of the author of this article, cannot be reconciled on principle with the decision invalidating the California statute.

The issue involved in this case was whether or not the State of California had authority to regulate the rates of property carriers as applied to the intrastate transportation of property of the United States. Several subsidiary issues arose but the issue stated was the focal and all-important one.

The statutory U.S. district court determined that issue in the negative and the Supreme Court affirmed.

A reading of the prevailing opinion of the Supreme Court and the dissenting opinion is most enlightening. These opinions are relatively brief and should be read by students of the subject here discussed.

The opinion of the district court was based upon an argument in terrorem, which is the usual position taken when courts seek to strike down the action of a State on the ground that it invades Federal authority. In other words, the exercise of State authority would create chaos and confusion and retard the military and security effort.

In attempting to distinguish the Penn Dairies case (which was indistinguishable, in my opinion), the lower court constitutionally contrasted a hydrogen bomb to a milk can, in order to underscore the justification for its holding, and relied (apparently exclusively) upon claimed security and military reasons for striking down the State statute, but wound up by invalidating the statute as applied to any and all property of the United States, whether hydrogen bombs, groceries, or toothpaste. The court made no distinction as to any of the departments of the Federal Government. There can be no doubt that the Supreme Court affirmed the lower court upon the broad grounds stated.

The following quotation from the opinion of the lower court is most interesting:

"In a dictatorship, the warlords do not even demand—much less request—authority to negotiate with private parties for the supply of their war needs. Autocrats take what they want.

"It is therefore a heartening spectacle, in a constitutional democracy, to see a group of military men, speaking for the sovereign itself, appear in a civil court to plead to be allowed to carry out their constitutional functions by being permitted to contract freely with privately owned carriers to supply the Government's transportation needs.

"But this very subordination of the military to the civil power—fundamental in every true democracy—itself imposes a grave responsibility upon civil courts. We dare not, in good conscience and under the Constitution of the United States, deny relief to such a suitor when it proves to our satisfaction that such denial would hamper the national defense."

The temper of this language has a strange ring to it. I had supposed that it was taken for granted that military officers would render themselves responsive to the civil authority, in light of the fundamental principle that the military is subordinate to the civil authority in this and all other free governments, and that such officers are due no compliment for obeying the laws of the land. The author spent his late teens and early twenties in the Regular Army of the United States and, at no time, was he ever taught by the military authorities that a soldier was to be complimented for recognizing this fundamental principle of our Government. As a matter of fact, he was specifically taught to respect it.

The opinion of the lower court is most interesting and is well worth reading, although somewhat lengthy.

STATE AUTHORITY IN REGULATION BANISHED

While the decision in the public utilities commission case, adverted to herein, concerned only transportation rates, in light of the tenor and temper of the opinion of the Supreme Court, it is my considered judgment that the same rule would be extended to all utility rates, gas, electric, telephone, water, and warehouses. The three justices who dissented expressed such to be their view. In my opinion, the decision in question has driven State authority from the field of regulation, as applied to services and commodities furnished to the United States; that is, if the rule announced will be followed by the Supreme Court. It would not be unusual, however, for that Court to refuse to follow the rule in a subsequent case, if past history of that Court's action is a guide.

JUDICIAL RESTRAINT NEEDED

There may be some who see virtue in having the Supreme Court act as it has acted but such a policy inevitably leads to consolidation of all power at the top. While there should be reasonable flexibility in the operation of the Federal Constitution, it is submitted that the Constitution should not become chameleonic and take on the coloring of the personal philosophy of each transient majority of the Supreme Court of the United States.

There can be no question but that a free government is not the most efficient as compared to a totalitarian one. The diffusion of powers among the people is the outstanding quality of a democratic form of government. As a matter of fact, the very inefficiency which inheres in the wide distribution of powers within the body politic is a merit in itself for which we are willing to pay. We do not need a decision of the Supreme Court on all matters appealed to that Court, except to dismiss many for lack of jurisdiction. Surely the people or their legislative representatives should be permitted more latitude in ordering their local affairs than they now enjoy.

More judicial restraint would be very much in order.

Let us examine the process by which the decisions are reached by the Supreme Court. First, the members of the Court decide that the Court has jurisdiction of the subject matter, it matters not what it may be. It takes the position that its decision, in this regard, is final and beyond review by any other agency of Government. This is an assertion of absolute power unrestrained by a vote of the people. Second, it decides the issues which it alone determines are presented and it takes the position that its decision on the issues is final and binding upon all other branches of government, even to the point of declaring null and void the deliberate acts of the executive and legislative branches of Government.

As heretofore pointed out, the Court contends that its varying and contradictory decisions interpreting the Federal Constitution are the supreme law of the land. Thus, the position of the Court is that it is absolute and all in all. It should be a sufficient answer to this to point out that Thomas Jefferson, Andrew Jackson, and Abraham Lincoln disagreed with such contention. If the Supreme Court is the final authority of what it may or may not do and what the two other coordinate branches of Government may or may not do, how can it be contended that it has not constituted itself a supergovernment?

Mr. Justice Stone, prior to becoming Chief Justice, stated in the *Butler* case (297 U.S. 1, 78, 79, 80 L. ed. 477, 495) that, while the legislative and executive branches are subject to restraint by the vote of the people at regular intervals, the only check upon the exercise of power by the members of the Supreme Court is their own sense of self-restraint. What a commentary on free government.

POLITICAL CONSTITUTIONAL REVIEW COUNCIL

You may ask me, "What is the answer to all this?" I reply that the efficient answer to this is a frankly political constitutional review council with the power to reverse and overrule decisions of the Supreme Court of the United States wherever that Court undertakes to interpret the Federal Constitution or to declare null and void acts of the Congress or of the State legislatures or the acts of the executive power, either Federal or State. Such a procedure would provide an automatic appeal to this council from any decision of the Supreme Court taking the action referred to.

Such council would be drawn from the branches of both the Federal and State Governments.

It is contended that the very existence of such a council would constitute a salutary restraining influence upon the Supreme Court and would result in preventing many of these decisions rendered by that Court undertaking to declare null and void acts of the executive and the legislative branches of Government, both Federal and State. The existence of such a council would inculcate a sense of wise judicial restraint where it now appears to be absent.

The mere presence of a reviewing authority would cause the members of the Court to exercise more mature judicial discretion than is now the case where they are free to roam in a world all their own. At all events, the people would have a frankly political council to exercise jurisdiction over what are frankly political decisions of the Supreme Court in the sense of governmental polity and admitted to be such by many members thereof.

History proves that public opinion has not been efficacious in retarding this march toward centralization of all power in the Federal authority. If this march is to be reversed, constitutional action is necessary.

Relatively speaking, I do not believe that the Supreme Court is any less in need of paramount authority over it than any other agency of Government. In the large sense, it is a political agency of Government as are the legislative and executive branches. I have never entertained the thought that the members of the Court are more intelligent, patriotic, or possessed of greater integrity than other public officials. The members of the Court are men possessed of the ordinary and usual frailties and shortcomings of human nature and the elevation to the bench of that, or any other court, does not change human nature.

My parting thought is: In a free society, the constitutional charter should be construed always in favor of a wide diffusion of power among the people and against consolidation of power in the national authority. Please remember that few men are without the dictator and indispensable man complex, to some degree, although they will honestly deny such aspiration or tendency. Therefore, it behooves free men to resolve all silences, omissions, presumptions, inferences, and doubts arising from national charters in favor of local autonomy, otherwise consolidation and concentration of authority at the top will ineluctably follow as night the day.

What the people of this Nation need is to talk less and act more in behalf of a movement to amend the Federal Constitution by specifically writing into that document the spirit which the Founding Fathers breathed into it, largely by implication, hoping with James Russell Lowell that this spirit would find lodgment in the hearts and minds of those who followed in their footsteps. The Fathers were possessed of that robust quality of free men, but their descendants have faltered and equivocated.

These gaps in the Constitution should be closed by unmistakable amendatory language, based upon experience, and so plainly worded that no consolidationist, however, sincere, might misconstrue the meaning of free government. This, to the end that there be indelibly enshrined in our Federal charter the wisdom of Thomas Jefferson, epitomized by these immortal words:

"In questions of power, then, let no more be heard of confidence in man, but bind him down from mischief by the chains of the Constitution."

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. JOHNSTON of South Carolina. Mr. President, I think it was understood that my time on my amendment would begin as of now.

Mr. President, I submit, and send to the desk, an amendment which is identified as "4-28-60—D." I call up the amendment at this time.

The PRESIDING OFFICER. The amendment submitted by the Senator from South Carolina will be stated.

The LEGISLATIVE CLERK. On page 20, between lines 21 and 22, it is proposed to insert the following:

(d) In section 510, which relates to purchases of commodities, strike out the third sentence and substitute the following: "Funds made available under chapter II of this Act may not be used for the procurement of a commodity outside the United States: *Provided*, That not more than 65 per centum of such funds from and after the date of enactment of the Mutual Security Act of 1960 may be used for the procurement of a commodity outside the United States if the President determines that such procurement will not result in adverse effects upon the economy of the United States, with special reference to any areas of labor surplus, or upon the industrial mobilization base, or to the net position of the United States in its balance of trade with the rest of the world, which outweigh the economic advantages to the United States of less costly procurement abroad, except that if the President determines that the rate of employment in an industry producing a commodity is depressed, none of such funds shall be used for the procurement of such commodity outside the United States."

Redesignate subsections (d) to (i) inclusive, as (e) to (j), respectively.

Mr. JOHNSTON of South Carolina. Mr. President——

Mr. HOLLAND. Mr. President, I yield to the Senator from South Carolina 30 minutes on the bill.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 30 minutes on the bill.

Mr. JOHNSTON of South Carolina. I thank the Senator from Florida.

Mr. President, in 1946 the Congress of the United States was asked to initiate a program to help Great Britain rejuvenate itself economically from the ravages of World War II. We were asked in that year to lend Great Britain $3,750 million. The purpose of this loan was to bolster the economy of that nation and help Great Britain restore its position in world trade, and to meet its financial obligations at home.

On May 2, 1946, I made an extended speech to the Senate on this proposed loan, which was, of course, the forerunner of Marshall plan aid, which subsequently became foreign aid, and which is now referred to under the smokescreen title of mutual security.

A loan would seem to be a legitimate piece of business, but when we got into the history of loans to foreign countries it was revealed that "loans" was just another expression for "giveaways."

It was interesting to note that at the time when the request for the $3,750 million loan to Great Britain was made, foreign countries still owed the United States, as of July 1, 1945, $14,791,340,307 in World War I debts, of which a large portion was owed to us by Great Britain. Every nation in the world which had owed us these funds from World War I, except Finland, was in default with us at the outset of World War II.

At the same time France had in Washington an emissary who was seeking a $2½ billion loan, China was asking for a huge loan, Russia was seeking $1 billion, and other countries were making approaches for money. Estimates in 1945 placed requests being made of us at $15 billion. That was 15 years ago.

During World War II, we sent to foreign countries untold billions of dollars in goods and materials. I doubt that there is a true picture of just what the true value of the goods we sent overseas during World War II amounted to. I know we sold Great Britain $6,500 million worth of goods left over at the end of World War II; we sold them for $650,000, or 10 cents on the dollar. In addition, we canceled World War I debts, and canceled every obligation for that country, amounting to approximately $32 billion. In return, we lent them the $3,750 million they were seeking at that time. To this, I objected.

In 1946, when I spoke against the loan to Great Britain and loans to other countries, and when I spoke against marking off the war surplus goods at 10 cents on the dollar, and when I spoke against wiping off the slate the debts of World War I, I warned that we were being spendthrifts. I could see further into the future than the spendthrift angle, because I knew that once we got into the habit of giving away money to foreign countries, for whatever good purpose, we would never be able to get out of the habit. All of us know that if a child is given a stick of candy, he does not want to give it up.

One loan led to another, and these led to gifts and grants, and to what we now call mutual security.

In 1946, I warned the Senate that these loans, gifts, grants, and whatnot would be used to build up foreign industry and foreign agriculture, which, coupled with cheap foreign labor, would come back to haunt us in later days. We are now in the later days, because American industry and American labor and American farmers are suffering from foreign competition in all fields, as they have never suffered before.

Never in the history of the United States has competition from abroad captured so many foreign and domestic markets which once belonged to American business, American labor, and American agriculture. Our gifts, grants, and loans have built up mountains of industrial might that now surround us; and yet we still have "statesmen"—and I use the word "statesmen" in quotation marks—who want to heap more upon those mountains and further confine America's free enterprise system.

Mr. President, there are a few facts of life which should be heeded in the Senate at this time.

In 1957 we imported from foreign countries a modest 1⅒ million tons of steel-mill products. By 1959 imports of such products had quadrupled to 4⅒ million tons.

In reverse order, in 1957 American steel mills exported 5⅖ million tons of steel-mill products, and by 1959 these exports had dropped to 1⅒ million tons.

This is practically a decrease of exports equal to an increase of imports. So, in fact, during that 3-year period, American steel mills lost markets for 8⅒ million tons of steel products. This amounted to approximately 11 percent of our 1959 raw steel production, because it takes 10 million tons of steel ingots to equal 7 million tons of finished steel.

Mr. President, let us consider the automobile industry, as an example. In 1959, 625,000 foreign-built passenger cars were imported into the United States. That was an increase of more than half a million automobiles over the number imported in 1955. At the same time, only 115,000 American cars were exported in 1959—which was more than a 50-percent drop in the number of American cars that were exported in 1955. We lost that production to foreign competition. We lost that producton to foreign industries that benefited from American loans, gifts, and grants. I see no mutual security in such stark figures which reflect the decline of American industry, labor, agriculture, and economy.

Mr. President, nothing portrays more vividly than does the automobile industry the changing balance of trade which is placing America in an unfavorable trade position.

For example, in 1952, the United States imported from France 145 new automobiles, at a cost of $243,439. By 1953, the latest year for which these figures are available, we imported from France 89,481 new cars, at a cost of $86,119,510.

In 1952 the United States imported 31,243 new cars from Great Britain, at a cost of $41,071,595. By 1958, we were importing 153,597 new cars from Great Britain, at a cost of $194,072,216.

In the case of West Germany, in 1952 we imported 1,341 new cars at a cost of $2,142,081. But by 1958 we were importing 134,610 new automobiles, at a cost of $145,974,098.

Mr. President, so it goes throughout the world, throughout every industry, and throughout every commodity. Imports to the United States have been growing, growing, growing, ever since the foreign-aid program was conceived.

Now let us look at exports of U.S. automobiles abroad. In 1952 the United States exported 1,330 new cars to France, for a net income of $3,035,353. In 1958 our exports of new cars to France had diminished to 971, realizing us an inflow of $2,692,984.

In the case of Great Britain, in 1952 we exported 224 new cars to that country, realizing a cash return of $429,220. In 1955 our exports of new cars to Great Britain amounted to 700, realizing us $1,533,890. By 1958, our exports to that country had dropped to 329 new cars, bringing into this country only $892,832. This is hardly enough volume in trade to keep one automobile dealer in America in business.

In the case of West Germany, we exported to that country in 1955, 983 new

cars, bringing in $1,927,405. By 1958, our exports to West Germany had diminished to 333 cars, for a total sales value of $893,320.

Here is another interesting import item: sewing machines.

Mr. President, I point out that we manufacture sewing machines in South Carolina.

In 1949 the United States imported 37,800 sewing machines. In 1950 imports had quadrupled to 153,000 units; and last year we imported 1,229,400 sewing machines—more than half a million of these machines coming from Japan—all of them coming from nations which have benefited from our so-called mutual security "giveaway" program.

Is it not foolish to give to people who are taking away the trade and the business of the United States?

Mr. President, Western European machine tool builders are underselling domestic builders of comparable supplies by 30 percent. This is after production costs, shipment costs, freight costs, insurance, and tariffs.

This brings me to another interesting point. While the United States has been lowering tariffs to make it easy for foreign countries to come into our country with their manufactured goods, foreign countries, on the other hand, have been increasingly building up tariff walls to keep American goods out of those countries.

If the original purpose of foreign aid was to help foreign countries recover from the war and restore them into the family of nations in the international economy, then the job has been done, and more than done.

Mr. President, I charge the job has been too well done, because we have not only restored them to a so-called rightful place or position, but we have done so to such an extent that they now far exceed our own Nation in many areas.

There is a story told which appeared in the publication Steel in 1959 entitled "The Case of the Vanishing Taxes." The story was retold in a brief fashion by Walter J. Campbell, editor of Steel magazine, this April before the House Appropriations Subcommittee on Foreign Operations. I now quote this story as it was told to that committee:

> An American steelmaker bid on a contract for ship plates for the Navy. The American producer was underbid by a foreign producer by $37,000. The foreign steelmaker got the contract.
>
> The American steelmaker felt a little frustrated. He asked his accountants and tax experts to figure out how much the company and its employees would have paid in additional Federal income taxes had the American received the contract and processed the plates.
>
> The tax experts came up with this answer. The company and its employees would have paid in direct income taxes $67,000 additional had the American company received the contract.
>
> So the American Government saved $37,000 in purchase price. But it lost $67,000 in direct income taxes, indicating a net loss to the Government of $30,000.

That is not counting all the money that would be put into circulation and the taxes that would be paid on that money time and time and time again.

Mr. President, is this mutual security? Is this what Senators are going to vote to do here today in approving more foreign aid?

The phrase is trite, but it was never so true: "You are going to kill the goose that laid the golden egg."

If I were a foreign government doing business, as well as they are doing today, I would have a lobbyist in Washington asking Congress to cut out foreign aid because, if the balance of trade continues to be so out of balance, to the disfavor of the United States, then this country is going to go broke, internationally speaking, and the source of cash dollars to purchase goods on the international market will vanish into thin air.

We can go broke internationally without going broke nationally, Senators should remember. We can reach a point where we cannot sell our goods to other nations because we have built them up so much that we will not be able to meet the competition of other countries. That is what we are facing today. I invite the attention of the Senate to that fact. We are continuing to give away money to build up other nations, and to put them upon a higher pedestal in the future.

Most nations of Western Europe are realizing national budgets which are in the black, while we still owe billions and billions and billions for every variety of international welfare program that has been tried since World War I.

We have gone into debt. We have had to raise our debt ceiling during the present Republican administration $30 billion. That is what we have given to foreign countries. It almost balances off dollar for dollar. Every time we give away money we go into the red.

Few people realize that foreign claims on U.S. gold for the first time in history exceeded the gold we have in stock. Liquid assets of foreigners held in the United States readily convertible into claims on U.S. gold at the end of last year were in excess of $23 billion, while our gold stock remained at approximately $19.5 billion.

That is something to think about. Our Treasury is worried about it. I was called upon the other day, and they talked with me. They do not say we should cut out foreign aid, for that is not one of their programs, but they want to cut other appropriations. They want to raise taxes. We still have in effect the taxes which were imposed during the wartime. We cannot cut them when we are running in the red.

As world trade goes more and more out of balance against the favor of the United States, we can expect the picture to continue to reverse. The vulnerability of the American gold position has followed a pattern of downward trend insistently ever since the Marshall plan came into existence in 1948. Everyone will have to acknowledge that.

In 1949 total foreign short-term assets in the United States amounted to $9,757 million, while U.S. gold holdings at year's end amounted to $24,563 million. Each succeeding year thereafter through 1958, foreign short-term assets increased by, roughly, $1 billion a year, while U.S. gold holdings dropped in varying amounts to $20,582 million in 1958. In 1959, of course, foreign short-term assets jumped by $4½ billion, placing us for the the first time in a position of foreign claims exceeding our gold stock.

Mr. President, during the past year the standing of the United States in international finance and foreign competition as a result of several notable developments, became unmistakably clear. Already in 1958 we had suffered a deficit of $3.4 billion in our total or overall foreign account. Then in 1959 this was not only repeated but surpassed. It rose to $3.7 billion. In the 2 years of 1958 and 1959 the United States fell behind by $7 billion in its financial position in relation to the rest of the world.

The balance of gold in Fort Knox dropped to $19.4 billion because of the outflow of some $3.5 billion in gold in the past 2 years. Of course, a $19.4 billion stock of gold does not sound so bad since only $12 billion are required as the legal gold reserve for our currency.

However, the fact is that foreign claimants could pull out more than $16 billion of this gold from Fort Knox should the claimants become so minded. Neither you nor I could draw a single dollar in gold out of those vaults, but foreign claimants have the legal right to do so. Should a run on our gold develop and should all these foreign claims be exercised, we would have something like $3 billion in gold left to back our currency, when we must have $12 billion. This would be about $9 billion less than the legal reserve requirement.

This is not a very comfortable situation for this country. Of course, no one now expects a run on our gold; but if trends continue in the same direction as in the past 10 years the time may soon come when withdrawals of gold will resume and get up a head of steam. With the exception of the single year of 1957, we have run an annual deficit of a billion dollars or more in our foreign account every year in the past 10 years. It was during this period that the huge backlog of claims on war gold was built up. Yet the press and the economists continued to talk about the "dollar gap." Only in 1959 when the deficit continued at the high rate of 1958 did the administration begin to take heed.

They are taking heed now, but not along this particular line I am talking about. They are still giving away money and building up the economies of foreign nations, which are ceasing to purchase from us.

There are several reasons for the deficit. One is our foreign aid; another, our foreign investments. Yet another is our foreign military expenditures, and a fourth is the great increase in imports of recent years. Tourist expenditures abroad also contribute to the deficit. In 1959 our imports of $15.3 billion were over $2 billion higher than in any previous year, including 1957, the previous high. Our exports are down some 20 percent from their 1957 peak. In 1959 our exports just held their own compared with 1958. Imports, on the other hand, were up nearly 20 percent.

Imports from Japan in 1959 were about 50 percent above those of 1958.

We became a net importer from Japan for the first time since the war. Imports from Europe rose about 40 percent in 1959 over 1958. For the first time in many years we became a net importer from England. Always in the past, back to the Civil War, we sold more to England than we imported. In 1959 our trade balance with both England and Japan reversed itself against us. Most of these goods were finished manufactures that compete heavily with the output of our own manufactures in our home market. Japanese textiles have already visited havoc on our textile industry. Now textiles are also coming heavily from Hong Kong and other countries.

Mr. President, there is little evidence that this country will be able to reverse the unfavorable balance in the near future. President Eisenhower has sent a message to Congress urging increased efforts to expand our exports, including loosened credit arrangements. Under Secretary of State Douglas Dillon has urged other countries to remove restrictions against our exports. Other countries have also been advised that we expect them to shoulder a part of our economic aid to underdeveloped countries.

The PRESIDING OFFICER (Mr. GORE in the chair). The Senator's time on the bill has expired. Does he yield himself additional time?

Mr. JOHNSTON of South Carolina. I will take some time on my amendment.

The PRESIDING OFFICER. The Senator has 30 minutes in support of his amendment.

Mr. JOHNSTON of South Carolina. Mr. President, this is all very well; but how soon will any of these efforts bear fruit?

I do not readily see how we can expect to increase our exports when we are as much overpriced in relation to other countries as all the evidence indicates. In the case of raw cotton we are overpriced by 8 cents a pound or about 35 percent compared with the world market. In the case of wheat the domestic price is some 60 to 65 cents per bushel above the world price. This is also in the neighborhood of 35 percent.

Look around elsewhere. On Government supply proposals we find foreign bidders underbidding domestic manufacturers from 20 to 40 percent.

That we will have difficulty in expanding our exports because of high production costs is further confirmed by the contention that the proceeds from the Development Loan Fund obtained by India, for example, would fall short by 40 percent in purchasing power if spent in this country as compared with spending them in the rest of the world.

This is a clear indication of the margin by which our prices are above those of other countries. The Washington Post therefore opposed the requirement that the Development Loan Fund should be spent in this country; but in so doing was forced to affirm what many economists and internationalists have denied; namely, that in relation to the low-wage countries of the world we are out-priced on a broad front.

How, then, are we to expand our exports sufficiently to offset the deficit and to pay off the enormous claims against our gold? If the wages of other countries remain as low in comparison with the wages paid in this country it must be clear that with the advantage of growing mechanization abroad and the installation of modern machinery, we cannot hope to compete more successfully than now. In the past 12 years we have shipped abroad over $30 billion in up-to-date machinery and equipment. Much of this moved under foreign aid at public expense. This added to our tax burden and was subtracted from the tax burden overseas to the extent that other countries did not have to tax themselves for the purpose of reequipping their plants and mills.

While foreign wages have increased, they have not kept up with the increase in productivity brought about by the technological advancement. Therefore since productivity advanced much faster in many industries abroad than here, because new machinery installed there meant replacing backward production with modern production, foreign manufacturers increased their competitive advantage. There is no present prospect that foreign labor unions can close the gap. Foreign labor does not have the bargaining power of unions in this country. While foreign wages may continue to go up, so will wages in this country.

Let us suppose that Japanese wages should double in the next 2 years. They might go from 20 or 25 cents an hour to 50 cents. That would be a 100 percent increase; but the wages would still be far below ours. Here a 10 percent wage increase would be equal to a 100 percent increase in Japan. An increase of 25 percent here would be equal to a 100 percent increase in wages in a number of European countries.

Who believes that wages in Japan will rise 100 percent while wages go up only 10 percent here; or that European wages will rise 100 percent while they go up only 25 percent here?

Yet some such ratio of increase would be necessary to make up some of the gap that separates our wage costs from those of other countries. They are using our money to compete with us. In the future the wages abroad would have to rise still more rapidly than ours if their costs are to come within reach of ours so that we could compete successfully. This is the case because foreign productivity is set to rise faster than ours. Every time we ship modern machinery abroad we contribute to this narrowing of our productivity lead. Every time we conduct foreign productivity teams through our factories we do the same thing. In the past recent years we have led upward of 8,000 such teams from abroad through our factories and taught them modern management methods.

Now after some 12 years of this we are surprised to find that we have succeeded in raising productivity abroad in comparison to ours, to the point that we can be outsold at will in almost any part of the world. Why we should be surprised is a mystery, since that was exactly what we set out to do. Evidently we are astounded over our success, and what we have accomplished by our giveaway programs.

But, Mr. President, we cannot continue to go down that road. There has been disappointment over the slow progress of productivity in this country. This is reported to be at the rate of 2½ or 3 percent per year. Of course, if we could import machinery that is far beyond ours in point of automation and output per man-hour and, not having to develop such machinery ourselves, could obtain a large part of it without even having to pay for it and get free instruction on how to install and operate it, as our competitors have been able to get modern machinery from us, I am sure that we could run our percentage of annual growing productivity far above the present rate of 2½ or 3 percent.

As matters stand we have no such possibility anywhere in view. Other countries have been able to draw on us and get our most modern developments. By substituting advanced machinery for backward machinery or for bombed-out equipment, other industrial countries were able in many instances no doubt to double or triple their productivity per man-hour. Yet their wages made no such forward leap.

The future does not hold much hope that the situation will change in our favor. It will get worse. Europe is setting up a mass market. They will get the advantages of mass production. Other industrial countries have inventive genius no less than we. They have highly skilled mechanical workers; and soon they need no longer look to us for modern machinery. They can invent, develop, and produce their own. Our technological monopoly or near monopoly is gone, Mrs. President; but will we have our wage lead?

Already many of our industries, scores or even hundreds of them, are entering into production abroad. They take the money from the United States and go over there and invest it in foreign countries. We cannot blame them if they want to make money. They either establish outright branches, or they buy into foreign concerns or set up subsidiaries or license foreign manufacturers to use our patents and processes. Why? For the simple reason that they can enjoy lower wages abroad and save their export markets. They may open up in Europe and manufacture there instead of shipping from here over there. This will reduce our exports. Then in some cases they will ship to South America, Asia, and Africa from Europe rather than from the United States. Again, this will reduce our exports. In yet other instances they will ship back to the United States, as witness the automobile imports that come from Ford, General Motors, and other American companies in Europe. It is estimated that about 28 percent of the total automobile imports of 668,000 cars in 1959 were generated by American investments in Europe. The same thing has gotten under way with office machinery, typewriters, calculating machines, and so forth; and also tractors, sewing machines and oil.

Where do we stand, Mr. President?

Shall we automate in order to reduce unit costs of production? We are automating now. Some textile mills run with few people in attendance. Industries such as steel, automobiles, and others are replacing workers with machines, but other countries can do the same thing and are doing it.

Meanwhile, while modern machinery throws people out of work we have nearly a million new workers coming forward for employment each year in the United States.

Automation is expected to lower prices and lower prices are supposed to increase sales and the increased sales volume is supposed to create new jobs. In the end automation makes more jobs, it is said, than it destroys; and in the long run this is undoubtedly true. If, however, other countries capture an ever-increasing share of our home market this expected expansion in jobs will not take place. We will be driven into a narrower sector of our own home market in industry after industry. The pressure will be relentless and will choke us out of many industries—unless we take steps to do something about it; and it is not too early to start. Indeed, it is already very late.

In many products imports have already captured 10, 20, 30, 40 percent and even over 50 percent of our market in 10 years' time. New penetrations are being made every month. Industries that were not previously greatly affected, including even the mass production industries, are now coming under the hammer. Steel, electronics, office equipment, tile, brass products, cotton and wool garments, shoes, athletic goods, lamb and mutton, beef, shrimp, and many other items are experiencing sharp rises in import competition. There will soon be hardly an industry in this country that will not feel the chill of low-cost import competition. Some of the oldtimers, such as pottery, glassware, hats and millinery, fisheries, lead and zinc, copper, oil, wool, plywood, and others will continue to feel the pressure and can also expect it to rise.

It seems almost incredible that in the face of these developments in recent years, and after having mishandled our tariff structure by 80 percent on the average in the past 25 years, we should be going into another tariff-cutting conference this fall, prepared to reduce tariffs another 20 percent on thousands of items.

This is absolutely senseless in view of the spot in which we already find ourselves. The last thing we need is a further lowering of our tariff. That may sound a little peculiar, coming from the South, but we have worked ourselves into it here in America. Right now we should be doing all within our power to counteract the forces that will overwhelm us if we simply stand still.

What did the wartorn and impoverished countries of Europe do when they found themselves at a disadvantage in the face of the dollar and under the pressure of our exports? Did they sit idly by and see their markets forever lost to them? No. They put into effect a very rigid import system by requiring import licenses before goods could be brought in from abroad. The tobacco growers know about that. The cotton growers know about it. They controlled all imports through exchange controls and did not buy $1 worth of imports that they did not feel to be best for the country. With our help they got back on their feet, thanks to the protective devices they instituted.

Of course, they called protectionism bad names for our consumption, and praised free trade as the best way to get along, although they practiced none of it. They did get back on their feet—something they could not have done had protectionism or restriction of imports been as bad as they told us it was. Now they are relaxing some of these restrictions but they are not throwing them so far away that they cannot pick them up again very quickly if they need them.

We should be able to learn a lesson from these other countries. We should guard our reserves and protect our employment and standard of living while yet we can against complete disruption from abroad. We should institute such import controls as we need, product by product, after study of the producing industries; and we should try to stop the drainage on our gold.

One of the means by which we halt a part of the drain on our dollars is to require that more of the money that we advance for oversea economic aid should be spent in this country. In this way a good part of the funds we take from the taxpayers would come back to this country. Not only would this result in a smaller drainage on our dollars and thus reduce our foreign deficit by that much; it would increase employment in this country and add to the income of domestic business. This in turn would increase tax collections, and therefore would help to bring our budget more nearly into balance.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senator from South Carolina may yield to me, without losing his right to the floor, to enable me to make a brief statement.

Mr. JOHNSTON of South Carolina. I yield for that purpose.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that I may suggest the absence of a quorum and subsequently withdraw it; and that following the withdrawal of the quorum call, the Senate stand in recess subject to the call of the Chair.

A distinguished former Senator and former President of the United States is in the Capitol. He always enjoys a visit to the Senate. I have talked with Senators on the other side of the aisle, and it is agreeable to them that I suggest the absence of a quorum to notify Senators to come to the Chamber. Then it is planned to have the Senate take a recess subject to the call of the Chair.

It is understood that when the Senate reconvenes, the Senator from South Carolina will be recognized, and that the time taken for these proceedings will not be charged to him.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk procedeed to call the roll.

VISIT TO THE SENATE BY FORMER PRESIDENT TRUMAN

Mr. HOLLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Pursuant to the order previously entered, the Senate will stand in recess, subject to the call of the Chair.

Thereupon, at 2 o'clock and 15 minutes p.m., the Senate took a recess subject to the call of the Chair.

Mr. Truman was escorted to his former seat in the Senate, and he was greeted with prolonged applause, Senators and occupants of the galleries rising.

Mr. JOHNSON of Texas. Mr. President, if I may have the attention of the Senate, I should like to call to the attention of the Members of this body that we have in the Senate Chamber at this moment a most distinguished guest, a distinguished former Senator, and a former President of the United States, who led this Nation through one of the most perilous periods in history, and a man in whom all Democrats take great pride, and whom all Americans are glad to welcome back to this body.

[Applause, Senators rising.]

Mr. President, it is customary, and I hope that custom will not be broken, for the distinguished former Senator from Missouri to make a few remarks to the Senate, and we surely hope he will.

[Applause, Senators rising.]

The PRESIDING OFFICER (Mr. MANSFIELD in the chair). The Chair recognizes the Senator from Missouri. [Laughter.]

Mr. TRUMAN. Mr. President, it is certainly a compliment to me, and one which I highly appreciate, that the Senate would permit me to come back to the floor and to be at the seat which I occupied when I was a Member of this body for 10 years.

I want to say to the leader of the majority that my words occupied less space in the RECORD of the U.S. Senate than those of almost any other Senator. The only times I ever spoke to the Senate were when I had to, and when I had a report to make. Some of the reports were quite thick, so perhaps they might have taken up more space than I think they did in the RECORD.

I am highly appreciative of this honor. I want to say to you, I served in this body for 10 years. I was personally acquainted with every Member of this body at that time. I had the most pleasant period of my whole life here on this floor. Had I been able to have my way on the subject, I never would have left the Senate, and I would give anything in the world if I were back here. [Applause.]

If I were not beyond the age of consent, I would try to do it again. [Laughter.]

You know, I was 50 years old when I came here in 1935. You can do your own figuring. I am too old to start again.

Although I made the announcement downtown yesterday that I had agreed to run for President again, because the constitutional amendment does not apply to me, when I am 90 years old, some "bird" who is always looking up details wrote me a great long letter and told me I could not even do that then, because it is to be an off year. So, you see, I am up against it. [Laughter.]

Thank you. Thank you very much for this privilege. I served here for 10 years. I have been all over this Chamber. I have been in and out of every door, particularly this one on the Democratic side of the Senate Chamber, but also the others, including the one which goes to the Marble Room.

I enjoyed every minute of my service. Thank you from the bottom of my heart.

[Prolonged applause, Senators rising.]

At 2 o'clock and 25 minutes p.m. the Senate reassembled when called to order by the Presiding Officer (Mr. MUSKIE in the chair).

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. JOHNSTON of South Carolina. Mr. President, I was very glad to yield the floor to former President Truman to have the pleasure of meeting with us today. We are glad to have him with us. I know I speak for all Senators when I say that.

Mr. President, I am introducing an amendment which would require that not less than 35 percent of all ICA funds be spent in this country for the purchase of materials, equipment, and supplies. This is a reasonable requirement and would give some benefits to our own economy from the funds which are collected from within it for the benefit of other countries.

I also want to state the purchases are about that amount at the present time; but if the trend continues downward on purchasing from the United States, the total will go far below that amount. This is only a valve to protect a little bit from going any further at the present time.

If it will be objected that this requirement will reduce the purchasing power of the total appropriations because the dollar will not purchase as much here as abroad, this will be further confirmation of the extent to which we are, indeed, at a competitive disadvantage in world markets. Let no one who objects on this ground again arise to deny that we are priced out of foreign markets.

Our whole international competitive situation cries out for a remedy. My amendment will be one step in the right direction.

Mr. President, I send to the desk a table showing the unfavorable changes which have taken place in U.S. gold stock and foreign claims since 1949, and ask that this table be printed as a part of my remarks at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

U.S. gold stock and foreign claims

Year	Total foreign short-term assets in the United States	U.S. gold holdings, year end	Ratio of foreign claims to gold
	Millions	*Millions*	
1949	$9,757	$24,563	39.7
1950	11,715	22,820	51.3
1951	12,099	22,873	52.9
1952	13,598	23,252	58.5
1953	14,476	22,091	65.8
1954	15,857	21,793	72.8
1955	16,970	21,753	78.0
1956	18,268	22,058	82.8
1957	18,593	22,857	81.3
1958	19,597	20,582	95.2
1959	[1] 23,017	19,507	118.0

[1] Estimate.

Source: Federal Reserve Board and U.S. Department of Commerce.

Mr. JOHNSTON of South Carolina. The table shows that the total foreign short-term assets have been increasing year by year since 1949, while the U.S. gold holdings have decreased year by year since 1949.

Mr. President, it does not take a genius to see that the farther we go down the road of foreign aid, or, as some call it, mutual security, the farther down the road to debt and ruination we drift.

Mr. President, today the present cost of foreign aid, including interest on money which we have borrowed to give away, exceeds $10 billion annually.

In 1946, to go back to my speech of that year, I pointed out that many people in the tobacco trade had urged me to vote for the proposed loan to Great Britain on grounds that Great Britain would use some of this money to buy products manufactured from American tobacco, which is grown in South Carolina.

I said at that time that I had no objection to extending credit to Great Britain for the specific purpose of purchasing tobacco, cotton, farm products, manufactured articles, and other things which had source in the United States; but I was opposed then—and I shall oppose now, as I have for the past 15 years—to the giving away of uncontrolled sums of money for uncontrolled purposes.

There was no guarantee when they made the loan in 1946 to Great Britain that any of that money would go to purchase anything made in the United States; there was no guarantee in subsequent years of very much or any of this foreign-aid money that followed being spent in any way beneficial to the United States.

It was, in truth, foreign aid. In fact, to the contrary, much of the money which came under the foreign-aid title was used to stimulate the growth of tobacco in the Mediterranean and African areas, which now is being grown, processed, sold, and manufactured in foreign markets to the distinct disadvantage of the American industry and the tragic harassment of our American tobacco farmers.

So much has this foreign competition disturbed our export picture in tobacco that we had to pass special legislation gearing parity on tobacco crops to the cost of production in an effort to help recapture some of the foreign markets.

I do not know how many times I have taken the Senate floor, how many times I have appeared before congressional hearings, or how many times I have appeared over in the State Department and before the Tariff Commission seeking import quota relief for the textile industries of America.

At no time in the past 7 years has the present administration ever done anything to genuinely help protect America's textile industry from the ravages of cheap, unfair, foreign competition. The influx of foreign cloth goods to this country has been so great that many textile mills have been forced out of business. This is true not only of mills in New England, but also mills in my own State of South Carolina.

The same picture is true in the plywood industry. Plants manufacturing plywood in South Carolina and in other States have been forced out of business, and people have been put out of work because of cheap, foreign competitive products coming into this country under the umbrella of trade relations favorable to foreign countries, and supported by our American dollars exported to those foreign countries under the so-called mutual security program.

A manufacturer can buy the wood in the United States, ship it to Japan, make it into plywood, bring it back, and sell it in the United States at prices lower than those for which plywood made in the United States can be sold.

I know personally of several mills in South Carolina that I am trying to help save today which have been forced into a precarious situation because of foreign competition. The ridiculous picture in the textile industry is that anything grown by American farmers is being sold to foreign textile manufacturers at 8 cents a pound less than the American manufacturer can buy it for. Japan can buy a pound of cotton from the United States at 8 cents less than manufacturers in the United States must pay for it in the United States.

Mr. President, what do we have to do to sustain the friendship of these foreign countries?

Our American soldiers have died on the battlefield to save their democracies and their economies. Our American dollars bought and paid for their war material during World War II. We wiped out their debts from World War I. We broke down our trade barriers to help them sell their products in this country. We have given away billions of dollars in cash to bolster the economies of these countries. We have given them nearly every military secret we have to help them defend themselves.

To help them economically we have kept our armies, our Air Force, and our Navy operating all over the world so that their military budgets would be at a minimum while they recovered from World War II.

Mr. President, if we have not saved these countries after 15 years of all-out support, plus 4 years of wartime sup-

port, I doubt if we will ever save them; to the contrary, they will drag us down the hole into which we have tried to keep them from falling.

It was not long ago the Department of State in its zealous support of foreign aid programs, advertised the fact that our foreign aid program consumes only 2 percent of the gross national product.

Mr. President, 2 percent sounds like a small amount, but this 2 percent is about what it takes to make the balance between whether our gold runs to foreign countries abroad or stays home in our Treasury. Two percent of our gross national product is equal, roughly, to 20 percent of our personal Federal income tax.

We have not reduced our income tax. We have the same tax rate in the United States we had during the war. If we could reduce it 20 percent, we could stop this foolishness.

In answer to the State Department's logic that our foreign aid costs us "only 2 percent" of the gross national product, I like to use the answer given by one witness before the House Appropriations Subcommittee on Foreign Operations, who said:

> This 2 percent of our gross national product is as important to our economic health as is the skin on a man's back.

Thus it is easy to see that by stripping away this 2 percent of our gross national product, we may be stripping the skin off the back of our economy.

It is inconceivable to me that, at a time when American business people are desperately trying to maintain foreign markets and keep their heads above water domestically, anyone would come before the Congress and ask for more billions of dollars to be sent abroad under the guise of mutual security.

The PRESIDING OFFICER (Mr. MUSKIE in the chair). The time of the Senator has expired.

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent to proceed for 5 more minutes on the bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator may proceed.

Mr. JOHNSTON of South Carolina. Some business people, who are shortsighted, to say the least, argue that foreign aid is good for our economy because much of the money goes to buy products made in the United States. This holds no water with a thinking man because it simply amounts to this:

American taxpayers must find the money with which to buy American products, which must be given away. In boiled-down language it means that a few business men who may make the sales to the international cooperative administration of products for shipment overseas under the mutual security program will benefit, while millions of American taxpayers must foot the bill.

Mr. President, you cannot give away anything in the world. Somebody has to pay for it. When the U.S. Government gives away anything, the American taxpayers are going to have to pay for it. The tragedy about foreign aid is that we not only have to pay for it, but after we pay for it we have to fight against what it has created in order to exist.

Mr. President, for 15 long years I have fought against foreign aid of every form and shape because I knew that none of it would be of any benefit to the United States in the long run. Our day of reckoning has come.

Like someone addicted to a bad habit, we have reached the point in history where we must break away from the giveaway habit or be destroyed by this habit. I realize it is easier for Senators to accept the smoothly worded reasons of necessity given by State Department officials and vote to continue the mutual security "giveaway" program than it is to vote to halt the program abruptly.

I realize it would be an impossibility to expect the Congress to break away from this evil habit of squandering money because it might jar several thousand Federal employees abroad, shake up a few selfish interests at home which may be profiting from foreign aid, and might battle the foundations of a few well-entrenched foreign politicians. Therefore, my greatest expectation or hope is that the Senate, in lieu of failing to abruptly halt this habit, will reduce the habit to a minimum.

Failing to halt foreign aid will be an unhappy and costly mistake at this period of our history. If we continue foreign aid at the present rate, we will be admitting the only way to keep foreign friendships is to buy them like one would buy a pair of shoes, an automobile, or some other item.

It is time that someone, some people, and some other countries in this world besides Americans begin to sacrifice for freedom, democracy, and economic well-being, as our forefathers sacrificed when this country was born.

If foreign aid is the only "gimmick" American ingenuity can drum up in the field of international relations, then we might as well pack up our bags in the four corners of the world and come back home. We will collapse economically at home trying to hold up the economic frontiers that we now claim to be our responsibility all over this globe.

The Roman Empire fell to pieces and capitulated because it was economically impossible for that dynasty to support its military frontiers that stretched around the then known world. Rome taxed its friends and conquered provinces as well as its own people, and yet it still could not afford its farflung flanks.

Mr. President, how in God's name can we expect to maintain our farflung military flanks and at the same time continue to uphold the four corners of the world with American dollars? The time has come for us to vote "No" a thousand times, if necessary, to free the American people from the awesome, endless burden of paying the tab for the food, clothing, housing, and military bills of every nation in the world outside of Russia and Red China.

The longer we linger and wait to break off foreign aid, the harder it will become to take the necessary action. The longer we hesitate, the closer we come to our economic doom.

The mutual security program is a misnomer. It is the most devastating, un-American, self-destructive foreign policy ever generated by any nation in history. Foreign aid, whether you call it mutual security, international socialism, global welfare, or just plain giveaway, is the most diabolically clever method of economic suicide ever conceived in the history of the world. The Congress is playing Russian roulette with America's economic strength in fostering the extension of this program.

What bank would continue to lend money under these circumstances? That is why the interest rates have continued to rise year after year. That is why they are going to continue to rise, not only with respect to the Government, but also for individuals, as long as we continue to operate our business the way we have been operating the business of the Federal Government. We must call a halt.

Mr. President, my amendment is at the desk. We will take it up on Monday, and I shall ask for a rollcall vote at that time. It is temporarily withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I have an amendment at the desk. I ask that it be not read, but printed in the RECORD at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment ordered to be printed in the RECORD is as follows:

> On page 13, beginning with line 22, strike out over through line 11 on page 14.

TIME FOR FEDERAL RESERVE TO STOP RESTRAINT AND LET ECONOMY MOVE AHEAD

Mr. PROXMIRE. Mr. President, it now appears that 1960 is not going to be anything like the boom year that many prognosticators in and out of Government expected for our economy.

Much Government policy, particularly Government monetary—for interest rates—policy, hinges on expectations of the status of our economy. The Federal Reserve Board has persisted in following policies on rediscount rates and open-market operations that reflect a concern that the economy may boom ahead too fast; that is, with employment demand creating labor shortages, factory capacity pressing to the limit, profits, and the stock market prices soaring.

The Federal Reserve policies have had the effect in the judgment of most monetary specialists, of restraining these forces, but what is the situation in which we find ourselves now?

The latest figures on employment from the Bureau of Labor Statistics indicate that unemployment is now higher than it has been in any month since we emerged from the recent recession and higher than the average for any year—including recession years—in this decade. Far from a labor shortage, we have a serious labor surplus—literally millions—demanding and needing work.

Is this a time for more monetary restraint, higher interest rates by the Federal Reserve Board—to throw more millions out of work?

Is factory capacity utilized fully? In autos, machine tools, aircraft, chemicals, and almost any other field one can mention, our factories are far below capacity. Indeed, in some industries a third of the plant facilities are now lying idle. The great bellwether of American industry—steel—which was expected to careen along at near 90 percent of capacity during most of this quarter, is now expected to sink to 75 percent of capacity. Think of it—the record-long steel strike is only a few months over and one-quarter of our steel plant is already idle. Is this a time for more restraint of production by the Federal Reserve Board? Do we want more idle factories?

Are stock prices shooting through the stratosphere? The stock market—that not always clouded crystal ball of economic things to come—seems to be predicting a further industrial torpor. Stock prices are slipping down once again near to the level to which they fell during the mid-December to February 1 toboggan ride. Certainly there is no sign of inflation expectation in the sensitive minds of the men who invest the Nation's equity money. Should the Government follow policies likely to submarine the stock market even further?

There is no question in the minds of outstanding monetary economists, that the policy of keeping the money supply low in relation to the gross national product not only drives up the interest rate, but otherwise puts a restraint on the whole economy.

How about profits? Can we expect them to move ahead?

Mr. President, I call as witness this morning's Wall Street Journal. Profits are one of the best indexes of the health of this free enterprise economy of ours. Let us take a look at what the Nation's leading financial daily says about what we can expect in the way of profits in this second quarter of what many persons expected to be booming 1960.

The Wall Street Journal points out that there are four industrial groups which reported declines in profits for the first quarter compared with a year earlier. They are the aircraft makers, the nonferrous metal and mining companies, the railway equipment producers, and the railroads.

The Wall Street Journal points out that the aircraft group in the second quarter might not show as big a drop from 1959 as the first quarter decline of 38.7 percent, but it seems unlikely to bring it in a gain.

The Wall Street Journal also points out that among the metal group in the current quarter better results are likely, perhaps equaling or slightly exceeding those of a year ago, unless the price of copper, now a bit above that of a year ago, falls. So there will be very little difference in the metal group.

The railway equipment makers, according to the Wall Street Journal, expect their profits to be below those of a year ago.

As for the railroads, the Wall Street Journal reports that they showed a decline of 2.1 percent for the first quarter, even though the two biggest, the Pennsylvania Railroad and the New York Central, did better than a year earlier. The Journal indicates, however, that the second quarter for the eastern roads is not likely to be as good as last year's second 3 months, when a pre-steel-strike inventory buildup by steel users expanded traffic. Consequently they expect the railroads to show lower profits.

This great financial daily goes on to relate:

> More important even than these, however, is the prospect that overall corporate profits in the second quarter may not equal those of a year earlier.

With respect to steel and other industries, the Wall Street Journal notes that the steelmakers, as I said a moment ago, expect production to decline below 75 percent before the current period is over.

In the auto field, according to the Wall Street Journal, the outlook is for a second quarter earnings decline, even though General Motors seems likely to hold its own.

In building materials, the second quarter earnings most likely will not be above the like period of a year ago.

Chemical producers expect to equal or slightly exceed the profits of a year ago in the second quarter.

Drug manufacturers, for the most part, look for a continuation of small increases in earnings over 1959 following a first quarter gain of 9.2 percent.

Electrical equipment makers may do about as well this quarter as a year ago.

Food producers: Packers of grocery products appear to be extending the substantial gains made last year and also in the first quarter, but some outstanding leaders in the industry say it may not necessarily hold true for the year as a whole.

Oil company earnings for the second quarter, particularly companies with large domestic operations and companies with more refining than producing business, are unlikely to do as well as a year ago because of weak prices for products.

It is that way all along the line.

Mr. President, this does not sound like the kind of situation in which the Nation's money managers should continue to hike rediscount rates and sell Government obligations, thereby tightening the supply of money, boosting interest rates higher and higher, discouraging an already slumping housing industry, and tightening this economy of ours in a vise of restraint.

Mr. HARTKE. Mr. President, will the Senator from Wisconsin yield?

Mr. PROXMIRE. I yield.

Mr. HARTKE. The Senator from Wisconsin has a wonderful message for the Senate and for the people of the United States. I think it is high time this matter was brought to the attention of the people of the country.

Mr. PROXMIRE. I thank the Senator from Indiana.

Mr. President, I say it is time for a long, hard look by our money managers. Let them carefully consider buying Government obligations, lowering the rediscount rate as soon as possible, and moving ahead. This is 1960, when 4 million Americans are out of work. It seems to me that at such a time, when we are concerned with the very serious challenge from Russian communism, we should reappraise our economic policies and recognize that we can move ahead and do so without the expansion of the money supply, which would result in inflation.

The fact is that the theory of monetary management is very simple and is widely accepted. It is true that by expanding the money supply in relationship to the gross national product—the money supply, of course, being currency and demand deposits—there is a tendency for interest rates to drop. There is a tendency for business to borrow. There is a tendency for people to build more homes. All those things can be inflationary and ill advised if there is a shortage of labor, a shortage of factory facilities, and a shortage of facilities for making steel and other building materials.

But at a time when there is a surplus of labor and a surplus of factory capacity, it seems to me that it is exceedingly unwise to follow a policy of restraint, which puts the screws on the economy. It seems to me that the lead article in the Wall Street Journal this morning is eloquent testimony as to why the Nation's money managers should reconsider their monetary policy.

Mr. President, I ask unanimous consent that the article entitled "Profits Likely To Slip to 1959 Level or Below in Current Quarter" be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Apr. 29, 1960]

EARNINGS SLOWDOWN—PROFITS LIKELY TO SLIP TO 1959 LEVEL OR BELOW IN CURRENT QUARTER—STEEL, AUTO FIRMS EXPECTED TO TRAIL YEAR AGO—TREND MAY CUT FEDERAL SURPLUS—REPORT ON 389 CORPORATIONS

Corporate profits in the first quarter exceeded those of a year earlier but are likely to slip back to the 1959 level or lower in the second quarter.

Those conclusions emerge from a Wall Street Journal's survey of early earnings reports for the first 3 months and of profits prospects for the current quarter.

In the first quarter, 389 companies earned $2,128 million, an increase of 6.6 percent from their aggregate profits in the first 3 months of 1959. Of 22 groups divided according to industries, only 4 recorded year-to-year declines in profits. But only two, the textile group and the tool and machinery division, achieved gains of 20 percent or more. Among the rest, the largest increase was 10.9 percent, for food products.

EFFECT ON FEDERAL BUDGET

The generally narrow improvement for 1960 so far over 1959, and the prospect that there may be no gain at all in the second quarter, add up to less than full support for the Federal Government's hope of a $4.2 billion budget surplus in the fiscal year that will start July 1. Corporate income tax collections for that fiscal year will come from earnings in calendar 1960. When President Eisenhower in January announced his budget for the approaching fiscal year, his revenue projections were based in part on an estimate that in 1960 corporation earnings before taxes would total $51 billion.

If the 6.6 percent first-quarter increase for the companies in the survey holds for all U.S. corporations, which earned at an esti-

mated annual rate of $46.5 billion in the first quarter of 1959, their first 1960 quarter rate will turn out to be $49.5 billion.

And if second-quarter profits are almost, but not quite, equal to those of a year earlier they'll be at the annual rate of $52 billion. Averaging the first- and second-quarter figures produces an annual rate of pretax corporate profit for the first half of $50.7 billion, or very close to the $51 billion which the budget counts on for the full year 1960. With the corporate tax rate at 52 percent except for small companies, each dollar of pretax corporate profit, of course, means about 50 cents of Federal income tax revenue.

The four industrial groups reporting declines in profits for the first quarter from a year earlier were the aircraft makers, the nonferrous metal and mining companies, the railway equipment producers, and the railroads. The aircraft group in the second quarter might not show as big a drop from 1959 as the first-quarter decline of 38.7 percent, but it seems unlikely to bring in a gain. Douglas Aircraft, which lost money in the first quarter, expects to be barely in the black in the second, and United Aircraft expects to continue to earn somewhat less the rest of this year than last year, its first-quarter drop having been about 17 percent.

COPPER STRIKES HIT PROFITS

Among the metal group, the 8.9 percent decline in the first quarter from 1959 was due largely to strikes in the copper industry, which more than offset the effect of a somewhat higher price. In the current quarter, better results are likely, perhaps equaling or slightly exceeding those of a year ago, unless the price of copper, now a bit above a year ago, falls.

Among railway equipment makers, the 10.6 percent drop from 1959 in the first quarter was caused almost wholly by a decline in Budd Co.'s earnings. Budd's decline stemmed largely from purchases of high-cost steel following last year's steel strike. For the second quarter, this Philadelphia company still does not expect earnings to equal the like 1959 period. Another concern in the same field, American Steel Foundries in Chicago, expects earnings in the current period to be "substantially the same, maybe slightly ahead of 1959," according to Joseph B. Lanterman, president. A small gain would repeat the first quarter's experience.

As for the railroads, they turned in a decline of 2.1 percent for the first quarter even though the two biggest, Pennsylvania Railroad and New York Central, did better than a year earlier. However, the second quarter for the eastern roads isn't likely to be as good as last year's second 3 months, when a pre-steel-strike inventory buildup by steel users expanded traffic. Carloadings for the Nation as a whole recently have been running under those of a year ago.

STEEL, AUTO EARNINGS MAY BE DOWN

More important even than these, however, in the prospect that overall corporate profits in the second quarter may not equal those of a year earlier, is the position of the steel and auto industries. The steel makers as a group earned 9.8 percent more in the first quarter than a year earlier, with production averaging 93.8 percent of capacity against 83.8 percent a year earlier. Now, however, production is slightly under 80 percent, compared with an average of 91.8 percent for the second quarter of 1959, and it threatens to fall below 75 percent before the current period is over.

Furthermore, even though production in the first quarter was slightly higher than in last year's second quarter, the earnings of most steel producers were somewhat less. The main reason is the wage costs are up following the strike, while prices aren't. Thus, a substantial drop from a year earlier in second quarter earnings is strongly indicated.

In the auto field the outlook is for a second quarter earnings decline, even though General Motors seems likely to hold its own. General Motors, whose first quarter was a record, is experiencing strong demand for its big cars this year, with the compact Corvair accounting for only 8 percent of its auto output. The compacts, of course, are less profitable than the bigger models. Furthermore, General Motor's production this quarter looks as if it might exceed a year ago by perhaps 5 percent.

But Ford, which earned 6 percent more in the first quarter than a year earlier, probably won't do as well as a year ago in the second. Production may be close to last year's level in number of cars, but almost 50 percent of Ford's output is now in compacts. Chrysler likewise is feeling the profit squeeze from the compacts, and Studebaker-Packard's Lark is suffering from the competition of the other makers' compacts. Only American Motors, which expects to produce 140,000 cars against 116,500 a year earlier, seems sure to turn in an earnings gain.

Trends in some other groups are detailed below:

Building materials: Second quarter earnings "most likely won't be above" the like period of a year ago, according to Robert E. Bundy, president of Potlatch Forests, Inc., big Northwest lumber and paper manufacturer. "We've been expecting the normal spring spurt in building but so far it hasn't developed," he adds. "When the pickup does take place, its effect on prices will be materially softened by huge inventories, and this will hold earnings down." April, May, and June were three of the biggest building months last year, housing starts then were close to the record 1950 rate. The group's earnings in the first quarter were up only four-tenths of 1 percent from a year earlier.

Chemical producers earned 9.8 percent more in the first quarter than a year earlier, and expect to be able as a group in the second quarter to equal or slightly exceed the profits of a year ago. American Cyanamid, which enjoyed a year-to-year gain in the first quarter to 78 cents a share from 68 cents, anticipates "only a slight gain in profits, at best," in the second period. Allied Chemical likewise expects a gain, but not as large as the first quarter's 20 percent increase. On the other hand Du Pont, whose first quarter earnings were off slightly, may not match the earnings of a year ago in the second quarter either, reflecting the effects of price cuts in a number of products that began late August and stretched through into the early months of this year. Union Carbide also won't equal a year ago in the second quarter.

Drug manufacturers for the most part look for continuation of small increases in earnings over 1959 following a first quarter gain of 9.2 percent. A few are suffering from price competition, which is hitting some antibiotics, polio vaccines and vitamins, among other products.

Electrical equipment makers may do about as well this quarter as a year ago. Their first quarter overall showing was an increase of 8.4 percent, led by sharply higher earnings for Westinghouse Electric, which has been conducting a cost-cutting campaign. Holding down profits currently are two facts: Recent increases in new orders won't be translated into shipments until later this year and there's some cutting of both production and prices in appliances.

Food producers: Packers of grocery products appear to be extending the substantial gains made last year and also in the first quarter, although Harold W. Comfort, president of Borden Co., says the rate of earnings increase of the first quarter "may not necessarily hold true for the year as a whole." The group as a whole gained 10.9 percent over a year ago in the first quarter.

Oil company earnings in the first quarter were up 8.7 percent for the group as a whole, but more than half of the gain was that of Gulf Oil Corp. Most reporting companies did little better than a year earlier and some showed declines. For the second quarter, companies with largely domestic operations and companies with more refining than producing business are unlikely to do as well as a year ago because of weak prices for products. International concerns benefiting from the higher growth rate of consumption abroad than here may show up more favorably, even though oversea oil prices are also under pressure.

Paper and paperboard: With output in the first quarter at a new high, 8 percent above a year earlier, the earnings of the pulp and paper group were up 7.6 percent. Further gains are expected, though not at quite such a good pace. The American Pulp & Paper Association is estimating consumption for the whole year will be up 3 or 4 percent. Price increases in several paper products are being put through and these will help boost earnings in the current quarter.

Textile profits in the first quarter were up a sharp 38.9 percent over a year earlier owing to price increases on goods ordered in the fourth quarter of 1959 and delivered in the first 3 months of the year. For the current 3 months another sharp gain is expected for the same reason: Backlogs of orders for delivery now and written in recent months at prices representing substantial margins over mill costs. These higher prices, marketing specialists believe, pretty well anticipated wage increases posted in March and April. Order backlogs, however, are being pared by current high production, which may depress the earnings rate after midyear.

Tobacco earnings in the first quarter were up 7.6 percent over a year earlier, with three major companies reporting record profits. Industrywide unit cigarette sales continue to run 2½ to 3 percent ahead of 1959, with gains coming both from the increasing population of teenagers and further expansion in the number of women smokers.

Machine tool builders turned in a first quarter improvement of 21.9 percent in earnings, but probably won't do that much better than a year ago in the second quarter. Shipments, on which earnings depend, are now running about $40 million a month for cutting tools, the major category, not a great deal higher than the $37 million shipped in June last year after a sharp rise from the first quarter of 1959.

ADMINISTRATION'S FAILURE TO REAPPOINT CONNOLE MEANS THE CONSUMER IS THE FORGOTTEN MAN AND WOMAN

Mr. PROXMIRE. Mr. President, I feel it is essential that we get to the bottom of the reason why William R. Connole, the long champion of the consumer on the Federal Power Commission, is not to be reappointed when his term ends this June. A number of theories have been advanced as to why Mr. Connole is being dropped. It is being alleged, on the one hand, that there has been pressure from oil- and gas-producing interests who have been irritated at Mr. Connole because of his frequent dissents from otherwise unanimous FPC decisions. It is well known that the Supreme Court has backed up Connole's point of view on several occasions. Doubtless if the FPC were unanimous in those decisions which

insufficiently protected the consumers' point of view, it would be more difficult to raise a public outcry about them.

As Petroleum Week for June 19, 1959, said:

> Connole has become something of an enemy in the view of many gas producers.

Petroleum Week also said of Connole:

> But he has the respect of those who disagree with his views. "He is smart, he works hard, and he does his homework," says one Washington gas industry representative. "When he takes a stand on a case, you can argue his theory but seldom his knowledge of the case."

Connole may have heightened the sense of irritation of the gas producers by speaking out consistently for a national fuels policy, a program supported by many of us who believe that an overall, rational comprehension of the Nation's energy needs and resources is absolutely essential.

On the other hand, the administration itself may be irritated by Connole's frequent dissents, which spoil the facade of team play so admired by the President.

The administration simply does not seem to understand the meaning of the words "independent" and "regulatory" as applied to an agency which is charged with the supervision of a basic industry. This is a further example of a small-bore obtuseness which seems to prevent the administration from comprehending that merely being cozy with the industry is not enough. Alone on the present commission, Mr. Connole has maintained that the costs of production are a crucial factor in determining rates. He has been the FPC's strongest proponent of the view that regulation should hold prices to the consumer to levels justified by costs. This is the observation also of Petroleum Week, which is a competent McGraw-Hill publication, and which certainly has no ax to grind against the petroleum industry.

This raises the pertinent question: Was the decision not to reappoint William Connole to the FPC a policy decision? Does the administration dislike his frequent dissents based on the belief that the cost of production ought to be used to determine the cost to the consumer?

Can a member of an independent regulatory agency, appointed as an independent or as a Democrat, as was Mr. Connole, expect to be dropped if he does not go along with the Republicans on the body?

Was this a Cabinet decision? The most persistent charge that we have heard has been that the pressure came from influential members of the Republican National Committee from oil- and gas-producing States who won the day for the big producers. Is this true?

The fact is that the public utilities commissions of many States, as well as the Great Lakes Conference of Railroad and Utilities Commissioners, comprising the regulatory boards of 10 States and the District of Columbia, have endorsed the reappointment of William R. Connole. The mayors of leading American cities have called for the reappointment of Mr. Connole as the one, lone champion of the consumer on the FPC.

In recent weeks, since word has leaked out that he might not be reappointed, we have seen a virtual torrent of testimonials supporting Connole pour in on Washington from spokesmen for the gas- and oil-consuming public all over the United States.

The President now says he thinks he can find a "better man" for the post. In my opinion, if he is looking, as he most certainly ought to be, for a man who knows the ins and outs of public power as well as anyone, a man who has a proven record of intelligent regulation to protect the consumer, who has spoken out consistently for the intelligent allocation of the Nation's energy resources, and one who has won the confidence of public-utilities experts in all the main gas- and oil- consuming areas, then the President can find no "better man" than William Connole. He seems to have been good enough for Mr. Eisenhower 5 years ago, when he was first appointed. Since that time he has carved a brilliant reputation as a hard-working, intelligent, respected, and well-liked Commissioner. If the President does not intend to reappoint him now, he owes the Senate and the people of the United States a better explanation than the ungracious sentences he uttered at his press conference earlier this week, when he simply said he could find a "better man."

Mr. President, I have discussed this appointment with a number of Senators. I find universal concern and curiosity about why Mr. Connole was not reappointed. I also find, on the part of Senators who have dealt most closely with the Federal Power Commission and with Mr. Connole, a conviction that this man not only is a person who is willing to vote against a majority in favor of the consumer, but that he is peculiarly endowed with a drive which very few persons in regulatory agencies have—the word "drive" recurred repeatedly with regard to Mr. Connole—a real conviction and determination to bring about a change in the regulation of companies, and in the interest of the consumers.

Petroleum Week, from which I have already quoted, said that Mr. Connole "has strived for an early and workable method of determining producer gas prices."

In other words, Mr. Connole does not simply say "No" to the big producers; he tries to work out some constructive alternative, some way in which regulation can be achieved, for the protection of consumers, instead of simply voting against the positive proposals of the oil and gas industry itself.

Another reason why this is a peculiar failure on the part of the President is that the petroleum industry itself expected Mr. Connole's reappointment. The same article to which I have referred in Petroleum Week said:

> Connole's present term on FPC expires next June, and he is expected to be reappointed to another 5-year term.

HERBLOCK EXPOSES WHAT THIS MEANS

All the words in the world cannot begin to be as persuasive or eloquent as a graphic cartoon, particularly a graphic cartoon drawn by the hand of that great molder of public opinion who draws for the Washington Post and Times Herald and for many other newspapers throughout the country, Herblock. This morning's Washington Post and Times Herald carries a cartoon by Herblock on this issue. It depicts the FPC Commissioners as automatons or robots under the control of the natural gas interests they are supposed to regulate, and Commissioner W. R. Connole sitting by himself, alone, individually, independent, a real person. It also shows President Eisenhower observing the situation and angrily saying to Connole, "You just don't seem to fit in here."

Mr. President, I think this is the kind of serious, tragic mistake the administration will have to live with for a long, long time. The administration talks often about inflation, and speaks, I think sincerely, against inflation. Here is one way in which the administration is failing dismally to protect the consumers from rising prices. The price of natural gas rose seven times as fast as other commodities in the past few years. This hits millions of consumers squarely in the pocketbook. The way to stop this, Mr. President, is by seeing to it that those on the regulatory agencies who supervise great industries like the power industry will fight for the consumer. When a Commissioner is found who is willing to fight for the consumer and willing to fight to keep prices down and willing to fight against inflation in a specific way, the result is that he fails of reappointment because, somehow, he does not fit in, and the President thinks he can find a better man. Let every gas consumer in America take careful and thoughtful note.

FARMERS ORGANIZED TO BARGAIN FOR DECENT INCOME IN BARGAINING POWER ECONOMY

Mr. PROXMIRE. Mr. President, as so often happens, the Wall Street Journal scored another clean economic beat this morning. The Nation's great financial daily turned its searchlight on the answer to a problem which has troubled many Americans; namely, What are the farmers going to do about a situation which has brought their income down to the bottom of the economic pyramid, in spite of harder, longer work and greater improvement in efficiency than any other substantial economic group in America?

To many of us, the theoretical trouble with the farmer has been obvious: in a bargaining power economy in which business, labor, and professional persons are strong and organized, and able and willing to limit their production to what they can sell at a fair price, the farmer—almost alone—is the victim of feeble bargaining power and erratic or nonexistent control of production.

For years, of course, farmers have tried to overcome this weakness by organization to bargain and negotiate. To date, the vast majority of farmers have been unsuccessful in this, although, in California, fruit-growers cooperatives, and, in some milk-marketing areas, dairy farmers organized behind Federal marketing orders have shown that the theory

of organization can pay off handsomely in higher prices and greater income for farmers.

This morning's Wall Street Journal reports that the National Farmers Organization, in the Midwest, is now trying to develop the kind of bargaining power that comes from organization to control marketing—out in the Midwest.

Incidentally, Mr. President, I may say that this organization perhaps is unusual, in that, by and large, it is not a group of economic liberals. It is a group of people who dislike having Government regulation or Government interference; and they are providing this kind of organization as an alternative to Government action. I find it interesting to note that among the leading organizations referred to in the article in the Wall Street Journal is the American Farm Bureau Federation.

The development of the National Farmers Organization is in recognition of the fact that something has to be done; and if it could be done on a private basis, by having individual farm groups organized, so much the better.

At any rate, Mr. President, I predict that this movement may, in one manifestation or another, bring the dawn of a new day to the American farm economy. In one way or another, this No. 1 economic injustice in America—the brutal erosion of farm income—must be stopped; and in a bargaining power economy, the National Farmers Organization may be pointing to at least part of the answer.

Mr. President, I ask unanimous consent that the article from the Wall Street Journal be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Apr. 29, 1960]

BARGAINING FARMERS—THEY SEEK PRICE PACTS WITH FOOD PROCESSORS AS WAY TO LIFT INCOME—HOGS ARE HELD OFF MARKET TO PUSH UP PRICES; OTHER DISPLAYS OF POWER SLATED—BORROWING TACTICS OF LABOR

(By Richard F. Janssen)

OMAHA, NEBR.—A dozen men recently were keeping a 24-hour vigil over trucks entering the big stockyards here. They shuffled about a bit uneasily as they waited under a freshly painted "No Soliciting" sign, knowing that elsewhere some of their cohorts had been whisked off to a police station. But they carefully recorded the ownership and contents of each hog truck rolling into the yards.

Though they looked and acted much like union pickets, the men actually were farmers, members of the militant, fast-growing National Farmers Organization, based about 75 miles away in Corning, Iowa. Disenchanted with costly Federal efforts to bolster their declining incomes, these farmers are trying to borrow a powerful tool from the labor unions—collective bargaining.

The NFO's first aim is to demonstrate its power by periodically holding hogs off the market; the pickets at the Omaha stockyards were checking on the success of one such effort. In this way, the organization hopes to get packers to pay the prices it demands. The NFO's ultimate aim is to induce all food processors to sign bargaining pacts which would let regional NFO units negotiate on the prices farmers receive for their products.

The NFO openly envies the unions' ability to win wage boosts, and claims greater bargaining power is the chief need of the farmer.

CAUGHT IN A SQUEEZE

"When the farmer buys something in a store," says Oren Lee Staley, NFO president, "he pays the price the seller sets. But when the farmer goes to market, all he can do is sell his products for whatever price the buyer offers him." The NFO argues that because labor exerts strong control over wages, and industry over prices, the farmer is caught in a severe squeeze. It insists that farmers must work together to free themselves from the squeeze, rather than depend on the Government.

While the NFO is clearly carrying the ball, other farm groups are also beginning to look hopefully toward collective bargaining.

"Farmers need to improve and organize their bargaining and marketing tools and use them to make the market price system function better," says Charles B. Shuman, president of the big and conservative American Farm Bureau Federation. The National Grange agrees that the farmer needs collective bargaining power, and an official adds, "This approach dominates the thinking of most intelligent farm leadership today."

A number of New Jersey poultry farmers feel so strongly about bargaining power that they have decided to join the Teamsters Union. The Teamsters also are claiming a breakthrough in getting some Greenville, Pa., dairy farmers into a Pittsburgh local of the big truckdrivers' union. Generally, leaders of farm organizations argue that farmers should not join labor organizations.

Of course, farmers have been banding together for years in order to serve their interests better. Cooperatives have sprung up in large numbers around the country. Co-ops aid farmers in marketing their produce but seldom bargain with processors over prices. The NFO aims to bargain with processors but would let individual farmers continue to market their own goods.

COSTLIER FOOD

If the NFO and perhaps other groups are successful in making collective bargaining the rule for farmers, consumers could almost surely expect to pay more for food. Firm control of marketing by farmers themselves also could regulate the Government to a standby role, sparing the taxpayer the heavy burden of supporting price-propping operations.

It is by no means certain that the NFO will be successful, however. It faces a formidable task in convincing farmers to hold back their products for long. In the past farmers have been hesitant to do this because crops might spoil and livestock might get overweight before they are marketed. Then, too, food processors have considerable economic power, and might be able to outlast the farmers. Furthermore, farmers risk public indignation if they do try to hold foodstuffs off the market in large enough quantities to seriously affect supplies.

Farmers have met with failure in earlier attempts to gain control over prices, and many observers believe the NFO probably won't fare any better. In the depression of the 1930's, farmers' strikes sometimes flared into violence, and were quelled by law enforcement officials. Such examples don't daunt the NFO leaders, however, since they studiously avoid violence and believe that existing Federal law actually provides them with a framework for a permanent bargaining mechanism.

For a better idea of how the NFO intends to achieve its aims, visit its office on Corning's steep main street. Husky, dark-haired Mr. Staley jubilantly tells some of the results of the 9-day hog holding action early in April: "On 1 day the stockyards at St. Joseph, Mo., only got 2,037 hogs, according to our count, while they had estimated 2,600." The week before the holding action, the same yards received about 5,000 hogs, Mr. Staley says.

The true impact of the holding action is clouded by the claims of yards officials that receipts were held down mainly by flooded roads, but Mr. Staley contends that, on the contrary, the roads were in worse condition the week prior to the holding action than they were during it. At any rate, hog receipts at the 12 major markets involved in the April 4–12 holding action were 8 percent under those of the comparable 9 days of March 21–29. From just before the test until the day after it was called off, the top hog price at Chicago advanced 65 cents to $17.25 a hundred pounds. The NFO was shooting for $19.60, but it must keep its holding actions short because hogs get too fat when held much beyond their regular marketing time.

NFO leaders say the holding action is one of a number planned to prepare for a full-scale effort some time in the future when farmers will be asked to keep all their products off the market in a brief demonstration. If this convinces processors they should bargain, they'll meet with NFO committees in each natural marketing area. Under existing Federal law, these negotiators could establish prices with the approval of two-thirds of the local farmers. The NFO's 3-year membership agreements provide that at such time the $25 annual dues would be replaced by a checkoff of 1 percent of gross sales.

Another purpose of the holding actions is to test the NFO's own organization. Leaders say they have been pleased with the results. According to Mr. Stanley, the NFO "can now contact every farmer in the Midwest in 5 or 6 hours." This is done primarily through some 10,000 so-called minutemen, each of whom is responsible for getting the word to about 35 other farmers. At the time of the NFO's first holding action last October, there were only 2,000 minutemen.

DAILY NEWS BULLETIN

Mass communications have been expanded, too. For the first time, the NFO issued a daily news bulletin during the April action. Copies were printed simultaneously in 24 scattered plants in the afternoon, and distributed the same evening. Many members picked up their copies reporting on the day's action as they attended almost nightly rallies in their local areas. The group also distributed 225,000 handbills and paid for spot announcements on 60 radio stations. It sponsors a continuing series of weekly television commentary programs in six Midwest cities, and publishes a monthly newspaper.

How big is the NFO? Officers won't divulge precise membership figures, but one source close to the organization believes its membership has tripled in the past 6 months or so. Groups with at least 25 members have been chartered in more than 275 midwestern counties, and organization is under way in about 25 more, NFO officials say. The NFO's strength centers in Iowa and Missouri, but footholds, at least, have been gained in Illinois, Wisconsin, Minnesota, Kentucky, Nebraska, Michigan, South Dakota, Kansas, and Indiana.

The NFO has climbed to its present prominence from a small protest meeting about low farm prices held by a group of Corning farmers at the local livestock auction barn in September 1955. The group set out originally to seek favorable Federal legislation but in 1957 decided instead to plug for collective bargaining. This switch in objectives soured some of the original members on the organization. Among them was peppery, 83-year-old Daniel W. Turner, farmer and former Governor of Iowa. Mr. Turner declares: "I don't want to starve

people into submission, and I think it's physically impossible anyway." Mr. Turner also worries about too-friendly relations with labor unions; the NFO has received a $3,000 contribution from the United Auto Workers and support from both the UAW and United Steelworkers of America. The NFO, in turn, endorses certain union-backed legislation.

But even the NFO's critics endorse the zeal and sincerity of the present leadership. Mr. Staley, president since 1955, has placed his 385-acre farm at Rea, Mo., under a hired hand so he can devote all his time to the $150-a-week presidency. He is busy almost constantly with speeches, conferences, and phone calls, and stays in his office 24 hours a day during periods of peak activity.

The rank-and-file members appear no less eager to work. Thousands took their turn during the April action to spend tedious 8-hour shifts checking hog shipments around the clock at many yards and receiving points. When police near East St. Louis picked up some NFO men for questioning, replacements quickly came forth and some 400 members of the organization gathered to demonstrate their support. "This took guts, because our members are respectable farmers who aren't used to that sort of thing," Mr. Staley says.

Behind farmers' support is the fear that the cost-price squeeze which is forcing rising numbers of farmers off the land will soon catch up with them, too. With prices down and costs climbing, farmers' net income last year fell 16 percent from 1958, and farm economists predict little or no improvement for 1960.

"I joined the NFO in January after I had worked out my income tax and found I had made only $2,000, just half as much as the year before," declares 28-year-old Dale Savery, who farms 240 acres at Soldier, Iowa.

NONMEMBERS ENTHUSIASTIC

Some of the same spirit influences farmers who haven't joined the NFO. One local NFO chairman, Ted Schneider, of Warsaw, Mo., estimates that 95 percent of the farmers in his area went along with the April hog-holding action, "and the nonmembers seemed even more enthusiastic than the members, because it was new to them."

A surprising degree of support comes from smalltown businessmen.

"As the farmer goes, so go we businessmen up and down the street," says Paul Gauthier, editor and publisher of the weekly Adams County Free Press in Corning. Adds Floyd F. Whitmore, president of the Okey-Vernon National Bank in Corning: "The average farmers' deposit in the bank is smaller than at any time in the postwar period. The rest of our economy today is more or less organized gang warfare—in such a situation, all the farmer can do is organize himself."

Although leaders of other farm groups say they are dubious about the NFO's chances for success, some are mapping plans for collective bargaining programs of their own.

The Farm Bureau this year incorporated an adjunct called the American Agricultural Marketing Association to aid marketing cooperatives in getting better prices when they contract with food processors. The Indiana Farm Bureau is working toward some type of system which would give tomato growers some measure of control over prices and selling conditions. The National Grange, while not directly involved in a bargaining program, recently announced it believes farmers must "develop programs of collective bargaining with buyers, just as industry and labor have done."

In some segments of agriculture, collective bargaining already is well established. West-coast fruitgrower co-ops exercise tight control over marketing and bargain quite effectively with canners. The Pure Milk Association, a Chicago area dairy farmers' co-op, has been bargaining with dairies for many years, and last fall linked itself with 21 other area co-ops. Altogether they could shut off 95 percent of Chicago's milk, and they credit the added strength with gaining them a prime boost late last year which was much bigger than they were able to get separately the year before.

Another means of buttressing prices is use of Federal marketing orders, which apply to milk and a limited number of other crops, including certain fruits and vegetables. Authorized since 1937, a milk marketing order sets the minimum price that dairies in a certain area must pay for milk. The Agriculture Department sets the price monthly, varying it according to supply and demand factors, but dairy farmer cooperatives sometimes bargain with dairies for a price higher than the minimum. Orders applying to other items regulate the quality and quantity that may be marketed, thus indirectly setting the price.

THE HOPES AND FEARS OF AN ATOMIC TEST BAN

Mr. PROXMIRE. Mr. President, the latest issue of Reporter Magazine contains an excellent summary—written by Chalmers Roberts, of the Washington Post—of the current test ban situation. Dr. Hans Bethe, a top administration adviser on nuclear testing, recently gave a talk which confirms some of the points in Mr. Roberts' article.

Dr. Bethe is concerned about the effect on congressional opinion of last week's test ban hearings before the Joint Committee on Atomic Energy. In his view, the emphasis on possible cheating under a moratorium is misplaced. He disagrees with the view that the Russians would sophisticate their armory of nuclear weapons by conducting small-scale underground explosions, since they already possess a stockpile of warheads to arm their missiles and bombers. So not only would they have a great deal to lose if they cheated—for they might be detected—but they would have little or nothing to gain.

The insistence by some on absolutely foolproof inspection of very small-scale tests hinges on the thesis that there are being developed new nuclear gadgets which would serve some unique military function. Dr. Bethe says there is no evidence that either our stockpiles or their stockpiles are not sufficient for any kind of military engagement.

Dr. Bethe is also concerned about the effect of the hearings and attendant publicity on the present Geneva talks. That situation has resulted in a great deal of behind-the-scenes irritation at Geneva, among the delegates on both sides.

I ask unanimous consent that this revealing article, written by Chalmers Roberts, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE HOPES AND FEARS OF AN ATOMIC TEST BAN

(By Chalmers M. Roberts)

WASHINGTON.—On Tuesday afternoon, March 22, five men sat around a table in one of the State Department's fifth-floor conference rooms. They made up what has been tabbed the Committee of Principals—the men in the Eisenhower administration principally concerned with policy on the nuclear test-ban treaty negotiations. This group, or its predecessors, has met from time to time ever since the Geneva negotiations with the Russians and the British began on October 31, 1958.

The five were Secretary of State Christian A. Herter (succeeding to John Foster Dulles' seat), Deputy Defense Secretary James H. Douglas (sitting in for Secretary Thomas S. Gates, Jr., who was in Europe and who had succeeded to the seat of Neil McElroy), Central Intelligent Agency Chief Allen W. Dulles, the President's science adviser, George B. Kistiakowsky (who had succeeded to the seat of James R. Killian), and Atomic Energy Commission Chairman John A. McCone.

On that Tuesday afternoon they talked for 2½ hours about the latest Soviet proposal, put on the Geneva conference table 3 days earlier, which had raised worldwide hopes that the three major nuclear powers might at long last reach agreement. The public did not then know, as the men around the table did, that British Prime Minister Harold Macmillan had become so alarmed by reports of an American rejection of the Soviet proposal that he was arranging to fly to Washington 4 days later for what turned out to be the Camp David talks.

Macmillan had reason to worry. McCone already had been passing the word to influential members of the congressional Joint Atomic Energy Committee that the Soviets had not really altered their position in the 17 months of talks, that only the United States was making concessions. The same afternoon of the meeting at State the chairman of the Joint Committee, Senator CLINTON P. ANDERSON, of New Mexico, put out a statement saying the new Soviet proffer "has the appearance of a phony" and that the United States was being asked "to buy a pig in a poke." The second-ranking Democratic House member, CHET HOLIFIELD, of California, also had taken a dim view of the Russian proposal and said so publicly.

The Eisenhower administration was in the midst of yet another internal crisis over its policy on a test-ban treaty. This time it was more serious than ever, for the simple reason that a treaty was now at least in sight. Some 17 articles of the draft treaty actually had been agreed on by the three powers, and the remaining differences had been reduced to negotiable proportions.

At the Tuesday meeting McCone led off with a call for rejection of the Soviet proposal. The Russians had said, for the first time, that they would agree with the western proposals to sign a treaty banning tests in the atmosphere, the oceans, and outer space, plus all underground tests which would produce a seismic oscillation of magnitude 4.75 conventional units (the equivalent of a 19-kiloton explosion, about the size of the Hiroshima bomb); that they would join in the western proposal for Soviet-United States-British joint research work to improve detection techniques for the so-called smaller tests underground (those below the 19-kiloton threshold figure), provided that during the research period the United States and Britain would agree to continue the current test moratorium.

It was, of course, this last proviso that caused all the ruckus. A couple of days later the Russians explained that this extension of the moratorium might last 4 or 5 years; and even then, if there were no agreement on how to incorporate the results of the joint research into the detection system, the whole issue would have to be fought out anew. Furthermore, the Soviets said the moratorium on the below-threshold explosions would have to be part of the treaty itself, a treaty subject to ratification by the U.S. Senate with a two-thirds favorable vote.

AN UNNECESSARY JOURNEY

McCone argued, as he was later to say in a speech, that any test suspension "must be

accompanied by a control arrangement which would assure us that this type of testing has been stopped by all parties." Quite clearly, he argued, with nothing more than the Soviets' word to assure that they were not testing underground, there would be no such assurances to the West. Ergo, the Soviet offer was in effect a fraud and should be rejected as such.

But then a strange thing happened. Douglas, only recently promoted from the Air Force secretaryship to the Pentagon's second command post of deputy secretary, argued strongly against McCone. Douglas said that an agreement that would open up the Soviet Union by the stationing of international (including American and British) inspectors inside Russia would be more valuable to the United States than the gains that could accrue to this country militarily from further nuclear testing of weapons and weapon refinements. Douglas argued that the Soviet Union's great strategic assets are its secrecy and its insularity; hence anything that helps to dissolve these assets would be a gain to the West.

Douglas was well aware, of course, of the strong pressures from the military services for continued testing. In fact he had said only 2 days earlier in a television interview that the military wanted more tests in order to produce both lighter and cleaner (fallout-free) weapons. But he added that there is "no end to the technological improvement that you can explore" through continued testing, and that right now the American nuclear stockpile is in "pretty good shape."

There had been signs before that Tuesday meeting of a change in top-level Pentagon thinking, particularly among the civilians. Secretary Gates, in earlier meetings of the Committee of Principals, had begun to talk the same way but not nearly so eloquently. Douglas, indeed, clearly outshone Herter, the chairman of the group, that day as they discussed the Soviet proposal. So too did Kistiakowsky, who strongly seconded the Douglas argument. At least that was the impression of a number of the staff people from the various departments who sat silent behind their chiefs.

Allen Dulles, who tries at these meetings to hold to the role of intelligence estimator, reiterated the thesis that the United States currently is sufficiently ahead of Russia on nuclear weaponry to make a freeze an advantage to this country.

A second meeting of the group the next day settled administration policy, with Herter, Douglas, Dulles, and Kistiakowsky all favorable to a conditional reply to the Soviets and only McCone against. Herter carried the word to the President, who gave it his blessing. All this was done before Macmillan reached Washington, much less Camp David.

At Camp David the two heads of government issued a communiqué saying that they had agreed that once remaining issues had been resolved and a treaty signed, "they will be ready to institute a voluntary moratorium of agreed duration on nuclear weapons tests below that threshold (4.75 on the seismic instruments), to be accomplished by unilateral declaration of each of the three powers."

The reasons for unilateral declarations were two: To avoid writing into a treaty subject to a Senate vote, a moratorium on smaller tests dependent on nothing more than the word of the Soviet Union; and to avoid the constitutional issue of the President's inability to commit his successor beyond the day he leaves office, next January 20. This latter problem was somewhat eased later by statements of most of the Democratic Presidential aspirants that they would look favorably on continuing any moratorium Eisenhower might agree to. Vice President NIXON had been a Camp David participant, so he too was committed to at least the same degree.

The communique in fact was drafted in Washington before the Camp David talks, largely by State with a few changes made at British suggestion. The truth of the matter is that Macmillan's trip was unnecessary; the issue had been resolved here before he arrived. But the stir and the worldwide headlines it created were indications of the terrible problem this administration has faced with almost every move in the long test ban controversy.

No further back than April 27, 1957, Secretary Dulles in a reply to a Japanese Diet resolution calling for a test ban had told the Japanese: "In the absence of an effective agreement regarding the control and disposition of fissionable materials, the United States is obliged, in the interests of free world security, to use portions of its fissionable material to develop and refine its nuclear weapons as the chief deterrent to aggression and war."

At the general disarmament negotiations in London in 1957 the United States had presented a package plan. One provision called for limitation and later a ban on nuclear tests, but even this was conditional on agreement to many other disarmament steps, including the important one cited to the Japanese by Dulles. The Russians, however, would not be swayed from what had begun as a "ban the bomb" campaign in the mid-1950's. They demanded that the testing issue be separated from other arms control measures. This the United States, strongly resisted, although at one time Harold Stassen, then the President's disarmament adviser, leaned toward the idea of a test ban alone. Stassen correctly saw that the three nuclear powers—the French were then still 3 years away from their first test—shared a common interest in preventing other nations from going into the nuclear-weapons business and that a test ban might well bring enough world pressure to do just that. That, of course, is still one of the chief aims of the United States and Britain and presumably of the Soviet Union as well.

UNTYING THE PACKAGE

What brought the United States around to separating the test-ban issue from other arms-control measures was the Soviet announcement on March 31, 1958, that it was suspending its tests. The State Department immediately greeted the announcement with some harsh words: It noted that the suspension came at the conclusion of "an intense series of secret Soviet tests," and it said the West could not rely "on a Soviet statement of intentions for which there is no system of verification, which can be evaded in secrecy and altered at will."

Nonetheless, the Soviet move put a new pressure on the United States, one that Secretary Dulles found irresistible. Adm. Lewis Strauss, then the embattled Chairman of the Atomic Energy Commission and long a public foe of a test ban, fought tooth and nail against any counterproposal from the United States.

In this he was backed by Donald Quarles, then Deputy Defense Secretary, to whom Secretary McElroy deferred on this issue. Quarles agreed with Strauss, arguing that further testing was essential for weapons development and that a test ban, should it last 2 years or more, would result in a breakup of the American nuclear scientific community gathered together by the Government. With no tests to check their work, scientists would drift away to private industry, he argued.

But Secretary Dulles was the strong man on this issue. He sat down in August 1958, and wrote out a statement for the President proposing a year's test suspension, tied only vaguely to "satisfactory progress" on disarmament measures. This was the beginning of the end of the package as American policy.

By the time Secretary Dulles wrote the Eisenhower proposal, McCone had succeeded Strauss. He, too, fought it but to no avail. What made the proposal possible was the agreement, announced the day before, of the Soviet-American-British experts at Geneva on a scheme for an international detection and control system. Few here had thought the Soviets would ever agree, but they did. Dulles saw this as assuring a real control system and he recommended that the President act on it. Eisenhower did.

But that was not the end of the matter. It turned out that the Geneva experts had had few technical data on underground testing on which to base their system, chiefly from the single Ranier test in Nevada some months earlier. Nevertheless, on this basis they constructed a system they said would be adequate to check suspected explosions down to 1 to 5 kilotons. They called for 160 to 170 detection-control stations around the world, some on ships, with a start to be made in the territory of the three nuclear powers—thus avoiding the touchy issue of China for the time being.

Strauss' chief ally in opposing a test ban was physicist Edward Teller, so-called father of the H-bomb. He took the position that disarmament in any form was a lost cause, and he fought against any limitations on testing. If he and Strauss had been cleverer, they would have agreed to a ban on above-ground tests, thus meeting the fallout health issue and relieving the pressure on Secretary Dulles from the British as well as from the Japanese, the Indians, and others. But they were stubborn. And so when Dulles, acting on the experts' report, suggested a year's suspension of testing, he included all testing. Ever since then, the United States has been trying to find some way to wriggle out of this agreement.

The reason for the wriggling was this: In the fall of 1958 the United States conducted its latest round of nuclear tests in Nevada, including some underground shots. Teller was in charge of these latter shots, and from them he came up with data to prove the earlier Ranier data erroneous: That the proposed detection system was inadequate, that the Soviets could cheat on such a system because it was easier than the experts had thought to hide deep underground tests. He had wide scientific agreement, including most importantly the opinion of Hans Bethe, a nuclear physicist of equal rank. It was on the basis of this new evidence that the President altered his total test-ban offer to suggest that unless the Soviets would agree to a detection system improved beyond that recommended by the experts, it would be better first to ban aboveground tests alone. But the Soviets would never let the United States off the hook.

NEW ADVICE

Bethe has played a key role in the whole internal administration controversy. Before the Eisenhower ban proposal of August 1958 the President had become so tired of hearing the arguments over possible Soviet cheating that he had asked his scientific adviser, then James R. Killian, to get him a definitive answer. Killian had been appointed in the wake of the first Soviet sputnik, and for the first time there was in the White House an alternative to Strauss as the source of scientific advice.

Killian named Bethe to head a special panel. The panel concluded that a test ban was a reasonable risk, and Bethe testified before Senator HUBERT HUMPHREY'S disarmament subcommittee that he favored a test ban not tied to any other arms-control measure. He also said that to stop tests would be to America's advantage because of this Nation's technical lead in nuclear weaponry. The same day he testified—some 2 weeks after the Soviet test suspension—

Strauss also testified. He said that to stop tests would be "a tragic mistake" which would leave the United States with "obsolete and obsolescent weapons systems" and which undoubtedly would "freeze our defensive research."

But the President accepted the Killian-Bethe report, which Dulles also found reassuring. Strauss' monopoly at the White House had been broken. Teller has kept on fighting the test ban ever since, but his battle has become a rearguard action; the administration has gone too far to retreat. Bethe, too, has kept at it from the other side, working now with Kistiakowsky, Killian's successor, and thus isolating McCone as Strauss was isolated within the administration.

Once the President did offer the test suspension, which took effect when the current Geneva test-ban treaty talks began October 31, 1958, administration officials had to hew to the line. The opposition in both the AEC and the Pentagon kept saying, however, that the ban depended on adequate inspection and control which the Soviets would never accept.

With the death of Quarles the Pentagon opposition began to soften. Gates succeeded Quarles, and after Herter succeeded Dulles, Gates and Herter saw more eye to eye. The high point came in the Committee of Principals meeting on March 22, when Douglas presented the Pentagon's view in Gates' absence.

Herter is far from the dominant administration figure that Dulles was, but in the internal quarrels he has generally favored banning tests. He is convinced that a ban is worthwhile because such an agreement does not involve a fundamental national security risk (as would be the case with dismantling missiles or nuclear weapons themselves). He also accepts the Stassen thesis that there is a common United States-British-Soviet interest in trying to limit the membership of the nuclear club. He knows that Communist China must eventually be brought into any test-ban agreement, and he is not unaware that to do so will require a change in American attitudes toward the Peiping government. But that headache will face the next administration, not this one.

Secretary Dulles once said he felt there was perhaps a 10-percent chance of agreement on a ban. If so, he said, he was prepared to go through with it. Perhaps the chances are now higher than 10 percent—some in Washington now think they are better than 50–50—but there are bound to be many more difficulties before the signatures are affixed to a treaty.

President Eisenhower has said that some of the remaining unsettled treaty points might be resolved at the summit conference, opening in Paris on May 16. From all appearances, this is the Soviet aim as part of Nikita Khrushchev's top-level diplomacy combined with propaganda. Herter lately has been hinting to the Soviets that they can hardly expect progress on a test ban at the summit if they are going to create a new crisis there over Berlin. This tactic is itself a measure of the belief here that Khrushchev really wants a test ban and is prepared to agree to an adequate inspection and control system.

As to the issue of Senate ratification of such a treaty, a number of important Senators have been quite leery. But as one of them recently put it, once the President puts the weight of his office behind a treaty, not to mention the worldwide pressure it will generate, to vote against it would be "like voting for cancer."

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. PROXMIRE. Mr. President, before I withdraw my amendment, I ask unanimous consent that after I withdraw it, I may suggest the absence of a quorum, and that there may be a quorum call, without having the time required for it charged to the time available to either side under the unanimous-consent agreement.

The PRESIDING OFFICER (Mr. MUSKIE in the chair). Is there objection? Without objection, it is so ordered.

Mr. PROXMIRE. Then, Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment of the Senator from Wisconsin is withdrawn.

Mr. PROXMIRE. Mr. President, at this time I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the call of the roll be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FULBRIGHT. Mr. President, I send to the desk an amendment which I ask to have stated.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. At the end of section 2 it is proposed to insert the following:

(g) In giving effect to the principles expressed in subsection (f) above, the President should not normally regard them as applicable to a situation wherein two or more nations receiving assistance under this Act or surpluses under the Agricultural Trade Development and Assistance Act of 1954, as amended, are engaged in actions detrimental to United Nations efforts to maintain peace and stability, and application of the above-mentioned principles would in the judgment of the President constitute partiality by the United States relating to the merits of the cause advanced by any one of the antagonists.

The PRESIDING OFFICER. How much time does the Senator from Arkansas yield to himself on the amendment?

Mr. FULBRIGHT. Ten minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 10 minutes.

Mr. FULBRIGHT. Mr. President, last night the Senate, by a substantial majority, adopted an amendment to the Mutual Security Act which amounts to political coercion by the United States on behalf of one side to the long-smoldering Arab-Israeli dispute. This amendment contemplates that the President is to use the Mutual Security Act as a club to force the United Arab Republic to open the Suez Canal to Israeli shipping.

The principal reason this amendment was offered was not because of the overall good of the United States, but because of the existence of a pressure group in the United States which seeks to inject the Arab-Israeli dispute into domestic politics. The amendment would not in fact contribute to the reopening of the canal to Israeli shipping, but would, on the contrary, tend to prevent the achievement of this desirable objective—an objective which officials of the United Nations and of our own Government are pursuing, I think, with as much attention and perseverance as they possibly can.

This amendment and recent economic coercion to prevent the unloading of an Arab ship in New York are part of a pattern which I find disastrous in the functioning of our constitutional system.

In what is probably the most delicate international situation which exists in the world today, 180 million Americans find their foreign policy being whipsawed by an irresponsible maritime union and by a minority pressure group.

The President cannot conduct our foreign policy in the Middle East under these circumstances. That policy is being directed by minority pressure groups.

But the problem I would address myself to briefly is broader. It is the problem of the development in this Nation of organized groups which bring into American political life the feuds and emotions that are part of the political conflicts of foreign nations. This is one of the things our Founding Fathers come here to avoid when they created this Nation.

Just as we have witnessed the success of one group in forcing an amendment into the Mutual Security Act, we see other groups trying to force the President to tailor the summit agenda to satisfy other ethnic groups. There is no end to this.

Mr. President, this Nation has welcomed millions of immigrants from abroad. In the 19th century we were called the melting pot, and we were proud of that description. It meant that there came to this land people of diverse creeds, colors, and races. These immigrants became good Americans, and their ethnic or religious origins were of secondary importance.

But in recent years we have seen the rise of organizations dedicated apparently not to America, but to foreign states and groups. The conduct of a foreign policy for America has been seriously compromised by this development.

We can survive this development, Mr. President, only if our political institutions—and the Senate in particular—retain their objectivity and their independence so that they can serve all Americans.

Our constitutional system is such that we do not expect Senators from Florida to vote against oranges, or Senators from the wheat belt to vote against wheat, or Senators from maritime States to vote against maritime interests, or even for Congressmen from predominately ethnic districts to vote against their special groups.

The point is that the Senate, with its special representation drawn two from each State, and serving 6-year terms of office, is expected to be able to override sectional and special interests in order to serve the Nation as a whole. This is especially so in foreign relations. The

Senate by the Constitution is given responsibility in this field different from that of the other body.

Our system of government will not work if the unity which has generally characterized this Nation in support of a foreign policy for all Americans is to be destroyed by lobbies and pressures that become so influential and all-pervasive that the Senate's freedom of choice is lost.

The very amendment which was added to this bill last night in the Senate, and last week in the other body, has also, in committee, been tacked on to the President's recommendation that we create an International Development Association. The Banking and Currency Committee of the other body has voted substantially the same language in the IDA bill now before it. It has not yet been reported, but that language has been voted into the bill in committee, and I am informed that the bill is not likely to be reported if that amendment stays in the bill. Should this consequence flow from the pressure of a small group interested in putting the United States on the side of the Israelis in the Suez dispute, our national effort to get other states to join with us in helping newly developing territories will have been sabotaged from within our own Government.

This is particularly disappointing, because our own Government originated the concept of IDA. In fact, it originated it in the Banking and Currency Committee and the Foreign Relations Committee of the Senate and, in my opinion, is an extremely hopeful organization.

We have already seen what has happened when certain unions in New York—and more recently in Montreal—have refused to handle the cargo of a United Arab Republic vessel. The UAR has responded by instructing its coastal wireless stations to cut their contact with all American ships. And this morning we are informed that the president of the American Merchant Marine Institute, representing 70 percent of the oceangoing merchant marine, has pointed out to the Secretary of State that our industry is being seriously hurt by the action of the unions. This kind of retaliation can result only in political and economic chaos for all concerned.

Mr. President, the foreign policy of the United States is too important to our total national security for it to become the instrument of minorities whose lobbyists stand outside the Chambers of the Congress to persuade the members to follow courses of action beneficial to special interests but with potentially catastrophic consequences for the Nation as a whole.

Mr. President, I wish to insert in the RECORD an article from the New York Times, entitled "Harm Seen in Picketing," by Werner Bamberger, which discusses the ramifications, the wide-ranging problems, that are already beginning to result from the boycotting of the UAR ship in New York Harbor. One curious thing, in view of the long discussion we had on yesterday of the 50–50 shipping clause as it applied in that case to the Indus River Basin, is reflected in this area—not with regard to the Indus River Basin, but with regard to the overall application of the 50–50 clause in the existing legislation, which is still in the law and has been throughout all the years it has been in existence. I draw attention to one paragraph of this article:

> Also reported was the reluctance of American tramp shipowners to submit bids to carry Government surplus grain to the UAR. Half the transportation of these Government-aid cargoes is reserved by law to U.S.-flag ships. These shipments have been the mainstay recently of the sorely depressed U.S.-flag tramp fleet.

That is just another instance of the very evil effects that arise from various groups taking into their own hands the responsibility for trying to correct matters, difficulties, and conflicts that are arising in various parts of the world. I do not think anybody in this body, or anywhere else, does not desire that the Suez Canal be opened for all shipping, including Israeli shipping; but I submit this is not the right way to do it. In fact, this kind of action on the part of the unions will accomplish exactly the opposite purpose.

Mr. President, I ask unanimous consent that the entire article from which I read appear in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 29, 1960]

HARM SEEN IN PICKETING

(By Werner Bamberger)

A spokesman for U.S. shipping told the State Department yesterday that all segments of the American maritime industry are being seriously hurt by the picketing here of the *Cleopatra*, a United Arab Republic ship.

Ralph E. Casey, president of the American Merchant Marine Institute, said that there was every prospect that the situation would deteriorate rapidly in the next 24 hours unless the picket line, maintained by the Seafarers International Union and the International Longshoremen's Association, was removed.

Mr. Casey, in a telegram to Secretary of State Christian A. Herter said that although the industry deplored the unions' action it found itself in sympathy with certain underlying reasons for the picketing as stated by the unions.

The institute represents 70 percent of the oceangoing American merchant marine. Its membership includes operators of passenger ships, cargo vessels, and tankers.

ASKS VIGOROUS STEPS

Mr. Casey urged the State Department to take vigorous steps to reaffirm such principles of U.S. foreign policy as freedom of the seas, freedom from discriminatory action by foreign countries in international trade, and the proper treatment of U.S. citizens abroad.

The *Cleopatra* has been idle at pier 16, East River, since April 13. The unions have been protesting the blacklisting by the UAR of U.S. ships that have traded with Israel and the resultant loss of job opportunities for union members.

Legal action to lift the picket line awaits a ruling by a Federal appeals court here. The court reserved decision on Wednesday on a lower court ruling denying a request for an injunction by the owners of the ship, the Khedivial Mail Line of Alexandria.

With a retaliatory boycott threatened in Arab ports, shipping sources here reported the shifting of some cargoes destined for the UAR, Lebanon, and Jordan from U.S.-flag ships to foreign vessels trading to the eastern Mediterranean.

Also reported was the reluctance of American tramp shipowners to submit bids to carry Government surplus grain to the UAR. Half the transportation of these Government-aid cargoes is reserved by law to U.S.-flag ships. These shipments have been the mainstay recently of the sorely depressed U.S.-flag tramp fleet.

DEAN STATEMENT ASSAILED

The SIU, meanwhile, took sharp exception yesterday to a statement made in Geneva on Tuesday by Arthur H. Dean, leader of the U.S. delegation to the United Nations Conference on the Law of the Sea.

Mr. FULBRIGHT. Mr. President, there has come to my attention some information that just came in over the wire, which reads in part as follows:

> Twenty thousand dockworkers in 20 Arab ports will begin a boycott of American ships at midnight (6 p.m. eastern daylight time) tonight unless American unions stop picketing the United Arab Republic ship *Cleopatra* in New York, an Arab union source said.

I ask unanimous consent that the whole dispatch be printed in the RECORD at this point. I have read the essence of it. I deplore this kind of retaliation. One thing leads to another, and I can see no end to this tendency, if it continues.

There being no objection, the news dispatch was ordered to be printed in the RECORD, as follows:

CAIRO.—Twenty thousand dockworkers in 20 Arab ports will begin a boycott of American ships at midnight (6 p.m. e.d.t) tonight unless American unions stop picketing the United Arab Republic ship *Cleopatra* in New York, an Arab union source said.

The Seafarers International Union has been picketing the *Cleopatra* since April 13 to protest the Arab nations' boycott of American ships trading with Israel. The International Longshoremen's Association has refused to cross the picket lines to unload the vessel.

"The Arab world from the Atlantic Ocean to the Persian Gulf is ready to join the boycott," a source at the International Confederation of Arab Trade Unions said.

Mooring boat and searchlight crews on the Suez Canal will be excluded from the boycott so that American ship passage through the canal will not be affected.

But in all Arab ports covered by the union, U.S. ships will be refused unloading, loading, fuel, repair, food, and dock facilities.

NEW YORK.—Picketing of the only two United Arab Republic ships in North American ports went ahead today in the face of an Arab threat to begin a boycott of all American ships.

The owners of the UAR freighter *Cleopatra* failed yesterday to get a court order removing a 2-week-old union picket line that has prevented loading the ship at its pier here. A picket line at Montreal failed, however, to prevent unloading of the UAR freighter *Star of Assuan*.

Mr. FULBRIGHT. Mr. President, the amendment which I have sent to the desk, which I hope the Senate will adopt, in view of the amendment which was adopted yesterday, I hope will bring the situation a little more into balance, to indicate that while we do regret that there is this conflict in the Middle East, which has led to obstruction to passage in the canal, at the same time we also feel that the other side of these disputes

deserves impartial, dispassionate consideration, and that by the adoption of the amendment yesterday we did not intend in this body to usurp the functions of our executive branch by trying to settle the differences which exist in that very difficult area of the world.

I assume, under the situation which prevails in the Senate, there would be a demand for a yea and nay vote. I assume there is no use in asking for it now, although I am perfectly willing to have the matter voted on now. I assume the amendment deserves consideration overnight, so I will say I expect to call it up, under the ruling, on Monday for discussion and for voting. In the meantime, I think the Members will agree, if they will read the amendment, that it is only a very modest effort to try to bring the language which was put in the bill last night into a better perspective.

The PRESIDING OFFICER. The time of the Senator from Arkansas has expired.

Mr. KEATING. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. KEATING. Surely.

Mr. FULBRIGHT. Mr. President, since we are operating under a unanimous-consent agreement. I think it would be proper, if it is agreeable with the Members on the other side, to ask unanimous consent that there be a yea-and-nay vote on this amendment on Monday, without going through the routine which we agreed to. Is that agreeable?

Mr. DIRKSEN. I think so.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arkansas? The Chair hears none, and the yeas and nays are ordered on the amendment.

Mr. KEATING. Mr. President——

The PRESIDING OFFICER. The Senator from New York is recognized. How much time does the Senator from Illinois yield?

Mr. KEATING. I should like to have 5 minutes.

Mr. DIRKSEN. Mr. President, I yield 5 minutes.

Mr. KEATING. This is not necessarily in opposition.

The PRESIDING OFFICER. Is it 5 minutes from the time on the bill?

Mr. KEATING. On the amendment, in opposition.

Mr. DIRKSEN. The Senator would have his own time on that.

Mr. FULBRIGHT. Mr. President, does the Senator from New York have a copy of the amendment?

Mr. KEATING. No. I was shown a copy, and then it was whisked away. Therefore, I have not had an opportunity to study it.

I am not necessarily opposed to the amendment. I should like to have an opportunity to look it over. I think also that the distinguished Senator from Illinois [Mr. DOUGLAS], who is the principal sponsor of the amendment which was agreed to, and who is known to be in Illinois today, should have an opportunity to be heard.

Perhaps it would not be unreasonable to ask that the Senator from Illinois be heard for more than 2½ or 3 minutes, possibly for as much as 5 minutes. I think that is not an undue request. We are confronted with the parliamentary situation which prevails. We must exhaust at this moment any time in opposition.

Mr. President, I now have a copy of the amendment before me. I should like to propound a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KEATING. The Senate yesterday by a generous vote adopted the exact language which is in the House bill, which presumably will go to the conference between the House and the Senate. In conference would it be possible for the conferees, if this amendment or any additional language is agreed to, to agree to the elimination of this phraseology completely?

The PRESIDING OFFICER. If the Senate strikes out all after the enacting clause and substitutes a new bill, the conferees will then have before them two separate bills.

The Chair will state further that to the extent there are identical sections in the two bills, there will be no differences for the conferees to compromise. As to the provisions which are different, there will be a basis for compromise.

Mr. KEATING. Therefore, since there is a part of this amendment which is identical in both the House bill and the Senate bill, it would not be possible for the conferees to bring back to the Senate nothing whatever relating to this statement of principles?

The PRESIDING OFFICER. In such an event the action of the conferees would be subject to a point of order.

Mr. KEATING. I thank the Chair.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

Mr. KEATING. I yield for that purpose.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. Since the language which was adopted in the so-called Douglas amendment is identical with the language in the House bill, that language would not be in conference.

The PRESIDING OFFICER. The Senator is correct.

Mr. DIRKSEN. Second, this is addenda or additional language, and a variety of things could happen to this additional language. The language could be rejected entirely by the conferees; it could be modified by the conferees; or it could be adopted in toto by the conferees. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. KEATING. I am very grateful to the distinguished minority leader for clarifying the matter.

Mr. President, I ask unanimous consent that notwithstanding the existing unanimous-consent agreement, and in consonance with it, the distinguished Senator from Illinois [Mr. DOUGLAS] and I each be permitted to have 5 minutes under the time for general debate with regard to this amendment on Monday.

Mr. FULBRIGHT. Mr. President, reserving the right to object, it is my understanding that the 2 hours' time on the bill is at the disposal of the leadership.

Mr. DIRKSEN. That is correct.

Mr. FULBRIGHT. I have no objection to the request, actually, in the sense in which it is proposed, but I think there is no need for the request. I hesitate to open the door to every Senator for the making of similar requests. I think the Senator can be given assurance he will have 5 minutes.

Mr. DIRKSEN. Mr. President, if the request is withdrawn, I assure my friend from New York now that both he and my colleague from Illinois will be given 5 minutes from the time allocated on the bill.

Mr. FULBRIGHT. I think that was the understanding, and it is why we provided the 2 hours' time on the bill.

Mr. KEATING. That will be perfectly adequate. I thank the Senator.

The PRESIDING OFFICER. The Chair would like to supplement the statement made in answer to the parliamentary inquiry propounded by the Senator from New York.

If the conferees should bring the matter back to the Senate, and no point of order were raised, the revised version as to which the Senator from New York made inquiry could prevail.

Mr. KEATING. Would any such revision not have to be limited to the language now offered by the distinguished Senator from Arkansas? Would it be open to the conferees to revise in any way the language of the two bills as they stand as of this moment?

The PRESIDING OFFICER. If the conferees should report to the Senate a version inconsistent with the ruling the Chair has already made, the point could be raised by a point of order. If the point of order were not raised——

Mr. KEATING. But the point of order would be sustained if it were raised.

The PRESIDING OFFICER. The Senator is correct.

Mr. FULBRIGHT. Mr. President, I send to the desk another amendment, and ask unanimous consent that a statement I have prepared explaining it be inserted in the RECORD at this point, and that the amendment be printed in the RECORD. I ask unanimous consent that it be subject to the same order previously entered, to be voted upon Monday. There is no point in discussing it today.

The PRESIDING OFFICER. Is the Senator requesting that the yeas and nays be ordered?

Mr. FULBRIGHT. Yes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arkansas? The Chair hears none, and it is so ordered.

The amendment and statement were ordered to be printed in the RECORD, as follows:

On page 18, end of line 13, insert the following:

"It is the sense of the Congress that the refugees wishing to return to their homes

and live at peace with their neighbors should be permitted to do so at the earliest practicable date, and that compensation should be paid for the property of those choosing not to return and for loss of or damage to property which, under principles of international law or in equity, should be made good by the governments or authorities responsible."

STATEMENT BY MR. FULBRIGHT

The language of this amendment following the phrase "it is the sense of the Congress" has been taken verbatim from paragraph 11 of Resolution 194, which was adopted by the U.N. General Assembly on December 11, 1948.

This paragraph has been specifically reaffirmed by a substantial majority of the members of every succeeding session of the General Assembly, including the last one. In some instances, the motion to reaffirm was approved by a voice vote.

In the last session of the U.N. General Assembly, the motion to reaffirm appeared as paragraph 4 in Resolution 1456. It "requests (the word 'request' was underlined) the United Nations Conciliation Commission for Palestine to make further efforts to secure the implementation of paragraph 11 of General Assembly Resolution 194."

Resolution 1456, reaffirming paragraph 11, the paragraph quoted here in my amendment, passed the General Assembly by a vote of 80 to 0, with Israel abstaining. I should add that the United States has faithfully supported each and every motion to reaffirm paragraph 11 of Resolution 194.

World opinion has always supported the principle of repatriation. It has been endorsed by our leading statesmen.

President Truman, in a White House news conference, urged Israel to take back a "certain number" of the refugees. And in 1949 he sent a stiff note to Prime Minister Ben Gurion, expressing deep disappointment at the refusal of Israel to make any of the desired concessions on refugees or boundaries at the Lausanne conferences, and interpreting Israel's attitude as dangerous to peace and in opposition to U.N. General Assembly resolutions.

In August of 1955, Secretary of State Dulles made a major policy statement before the Council on Foreign Relations, in which he tried to advance the case for repatriation of Arab refugees. He noted, by the way, that he was speaking "with the authority of President Eisenhower." He said this:

"To end the plight of the 900,000 refugees requires that these uprooted people should, through resettlement, and to such an extent as may be feasible, repatriation, be enabled to resume a life of dignity and self-respect."

In recognition of the financial strain this would impose on Israel, Mr. Dulles recommended outside help:

"All this requires money. Compensation is due from Israel to the refugees. However, it may be that Israel cannot, unaided, now make adequate compensation. If so, there might be an international loan to enable Israel to pay the compensation which is due and which would enable many of the refugees to find for themselves a better way of life.

"President Eisenhower would recommend substantial participation by the United States in such a loan for such a purpose. Also we would recommend that the United States contribute to the realization of water development and irrigation projects which would, directly or indirectly, facilitate the resettlement of the refugees."

We all are interested in resettlement of Arab refugees in other countries, where they may have the opportunity of becoming productive, useful citizens. But any impartial person who has taken even a cursory look at this problem knows that the refugees must first be given the option of repatriation and/or compensation. Of those who are actively concerned with this problem, I know of none who feels that more than 10 percent, if that many, of the refugees would choose to go home. Of these, most would be older people, wishing to spend their remaining days in the land where they were born. Others would be expected to return only long enough to liquidate claims before opting for another Moslem country.

However, I do not wish to dwell at length on the merits of this issue. With the amendment now before my colleagues, I am merely trying to enlist the support of the Congress for a U.N. resolution that has been endorsed by a great majority of member states, including our own country, in every session of the General Assembly since 1948.

Mr. KEATING. I now yield to the Senator from Pennsylvania [Mr. SCOTT].

Mr. SCOTT. Mr. President, the Congress, by authorizing additional governmental funds for the foreign aid program, is, in effect, providing a stimulus for private enterprise to become more active in other friendly nations. Certainly no one can expect that the American taxpayer can indefinitely finance a foreign aid program. The American people, who constitute only a little over 6 percent of the world's population, have resources which are necessarily limited. However, a great deal can be accomplished if, through our efforts, American firms are placed in a position to assist enterprising firms and individuals in friendly countries to establish their own private enterprise projects.

Our efforts have been directed at maintaining a stable world with reasonable peace so that private commitments can be made with some certainty that they will be fulfilled. During the course of the hearings by the Foreign Relations Committee, one of the leading industrialists of Pennsylvania, Mr. Fred C. Foy, chairman and president of the Koppers Co., Inc., summarized one of the most interesting projects which has been undertaken with the assistance of the Development Loan Fund. This program was carried out in cooperation with a private bank, the Chase Manhattan Bank of New York. It has been of great benefit to Pennsylvania workers since in this instance three manufacturing concerns, all located in Pennsylvania, have cooperated in the planning and financing of a new steel mill in Turkey. In addition to the Koppers Co., they include the Blaw-Knox Co. and the Westinghouse Electric & Manufacturing Co.

It is indeed a satisfaction to those of us who have been urging that emphasis be placed on the promotion of private enterprise that this proposed Turkish steel mill will be privately controlled in a country where all of the traditions have normally favored Government ownership of major production facilities.

Mr. President, the Koppers Co., an organization which has contributed a great deal to the economy of Pennsylvania, has also assisted the nationals of many other countries, particularly in South America, to develop their resources and establish private enterprise economies. In reviewing its activities, I find that the policies of Koppers with regard to the development and operation of oversea enterprises may be summarized as follows:

First. To invest primarily in these foreign ventures where the predominance of equity financing is being supplied by private sources, thus helping to promote the free enterprise system in other countries.

Second. To work closely with foreign nationals in the planning and construction of oversea plant facilities for which a definite need exists, and in the training of local personnel to operate and manage such facilities.

Mr. President, there has been a long-continued interest in bringing American know-how and techniques to the so-called underdeveloped areas. Since 1950 Koppers has invested in nine Central and South American firms. In all but one of these investments, the Koppers equity participation is 50 percent or less. Plants that are partially owned by Koppers are now producing polystyrene in Argentina and Brazil, styrene monomer in Brazil, pressure-treated wood in Guatemala and Jamaica, and steel in Chile. In addition, a Chilean cement plant, partially financed by Koppers, is now under construction. And another Chilean firm, which will be capable of designing and building many types of industrial facilities, is now being formed by Koppers in partnership with an existing Chilean company. Additional Koppers investments are being contemplated in Argentina, Mexico, the Netherlands, India, Pakistan, Turkey, and the Philippines.

In addition to making a direct minority investment in a foreign enterprise, the Koppers Co. has also aided local business interests in underdeveloped countries through technical and management advisory contracts which make American experience and know-how available to newly formed enterprises.

Through such management contracts, Koppers provides assistance on management, finance, production, and marketing and also trains local personnel in the management and operation of industrial plants. Koppers presently has management contracts with seven firms located in foreign countries—four of which also represent Koppers investments. The firms now receiving management assistance from Koppers include two major oversea steel producers: Compania de Acero del Pacifico, S.A.—Santiago, Chile—and Acerias Paz del Rio, S.A.—Bogota, Colombia—and five other companies located in Argentina, Brazil, and Chile.

Mr. President, at a time when we are vitally concerned with the economic development of Latin America, the formation of a Chilean steel company provides a perfect example of what can be accomplished when American business techniques are made available to foreign personnel who are thus in a position to use the raw materials which are indigenous to their country.

Koppers management and technical personnel have worked with Cia de Acero del Pacifico since its inception in 1947. This steel plant now has an annual ingot capacity of 436,000 tons and supplies practically all of Chile's required

steel products. The plant employs 5,500 workers, and total sales last year were in excess of $50 million.

Mr. President, I believe my colleagues will be interested in the statement which was presented by Mr. Fred C. Foy before the Foreign Relations Committee, and I ask unanimous consent that it may be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT ON THE FOREIGN AID PROGRAM ON BEHALF OF KOPPERS CO., INC., BY MR. FRED C. FOY, PRESIDENT AND CHAIRMAN

My name is Fred C. Foy. I am chairman and president of Koppers Co., Inc., Pittsburgh, Pa. My company is a very diversified one, as it serves a broad range of industries. One of our major divisions is a leader in the engineering and construction of steel mills and all allied components. Our engineering and construction division has had wide experience in designing and constructing such facilities not only in the United States, but also in many foreign countries. In addition to building such facilities abroad, we have had a number of contracts to provide know-how on management, production and marketing, as well as the opportunity to help train the staffs of such foreign facilities in the management and operation of those enterprises.

With this background, we would like to tell your committee today something about how our Government's foreign aid program is working practically as we are witnessing it currently in one particular country. We believe this experience will help demonstrate to the committee how the intent of the Congress that our Government agencies and American private enterprise work together to aid less developed countries is being carried out. It illustrates how the principle of private enterprise is being fostered concurrently with giving assistance to other countries in developing their economies and raising their standards of living.

The specific project to which I refer is for the construction of a new integrated steel mill for Turkey, our most steadfast and our strongest ally in the Middle East.

Turkey's major industrial growth has been fostered by its Government largely because of a shortage of both private risk capital and experience needed to undertake the necessary huge expenditures for basic industries such as steel and cement, for transportation facilities, and for power generation. The existing steel mill in Turkey is owned and controlled completely by the Government. It was their intention that a contemplated second integrated steel mill also would be owned and operated by the Government. However, because of the combined efforts of the Development Loan Fund and a group of American companies, this new $200 million mill will be owned and controlled by private enterprise in a country where government ownership and control of such heavy industry has been the practice.

In November of 1958, Koppers was commissioned by the Turkish Government to make a survey of the economic and technical possibilities for a second integrated steel mill in Turkey. After a thorough study of all technical, financial, market, and raw material factors, a report was submitted to the Turkish Government on September 1, 1959. This report indicated that:

1. By 1963 there would be an overall demand in Turkey for at least 1,245,000 metric tons.

2. The existing mill at Karabuk, which makes primarily structural products, would have a capacity after completion of its expansion program of 600,000 metric tons of finished products.

3. The need in Turkey was for a new mill to produce flat products such as plates, sheets, coils, skelp, and the like.

4. In its first stage, the new plant should produce 268,000 metric tons of finished products, and be planned for expansion to 470,000 and 1 million metric tons in its second and third stages, respectively.

In September, soon after the report had been received by the Turkish Government, the Minister of Economy and the Minister of Industry and Secretary General of the Foreign Ministry for Economic Affairs met with the Managing Director of the Development Loan Fund, Mr. Vance Brand, to inquire whether the Development Loan Fund would be willing to consider this second integrated steel mill as another 100 percent government-owned plant.

In the course of this conversation, Mr. Brand discussed with them at some length the values inherent in private ownership and operation of such a mill; the possibilities of interesting American private investors in a part of the equity participation; and the fact that a private enterprise approach would fit more closely into the congressional direction to American lending agencies to stimulate private enterprise wherever practical in development activities throughout the world.

The Turkish representatives expressed a sincere interest in such an approach; advised that they would welcome American participation in a project of this type in Turkey, but stated that because no project of this magnitude existed in the private sector in Turkey they would have to have assistance from the Development Loan Fund in bringing this about.

After further consideration the Turkish Prime Minister and his associates agreed that a private enterprise approach to this second steel mill might well have many values to the Turkish economy; and they advised Mr. Brand that they would undertake to see how one might be developed.

During the month of September while the Turkish officials were in Washington, Koppers representatives met with them to discuss the project. Koppers was later joined by representatives of Westinghouse Electric International Co. and Blaw-Knox Co. in discussions with the Turkish officials concerning the construction and financing of the new steel mill.

These discussions culminated in the signing of a letter of intent on November 11, 1959, in which the Turkish Government agreed to award to Koppers, Westinghouse, and Blaw-Knox a contract for engineering, procurement, construction supervision, and certain equipment for the new plant. As part of their responsibility under this letter of intent, the three U.S. suppliers agreed to work with the Government of Turkey to work out a plan for a corporate structure and financing for the project. It was agreed that this plan would include not only the Turkish private and public sector, but also private investors from the United States. The three U.S. suppliers agreed further to take a substantial equity interest in the new company when formed.

Representatives of Koppers, Westinghouse, and Blaw-Knox proceeded to Ankara, Turkey, arriving on November 22, 1959. After a week of meetings, a protocol was signed on November 29 which formalized the letter of intent, establishing that Koppers, Westinghouse, and Blaw-Knox would provide at least $10 million of equity capital in kind, and establishing the general rules for the formation of the new steel company.

A representative of the Chase International Investment Corp. accompanied the American group to investigate the possibility of private investment by Chase and by other private U.S. investors.

Just prior to the group's departure from Ankara, they were advised that the Turkish cabinet had met on November 29, and approved the principle that the material, equipment and supplies for the new steel mill will be exempt from import duties.

On January 5, 1960, the Turkish officials notified the Development Loan Fund and the American group that the protocol had been ratified by their Government. Upon receiving this notification, the Managing Director of the Development Loan Fund, his chief engineer and loan officer joined the American group in Turkey to determine the procedures to be followed and the additional information that would be required before they could consider a loan for this project.

During this visit the Koppers group and the Turkish officials worked out the details of a founders' agreement for the proposed Turkish steel company, articles of association of the company, and the draft of a special law which would have to be passed by the Turkish Parliament before the new company could be formed. The founders' agreement and the articles of association were signed by representatives of the founders on February 9, 1960. On March 8 we were advised that the special law had been passed by the Turkish Parliament.

Among other things, these documents provide and the law makes possible the formation of a new Turkish steel company, which will be controlled by the private sector. It is contemplated that the total equity capital will be $51,250,000, of which the Turkish public sector will subscribe to $24 million—before disposing of any of its stock—the Turkish private sector $11 million, and the U.S. private sector $16,250,000—when all debentures with warrants are converted to common stock. Although the Turkish public sector will own about 47 percent of the stock, one-half of their stock will be preferred stock with only one vote per share, whereas the balance of the stock will be common stock with two votes per share. The public sector will, therefore, only control 40 percent of the voting power.

The documents I mentioned previously also provide that the Turkish Government eventually will dispose of 100 percent of its participating interest in the new steel company. A definite formula for the disposal of the stock has been worked out, making it an obligation of the board of directors of the new company to see that the stock owned by the public sector will be sold completely to private interests.

It is too early to tell the extent of participation that will be obtained from the Turkish private sector. Our latest advice is that the equivalent of $5 million in Turkish lira had already been subscribed, even before the new company has been formed, and subscriptions are continuing to be filed. It is expected that this total will reach a minimum of $11 million. It is interesting to note that a cooperative association has been formed among the employees of the existing steel mill at Karabuk, and that they expect to subscribe for $5 million Turkish lira—$550,000.

The Turkish businessmen and other investors who are associated in any way with the development of this new Turkish steel company, are very proud of their participation. They expressed great interest in this combined effort of the U.S. Government and American private industry in helping to make it possible for this new tool for their industrial development to be owned and operated as a private enterprise. They view this undertaking as the first major step in the development of a more important role for private investors in the financing of new industries.

We three American suppliers, Koppers, Westinghouse, and Blaw-Knox, are likewise very pleased to have the opportunity to participate with the Turkish Government and its people, and the Development Loan Fund, in bringing this vitally needed facility to Turkey. We are very pleased that we will have financial interest in this new Turkish steel company, as we believe that the com-

bined experience and knowledge of Turkish and American businessmen can result in the establishment of an economically sound and profitable enterprise.

It has been very helpful that the Chase International Investment Corp. has been carefully studying the new Turkish mill as an investment possibility. From a financial point of view, Chase has made some extremely valuable suggestions, making this venture attractive to American investors interested in the international field.

We are confident that with the combined strengths of the Turkish and United States private and public sectors brought to bear upon the undertaking, this large-scale privately operated venture will have important long-range benefits for the Turkish Government, the Turkish people, and the Turkish economy.

We are also confident that this investment in private enterprise in a strongly pro-Western ally will be wise not only from an economic standpoint, but from a political viewpoint as well.

Mr. KEATING. Mr. President, I yield back the remainder of my time.

Mr. COOPER rose.

Mr. FULBRIGHT. Mr. President, how much time remains?

Mr. COOPER. Mr. President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. I yield 3 minutes to the Senator from Kentucky.

Mr. COOPER. Mr. President, yesterday I spoke briefly against the amendment offered by the Senator from Illinois [Mr. DOUGLAS] and also voted against it. The time for debate will be limited on Monday, and because I think the time on Monday should be reserved to the Senator from Arkansas [Mr. FULBRIGHT] and other members of the Foreign Relations Committee, I will speak for a few minutes this afternoon.

As I said yesterday, when some of the sponsors first talked with me about this amendment, I expressed sympathy toward the principle of freedom of navigation in international waterways, and inferentially, in the Suez Canal, which it expresses. But upon reflection I decided that it would be harmful to these purposes for the amendment to be enacted.

I know what the sponsors intend. They hope that by the enactment of this amendment the United States, through the President, would be able to bring influence to bear upon the United Arab Republic to change its embargo policy against Israel's shipping, on cargoes bound to or from Israel. I believe such an embargo contravenes the convention of 1888, and certainly the spirit that we believed would obtain after the settlement of the Suez Canal ownership a few years ago. Yet I oppose the amendment because I believe its consequences would be the very opposite of those intended by its sponsors. Instead of assisting the President in any representations or negotiations, either directly or through the United Nations, which our Government might wish to undertake toward the removal of the embargo, it would only harden the position of Egypt. If this should occur—and it would occur, in my opinion—no good could possibly be accomplished by this amendment.

The amendment has other connotations which would not be helpful to the U.S. aid program. A great hue and cry is made by Russia, and believed by some free countries, unfortunately, that our aid is offered with strings—that is, our aid is used solely to secure political ends. Certainly such a charge would be made in this case.

While I believe strongly that the Suez Canal ought to be opened to Israel, and that the United Arab Republic would make a great contribution to world order and to the settlement of the issues in the Mideast if it were to open the Suez Canal, I believe with all my strength that this amendment would have the opposite result. It would be viewed merely as an effort by the American Congress and the executive branch of our Government to put pressure on another country through its aid program.

What would happen? The United Arab Republic would say, "We do not want your aid. You are interfering with our sovereignty."

Much as I should like to see the principle expressed in the amendment become a reality—the opening of the canal—I believe we will do great damage to Israel and to conditions in the Mideast, and great damage to our total foreign aid program, if we allow this amendment to remain in the bill.

Mr. FULBRIGHT. I thank the Senator.

Mr. President, a moment ago I asked unanimous consent for the yeas and nays on my amendments on Monday. I understand that it is contrary to tradition to order the yeas and nays by unanimous consent. I ask unanimous consent to vitiate the unanimous-consent order.

The PRESIDING OFFICER. Is there objection?

Mr. KEATING. Mr. President, reserving the right to object——

Mr. FULBRIGHT. I am expecting a yea-and-nay vote under the normal procedure. I understand that the unanimous-consent order which has been entered violates the traditions of the Senate and the policy of the leadership. I did not realize that. That is my reason for making the present request. I still intend to seek a yea-and-nay vote on Monday.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arkansas?

Mr. KEATING. Reserving the right to object, was there a series of amendments with respect to which the Senator obtained unanimous consent for yea-and-nay votes?

Mr. FULBRIGHT. Only two.

Mr. KEATING. Is the Senator seeking to vitiate both orders?

Mr. FULBRIGHT. Insofar as unanimous consent for the yeas and nays is concerned.

Mr. KEATING. I realized that that was the policy, but I assumed that the policy had been changed or the Senator from Arkansas would not have made the request which he did. I believe that the policy established by the leadership is a sound one.

Mr. FULBRIGHT. So do I. That is why I am making the present request.

Mr. KEATING. I have no objection.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arkansas [Mr. FULBRIGHT]? The Chair hears none, and it is so ordered.

Mr. FULBRIGHT. In conclusion, let me say that we are operating under an unusual procedure. The votes on the amendments are going over until Monday.

Mr. JOHNSON of Texas. The Senator can have the yeas and nays ordered on Monday without any difficulty.

The PRESIDING OFFICER. Does the Senator withdraw the amendment?

Mr. FULBRIGHT. Can I offer it again on Monday?

Mr. JOHNSON of Texas. Yes.

Mr. FULBRIGHT. Mr. President, I withdraw the amendment temporarily.

Have I any time remaining?

Mr. JOHNSON of Texas. Mr. President, I yield myself 1 minute on the bill.

The PRESIDING OFFICER. Without objection, the Senator from Texas is recognized for 1 minute.

Mr. JOHNSON of Texas. The senior Senator from Louisiana [Mr. ELLENDER] has a series of amendments—I believe a total of four amendments. He desires to offer those amendments en bloc. Under the agreement he would be entitled to 5 minutes on each amendment. He would be entitled to 20 minutes on four amendments. I ask unanimous consent that the Senator from Louisiana may be entitled to offer his four amendments en bloc, and that he be entitled to 20 minutes on the four amendments.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. COOPER. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 15, line 20, it is proposed to strike out "$247,500,000" and insert in lieu thereof "$250 million."

Mr. COOPER. Mr. President, I have offered the amendment so that I may speak on the mutual security program. I shall withdraw the amendment later. I am doing this so that I will not encroach on the limited time allotted for debate on the bill next Monday.

As a Member of the Senate in 1947, I supported the Greek-Turkish program of assistance. In 1947 and 1948, I strongly supported the Marshall plan at a time when the importance of foreign aid was not as yet well accepted. In the years that have followed, when I have been in the Senate, I have continued to support foreign-aid programs. I intend to support the pending bill. And as long as I stay in the Senate, if the need for assistance obtains, and supports our country's purposes, I will continue to give my support to this principle of our foreign policy.

Nevertheless, throughout the years, and particularly since 1955 and 1956, when I saw the operation of our foreign-aid program in recipient countries, I have believed that they are not as effective as they should be—and could be if the executive and legislative branches would take corrective action. This I have stated several times in the Senate. I have made speeches throughout the

United States to this effect. Today I wish to speak my convictions, and to state the views that I hold on improving our foreign-aid program.

The foreign-aid program is one of contradictions. It has been uniformly supported by the Presidents of the United States since World War II—by President Truman and by President Eisenhower. It has been supported by every Secretary of State.

Despite opposition in the country, it can be said that it has been supported by Congress, because year after year foreign aid authorization bills, and foreign aid appropriation bills, are enacted. While the figures for foreign aid vary, I am informed that foreign aid appropriations and commitments which have been made to other countries since World War II amount to some $50 billion.

Our aid has gone to 73 countries throughout the world. It has accomplished great good. Perhaps most effective of all was the Marshall plan program. But later programs have done great good, and have helped countries in every section of the world.

Yet with this background, it is a fact that many in the United States are disillusioned and oppose foreign aid. Many in Congress, who were its strongest supporters in the past, and who want to remain supporters, express doubts about many of its features.

There are factors which would cause opposition in any case. Many of our people do not like to pay taxes to assist other countries. Many say, as we hear so often, "If the United States can aid other countries, then the Congress and the Executive ought to do more for a special program, or area, in which they are interested."

Again, from time to time evidence has been adduced of waste in our foreign aid program.

Yet objectively we are reaching the point where our foreign aid program will be indispensible to the interests of the United States as well as to those of other countries. Newly independent countries are experiencing economic and political difficulties. They must have aid if they are to make progress. We have responsibility regarding the peoples who have chosen democratic forms of government. They must look for foreign aid either to democratic countries or to Communist countries.

I believe that if the program is to survive, it demands a reorganization by the executive branch, and by the Congress.

One of the chief reasons for the growing disillusionment over our foreign-aid program, in my view, is that many people do not believe that it is as effective as it could be, considering the amount of money that we appropriate each year. From my observations for a short time in another country, that was my belief—that it is not as effectively used as it should be, and that it demands reorganization.

I wish to suggest a few points today which I believe this administration, or the incoming administration, and the Congress and its appropriate committees might take into consideration in the formulation of a foreign aid program for the future.

I state as my first point that I believe that military assistance and defense support—and these items account for the largest appropriations in the mutual security bill—should be placed in the defense budget. One reason they are kept in the mutual security bill is to carry the other programs, that is, the economic and point 4 programs. An appeal can be made to Congress and to the people, it can be said, "The United States must have a strong defense; as an essential part of our defense system we must have military assistance and defense support programs for other countries." And then economic aid and the point 4 program are carried along.

If the military assistance and defense support programs were considered by the Committee on Defense Appropriations and the Committee on Armed Services, in connection with other defense expenditures, there would be a better judgment about the extent to which military assistance is needed. We make large appropriations for military assistance to countries in Asia, Latin America, and Africa. We say it is for defense against Communist aggression. For some countries this is a valid reason. Others need assistance to maintain internal order. But any person of judgment knows that if there should be an attack upon one of these countries by Russia—and though I do not think that would be the way Russia would strike—they could not stand for a week, and some of them not even a day. I do not say this in derogation of their courage—for their courage is great—but as a comparison of strength.

My first point is that military assistance and defense support should be stricken from the mutual security bill and placed in the defense budget.

The second point I make—and I believe this is the most important of all—is that if a foreign aid program is to be truly effective, it must be given continuity by the administration and by Congress.

Two years ago the President recommended that continuity be provided for the Development Loan Fund. Last year the Senator from Arkansas [Mr. FULBRIGHT] made a valiant fight to do so. Yet, the Senate struck the language from the bill upon a point of order. Unless the Constitution is amended, it is entirely possible that such a point of order could always be made.

Nevertheless, the Marshall plan succeeded, in my judgment, because Congress made a statement of policy, a moral commitment to a 5-year program. The European countries were able to plan programs to fit their needs. They were able to organize their plans and programs for a 5-year period. The United States on its part was able to make its economic arrangements, its delivery of supplies over a period of 5 years. This course produced an effective program. And the cost was less than was contemplated at the time of the adoption of the Marshall plan.

As long as we have an economic program under which appropriations are made year by year, the recipient country cannot plan its expenditures; it cannot manage its foreign reserves. The United States cannot plan with the recipient country programs which would be most effective in that country. As a result, a country will not undertake wealth-creating programs because it does not know that help will be forthcoming from succeeding Congresses.

A great amount of aid is channeled into secondary projects—projects which are useful, but which are not absolutely necessary and are not the wealth-creating projects, which take several years to develop.

Russia has an advantage in this respect: It can select one or two great projects in another country, of large cost, which are wealth creating. It will make commitments at one time, to enable the major projects to go forward under Russian aid.

It seems contradictory to the very spirit of this country—a country which prides itself on its efficiency, and on the effectiveness of its private enterprise system, where plans are made years ahead—for the Congress to appropriate vast sums of money year by year, piecemeal, which deny the very effectiveness and the fulfillment of the objectives of our foreign-aid program.

The only way the foreign-aid program can be made effective is along the order of the Marshall Plan. This country should commit itself for a period of 5 years. It might not be enforcible from a legal viewpoint, but being a commitment of Congress, it would be carried out, as under the Marshall plan. Continuity for 5 years would make possible a far more effective foreign-aid program, with the same amount of money we appropriate now, or even with smaller sums.

The third point I make relates to the selection of projects in the recipient countries. Our programs are bilateral. Usually a country submits to the United States a program which it would like to undertake. It is difficult for the United States to say that a better program could be initiated. To do so offends the sense of sovereignty of the other country. It offends their sense of freedom and independence in a newly established country. A multilateral organization, however, could assist in the selection of the best program for a country, without difficulty.

I should like to see the State Department and the executive branch be able in the future to arrange consultations with the World Bank, or with the United Nations program of preindustrial planning. If the preindustrial planning program of the United Nations or the World Bank were used to determine the most suitable programs for recipient countries, we could be sure then our money would be spent on the best programs and would be more effectively used.

My fourth point is that we should give more attention to agriculture. In some of the countries I have visited, particularly the newly independent nations, I saw evidence of great desire to build an industrial base. That is natural, because a country cannot advance its standards of living very much until an industrial base has been created. These countries are conscious of the fact that

under colonialism they were not permitted to industrialize to any large extent, and were used as a source of raw products. But as these countries industrialize, the slow advances in personal income will first be spent on food and clothing. Unless they make progress toward modern agricultural development, we will see inflation in these countries, and the small advance in personal income from their industrial progress will be wiped out.

The great efficiency of American agriculture is well known. It is a blessing so generous that we are not fully able to handle it. By sharing our agricultural knowledge, and through wider use of fertilizer and other proven practices, many of the newly independent countries could very effectively and quickly increase their food production. I think that is the fourth point to which we should give more attention in the future.

I have mentioned four points as practical points: First, remove military assistance and defense support from the mutual security bill.

Second, follow the example of the Marshall plan and establish stated appropriations for a period of at least 5 years, to provide continuity.

Third, to select with the countries the programs which are best suited to them, and most effective, we should enlist the help of the World Bank and the United Nations, in their preindustrial planning, to work with the recipient countries, in the selection of the most needed projects.

Fourth, more attention should be paid to the development of agriculture. Public Law 480 has helped the hungry people of the world. But we cannot expect that those countries will rely on this program forever; and we cannot be certain that our country will always have a Public Law 480 program. With the help of the agriculturists of this country, and with the possibilities which are afforded through the use of fertilizer, plant breeding, modern cultural practices, and similar advancements, the foreign countries can, contrary to what many persons say, move toward self-sufficiency in food production.

I shall mention two other points. The first one is not concerned with the practical execution of the program, but relates to an attitude of mind and to the purposes of our program.

We are engaged in a world struggle with the Communist nations. Whether it is admitted or not, we are engaged in a struggle to achieve a balance of power, or to achieve superiority in the balance of power. We hope through this means to avert war.

We know that our foreign-aid program, in self-interest, takes into account the struggle between the two great world forces—the democratic countries and the Communist countries. But for many people throughout the world—and I know this to be true from my service in other countries and from my service in the United Nations—this struggle has little appeal. It ought to have appeal, but it does not reach the people. Many countries are engaged in a revolution, peaceful or violent, to upset the old order in their countries—an order which they believe has held down their living standards and prevented them from attaining equality in the world. Whether it be a democratic revolution or a Communist revolution, there is mistique and attraction in revolution. We see this today in Latin America.

If we base our mutual aid program with these countries solely on helping us maintain our own defenses and our own security against communism, the program will not have full appeal to the countries that are developing. Although they know of our self-interest, they want to be certain that our purpose in maintaining this program is also to help the newly independent and developing countries advance in the ways our country has advanced. We can communicate that purpose to them only through action. Certainly that principle is basic to this program.

Yesterday I opposed the amendment of the distinguished Senator from Illinois, which related to the Suez Canal. Admitting the justice of the claims of Israel, and the justice of their claims in the eyes of the world—and I think they are just—yet, Mr. President, if we give to the people of the world the impression that we are using our mutual aid program for political purposes, to advance our own interests in every dispute in the world, this program will have no great meaning.

I come now to the last statement I wish to make. It has nothing to do specifically with the pending bill, but it goes to the support that these bills and future bills like them may receive from the people of the United States. Here in the Congress, we often hear calls for domestic appropriations for good purposes. Statements are made that if we can spend money over the world, we should also spend money for some particular purpose. I do not believe that is a valid argument in many cases, because our foreign-aid program is concerned with our security, with trade, with building better relationships with peoples throughout the world. But the argument has a certain validity at this time, because while we have been enjoying the greatest general prosperity in our history—and for most of the people of the United States that is true—yet in our country there are areas and people which that general prosperity cannot reach. These are the people—in the underdeveloped regions and pockets of depression in this country—which have been left behind. We have got to help pull them out of the ditch.

When I refer to this matter, Mr. President, I realize that some may say, "You are from Kentucky, and you are speaking about the mining areas of your State." But whether or not I speak, the facts will not go away. And there is, and will continue to be, resentment that we are not making our best effort for the people in the backwash of our own economy. I have been saying this for 3 or 4 years now, here in the Senate. I have said it to members of the Cabinet; and I have said it at the White House.

Again I say that this situation is wrong. When there is such great general prosperity in our country, but when some parts of the country are left behind, and the people of those areas are in trouble and in need, that situation should be dealt with by the administration and by the Congress.

It should be dealt with on its own merits, I recognize that. But I should like to warn the administration, and future administrations and the Congress, that unless programs are undertaken to assist these depressed areas in the United States, where people have little or no opportunity now, we shall see rising opposition to mutual assistance programs. I do not want to see that occur, because I believe mutual assistance has its own valid reasons for existence. But we cannot escape public opinion, or the resentment of people in this country who see great sums of money going abroad while very little or nothing is done for our own people who are in dire need and dire trouble.

So I hope that, during this year, steps will be taken to give help in the areas of the United States which are most deeply affected, so that it cannot be said that we forget our own people.

I close by saying that if there is to be in this country the public support needed to maintain the foreign aid program, we must be mindful of the needs—not the wants and desires of everyone in this country; we could not provide for all of them, but the real needs—of people throughout the United States who are in trouble.

So, Mr. President, if we are to have a mutual security program which the country will continue to support, I believe this program must be reorganized. I do not assert that my views are the ultimate ones; but I present them with great conviction and belief. I have had the unique experience of observing this program from both sides; and I have made these same recommendations over since 1955 and 1956, when I saw our mutual security program in operation.

Mr. KUCHEL. Mr. President, will the Senator from Kentucky permit me to comment at this time, in the time available to him?

The PRESIDING OFFICER (Mr. KEATING in the chair). The Senator from Kentucky has 3 minutes remaining.

Mr. KUCHEL. Mr. President, will the Senator from Kentucky yield that time to me?

Mr. COOPER. Yes; I yield.

Mr. KUCHEL. Mr. President, as always, when the distinguished senior Senator from Kentucky [Mr. COOPER] speaks, either here in the Senate or elsewhere, he offers challenging and constructive comments in the best interests of the Nation.

We in the Senate respect the views and the judgment of our colleague, the senior Senator from Kentucky, who is most distinguished and very able, and in the past graced our Foreign Service when he held the post of U.S. Ambassador to India; and both prior and subsequent thereto he was a representative of the Government of the United States before the United Nations.

So I am always glad to listen to the suggestions which the Senator from

Kentucky makes to the Senate, to the Government, and to the people of the United States.

In the present instance, it is his judgment that his suggestions will enable our program of mutual security to be bettered and improved.

On many occasions I have had the opportunity to speak with the Senator from Kentucky and to hear him describe some of his experiences in India and in Europe. I remember particularly that on one occasion he and I discussed with an agriculturist who happens to live in my State the possibility of giving to the people of India an opportunity to overcome their poverty and their privation; it was proposed that, by means of chemical treatment of their apparently abundant soil, it would be possible for the people of India to raise for themselves the foods and the fibers they require.

I am content now, Mr. President, to say here for the RECORD that once again his colleagues profit by the vast experience in American government which the distinguished Senator from Kentucky has had, and in his comments he has given us an opportunity to face up to some of the problems which exist today with respect to our mutual security program in America.

Now I ask unanimous consent that I may suggest the absence of a quorum with the time being charged to either side.

The PRESIDING OFFICER. Is there objection to the request? The Chair hears none.

Mr. KUCHEL. Mr. President, before I suggest the absence of a quorum, I do want to say for the RECORD that I observe for the moment some of my colleagues participating here this afternoon who happen to share my political philosophy. On one previous occasion, when the situation was just the reverse, and my colleagues on this side of the aisle were required to be absent from the Chamber, one of my colleagues on the majority side suggested that he might make a motion to abolish the Republican Party.

On tomorrow, when my absent colleagues read this RECORD, and when, I imagine, some paroxysms of fear may overcome them as to what might have happened this afternoon, I am sure, Mr. President, you would want to join me in suggesting in the RECORD that they need have no fear at all that we will not proceed here in a manner that will not be in keeping with the high traditions of the U.S. Senate.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. KUCHEL. I now suggest the absence of a quorum.

The PRESIDING OFFICER. Is there objection?

Mr. LONG of Louisiana. I object. I should like to make a brief insertion.

Mr. KUCHEL. I did not hear the Senator.

Mr. LONG of Louisiana. I have been waiting for the Senator to complete his speech, so I may make a brief insertion.

Mr. KUCHEL. I did not hear the Senator.

Mr. LONG of Louisiana. Some time ago, during the civil rights debate, it occurred to me we southerners could have won that contest by default, because we were the only ones on the floor, but then I realized there were perhaps two Republicans present, and I knew there was no use in trying it, because Senators would have been rushed here.

Mr. President, I ask unanimous consent that I may make an insertion in the RECORD.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

THE CUBAN SITUATION

Mr. LONG of Louisiana. Mr. President, I have several editorials which reflect my views with reference to the Cuban situation. I ask unanimous consent to have them printed in the RECORD at this point.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Fort Lauderdale (Fla.) News, Mar. 31, 1960]

THIS IS TURNING THE OTHER CHEEK TO THE POINT OF STUPIDITY

It seems almost inconceivable today that, in the wake of the blistering attacks Fidel Castro and other high officials of the Cuban Government are making against this Nation, we should still be considering awarding Cuba $350,000 in economic assistance under our foreign aid program.

Yet, that amount of money is contained in the foreign aid budget presented to Congress by the administration, and there's a good chance it will stay there unless the House Foreign Affairs Committee chops it out this week.

One member of the committee, Representative WAYNE HAYS, of Ohio, does seem determined not to reward the Castro government for its attacks on this Nation. A week ago he proposed that the economic assistance money proposed for Cuba be knocked out of the aid program, but he frankly admits that other committee members are sharply divided on the issue and he may have to take his battle to the floor of the House to get the aid funds knocked out.

HAYS has pointed out that some committee members are arguing that cutting Cuba out of our assistance program would only serve to give Castro more reason for belaboring the United States and to picture himself as a martyr being crucified because he won't do what we want him to do.

The State Department apparently shares this viewpoint as it has registered its opposition to cutting off foreign aid assistance to Cuba although, if it comes to a showdown, it probably won't wage too strong a fight against the Hays proposal.

Actually, HAYS doesn't want to deprive Cuba of any chance to qualify for assistance under the foreign aid program. His proposal would merely serve to cut off economic aid unless President Eisenhower makes a formal determination that it would be in the national interest for Cuba to continue to share in the program.

Furthermore, HAYS is willing to go along with an amendment to his proposal that would make the cutoff applicable only to the Castro regime so that economic assistance could be renewed if and when there is another change in the Cuban Government.

Representative HAYS' stand is similar to that of Senator GEORGE SMATHERS of Florida. A few days ago the junior Senator from this State took the floor of the Senate to protest the action of the State Department in sending Ambassador Philip W. Bonsal back to Havana.

SMATHERS declared that the return of Bonsal proved that our current policy toward Cuba is one of weakness and appeasement which is confusing our friends throughout Latin America because they cannot understand how we can supposedly oppose iron-fisted, one-man rule while at the same time lending support to Fidel Castro who is certainly a dictator cast in this mold.

SMATHERS pointed out that there are now only 5 of the original 130 members of Castro's 26th of July movement still associated with him in the Cuban Government. All the rest have pulled out of the movement largely because they were not Communists and could not stomach the steady drift of the Castro government toward outright communism.

SMATHERS quoted the remarks of one of the most recent retirees from the Castro government as indicative of what is currently going on in Cuba. This man, Miguel F. Pons, who was serving as a Cuban representative on the Inter-American Defense Board in Washington, announced he was quitting the Castro regime because he had had enough of Fidel Castro. He denounced Castro as a stooge of international communism and as the new dictator of Cuba.

Pons reportedly got a standing ovation from the other members of the Inter-American Defense Board when he announced his departure from the Communist government of Castro with the following statement:

"There are no individual guarantees in the Cuba of today. There is no respect for property and, even in its social and collective functions, there is no liberty of enterprise. Individual initiative is prohibited. People who would not dare work openly for communism before are doing it now under the guise of aiding Fidelismo."

SMATHERS declared that other Latin American nations simply cannot understand our vacillating policy toward the Castro government. On the one hand we are spending billions of dollars to fight the spread of communism throughout the world yet, with the other, we continue to extend recognition, aid, and comfort to a regime dedicated to spreading communism in Cuba with no thought to how this policy will be received by other Latin countries.

The points made by Senator SMATHERS and Representative HAYS are certainly worth thinking about. Neither of these gentlemen is advocating direct intervention on our part to overthrow the Castro government and both, no doubt, will go along with remedies instituted by the U.S. Government to prevent intervention in Cuban affairs by individual Americans.

But this policy of nonintervention does not mean we have to extend a soft hand of friendship to Fidel Castro and his Communist buddies. It does not mean we have to buy their sugar at an inflated price; keep our Ambassador in their country, or continue to furnish them with economic assistance under our fuzzy and wasteful foreign aid program.

This is turning the other cheek to the point of stupidity and, like Representative HAYS and Senator SMATHERS, we are prone to wonder when the administration and the State Department are going to wake up to the fact that Communists in Cuba are no different than Communists elsewhere no matter what kind of a disguise they adopt.

[From the Tampa (Fla.) Tribune, Mar. 30, 1960]

PATIENCE VERSUS APPEASEMENT

When the State Department earlier this month decided to send Ambassador Philip Bonsal back to Cuba, Florida Senator GEORGE SMATHERS arose on the Senate floor and protested that the action would be a tragic mistake.

The day after Bonsal returned to Havana, SMATHERS read his fellow Senators the news reports out of Cuba and said, in effect, "I told you so."

From the look of things in Cuba, we suspect Washington will be hearing a good many more I-told-you-so's from Senator SMATHERS.

SMATHERS' contention was, and is, that to return America's Ambassador—who had been withdrawn because of insults from Castro newspapers—constitutes appeasement of a Government which is as anti-American as ever and is, moreover, a Communist-type dictatorship. This apparent truckling to a regime which consistently praises communism and denounces Americanism, SMATHERS argues, hurts U.S. prestige throughout Latin America.

The Florida Senator told the Tribune this week:

"Our Cuban policy dismays our Latin American friends who side against Castro because he is a dictator. Our policy confuses every Latin American as to what our stand on dictatorships really is. We supposedly oppose ironfisted one-man rule but, at the same time, we apparently give support to Fidel Castro—who is certainly a dictator cast in this mold.

"The Eisenhower administration has scored what they termed appeasement in the Far East and elsewhere in the world. They vowed unending opposition to such a policy. Yet in Cuba I think we have seen an appalling example of appeasement and obviously to no avail."

Since this is an election year, there may be a mite of politics in Senator SMATHERS' reminder of past Republican attacks on appeasement in Democratic administrations. But events in Cuba do seem to confirm his contention that we're getting nowhere trying to be nice to Castro.

In another of his television talkathons, Fidel Castro yesterday said Cuba "won't bother" to send its own Ambassador back to Washington until the United States "demonstrates better faith."

This is insufferable arrogance toward a country which has made every effort to be a good neighbor in the face of constant abuse, the seizure of American-owned properties (without compensation) and the harassment of American citizens.

Nor does there seem to be much doubt where the sympathies of the Castro government lie in the struggle between democracy and communism. On the same day Ambasador Bonsal got back in Havana, Cuba's economic boss and Castro pal, Ernesto Guevara, publicly declared that "Cuba's great friend is Soviet Russia * * * Cuba's economic war will be against the great North American power (meaning the United States)."

Pro-Communists in Cuba have unlimited freedom of speech. But anti-Communists are denounced by Castro and his associates as "enemies of the revolution" and the mobs incited against them. One by one, the brave voices which have continued to speak out against communism and dictatorship are bullied into flight or silence.

If Fidel Castro has uttered one word of friendship for the United States, or criticism of Soviet communism, we've missed it. He does not even mention the holding of free elections any more. Nor does he talk of peace. He rants of enemies and plots and speaks lovingly of his arsenal of foreign-bought weapons. "We shall defend our territory house by house, street by street, sugar mill by sugar mill."

Against whom, pray tell?

The United States has had to be patient with Castro to prove to the world its sympathy with an oppressed people's struggle for freedom.

It is increasingly clear, however, that the Cuban people have swapped the tyranny of Batista for the tyranny of Castro. In such circumstances, Washington had better prepare appropriate measures—such as a reduction of Cuban sugar purchases—to show that we can tell our enemies from our friends. Otherwise, as Senator SMATHERS suggests, our Latin American neighbors may mistake noble patience for ignoble appeasement.

[From the El Paso Times, Apr. 5, 1960]

WE'RE FOR SMATHERS

While Fidel Castro again was hitting out against the United States, a U.S. Senator from Florida, our closest neighbor to Cuba, had the courage to speak what millions of Americans have been thinking.

That U.S. Senator is GEORGE A. SMATHERS, Florida Democrat.

He said the United States should recall Ambassador Philip W. Bonsal from Cuba, reduce Cuban sugar quotas and adopt a get-tough policy toward the Castro government.

It is possible that Senator SMATHERS was a little tough in his public pronouncements, but he was not near as tough as Castro has been in his denunciation of the United States.

In Havana on Sunday, Castro said the United States is bringing pressure in other Latin American nations for collective action against Cuba, implying anticommunism was the rallying point for the action.

Castro again showed he does not know what he is talking about, but, even if his accusations were true, it cannot be denied that it is time for anticommunism to be a rallying point for collective action against the Castro government.

Castro has surrounded himself with Communists and fellow travelers. He fawned in the smile of Mikoyan of Soviet Russia. He made a deal with Moscow aimed at embarrassing the United States.

Now, when Castro's political sins are finding him out, he wants to strike again at the United States. He is proving himself to be a small boy who thinks he can do anything he wants to, but no one has the right to scold him for it.

The Times agrees wholeheartedly with Senator SMATHERS, of Florida.

Uncle Sam has not gone soft yet, we hope.

[From the Sarasota (Fla.) Herald-Tribune]

SPOKESMAN ON CUBA

Americans who are ashamed of their Government's conduct toward the Communist dictatorship in Cuba have a spokesman in Florida's Senator GEORGE SMATHERS. In a statement this past weekend Mr. SMATHERS issued a warning which the United States should heed despite the equivocating Castro apologists in the State Department and in the liberal press. Florida's Senator said flatly that the United States is faltering in the Cuban crisis, and that some State Department officials have shown "a timorous desire that we hide our national dignity and cloak our self-respect for fear that by acting courageously we will alienate the friendship of other Latin American countries."

"That policy is dangerous and self-defeating," he said. "In the past our proudest national achievements were those we fashioned with courage and fortitude. Whenever vacillation and fear took command our Nation suffered and we were ashamed of that which we wrought."

Anyone who has ever studied Latin America will realize the pure truth of Mr. SMATHERS' statement that "nowhere in the world is strength of character and reasoned firmness in action more highly regarded than in Latin America."

"If we continue such appeasement policies as those which marked our dealings with the strutting Cuban dictator, we will forfeit respect of every Latin American.

"Latin Americans, both the man-in-the-street as well as those who govern the country, look to the United States for leadership and they are appalled to find us faltering in the Cuban crisis," Mr. SMATHERS concluded.

The State Department recently sent back to Cuba our Ambassador, Philip Bonsal, despite the insulting actions toward him and our Government which had previously occurred. Dictator Castro had arrogantly refused even to talk with Mr. Bonsal. The Cuban regime has failed to honor its international agreements, has brutalized its own citizens, and is not worthy of the diplomatic recognition the U.S. Government has extended.

Mr. SMATHERS criticized the return of Ambassador Bonsal, saying that it was sickening appeasement of the Castro leadership. How right he was could be seen shortly after Mr. Bonsal's return, when Castro continued to heap calumny on the United States, and contemptuously said that he would send an Ambassador to the United States if and when he felt like it.

Castro has turned Cuba into an armed camp, with even children and parents drilling in the streets. He has spent millions of dollars for war materials in Europe, and is even now concluding a deal with Communist Poland to obtain Russian-built jet aircraft.

How long are we going to continue to subsidize this dictatorship with millions of dollars in payment for sugar at prices above the world market? How long are we going to continue to lend prestige to this strutting megalomaniac by extending formal diplomatic recognition? What manner of men in Washington are setting U.S. policy for the Caribbean area?

American people should demand that their elected representatives join with Senator GEORGE SMATHERS in finding the answers to these fateful questions.

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KUCHEL. Mr. President, I now suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORE. Mr. President, I move to strike out the enacting clause.

The PRESIDING OFFICER. The Senator is recognized.

Mr. GORE. Mr. President, there is little disagreement on the long-range objectives of our foreign policy. Although these objectives may be stated in varying ways, what we really seek is national security in a world at peace. This would mean security and peace for all. We seek a world order in which human beings everywhere shall enjoy individual freedom and increasing benefits of a free and productive society.

We have long since recognized that this goal is not achievable through a go-it-alone policy.

In recognition of the need for a collective effort against the challenge of Communist world domination, our budget annually contains billions of dollars whose expenditure is designed to promote collective security against military

aggression and to promote the cause of freedom against that of Communist enslavement. To the extent that our foreign-aid expenditures actually promote this objective, the money is well spent. To the extent such expenditures do not promote this objective, they may well prove detrimental to the very causes we seek to advance.

In my opinion, the overall direction of our foreign aid program and the manner in which it is administered should be subjected to a searching reexamination. It seems to me that we should seek through our aid to underdeveloped nations to create conditions which will lead to progress in both political and economic freedom. Yet, in some instances, our aid both military and economic, is granted in such a way that the citizenship of the recipient nation is generally either unaware that U.S. aid is being granted or, if aware of it, believes that such aid perpetuates existing political conditions.

I am concerned over the extent to which, through our foreign aid programs and otherwise, our Government has either openly or tacitly alined itself with authoritarian regimes. Political regimes of some countries to which our aid has been granted exist with but little discernible popular support and, in some at least, these regimes maintain themselves in power almost entirely by means of U.S. aid.

That we have supported and, in fact, now give support to dictatorships is self-evident. For what good reason was Peron decorated? What about aid to Batista? And now the new Government of South Korea promises, think of it, to clean up the U.S. aid program.

It may be truthfully said that the support we give to dictatorships is a matter of expediency, and undoubtedly it is with the hope that the dictators whom we aid will become enlightened and voluntarily bring about conditions under which democratic procedures will emerge. But the peoples who are oppressed by those whom we aid may not be impressed by, if, indeed, they can understand, the subtleties of international power politics. What they must know is that those who exercise arbitrary rule over them are supplied their guns by the United States. As to economic aid, the trickle-down theory does not work even in the United States. There is even less likelihood that it can work or that it would be allowed to work in a country ruled by a dictator.

I recognize the problems faced by the policymakers of the executive department who administer our aid program.

First of all, I recognize that our Government cannot deal with individual citizens of a nation which is to receive our aid. If we are to deal at all, we must deal with the government which is in power. I do not suggest at all that this is merely a simple question of whether we shall choose to grant aid to a democratic government or to an authoritarian regime.

I am aware, also, of the fact that there is a limit beyond which we cannot go in attaching conditions to our aid, without subjecting ourselves to the charge that we seek to interfere in matters that quite properly should be subject to determination by the people of the recipient nation.

Nor can it be expected that we can create overnight the U.S. brand of democracy in areas where democracy is unknown and whose citizens are unprepared to discharge the responsibilities of citizenship in a democratic society.

Finally, the argument is made that we must, in some instances at least, support an authoritarian regime, lest the incumbent be deposed and replaced by another who is equally authoritarian and less favorably disposed toward the cause of the free world. Admittedly, this argument has validity from the short-range point of view.

It is my considered opinion, Mr. President, while recognizing the arguments of expediency, that the extension of aid to dictators under conditions which lead to the perpetuation of the dictatorship, is contrary to what is, or ought to be, long-range U.S. policy objectives. In the final analysis, the battle of the free world against the Communist world, is a battle between the concept of freedom against the concept of despotism. A dictatorship of the right can be just as oppressive as is a dictatorship of the left.

In granting aid to authoritarian governments, we take a chance even with respect to the short-range point of view. If a despotic power that holds power, either in whole or in part as a result of our aid, should be overthrown, those succeeding it may or may not be friendly toward us. By virtue of our aid, we are identified in the minds of the people with the regime in power. If it goes down, so may we, in the eyes of the people.

We are even now experiencing a dramatic example of the disastrous effects which may flow from aid to a dictator. The present state of our relations with Cuba is due in large measure to our previous alinement with the cruel and corrupt Batista regime. Whatever may have been our reasons for giving aid to Batista, we are, in the minds of the Cuban masses, identified with him and his regime which, to say the least, did not deal gently with the Cuban people. In any event, it is obviously no problem at all for Fidel Castro to ignite among the Cuban masses the flame of bitter anti-Americanism.

Thus, while it may be argued that we must at times support a despot lest someone worse replace him, the Cuban example illustrates the point that when such a government is overthrown despite our aid, the alternative may be worse.

We are still giving military aid to Trujillo, one of the most repressive dictators of recent times, although I understand we will not furnish further military aid to him after the end of this fiscal year. The damage to the United States may, however, already be done. Should he be succeeded by a regime inclined to be unfriendly or skeptical toward the United States, our influence in the Dominican Republic may suffer for years to come just as surely as it is now suffering in Cuba.

Last fall I had the opportunity of visiting several countries in the Middle East and in south and southeast Asia. In many of these countries I was able to observe the results of our relationships, particularly with regard to the administration of our foreign aid, to some of the authoritarian governments throughout that area.

One of the purposes of my trip last fall was to investigate certain aspects of the administration of our foreign aid program in south Vietnam. I spent 3 days in field inspections throughout south Vietnam and conducted, together with the able junior Senator from Wyoming [Mr. McGEE], 2 days of hearings in Saigon.

In that country I found much reason for encouragement. It appeared that our foreign aid program has been generally helpful in advancing our foreign policy objectives.

I found greatly increased military strength and potential there. I found, also, evidence of greatly increased political stability.

But, although I realize the extremely difficult conditions under which the Diem government has been operating, I also wish emphatically to state that this authoritarian government is not making the progress toward democracy which I would like to see. Although the Diem government is ostensibly committed to a constitutional democratic rule for the future, it would appear that this future is a long way off, indeed.

In October 1955, President Diem called on the Vietnamese people to choose by referendum between himself and Bao-Dai. There was, according to official reports, 97.8 percent participation, and Diem received 98.2 percent of the vote. These statistics, Mr. President, have a certain Iron Curtain flavor.

In this respect, there appears to have been little change since 1955. The results of the elections to the National Assembly, held last August, will illustrate this. Although there are several political parties in South Vietnam, few are really opposition parties.

Let me say, Mr. President, that I have admiration for President Diem. With our aid, he has brought order to his country, and that is a notable accomplishment. He is a capable and highly respected man. He has undertaken many popular measures and, with our help, has built a base of considerable popular support. I would like to see him move more decisively toward liberal democratic government, however.

I recognize that movement toward democracy for any given country does not necessarily entail copying American methods and models. I am not so naive as to think that the United States can create democracies around the world in its own image. I do insist, however, that the first step toward responsible, democratic government consists in allowing the formation of responsible opposition. After all, the legitimization of a government consists largely in the establishment of responsible, organized opposition to that government.

I would hope that our continued support of the Diem government through foreign aid and otherwise will move that

government in the direction of democratic procedures and processes. And I believe there are ways in which we could and should bring such an influence to bear.

Let us consider for a moment the political situation in South Korea. The Syngman Rhee government was formed under the auspices of the United States and has maintained power ever since with our direct and generous support. It has been difficult to determine what support the Rhee government had among the Korean people. In 1948 Rhee was elected President by the National Assembly in accordance with the Korean Constitution. Upon the approach of the 1952 election, however, Rhee was at odds with a majority of the Assembly, and it was apparent that he would not be reelected. Upon realizing this, Rhee forced through a constitutional amendment calling for the popular election of the President. I use the term "forced" deliberately because this amendment was accomplished by martial law and the arrest of a number of members of the Assembly. Yet U.S. aid continued.

In spite of the national police, Rhee won the presidency in 1956 by only 56 percent of the vote. This vote apparently shocked Rhee, and further repressive steps were taken. One of his opponents had died during the campaign, and the other was arrested, tried, sentenced to death, and executed. This execution was widely interpreted in Korea as a warning to opposing politicians, yet our aid continued.

In December 1958, Rhee again, with the assistance of the police, pushed more stringent internal security laws through the National Assembly, including one which ended the election of mayors and provided for their appointment. Several prominent newspaper editors have been jailed under the provisions of these new laws, one reportedly for publishing an article which was merely a commentary on the philosophical problems of majority rule.

The death at Walter Reed Army Hospital, of Chough Pyong-ok, President Rhee's opponent for the presidency, focused attention on Rhee's undemocratic conduct. After Chough had become ill and had come to the United States for treatment, Rhee moved forward by several months the date for the elections, thus giving his opponent no opportunity to campaign against him. Yet our aid continued.

We identified ourselves so closely with the Rhee regime, and our foreign-aid program has been administered in support of this regime in such a way that the complete loss of American influence in that country was threatened. Finally the people, particularly the young people of South Korea rebelled. President Rhee is out. Fortunately, a friendly government has succeeded to power.

Let us look briefly at the situation in Taiwan. Although we did not establish Chiang Kai-shek on this island, we have certainly made his control there possible. The native Formosans, who comprise some 80 percent of the population, have almost no voice in the government, which is run by a small clique within the Koumintang, maintaining the illusion of a national government over all of China. This government, in fact, exercises power over a people who do not comprise an electorate. This government is responsible to no electorate whatsoever.

There has been some show of political opposition by the device of setting up "opposition" parties. These parties, the Democratic Socialist Party and the Young Chinese Party are, in fact, closely associated with the Koumintang, and do not constitute any real opposition. The Koumintang does occasionally allow an opposition candidate, even sometimes a Formosan, to run for office in provincial elections. Some of these opposition candidates have been elected, but if they become troublesome, they are removed by the National Government.

There is little in the way of democracy, and but few visible signs of any movement toward democratic procedures in the National Government on Taiwan. Here again, our aid programs have been administered in such a way as to identify the United States with the Chiang Kai-shek regime. At the termination of this regime, U.S. prestige and influence in this important outpost on our line of defense may be jeopardized.

Let us consider some of the regimes we are bolstering, although we do not have to take the dubious credit for establishing them, in the Middle East. I visited both Jordan and Iran. In those countries I saw an almost medieval way of life, with governments to match. In both cases, there is a lack of even simple forms of democratic self-government. These regimes, I believe, are kept in power by American assistance. Our aid, it must be said, serves many useful and good purposes. Moreover, there is promise of progress in both countries.

I have already indicated that we cannot expect to create democratic processes overnight. Admittedly, in many areas progress must necessarily come slowly. I do suggest that our aid program can and ought to be used in such a way as to promote some progress, however slow, toward democratic processes.

There is some evidence of progress, for example, in Pakistan, governed by an authoritarian regime receiving substantial U.S. aid. It is yet too early to say, however, whether this progress will eventually result in a democratic government.

Pakistan had and has special problems. Since the Indian subcontinent had been administered as a unit by the British, the partition left Pakistan with a dearth of trained administrators, educators, and intellectuals. An overthrow of the government of President Iskander Mirza in 1958 and the assumption of the presidency by Gen. Mohammed Ayub Khan did not necessarily constitute a "naked military dictatorship," as it has been classified by some.

The army has moved into the background and the country is now being ruled by a largely civilian bureaucracy. A land reform commission is active.

Gen. Ayub Khan has very recently moved to establish a new system of "basic democracies" on the local level. Elections are presently being held in each village for local councils which will be given considerable authority and responsibility for local affairs. A pyramid of higher councils is to be constructed, partly composed of members elected from the local councils but largely composed of appointed officials. This system, however, provides for no nationwide opposition and ultimate power in local as well as national affairs will remain with the central government. Its actual operation cannot be foreseen at this early date, but it is worth noting that it is a much more realistic and sound approach to the problem of introducing democratic government in a country with no traditions and experience with this sort of government than previous attempts to introduce it intact at the very top level.

If the experiment with "basic democracies" succeeds, Pakistan will have a base in local self-government upon which to build a national representative government.

If the military will encourage a growth of responsible political parties there may be a guidance toward some sort of democracy suitable for that country.

The recent election held in Pakistan is not encouraging. General Ayub has evidently felt compelled to show that his government has popular support. On February 14 a special vote of confidence was called for. This semiplebiscite was conducted among a special group of 80,000 electors at 413 polling places throughout Pakistan. General Ayub's policies received the endorsement of more than 94 percent of these 80,000 electors. This raises questions, does not settle them.

There are other examples in which, unfortunately, the trend toward democratic procedures which once appeared to be in process has now been reversed. Thailand is such an example. I visited Thailand 4 years ago. At that time there were at least some signs of a base upon which democratic procedures might be built. Political parties were in existence and representatives were elected to a parliament in which candidates of the opposition party were seated and in which democratic debate was held. In fact, Thailand was selected as the site for the annual meeting of the Interparliamentary Union, an international organization in which most nations of the world possessing parliamentary governments participated.

I visited Thailand again last fall. There is now hardly a semblance of parliamentary government. A coup d'etat executed by Field Marshal Sarit Thanarat in October of 1958 placed the military squarely and openly in power. However imperfect the parliamentary process in effect when I previously visited Thailand may have been, it is a source of regret to note the regression in democratic procedures.

The question now is in what direction is the present government of Thailand headed? As an indication of the probable future course of events, we might examine a statement of Foreign Minister Thanat Kooman. In discussing the 1958 coup, he said:

> We can, of course, try to revamp the imported institutions, adapt them to our needs and our own climate and replant them, with

the hope that they will take root and prosper. My own view, and I like to think, the view of a number of people in Thailand now, seems to be that it is preferable to fall back onto ourselves, to withdraw into our shells and think, think hard and forget about these institutions for a while.

To me this is a rather clear indication that the leaders of the present government in Thailand are not contemplating any movement toward real democracy for a long time, if ever.

I do not suggest, Mr. President, that we should necessarily withhold all aid from the countries I have mentioned, or that we should henceforth extend aid only to those nations which already have democratic governments. On the contrary, we should use our aid program in such a way as to encourage progress toward democratic procedures in those countries where they do not now exist. I believe this can be done in most cases. In those where such is impossible, then I seriously doubt that the expenditure of foreign aid funds advances the long-range interests either of the United States or the free world.

Some way must be found by which our aid funds will improve the status of the people as individuals, rather than merely sustaining the regimes which happen to be in power.

Military aid cannot demonstrably provide assistance to the people. On the contrary, in many instances guns provided ostensibly to enable a dictator to resist Communist aggression are actually used, as I have said, to entrench an oppressive regime. This has frequently been the result of military aid to Latin America, as in the case of Cuba. Then, too, military aid to one country may encourage arms races among neighboring countries, not for the purpose of building strength against the possibility of aggression by a common foe, but for use against each other. Such conditions have occurred both in Latin America and in the Middle East. We are sometimes in the position of aiding two neighboring countries to arm against each other. The extension of military aid under such conditions should be drastically curtailed.

Economic aid, both in concept and in direction, should be revised so as to emphasize programs which will better the political and economic conditions under which individual citizens must live. At the very least, we should avoid the expenditure of aid funds for programs which perpetuates an oppressive regime.

Among other steps, we should put increased emphasis on educational programs, particularly in those areas in which illiteracy is high and in which there are few opportunities for professional training and advanced study, even by the few who are financially able to afford it. An improved educational level will both fill a definite need and provide a base upon which to build the principles of democracy.

While there are limits to the type of conditions we can attach to the expenditure of economic aid funds, we can certainly do more than we are now doing.

We should surely take steps to eliminate mismanagement in the administration of economic aid funds on the part of officials of recipient nations. Individual citizens in countries receiving our aid cannot be expected to appreciate the help we seek to extend when they know that a large percentage of the money winds up in the pockets of those in power. Such a situation makes a mockery of our announced purpose of helping others to help themselves.

In Vietnam our own ICA mission is not even permitted access to records maintained by the Diem government which reveal the disposition of certain ICA supplies granted to that government, or to ascertain the levels of supply of materials which remain on hand. Surely, we have a right to know what happened to our money.

In my opinion, individual projects in underdeveloped countries should be reviewed more realistically from the standpoint of the present state of development of the local economy. Somehow, it seems that we have gone overboard on the theory that the answer to our problems is industrialization. We create, or allow to be created, the impression that we can or will industrialize one nation after another. The people wait for the miracle which does not come and which, in most cases, cannot come.

We sometimes send bulldozers where there is a crying need for individual tools. If the peoples of an area are to understand and appreciate our efforts to help them, we must aid them in ways they can see and feel and understand. Certainly, our aid program does not meet this test in many countries which we now aid and which are ruled by a dictatorial regime.

Essentially, we should help the people help themselves. The purpose of our foreign aid program is twofold in nature. In our own enlightened self-interest, we seek to buttress our own security by strengthening other nations. Moreover, we are motivated by the humanitarian desire to help others achieve the things we now enjoy. Resort to expediency must not be allowed to dominate the pattern of our foreign aid program.

Despite these criticisms, despite the urgent need for better administration and direction of the mutual security program, I believe it must be continued in the national interest. Our security requires it. Improvements must and will, I believe, be made.

Mr. President, I withdraw my amendment.

Mr. COOPER. Mr. President, I submitted an amendment earlier, in order to speak. I wish to withdraw my amendment.

ADJOURNMENT TO MONDAY AT 10 A.M.

Mr. JOHNSON of Texas. Mr. President, if no other Senator desires to address the Senate, I move, under the order previously entered, that the Senate stand adjourned until 10 o'clock a.m. on Monday.

The motion was agreed to; and (at 4 o'clock and 40 minutes p.m.) the Senate adjourned, under the order previously entered, until Monday, May 2, 1960, at 10 o'clock a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate on April 29, 1960:

POSTMASTERS

ALABAMA

Virgil B. Huff, Brundidge.
John D. Lassiter, Hartford.
Albert T. Tucker, Sweet Water.

ALASKA

Virginia L. Simonds, Annette.
Alice P. Harris, McGrath.
Norma I. King, McKinley Park.

ARIZONA

Agnes M. Young, Dateland.

ARKANSAS

Ernest E. Castleberry, Bono.
Devoe Bollinger, Jr., Horatio.

CALIFORNIA

Ruth H. Burkett, Cedar Glen.
Donald F. Cox, Hollister.
Eva C. Edwards, Littlerock.
John A. Black, McClellan Air Force Base.
Nine E. Slade, Tahoma.

COLORADO

Harold W. Best, Larkspur.

DELAWARE

Martha E. Armstrong, Cheswold.

FLORIDA

James O. Mahon, Apalachicola.
George C. Coker, Bartow.
Robert T. Arnold, Brandon.
Lorence E. Brandon, St. Petersburg.

GEORGIA

Hal D. Carlisle, Camilla.
Henry R. Taylor, Cumming.
Horace J. Healan, Hoschton.
Pauline T. King, Sea Island.

IDAHO

Wayne Shaeffer, Nezperce.

ILLINOIS

Christian M. Willman, Jr., Deerfield.
Milton L. Farney, Forrest.
Robert F. Baker, Oakwood.
Renton Pullen, Princeville.
Paul H. Eberle, Wonder Lake.

INDIANA

George L. Reitz, Chrisney.

IOWA

Gloria L. Pool, McCausland.
George W. Munns, Okoboji.

KANSAS

Boyd W. Ensley, Cambridge.
William S. Stevenson, Clay Center.
Frank W. Peterson, Home.
Gottfreid W. Staub, Jr., St. John.
Thomas B. Standard, Winona.

KENTUCKY

Jean C. Hall, Viper.

LOUISIANA

John T. Baldwin, Jr., Bernice.
Bobby Ray Holley, Dubberly.
T. James Russell, Logansport.
Myron J. Parr, Plaucheville.

MAINE

Douglas G. Jenney, Belgrade.
Edward T. White, Vinalhaven.

MARYLAND

Ethel M. Grover, Solomons.

MASSACHUSETTS

A. Eugene Feio, Central Village.
Hugo A. Taglieri, Haverhill.
Edward B. Walker, Millbrook.
William H. Evans, Webster.

MICHIGAN

Milton R. Hein, Ada.
Louis Gee, Farwell.
Sayre H. Ostrander, Grand Marais.

MINNESOTA
Raymond R. McAloney, Breckenridge.
Harry A. Smith, Mound.

MISSISSIPPI
Sam L. Mansell, Camden.
Lillie R. Yelverton, Hattiesburg.
Thomas H. Buford, Holly Springs.
Levi C. Jenkins, Jr., Sallis.
Frank L. Middleton, Woodland.

MISSOURI
Robert C. Greenwood, Brunswick.
Elwood C. Thompson, Oran.
William H. Lea, Steelville.

MONTANA
Alfred H. Wilkinson, Butte.
Phyllis A. Lea, Inverness.
Sherman S. Cook, Jr., Lincoln.

NEBRASKA
Warren W. McBride, Archer.
Marie A. Bodzek, Linwood.

NEVADA
William A. Leno, Owyhee.

NEW HAMPSHIRE
Earle W. Ladd, West Stewartstown.

NEW MEXICO
Romeo A. Ortis, Bernalillo.
Robert W. Prunty, Red River.

NEW YORK
John J. Hogan, Flushing.
Horace F. Davies, Plattsburgh.
Joseph N. Vogel, Wallkill.
Albert B. Hibbert, Winthrop.

NORTH CAROLINA
Glenn O. Pasour, Bessemer City.

NORTH DAKOTA
Albert Maier, Ashley.
Verna L. Becker, Inkster.
Hazel F. Elness, Sterling.

OHIO
Harriett R. Vasbinder, Brinkhaven.
Clarence J. Loch, Salineville.

OKLAHOMA
N. Berniece Henderson, Brass.
David L. Ratliff, Fort Cobb.
Edward E. Weeks, Indianola.
Geral D. Carlin, Picher.

OREGON
Martha H. Anderson, Gardiner.
Arthur J. Hansen, Hood River.

PENNSYLVANIA
Robert G. Burgan, Cresson.
Stanley H. Ward, East McKeesport.
Paul R. Buehler, Fort Carbon.
Lester I. Heist, Robesonia.
Rudolph Simitz, Spinnerstown.

SOUTH CAROLINA
Henry F. Rucker, Bath.
Thomas P. Edwards, Gresham.
Angeline R. Cobb, Hodges.
Louise R. McLeod, Rembert.
Earle W. Crosby, Smoaks.
William B. Laye, West Union.

SOUTH DAKOTA
Eldon H. Robbins, Carthage.

TENNESSEE
William F. Parrott, LaFollette.
Clarence H. Davis, Signal Mountain.

TEXAS
Sam E. Henderson, Atlanta.
Charles L. Jones, Chandler.
Wilbur W. Mueller, Flatonia.
Issac J. Newman, Moody.
Corolee J. Wismar, Sabine Pass.
James D. Baldwin, Seagoville.

VERMONT
Donald R. Dayton, East Middlebury.

VIRGINIA
Bessie C. Townshend, Bluemont.
John M. Corstaphney, Clifton Forge.
John R. Pritchard, Jr., Emporia.
John C. Raiford, Ivor.
Willie W. Smith, Sedley.

WEST VIRGINIA
Robert C. Fenton III, Williamstown.

WISCONSIN
Richard C. Coffen, Lake Tomahawk.
Sylvester J. Penning, Stockbridge.
Donald O. Miller, Thiensville.
Earl J. Murray, Webster.

SENATE

MONDAY, MAY 2, 1960

The Senate met at 10 o'clock a.m., and was called to order by Senator JOHN STENNIS of Mississippi.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O Thou God of love, on this national day dedicated to the sanctity of law, we thank Thee for the ever-higher levels to which man has climbed on the stepping-stones of the statutes for the common protection he has enacted. We humbly acknowledge that our Nation's respect for justice, under the law before which all stand as equals, has its very roots in our spiritual heritage.

In this Legislative Chamber, where laws for the good of all are fashioned, we would dedicate our powers to further the efforts now being made by men of good will for the extension of the reign of law in all relationships between nations in the crusade for world peace. On this day of law, make us vividly conscious that respect for manmade laws alone will not suffice, and that men will lose that reverence unless they recognize a divine sanction behind such ordinances.

As those who love Thy law, written on the tablets of our hearts may there rest the benediction which changes statutes into songs.

Blessed is the man whose delight is in the law of the Lord, and who in that law doth meditate day and night.

We ask it in the name of the Redeemer who came, not to destroy the law, but to fulfill it. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., May 2, 1960.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JOHN STENNIS, a Senator from the State of Mississippi, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. STENNIS thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Friday, April 29, 1960, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on April 29, 1960, the President had approved and signed the following acts:

S. 634. An act for the relief of Grace C. Ream;

S. 1856. An act for the relief of Frank Podany;

S. 2434. An act to revise the boundaries and change the name of the Fort Laramie National Monument, Wyo., and for other purposes;

S. 2804. An act to donate to the Keweenaw Bay Indian Tribe, L'Anse Reservation of Michigan, a certain tract of Federal land with improvements located thereon; and

S. 2877. An act to authorize the reconveyance of tribally owned lands by the Muckleshoot Indian Tribe of the State of Washington to the original allottees, their heirs, devisees, or assigns.

REPORT ON MUTUAL SECURITY PROGRAM—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 373)

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read and, with the accompanying report, referred to the Committee on Foreign Relations:

To the Congress of the United States:

Transmitted herewith is the Seventeenth Semiannual Report on the Operation of the Mutual Security Program for the period ending December 31, 1959. The report was prepared under the direction of the coordinator for the mutual security program by the Department of State (including the International Cooperation Administration), the Department of Defense, and the Development Loan Fund.

In the decade of the 1960's our country will face new and somewhat different problems in the mutual security area. For example, the divergence in living standards between the Western democracies and the underdeveloped countries poses a growing problem to our purpose of maintaining and extending free political and economic institutions. It also presents an increasingly acute need for development assistance.

Our friends and allies in Europe are also aware of this need, and as their ability to provide development assistance grows, we are increasingly consulting with them to determine how the burden can most efficiently be shared by all.

The growing need for development assistance demands of our mutual security program the utmost prudence and foresight in the management of its resources for such purposes. I am accordingly convinced that our program must be flexible, as well as strong, so that we may be able to deal with this and other problems that arise quickly, wisely and successfully.

DWIGHT D. EISENHOWER.
THE WHITE HOUSE, *May 2, 1960.*

EXECUTIVE MESSAGES REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour; and I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Subcommittee on Minerals, Materials, and Fuels, of the Committee on Interior and Insular Affairs; the Committee on the Judiciary; and the Committee on Interstate and Foreign Commerce were authorized to meet during the session of the Senate today.

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Internal Security Subcommittee of the Committee on the Judiciary was authorized to sit during the session of the Senate today.

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator from Texas will state it.

Mr. JOHNSON of Texas. As I understand the unanimous-consent agreement, at the conclusion of the morning hour there will be 5 minutes for those who favor and 5 minutes for those who oppose each amendment which is called up. Is that correct?

The ACTING PRESIDENT pro tempore. That is correct. A written memorandum of that agreement is available to all Senators.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

ESTABLISHMENT OF FLAG BILLETS FOR CERTAIN NAVAL OFFICERS

A letter from the Deputy Secretary of Defense, transmitting a draft of proposed legislation to authorize the establishment of while-so-serving flag billets for officers of the Navy who are designated for special duty in communications, law, naval intelligence, public information, and meteorology (with accompanying papers); to the Committee on Armed Services.

AUDIT REPORT ON CUSTODIANSHIP FUNCTIONS, OFFICE OF THE TREASURER OF THE UNITED STATES

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on custodianship functions, Office of the Treasurer of the United States, Treasury Department, fiscal year 1959 (with an accompanying report); to the Committee on Government Operations.

REPORT ON EXAMINATION OF SELECTED ACTIVITIES UNDER DEPARTMENT OF THE ARMY CONTRACTS WITH WESTERN ELECTRIC CO., INC.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the examination of selected activities under Department of the Army contracts with Western Electric Co., Inc., New York, N.Y., for Nike guided missile weapon systems dated April 1960 (with an accompanying report); to the Committee on Government Operations.

REPORT ON EXAMINATION OF ADDITIONAL FEES PAID UNDER DEPARTMENT OF DEFENSE CONTRACTS

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the examination of additional fees paid by the Government for contractor financing expenses under Department of Defense contracts, dated April 1960 (with an accompanying report); to the Committee on Government Operations.

JOHN TREVOR JEFFERIES, CHARMIAN CANDY JEFFERIES, AND STEPHEN REID JEFFERIES

A letter from the Under Secretary of Commerce, transmitting a draft of proposed legislation for the relief of John Trevor Jefferies; his spouse, Charmian Candy Jefferies; and their minor son, Stephen Reid Jefferies (with accompanying papers); to the Committee on the Judiciary.

REGULATION OF SESSIONS OF DISTRICT COURTS

A letter from the Director, Administrative Office of the U.S. Courts, Washington, D.C., transmitting a draft of proposed legislation to provide that the district courts shall be always open for certain purposes, to abolish terms of court and to regulate the sessions of the courts for transacting business (with an accompanying paper); to the Committee on the Judiciary.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting, pursuant to law, a report of the Archivist of the United States on a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The ACTING PRESIDENT pro tempore appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the committee on the part of the Senate.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated.

By the ACTING PRESIDENT pro tempore:

A concurrent resolution of the Legislature of the State of Hawaii; to the Committee on Banking and Currency:

"HOUSE CONCURRENT RESOLUTION 59

"Whereas, $13 million of Federal aid money is available for developing low-rent public housing in Hawaii; and

"Whereas additional sites for public housing are difficult to attain; and

"Whereas a possible solution, whereby the available Federal aid money can be utilized, is to construct high-rise low-rent public housing on presently-used housing sites; and

"Whereas in the presently-used housing areas, there are many middle-income families; and

"Whereas should these areas be used for low-rent public housing, the middle-income families would not qualify to remain therein and would be displaced therefrom; and

"Whereas many of the members of the middle-income families have been, throughout the years, very progressive and have supplied much of the community leadership in these housing areas; and

"Whereas should the United States Housing Act of 1937, as amended, be further amended to permit a percentage of the residents in any low-rent federally-aided public housing area, to be middle-income families, it would then be possible to add to the number of low-rent units in our present housing areas and at the same time to allow middle-income families to remain therein, thereby taking advantage of the leadership qualities of the members of the middle-income families: Now, therefore, be it

"Resolved by the House of Representatives of the First Legislature of the State of Hawaii, Budget Session of 1960 (the Senate concurring), That the Congress of the United States be and it is hereby requested to amend the United States Housing Act of 1937, as amended, so as to permit a percentage of residents in any low-rent federally-aided public housing area to remain in said area who would otherwise be displaced therefrom by reason of their relatively high income; and be it further

"Resolved, That certified copies of this concurrent resolution be forwarded to the President of the U.S. Senate, the Speaker of the U.S. House of Representatives, the majority floor leaders of the two said bodies, the Honorable U.S. Senators OREN E. LONG and HIRAM L. FONG, and the Honorable U.S. Representative DANIEL K. INOUYE."

A petition signed by Rose I. Oshiro, and sundry other citizens of Ryukyuan ancestry, paying for the enactment of House bill 1157, relating to the development of the Ryukyu Islands; to the Committee on Armed Services.

A resolution adopted by the Chamber of Commerce of Petersburg, Alaska, favoring the revocation of the Executive order governing Indian Fishing Regulations in Alaska, dated April 6, 1960; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CLARK, from the Committee on Post Office and Civil Service, with an amendment:

S. 2857. A bill to amend the Civil Service Retirement Act so as to provide for refunds of contributions in the case of annuitants whose length of service exceeds the amount necessary to provide the maximum annuity allowable under such act (Rept. No. 1302).

By Mr. BYRD of Virginia, from the Committee on Finance, with an amendment:

H.R. 4029. An act to amend the Internal Revenue Code of 1954 to eliminate the proration of the occupational tax on persons dealing in machine guns and certain other firearms, to reduce occupational and transfer taxes on certain weapons, to make the transferor and transferee jointly liable for the transfer tax on firearms, and to make certain changes in the definition of a firearm (Rept. No. 1303).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

S. 2627. A bill for the relief of Nicholas Anthony Marcantonakis (Rept. No. 1308);

S. 2833. A bill for the relief of Sadako Suzuki (Rept. No. 1309);

S. 2939. A bill for the relief of Dr. Chien Chen Chi (Rept. No. 1310);

S. 3114. A bill for the relief of Adolphe Herstein (Rept. No. 1311);

S. 3170. A bill for the relief of Sam Doolittle (Rept. No. 1312);

HR. 1752. An act for the relief of Wilhelmina Ordonez (Rept. No. 1322);

H.R. 2082. An act for the relief of James Demetrios Chrysanthes, also known as James Demetrios Chrysanthacopoulos (Rept. No. 1323);

H.R. 3786. An act for the relief of Chan Kit Ying and James George Bainter (Rept. No. 1324);

H.R. 3934. An act for the relief of Mrs. E. Christine Williams (Rept. No. 1325);

H.R. 4562. An act for the relief of Stanislaw Grzelewski (Rept. No. 1326);

H.R. 4825. An act for the relief of Jean K. Simmons (Rept. No. 1327);

H.R. 6843. An act for the relief of Daniel Wilging (Rept. No. 1328);

H.R. 7254. An act for the relief of Simeen Helena Chaghaghi (Rept. No. 1329); and

H.R. 8672. An act for the relief of Dr. Deh Chang Tao (Rept. No. 1330).

By Mr. EASTLAND, from the Committee on the Judiciary, with an amendment:

S. 2776. A bill for the relief of Raymond Thomason, Jr., (Rept. No. 1314);

S. 2799. A bill for the relief of Santo Scardina (Rept. No. 1315);

S. 2821. A bill for the relief of Kristina Selan (Rept. No. 1316); and

S. 3081. A bill for the relief of Irena Maria Koller (Rept. No. 1317).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 1349. A bill for the relief of Song Tai Song (Rept. No. 1318);

S. 2635. A bill for the relief of Maria Genowefa Kon (Rept. No. 1319);

S. 2739. A bill for the relief of Yu Shu Lin, a minor (Rept. No. 1320); and

S. 2886. A bill for the relief of Nikolija Lazic (Rept. No. 1321).

By Mr. O'MAHONEY, from the Committee on the Judiciary, without amendment:

S. 3327. A bill for the relief of Jean Goedicke (Rept. No. 1313); and

H.J. Res. 598. Joint resolution to extend the time for filing of the final report of the Lincoln Sesquicentennial Commission (Rept. No. 1305).

By Mr. O'MAHONEY, from the Committee on the Judiciary, with an amendment:

H.J. Res. 640. Joint resolution to authorize and request the President to issue a proclamation in connection with the centennial of the birth of General of the Armies John J. Pershing (Rept. No. 1304).

By Mr. McCLELLAN, from the Committee on the Judiciary, with an amendment:

S. 3338. A bill to remove the present $5,000 limitation which prevents the Secretary of the Air Force from settling certain claims arising out of the crash of a U.S. Air Force aircraft at Little Rock, Ark. (Rept. No. 1307).

By Mr. JOHNSTON of South Carolina, from the Committee on Agriculture and Forestry, with an amendment.

S. 2759. A bill to strengthen the wheat marketing quota and price support program (Rept. No. 1306).

By Mr. CHAVEZ, from the Committee on Public Works, without amendment:

S. 2985. A bill to change the name of the locks and dam No. 41 on the Ohio River at Louisville, Ky. (Rept. No. 1331).

REPORT OF JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES—FEDERAL EMPLOYMENT AND PAY

Mr. BYRD of Virginia. Mr. President, as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures, I submit a report on Federal employment and pay for the month of March 1960. In accordance with the practice of several years' standing, I ask unanimous consent to have the report printed in the RECORD, together with a statement by me.

There being no objection, the report and statement were ordered to be printed in the RECORD, as follows:

FEDERAL PERSONNEL IN EXECUTIVE BRANCH, MARCH 1960 AND FEBRUARY 1960, AND PAY, FEBRUARY 1960 AND JANUARY 1960

PERSONNEL AND PAY SUMMARY

[See table I]

Information in monthly personnel reports for March 1960 submitted to the Joint Committee on Reduction of Nonessential Federal Expenditures is summarized as follows:

Total and major categories	Civilian personnel in executive branch			Payroll (in thousands) in executive branch		
	In March, numbered—	In February, numbered—	Increase (+) or decrease (−)	In February, was—	In January, was—	Increase (+) or decrease (−)
Total [1]	[2] 2,514,752	2,331,884	+182,868	$996,598	$1,026,742	−$30,144
Agencies exclusive of Department of Defense	1,469,077	1,284,724	+184,353	536,240	566,716	−30,476
Department of Defense	1,045,675	1,047,160	−1,485	460,358	460,026	+332
Inside the United States	2,351,300	2,172,137	+179,163			
Outside the United States	163,452	159,747	+3,705			
Industrial employment	556,364	556,493	−129			
Foreign nationals	179,352	179,479	−127	21,459	[3] 21,657	−198

[1] Exclusive of foreign nationals shown in the last line of this summary.
[2] Includes 186,214 temporary employees (enumators, clerks, supervisors, crew leaders, etc.) of the Department of Commerce, engaged in taking the Eighteenth Decennial Census, as compared with 4,431 in February.
[3] Revised on basis of later information.

Table I breaks down the above figures on employment and pay by agencies.

Table II breaks down the above employment figures to show the number inside the United States by agencies.

Table III breaks down the above employment figures to show the number outside the United States by agencies.

Table IV breaks down the above employment figures to show the number in industrial-type activities by agencies.

Table V shows foreign nationals by agencies not included in tables I, II, III, and IV.

TABLE I.—*Consolidated table of Federal personnel inside and outside the United States employed by the executive agencies during March 1960, and comparison with February 1960, and pay for February 1960, and comparison with January 1960*

Department or agency	Personnel				Pay (in thousands)			
	March	February	Increase	Decrease	February	January	Increase	Decrease

[1] Revised on basis of later information.

STATEMENT OF SENATOR BYRD, OF VIRGINIA

Executive agencies of the Federal Government reported civilian employment in the month of March totaling 2,514,752. This was a net increase of 182,868 as compared with employment reported in the preceding month of February.

Civilian employment reported by the executive agencies of the Federal Government, by months in fiscal year 1960, which began July 1, 1959, follows:

Month	Employment	Increase	Decrease
1959—July	2,370,694	3,703	
August	2,364,320		6,374
September	2,345,359		18,961
October	2,348,807	3,448	
November	2,372,247	23,440	
December	2,364,342		7,905
1960—January	2,329,442		34,900
February	2,331,884	2,442	
March	2,514,752	182,868	

Total Federal employment in civilian agencies for the month of March was 1,469,077, an increase of 184,353 as compared with the February total of 1,284,724. Total civilian employment in the military agencies in March was 1,045,675, a decrease of 1,485 as compared with 1,047,160 in February.

Civilian agencies reporting the larger increases were Commerce Department with 181,997, State Department with 851, and Federal Aviation Agency with 810. The largest decrease was reported by Post Office Department with 1,258.

Nearly all of the Commerce Department increase was in the Bureau of the Census which during March on a temporary basis was employing a total of 186,214 in connection with the 18th decennial census, including 170,627 enumerators, 11,156 crew leaders, and 4,431 clerks and others. The employment build-up for the census started in February with 4,431; it is likely to be at its peak in April.

In the Defense Department decreases in civilian employment were reported by Department of the Air Force with 1,297, and Department of the Navy with 172.

Inside the United States civilian employment increased 179,163, and outside the United States civilian employment increased 3,705. Industrial employment by Federal agencies in March totaled 556,364, a decrease of 129.

These figures are from reports certified by the agencies as compiled by the Joint Committee on Reduction of Nonessential Federal Expenditures.

FOREIGN NATIONALS

The total of 2,514,752 civilian employees certified to the committee by Federal agencies in their regular monthly personnel reports includes some foreign nationals employed in U.S. Government activities abroad, but in addition to these there were 179,352 foreign nationals working for U.S. military agencies during March who were not counted in the usual personnel reports. The number in February was 179,479. A breakdown of this employment for March follows:

Country	Total	Army	Navy	Air Force
Belgium	2			2
England	3,259			3,259
France	21,894	17,577	4	4,313
Germany	81,101	68,835	55	12,211
Japan	62,238	20,639	16,032	25,567
Korea	6,428	6,428		
Morocco	3,815	2	846	2,967
Netherlands	41			41
Norway	24			24
Saudi Arabia	2			2
Spain	1			1
Trinidad	547		547	
Total	179,352	113,481	17,484	48,387

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

Ralph Kennamer, of Alabama, to be U.S. attorney for the southern district of Alabama;

William L. Longshore, of Alabama, to be U.S. attorney for the northern district of Alabama;

Oliver H. Metcalf, of Pennsylvania, to be U.S. marshal for the middle district of Pennsylvania; and

Joseph S. Bambacus, of Virginia, to be U.S. attorney for the eastern district of Virginia.

By Mr. McCLELLAN, from the Committee on the Judiciary:

Francis Adams Cherry, of Arkansas, to be a member of the Subversive Activities Control Board.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CLARK:

S. 3458. A bill amending section 112 of the Housing Act of 1949; to the Committee on Banking and Currency.

By Mr. WILEY:

S. 3459. A bill for the relief of John W. Snyder; to the Committee on the Judiciary.

Mr. PASTORE (for Mr. ANDERSON) (by request):

S. 3460. A bill to amend section 143 of the Atomic Energy Act of 1954, as amended, to

grant access to restricted data to Coast Guard personnel on the same basis as such access is granted to certain personnel of agencies of the Department of Defense, and for other purposes; and

S. 3461. A bill to amend various sections of the Atomic Energy Act of 1954, as amended, and the Euratom Cooperation Act of 1958; to the Joint Committee on Atomic Energy.

By Mr. LAUSCHE:

S. 3462. A bill for the relief of Maria Spisz; to the Committee on the Judiciary.

By Mr. BEALL:

S. 3463. A bill to increase annuities payable to certain annuitants from the District of Columbia teachers' retirement fund; to the Committee on the District of Columbia.

By Mr. YOUNG of North Dakota:

S. 3464. A bill to provide equitable treatment for partnerships in the application of any limitations on any farm program; to the Committee on Agriculture and Forestry.

By Mr. JOHNSTON of South Carolina:

S. 3465. A bill to authorize and direct that the national forests be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. DOUGLAS:

S. 3466. A bill for the relief of Peter Karl Ferdinand Grieder; to the Committee on the Judiciary.

By Mr. MCNAMARA (for himself, Mr. KENNEDY, Mr. CLARK, Mr. RANDOLPH, and Mr. HUMPHREY):

S.J. Res. 189. Joint resolution to provide for the designation of the first full week in May of each year as "National Employ the Older Worker Week;" to the Committee on the Judiciary.

(See the remarks of Mr. MCNAMARA when he introduced the above joint resolution, which appear under a separate heading.)

RESOLUTION

PRINTING AND REFERENCE OF REPORT ON WATER RESOURCES AND CONTINUANCE OF STUDIES

Mr. MOSS (for himself, Mr. GRUENING, and Mr. MUSKIE) submitted the following resolution (S. Res. 311), which was referred to the Committee on Interior and Insular Affairs:

Whereas the Senate by committee action, public hearings, and floor vote on Senate Resolution 248 (85th Cong., 2d sess.) has been engaged in a continuing study of the relative water resource and related development programs of the United States and Soviet Russia, since 1957; and

Whereas that endeavor through the joint efforts of the Committee on Interior and Insular Affairs and the Committee on Public Works has now resulted in a factual, eyewitness report revealing the remarkable effort and accomplishment of the Union of Soviet Socialist Republics to overtake and then surpass the United States of America in this vital field: Now, therefore, be it

Resolved, That this report be received, accepted, ordered printed, and referred to the Committee on Appropriations, Committee on Interior and Insular Affairs, and the Committee on Public Works for appropriate consideration in relation to their other duties; and be it further

Resolved, That it is the sense of the Senate that the Committee on Interior and Insular Affairs and the Committee on Public Works continue the joint studies as previously requested, including, as appropriate, securing similar information concerning developments in Communist China and elsewhere, and continue also, as previously requested, to submit their recommendation of ways and means to accelerate the development and utilization of the natural resources of the United States.

NATIONAL EMPLOY THE OLDER WORKER WEEK

Mr. MCNAMARA. Mr. President, one of the serious problems that has been under investigation by our Subcommittee on Problems of the Aged and Aging is that of discrimination in employment because of age.

Our hearings and studies have shown us how widespread this discrimination is—and even more distressing is the fact that it can begin to haunt an individual as early as age 45 or even before.

As automation, or mergers displace workers in the 45 to 65 age group from their regular jobs, these persons find it increasingly difficult to obtain new employment.

In the recent recession, for example, persons in this age group had the greatest duration of unemployment of those under 65.

The report of the subcommittee describes the situation in considerable detail.

Mr. President, this situation is not only injurious to the dignity and self-respect of older workers, as well as the very livelihood of themselves and their families, but it also deprives the country of one of its most valuable resources, the skill and experience of the mature person.

Fortunately, we also found in our hearings that a great deal of new attention was being given this problem.

State and local levels of government are initiating efforts to end this discrimination, with six States having enacted laws to prevent it.

Taking a leading role in these efforts is the American Legion, which has designated this week as "Employ the Older Worker Week."

I am happy to salute the Legion for its work in calling attention to the problem, and I believe its campaign deserves the recognition and support of the Federal Government.

For that reason, I introduce, for appropriate reference, a joint resolution which would designate the first week in May of each year as "National Employ the Older Worker Week."

I am joined in sponsorship of the joint resolution by Senators KENNEDY, CLARK, RANDOLPH, and HUMPHREY.

Passage of the joint resolution would give this worthy program the status, stability, and recognition that it deserves.

I send the joint resolution to the desk and ask unanimous consent that the text be printed in the RECORD as part of my remarks.

The ACTING PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the RECORD.

The joint resolution (S.J. Res. 189) to provide for the designation of the first full week in May of each year as "National Employ the Older Worker Week," introduced by Mr. MCNAMARA (for himself and other Senators), was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Whereas the Nation is witnessing the emergence of patterns of discrimination in employment against properly qualified persons because of their age; and

Whereas such age discrimination is contrary to American traditions of equal opportunity for men and women who are willing and able to work; and

Whereas bias against jobseekers as young as 45 and sometimes younger, because they are deemed too old, deprives the national economy of important sources of experienced workers, increases the burden upon public welfare resources, and imposes on older persons a sense of humiliation and loss of faith in the free enterprise system; and

Whereas local, State, and National organizations, and employers and labor organizations should be encouraged voluntarily to take all possible and proper measures to eliminate discrimination in employment against properly qualified persons because of their age: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the first full week in May of each year, beginning with the year 1961, as "National Employ the Older Worker Week," and calling upon employer and employee organizations, other organizations officially concerned with employment, and upon the people of the United States, in general, to observe such week with appropriate ceremonies, activities, and programs designed to bring about the elimination of discrimination in employment because of age.

ADDITIONAL TEMPORARY DISTRICT JUDGESHIP FOR MIDDLE DISTRICT OF PENNSYLVANIA—AMENDMENTS

Mr. CLARK. Mr. President, on behalf of my colleague the junior Senator from Pennsylvania [Mr. SCOTT] and myself, I submit amendments to the omnibus judgeship bill—S. 2673—to create an additional temporary district judgeship for the middle district of Pennsylvania. The proposal is in accordance with the recommendation of the judicial conference at its meeting on March 10 and 11, 1960.

The judges in the middle district of Pennsylvania are in urgent need of assistance. Chief Judge Murphy has been seriously ill since last summer. Judge Follmer, the other active judge, is 74 years of age and is unable, alone, to carry the full load of the work in the district.

In the first half of fiscal year 1960, civil cases commenced in the middle district increased 17 percent over the same period in the previous fiscal year.

I urge early action on the omnibus judgeship bill, which has been pending on the Senate Calendar since last September.

The ACTING PRESIDENT pro tempore. The amendments will be received, printed, and lie on the table.

Mr. CLARK. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a memorandum of the judicial business of the middle district of Pennsylvania and certain tables indicating the caseload in that district.

There being no objection, the memorandum and tables were ordered to be printed in the RECORD, as follows:

THE JUDICIAL BUSINESS OF THE MIDDLE DISTRICT OF PENNSYLVANIA

There are two judgeships in the middle district of Pennsylvania and have been since the second was created in 1929. The caseload is light and normally cannot be considered too heavy for two judges to carry. However, Judge John Murphy, the chief judge, has been seriously ill since last summer, was operated on at the National Institutes of Health in Washington last November and has not yet returned to duty.

Judge Follmer, the other active judge in the district, is 74 years old and it is impossible for him to carry the full load of the work in the district alone.

Judge Murphy got very badly behind in his work before the current illness (diagnosed as cancer) and had a considerable list of old cases under advisement at the time the district was inspected by me last spring at the request of Judge Biggs.

The following report concerning this district was made by the committee to the March 1959 session of the Judicial Conference:

"Middle district of Pennsylvania: Judge Biggs, chief judge of the third circuit, presented to the committee the need for an additional temporary judgeship in the middle district of Pennsylvania because of personnel problems involving the present judges. He pointed out that some cases in that district have been pending for considerable lengths of time awaiting action by the court. The committee considered the statistical report of the business of the district and the fact that the caseload per judgeship in 1958 was 187 civil cases filed compared with the national average of 259, 105 private civil cases compared with the national average of 167 and 69 criminal cases compared with the national average of 108 and that the pending civil caseload was 213 civil cases per judgeship compared with the national average of 270. The decrease in private civil cases filed in the 5-month period from August through December 1958 compared with the same months of the previous year was 7 percent. The vote on the creation of a new judgeship for this district by the committee was 3 to 3 and, therefore, no recommendation is made."

Judge Murphy has himself written a letter to Judge Biggs advocating the creation of another judgeship. That letter reads as follows:

"OCTOBER 23, 1959.

"DEAR JUDGE BIGGS: Just a note by way of a progress report on my illness. It appears that the sugar problem is under dietary control. However, I have been unable thus far to solve the problem of the pains in the muscles of my back.

"After long deliberation it occurs to me that the work in the district has practically doubled in the Scranton area, so far as I am concerned, since the retirement of Judge Watson. We have had a particularly heavy criminal caseload requiring a number of trials. Notwithstanding the fact that I have not taken a vacation in years, I have been working long hours in the office and at home in order to keep up with the work schedule. It is my considered judgment that this district should have an additional judge, at least on a temporary basis.

"It may be that we do not meet the 'statistical standards' viewed from a national viewpoint. The fact is, however, that the workload is here and it has been quite an effort to keep up with it.

"I do hope that you will exert every possible effort to see that the middle district is considered in the omnibus bill, or any other bills that are introduced, in order to increase the judge manpower in this district.

"With warm personal regards, I am,

"Sincerely,

"JOHN W. MURPHY."

The work of the district has been greatly aided by the help of visiting judges brought in by Judge Biggs. That help, however, is necessarily of a temporary nature and does not offer a permanent solution to the problem.

The statistical tables concerning the business of the district through the fiscal year 1959 are attached. In the first half of the fiscal year 1960 civil cases commenced increased 17 percent over the same period in the previous fiscal year and private cases 7 percent—both classes, however, still being less than the national average.

Respectfully submitted.

WILL SHAFROTH,
Chief, Division of Procedural Studies and Statistics, Administrative Office of the U.S. Courts.

FEBRUARY 15, 1960.

1950	20		11.2		6.7	1956	43	15.0	15.4	11.5	10.3						

[1] The median time interval in months is computed for the civil cases in which a trial was held, which were terminated during the year, excluding land condemnation, habeas corpus, and forfeiture proceedings. No median interval is shown for the years 1945 through 1952 where less than 25 cases were terminated after trial. For the year 1953 and subsequent years, where there were less than 25 cases terminated after trial, a median is listed with an asterisk (*) on the basis of the number of cases terminated after trial for the last 2 years, provided there were 25 such cases for the 2 years.

EXTENSION OF PROGRAM FOR UTILIZATION OF SALINE WATER—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of April 29, 1960, the names of Senators WILEY, KUCHEL, and ALLOTT were added as additional cosponsors of the bill (S. 3446) to amend the act of July 3, 1952, as amended relating to research and development and utilization of saline water, introduced by Mr. CASE of South Dakota on April 29, 1960.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. MCCARTHY:

Statement by Senator HUMPHREY entitled "West Virginia's Coal Resources—a Tremendous Power Potential for New Industry."

CONNOLE OUT: GAS PRICES UP—ADMINISTRATION MUST ASSUME RESPONSIBILITY

Mr. PROXMIRE. Mr. President, the significance of the refusal of President Eisenhower to reappoint William Connole, the lone champion of the consumer on the Federal Power Commission, simply cannot be overestimated. This is almost a classic textbook clash between the public interest and special interests. Last week, I repeatedly documented, on the floor of the Senate the fact that William Connole, alone of the Federal Power Commissioners, has insisted on battling time after time for the consuming public and against the position taken by the gas lobby.

The amazing fact about this unusually competent and dedicated champion of the public interest is that he is deeply respected by the industry itself. Nearly 2 years ago, the Oil and Gas Journal, a spokesman for the petroleum industry, published an unusually discerning article about Mr. Connole. It set forth his biography, which indicated excellent qualifications. It also briefly delineated Mr. Connole's philosophy on regulation. I call the attention of my fellow Senators to that statement. It is an unusually sensitive expression of the responsibility of the regulator. It is a clear recognition of the heavy double responsibility of the regulator: to the industry regulated, and to the consuming public.

Mr. President, by refusing to reappoint Mr. Connole, and by leaving the Federal Power Commission entirely in the hands of Commissioners who—on the record—recognize their responsibility as primarily to the regulated industry, the President of the United States has walked out on the consuming public. He has turned his back on the public interest.

Of course, President Eisenhower has a perfect constitutional right to appoint or to reappoint anyone he pleases to the Federal Power Commission; but, at the same time, when the President refuses to reappoint the one Commissioner who has clearly established his expertise and his understanding of his responsibility to the consumer, and when the President dismisses questions on the reappointment with an insulting statement about being able to "find a better man," it seems to me that there is ground for the conclusion that the President has forgotten the consumer.

Mr. President, in an editor's note accompany this Oil and Gas Journal article, it is observed that Mr. Connole "will probably be around in Washington for many years to come." The industry itself did not expect that the President would fail to reappoint the one and only consumer champion on the Commission.

Mr. President, the article consists mainly of an interview with Mr. Connole, on the subject of how far regulation of the gas industry should go. In the course of the interview, Mr. Connole explained precisely how weak regulation or the absence of regulation leads to exploding consumer prices for millions of Americans who use gas to heat their homes.

It also shows that Connole is a man who both knows his subject intimately and speaks for himself.

I ask unanimous consent, Mr. President, that the article entitled "How Far Should Gas Regulation Go?" from the Oil and Gas Journal of June 2, 1958, be printed in the RECORD in the following order: First, the editor's note; then the thumbnail biography of Mr. Connole; next, his philosophy of regulation; then the introduction to the interview; and, finally the interview itself.

Mr. President, I also ask unanimous consent that a typically hard-hitting no-holds-barred editorial entitled "Last Friend of Consumers on FPC to Get Sack," from the Madison (Wis.) Capital Times, also be printed at this point in the RECORD.

Mr. President, I also ask to have printed at this point in the RECORD a well-documented editorial, from the Milwaukee Journal, showing how the refusal to reappoint Mr. Connole represents a triumph for the oil and gas interests over the consumer.

There being no objection, the article and the editorials were ordered to be printed in the RECORD, as follows:

[From the Oil and Gas Journal, June 2, 1958]

HOW FAR SHOULD GAS REGULATION GO?

EDITOR'S NOTE.—William R. Connole is the youngest and most controversial member of the five-man Federal Power Commission. During his 3 years on the Commission, he has been widely criticized by the petroleum industry for his views on Federal controls. He will probably be around in Washington for many years to come.

For these reasons, the Journal thinks gas men should know him better. To give gas men Connole's philosophy in his own words, the Journal assigned its veteran Washington editor, Bertram F. Linz, to conduct this extensive interview.

BIOGRAPHY

William R. Connole is the youngest man ever appointed to a Federal regulatory agency. He became a member of the Federal Power Commission in June 1955 at the age of 33.

But he had established another record 5 years earlier. He was the youngest person ever to be appointed general counsel to a State regulatory body when he joined the Connecticut Public Utilities Commission. He advanced from that post to the FPC.

Connole was born in Naugatuck, Conn., in 1922. He has three degrees, a bachelor of arts from Georgetown University's school of foreign service and college of arts and science, and a law degree and master of arts in economics from the graduate school of Trinity College, Hartford, Conn.

Connole got his first experience in regulation in the Interstate Commerce Commission. Joining the ICC while in law school, he served first as legal assistant to Commissioner Walter M. W. Splawn and later as attorney-

examiner in the Bureau of Formal Cases. After leaving the ICC, he engaged in the general practice of law.

While on the FPC, Connole frequently has dissented from the majority. He has refused to attach conditions to producers' initial prices which he felt were too high and in cases where he felt the result was out of line with his concept of regulation. He also has opposed congressional recommendations that FPC not be required to consider cost and revenue in rate cases.

Connole is married and has four children.

CONNOLE OUTLINES HIS PHILOSOPHY ON REGULATION

"I believe strongly in two fundamental principles. These govern my actions as much as any other.

"First, the regulatory process is the soundest protection against either of two unacceptable extremes; the unbridled monopolistic excesses which, in the early history of the Nation, nearly wrecked industries affected with the public interest, or outright socialism of those industries. It would be hard to select which is worse.

"Second, the regulator constantly must choose between two or more unpopular choices, any one of which will offend some vested interest or misguided consumer interest.

"The knowledge of the first is what gives regulation its validity and its challenge. It is the reason that regulatory commissions, in my judgment, are in the very front rank in importance among domestic governmental agencies.

"The knowledge of the second is what makes it possible to shrug off any mistaken objections to decisions I may join in and is the reason I feel no personal offense at them.

"I believe the industries under regulation will thrive, and the economy of the Nation with them, to the extent that regulation is sound, is respected, is observed. For this reason I resent deeply the suggestion that the remedy for any individual infirmities discovered in isolated instances is to abolish the whole system. Such burning down of the barn to roast the pig would be catastrophic. After all, the electric and gas industries, to name only two, represent the greatest aggregations of capital ever known to the world. And they have prospered because of, not in spite of, effective regulation.

"The risk to our entire economic and political structure of discarding that process now is unthinkable."

INTRODUCTION TO THE INTERVIEW

Oil, gas, and product lines have the same problems. Should all of them be controlled by the same agency? William R. Connole, of the Federal Power Commission, thinks perhaps they should.

Connole, in this exclusive interview with the Journal, also sees a critical threat to the U.S. gas industry ahead in imported methane. And he says there are some serious problems to be met in imports of gas from Canada.

THE INTERVIEW

Question. Mr. Commissioner, is the Federal Power Commission the only agency with control over pipelines?

Answer. At the present time regulation of the pipeline industry, both oil and gas, is spread among the several agencies of Government on both the Federal and State level.

For example, on the Federal level, some degree of regulation at least is exercised by the Interior and Defense Departments, Interstate Commerce Commission, Federal Power Commission, and perhaps some others.

This appears unduly burdensome to the industry and probably does not react in the general public interest. I suggest that more reasonable and effective regulation is possible were oil pipelines and natural gas pipelines and even liquefied petroleum gas pipelines regulated by same source.

Question. Would that involve control of the oil and LPG lines?

Answer. This doesn't mean that I favor the regulation of oil pipelines to the same extent and in the same manner as natural gas pipelines.

The nature of the business as a common carrier in law, if not in fact, argues against this.

Nor do I advocate divorcement of pipelines from integrated companies. Every effort to date to do so has met with such objections that it has failed. But there are enough problems common to both that regulation of one should not be carried on with no regard whatsoever for the direction of the other.

Question. You feel then, that oil and gas pipelines are so similar in some respects that they should be dealt with by a single agency?

Answer. As natural gas pipelines increasingly resort to transportation contracts covering gas to which they do not have title, they become more nearly like oil pipelines with the exception, of course, that the duration and stability of the transportation contracts differ.

Similarly, oil pipelines, to the extent they are successful in maintaining their status as plant facilities of integrated companies, become more nearly like natural gas pipelines that produce from their own reserves and transport to a buyer.

I think the whole petroleum energy picture should be before the regulatory agency which attempts to regulate any one aspect of it.

Question. Getting down to the case of gas, What changes do you feel should be made in the Natural Gas Act?

Answer. First, the requirements that certificates of public convenience and necessity be obtained before producers may sell gas should be dropped.

No material benefit seems to result from this requirement. Only one real benefit can be realized from this process and this can be achieved in other, less-burdensome ways.

New contracts for sale of gas should be presented to the Commission before sales are permitted under them to give the Commission an opportunity of deciding whether the public convenience requires the commencement of sales at the particular price level proposed.

Question. How can this be done?

Answer. This can be done through some modification of the requirements of section 7 of the Natural Gas Act, and in my judgment would provide the most effective and painless method of keeping natural-gas prices from running away with the market.

Question. How does this "running away" come about?

Answer. It is the new contracts which historically set the level for future negotiation and for price increases in existing contracts.

For example, in a recent hearing on a producer's contract a responsible official for one of the largest purchasing pipelines testified that the highest price being paid for gas in the same area is determinative of the price asked for the gas. By restricting these increases the artificial pressure for pipeline companies and others to bid unreasonably high prices is sharply reduced. Meanwhile, price levels are subject to an orderly demonstration of their reasonableness in appropriate proceedings.

The point is that the pressure for new prices then will come at price levels established by Commission authority and after Commission review. It will not be the result of near panic or overeager buying on the part of one or more pipelines which find themselves in a temporary shortage of gas and must go out and pay virtually any price in order to correct it.

Question. What about standards of reasonableness?

Answer. If the standard of measuring the risk and, hence, the lawful compensation to a producer, is as hidebound as the literal interpretation in the City of Detroit case would hold, there is much need for flexibility.

I suggest that the measure of the risk is more particularly a function of exploration and development cost than of invested capital or operating expenses in the sense more commonly used in the regulatory field.

This is because the gas production business will succeed or fall depending on whether the market will support development and exploration. Consequently, moneys spent in that pursuit are the moneys we should watch most closely and ratio to revenues in order to develop a fair incentive and a just return.

Furthermore, whether rates will provide enough to meet the financial needs of the industry (whatever ratemaking unit is finally used) and will compensate for the risk in further exploration and development depends on the probabilities of future markets. This means concern for price and marketability of competitive fuels.

For this reason, I believe some consideration must be given to the impact of the producer price at the end of the line, particularly how that price will square with competing fuel prices.

Question. Do you see price as a cause for alarm in the industry?

Answer. Prices have been bid up by overeager pipelines seeking more and more gas without sufficient regard for the impact of the new prices and the end product.

The experience in south Louisiana provides a striking example. The average price for deliveries made under 20-year contracts entered into in 1954 was 10.1 cents while in 1956 it was 16.9 cents. This represents a more than 66-percent increase in 2 years.

Question. Do you feel that is serious?

Answer. Yes. This is serious for two reasons.

First, the effect of increased producer prices is a kind of time bomb which doesn't explode until many years after the contract was made, by which time the average cost of purchased gas for a particular company may be too high to permit it to retain an effective load factor. But because of the contract terms it will be impossible for the pipeline to do anything about it.

Secondly, and related to the first reason, the ratio of wellhead prices to average value at point of consumption remains remarkably constant. For example, the average wellhead price was 25.3 percent of the value at point of consumption for the 10 years 1946 through 1956 on the average. This is so despite an increase in wellhead price from 6.2 cents (the 1946 to 1950 average) to 10.8 cents (the 1956 price).

Question. What does that indicate to you?

A. If the average wellhead price continues to increase, and the relationship between that wellhead price and value at point of consumption remains the same, the average wellhead price by 1962 will be 17 cents and the average value at point of consumption will be 60 cents. As the more recent contracts occupy an increasingly large proportion of total sales, the rate of increase might well be greater.

Sometimes it appears that the separation of producer from ultimate consumer has served to dull the realization of how steeply and rapidly the prices at point of consumption can be expected to increase in the next few years. And with off-peak sales already being lost to competing fuels and no clear-cut successful substitute to take up those sales, the prospects are that the slack will appear in the rates for winter heating season customers.

Question. Do you consider all producer prices too high?

Answer. No. Despite the increase in average wellhead prices, there is an unjustifiable number of producer prices which are unrealistically low.

This comes about by virtue of the pressure on the pipelines to purchase gas at prices which will permit them to keep large trunklines with large compressor capacity operating at a practical load factor during the off-peak season. No consideration is given, however, to whether this gas will be purchased for sale at premium prices or for sale at dump prices. The price the producer gets is the same.

Question. Have you any suggestion to meet this situation?

Answer. I wonder whether the producer segment of the industry should not consider asking lower rates for gas sold to fill valleys than for gas that is sold to meet peaks. When the pipeline can obtain the highest price for its gas should it not pay more for it to the producer, and when it gets least for its gas should it not pay less?

Question. Wouldn't that be rather complicated?

Answer. I appreciate the complications when a line is purchasing for storage or is selling to a distributor who may have a summer instead of a winter peak. Moreover the pipeline does not tag individual M c.f.'s for off-peak or on-peak use. Nevertheless, I think some consideration might be given to instituting a two-part rate which would recognize that the producer as well as the pipeline and distributor is rendering part of the service of meeting a fluctuating demand.

Question. Would this help the producer?

Answer. This suggestion could actually increase a producer's revenue because he will get more for the most valuable M c.f.'s. At the same time it would reduce the total cost of delivered gas to the ultimate consumer.

Most costs that are added to the wellhead price to reach the price at which the gas is sold to consumers are capital costs. And more of these capital costs are levied on the peak consumers because of the need to allocate as few as possible to the very price-sensitive customers to whom gas is sold at off-peak times.

Question. How about the effect on consumers?

Answer. If a smaller proportion of the off-peak price consisted of costs to the producer, a larger proportion of constant costs could be allocated to these large volumes, thereby reducing the contribution necessary from ultimate consumers at the peak period.

Question. Wouldn't this unfairly improve the position of gas in competition with coal or oil?

Answer. No. No unfair competitive advantage would accrue to gas, unless the price were permitted to fall to levels so low that they would defeat the purpose of the two-part rate. The increase in volume as a result of the reduction in the on-peak price would undoubtedly stimulate increased use of gas for superior purposes to the ultimate advantage of producer, pipeline, and consumer.

And because pipelines no longer would have to keep prices artificially low to be able to sell at off-peak times, prices to the producer no longer would be set by the least valuable of unit sales made by the pipelines.

Question. Mr. Commissioner, where is the natural gas business going?

Answer. The needs for energy continue to climb at spectacular rates. The difference between experts who have assessed the situation is only how far up they will go. Few have been pessimistic enough to assume even a declining rate of increase. None has suggested they will stop climbing altogether.

But, first, there must be an optimum pipeline capacity for each stage of energy demands. Every pipeline is not rendered economically feasible simply because some people state that they want to buy natural gas. And, secondly, we must realize that there is a fixed and definite volume of hydrocarbon resources.

Question. What does that add up to?

Answer. From these considerations, two facts appear. First, the ultimate level at which pipeline capacity will stabilize is the level at which competing fuels, operating in an unregulated market (including both coal and other petroleum products) will adjust themselves.

There is a possible price for every product where it will maximize the profits to a seller. Once this level is reached for competing fuels it will work its way back to natural gas prices and set the practical limit for them as well. If a new line cannot be built, or new capacity added that will bring natural gas in at a price competitive with those competing fuels, it will not be built.

Question. And the second fact?

Answer. The second fact is that the limits of the hydrocarbon energy resources available to this Nation may be widened vastly by the use of liquefied methane from the Middle East or elsewhere.

Question. Do you attach any importance to that?

Answer. I do indeed. This could be the most revolutionary development in the next 10 years, considering the almost unmeasured natural gas wealth which now awaits economic development in the Middle East and Venezuela, to mention only two sources.

Unrestricted imports could wreck the price structure of the natural gas industry, and indeed the entire fuels industry—coal and oil—as we know it.

I suggest that the problems of the petroleum industry in handling its oil import dilemma will be minor compared to the problem which will beset the coal, oil, and natural gas industries once liquefied methane by tanker becomes a reality.

Question. Where will the FPC fit in?

Answer. The same considerations that will govern the decision on importing Canadian gas also will affect the decision of the United States whether to authorize the importation of natural gas from other producing areas in the form of liquefied methane.

The technical roadblocks to the practical importation of natural gas in this way are close to solution. Soon we will be faced with the question whether and how this importation should be permitted or regulated. Even intracoastal transportation of natural gas is a distinct possibility.

Question. Does the law not cover this matter?

Answer. I do not know whether the Natural Gas Act plainly contemplates such transportation and whether a carrier by barge or tanker would be a natural-gas company within the meaning of the act. Of even greater interest is the issue whether an importer, say from the Middle East, is a natural-gas company.

But I think the problem is near enough that some efforts should be made now before the problem bursts upon the industry and the regulatory community and finds both without any practical solution.

Question. You mentioned Canadian gas. What is involved there?

Answer. In my opinion, the first decision to be made before the introduction of Canadian gas is to determine whether its use in the United States is in the interest of either country.

That means we must know how much it will cost the United States to import natural gas. That means more than mere cents per thousand cubic feet. There are several considerations of national and international policy over and above the considerations of the cents per thousand cubic feet it would cost.

Against this price, for instance, must be weighed the advantages of having an additional supply. On the other hand, Canada must weigh the pros and cons to its economy. If it is apparent that the mutual best interest of both nations would be served, the way is clear to examine the other factors involved in specific applications for authority to import.

Question. Is this a matter for the FPC to decide alone?

Answer. It seems to me that many of these considerations may not be proper subjects for FPC consideration. Some affect the relations of this Nation with Canada, while others affect our national defense or the internal economy of the Nation to the extent other and competing fuels are involved.

Issues affecting our relations with Canada are perhaps the most delicate. And it is in this area an administrative regulatory agency is least qualified.

Question. Where, then, should the problem go?

Answer. The President, under the Constitution, has charge of our relations with foreign powers. The import and export of a natural resource as valuable as natural gas affect these relations with Canada in matters of broadest public and international import.

Our relations with Canada quite properly are within the specialized responsibility of the President and the executive Department of State. How they will be affected by the terms of an order authorizing the importation of natural gas can hardly be evaluated by the FPC with any degree of accuracy.

Accordingly, I have some doubt whether the FPC, an arm of the Congress, is the proper repository under the Constitution for the power to grant or withhold import authority and permission to construct facilities at the border for importing natural gas.

Question. But the FPC does have some authority, doesn't it?

Answer. I appreciate the FPC is supposed to be concerned with the problem as a matter of economic public policy rather than primarily as one of international policy.

I also appreciate that before a Presidential permit to construct facilities at the border will issue consultation with the State Department is necessary.

Question. That seems to be pretty clear-cut, doesn't it?

Answer. Nevertheless, I do question the vesting in an administrative agency in the first instance, and as the ultimate authority, of power to issue orders directly affecting our relations with a foreign power.

I am especially concerned when the standards in this delegation are so vague.

Question. In what way are they vague?

Answer. For example, the Natural Gas Act says only that we shall issue an order permitting importation unless we find it "will not be consistent with the public interest."

At least the Federal Power Act adds a limitation. It prohibits the issuance of an order authorizing the export of electric energy if the Commission finds the proposed transmission would impair the sufficiency of electric supply within the United States or would impede or tend to impede the coordination in the public interest of facilities subject to the jurisdiction of the Commission.

Just where the public interest lies with which we must reconcile each request for import authority for natural gas is far from obvious.

Question. Are any other factors involved?

Answer. Yes. In addition, all sorts of conflicts within the internal fuels and energy policies of this Nation are involved. The oil-import problem is evidence of this.

Of course, these problems are more properly the subject for FPC concern. But even these are inextricably bound up with questions of national fuels policy beyond our responsibility because the interests of so many other fuels and factors in the economy are involved.

For example, questions of tariffs and excise taxes, and the extent to which it is in the best interest of this Nation to encourage world trade or to protect domestic industries, come to mind.

And, of course, there has never been any clear expression of a national energy policy by this Nation. The President's Commission on Energy Resources has taken long and constructive steps in this direction but much still remains. And in Canada far-reaching efforts are now being made in this direction by the Royal Commission on Energy.

Question. What course, then, would you suggest?

Answer. In my judgment, the first step is for both the United States and Canada to establish firmly where the best interest of each nation lies. In other words, to establish what is the public interest with which the importation of natural gas must be consistent before it may be authorized.

Question. What would this public interest involve?

Answer. This must consider adequately how best to serve the whole of our national economy, not just one segment of it like natural gas. It means the welfare of the consumers of all forms of energy must be considered. It means that proper attention must be given to what will happen to the petroleum industry, the railroad industry, the coal industry—indeed to all sections of the economy that will be affected by whatever decisions are made to emphasize one fuel or another.

And in addition, the effect on our foreign relations will have to be weighed.

The issuance of Presidential permits and import orders by the FPC will have much firmer basis once these principles are visible. At that time more meaningful consideration can be given to specific requests for authority to import natutral gas from Canada.

Question. How would those decisions affect the work of the FPC?

A. I think a decision as important as whether to authorize large-scale importation of natural gas from Canada, for example, should be jointly reached in cooperation with the exporting nation. I think the terms should be agreed upon beforehand. Perhaps more important, a means must be set up to insure they are carefully observed and not changed unilaterally during the life of the contracts because conditions change on one side of the border or the other.

Question. How can this be done?

Answer. If proper determination is had on what is in the best interest of each nation and if the authority to import from Canada is made after such joint determination the job is half done.

It will be completed if joint authority is created to effectuate these agreements or if the respective regulatory authorities on both sides of the border agree on the principles and the procedures to use when viewing the regulation of the importation and exportation of natural gas.

Question. And in the meantime?

Answer. Of course, when we are confronted with actual applications at present we must act as best we can, relying on expressions of domestic policy to the extent that they exist. Similarly, we must rely on ad hoc decisions on the international level.

This is vastly better than to refuse to consider them at all. Moreover, until some authority, such as a court of law having jurisdiction, tells me otherwise, I have no choice but to carry out the law as now written.

[From the Madison (Wis.) Capital Times]

LAST FRIEND OF CONSUMERS ON FPC TO GET SACK

President Eisenhower's announcement that he will not reappoint William R. Connole to the Federal Power Commission comes as a surprise to no one who has followed the President's appointments to regulatory agencies.

Connole is the last member of the FPC who has stood up for the rights of consumers in whose interests the agency is supposed to regulate utilities. He is the only one who has made a fight for the consumer in the struggle to prevent natural gas interests from gouging the public.

He is the one member of the five-man agency who has insisted that the FPC has the authority and the duty to regulate natural gas rates to protect the public. His position was upheld by the U.S. Supreme Court in 1954 but the Commission still refuses to act in the consumers' interest.

The natural gas interests have been out to get Connole. It was to be expected that the President would go along with them. He has been a captive of the oil interests throughout his two terms in the White House. One of his first major acts as President was to sign away the tideland oil deposits.

He has supported the natural gas interests in their efforts to enact legislation exempting them from rate regulation by the FPC. He vetoed such a bill but only after a major lobbying scandal involving a $2,500 payment to a U.S. Senator. He is now encouraging the passage of the natural gas bill.

Scandals in other regulatory agencies have revealed a similar pattern of appointing men more sensitive to the wishes of the industry intended to be regulated than the needs of the public.

The FPC is now in the process of being investigated because it has made decisions after "off the record" discussions with Thomas Corcoran, a natural gas lobbyist. Its members have accepted hospitality from the natural gas companies.

One would think that in such a situation the President would want to keep the one member of the Commission who is known as a friend of the consumer. But when the natural gas interests want something Eisenhower delivers.

[From the Milwaukee Journal]

SO MR. CONNOLE IS PUSHED OUT

President Eisenhower says that he will not rename William R. Connole to the Federal Power Commission because he thinks he can find a better man. Maybe he can, but from the consumer's standpoint the Connole matter is of interest.

Back in 1954 in the famous Phillips Petroleum Co. case, in which Wisconsin played an important part, the Supreme Court held that the FPC is required by law to apply utility type regulation to independent producers in determining the field price of natural gas.

The FPC hasn't done so, although in 1959 the High Court sharply took it to task for not carrying out the earlier decision. As a result there is a huge backlog of cases—estimated at between 2,000 and 3,000—in which application for rate increases have not been acted upon. The FPC defense is that it hasn't agreed upon a formula for setting prices.

Connole has been the single continuous voice on the FPC in arguing that price regulation should be carried out as the law requires. He was voted down 4 to 1 in an FPC decision not to regulate prices, and the Supreme Court backed him up. In a connected case—the Catco case, titled from the initials of a combine of five natural gas producers—Connole was again voted down by the Commission 4 to 1 and again the Supreme Court took his side.

The FPC in that case approved sale of gas from offshore Louisiana fields to a pipeline company at a level well above the general price. The Supreme Court sent the case back with the instruction that "a most careful scrutiny" of prices was required in rate cases, and it scorched the Commission for inordinate delay in handling cases.

When Connole's term neared its end, commissioners from six New England public utility agencies wrote President Eisenhower asking his reappointment. So did the president of the California public utilities commission. So did many consumer interests. Fortune magazine last fall called the FPC inept but said that Connole was the keenest of the Commissioners.

But the oil and gas forces lined up against him. The New York Times reports that Electrical World, a trade publication, said in a newsletter: "Natural gas producers are creating pressure on the administration to avoid reappointment of Federal Power Commissioner William R. Connole. It remains to be seen whether business interests can do to the politicians what they're not supposed to be able to do to the FPC itself."

They were able to do it. Connole is out of a job. As Petroleum Week said a year ago, "Connole has become something of an enemy in the view of many gas producers" because "he insists that production costs are a vital factor in rate determination."

Maybe President Eisenhower can find a better man—but, from the consumer's standpoint, it is doubtful.

TWELFTH ANNIVERSARY OF THE STATE OF ISRAEL

Mr. PROXMIRE. Mr. President, today we observe the 12th anniversary of a nation that has, in a short span of time, earned the honor and esteem of the free world and the loyalty and trust of much of the large bloc of neutral nations that may well hold the key to the future of all of us.

The progress of the independent State of Israel may be measured in many ways. In a decade, her number of factories has increased from 8,000 to 25,000; her industrial production, from $356 million to $710 million; her land under cultivation, from 412,000 acres to 1 million acres; and her annual agricultural production, from under $100 million to $320 million. Her annual exports have multiplied more than fivefold in value, from $37 million to $200 million, and are expected to reach $400 million by 1964.

But I think it is even more important and fitting to measure Israel's progress in terms of human values, in terms of her contribution to the world community. For the past few years, this small state, which has flourished through a combination of foreign economic assistance and her own tremendous human efforts and resources has, in turn, been furnishing economic and technical assistance to the underdeveloped countries of Africa and Asia.

Israel's foreign-aid program, considering her youth and size, has been farsighted and generous in concept and outstandingly successful in execution. Though little publicized, it has captured the imagination of many underprivileged nations that hesitated between United States aid and Soviet Union aid, for fear of being drawn into the cold war.

Nations that are young, whether in time or in spirit, are interested in Israeli aid, because Israel, too, is a new country. Her people have carved a free nation and a sound economy out of the desert, and in the face of all the hardships now confronting these other lands.

Israel is providing assistance to some 20 countries in Africa and Asia. Israeli aid programs are in full swing in such ancient and farflung places as Burma and Hong Kong, as well as in Liberia, Ethiopia, and the new state of Ghana. And this aid is very, very substantial.

In Africa, Israel's strongest ties are with Ghana. Trade relations between these two young countries were established in 1957; and to finance this expanding two-way trade, Israel provided Ghana with a $20 million credit for a 4-year period.

When the new African state sought to establish her own merchant fleet, it was to Israel that she turned for help. The Black Star Line was launched, owned 60 percent by Ghana and 40 percent by a private Israeli corporation, Zim Israel Navigation Lines, which is in charge of managing and operating the fleet for the first 5 years. Israel is providing the technical assistance to train officers for Ghana's merchant marine.

Another major investment in Ghana is in the building industry. Israel has provided the beginning capital for large-scale construction projects, and is training Ghanians in building techniques and skills. In many other fields, Israel is sharing her pioneer spirit and her acquired knowledge. She has sent to Ghana experts in city planning, agricultural production, trade-union organization, and cooperative settlements.

In Asia, Burma is Israel's oldest friend. Their bond of friendship was strengthened in 1955, when the Burmese Prime Minister, U Nu, made an official trip to Israel, despite an Egyptian demand that he cancel his visit. Impressed with Israeli skills and accomplishments, U Nu called for closer Burma-Israel economic ties; and a 3-year trade agreement resulted from his visit.

Israel has been generous, as well as effective, in her programs of technical assistance, and has struck a blow for world freedom by giving the wary neutrals confidence in a friend in freedom's corner.

Let us then salute Israel, a young and worthy member of the community of nations, and an inspiration to all of us, on this, her 12th birthday.

Mr. President, I ask unanimous consent that an excellent article by David Ben-Gurion, published in the New York Times magazine of May 1, 1960 be printed at this point in the RECORD. It is a tribute to the great leader, Theodor Herzl, the founder of modern political Zionism, on the 100th anniversary of his birth.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HERZL'S DREAM AND THE REALITY—A TRIBUTE TO THE MAN WHO FORESAW ISRAEL BY ONE WHO HELPED MAKE HIS VISION COME TRUE

(By David Ben-Gurion)

JERUSALEM.—The seer of the Jewish state sprang from the Jewish group that lived in a Hungarian borderland between Eastern and Western Europe, between the Middle Ages and the modern era. This Jewry had produced two of the earliest pioneers, Stampfer and Raab, who went up to settle in the land of Israel in the generation that preceded Herzl. They founded the first Jewish village of our times, which bore the momentous title of Petach Tikva—the Gateway of Hope. And that same Jewry produced the two great leaders of political Zionism, Herzl and Max Nordau.

In the exodus from Egypt, it was twin leaders who marched in the van of the Jewish people: the one, Moses, lawgiver, teacher, guide; the other Aaron, spokesman, clarion, exponent. But in Jewish history Moses was unique, and has no peer. In modern Jewish history, Herzl also stands alone in living and lasting greatness. Only he, by the magic of his personality, his penetrating insight, his prophetic courage, his creative and stimulating inquietude, was privileged to become the focal point of the people's love and pride, the very visage of its secret and sincere longings, the symbol of its redemption and rebirth.

In Herzl's day, two contradictory concepts were current in the relationship between the Jews and the peoples among whom they lived. One was the ghetto concept, which saw an absolute and eternal gulf between the Jews and the other peoples, and held that until the coming of the Messiah, who would restore them by supernatural means to the lands of their fathers, Jews must wait, helpless and dependent on alien mercies.

The opposite concept was that of the assimilationists, in whose midst Herzl grew up and was educated—that the Jews were in no sense whatever a nation like all the nations, that only a trifling and transient barrier of superstitions and prejudices divided them from their neighbors, and that if only they could succeed in getting to be like their neighbors in language, in dress and in deportment, the difference would disappear, the peculiar Jewish way of life would cease, and they would be assimilated into the context of their neighbors.

Ever since childhood the ghetto concept had been strange to Herzl. But his feeling for the dignity of man, deeply wounded by the sight of anti-Semitic outrages in France and Austria, challenged the assimilationist concept in him. With his acute vision he beheld the sufferings of the Jews in his time not as just a calamity, which had to be either accepted or escaped, but as a creative momentum impelling the Jews to set up their state again, so that they could be equal to other peoples as a people sovereign in its own right.

In the spring of 1895 Herzl noted in his diary: "I have been working for some little time at a project of incalculable magnitude. Today I do not know how I will finish it. Its image is as a majestic dream. For days and weeks, now, it has filled my soul to the bounds of consciousness and beyond. Its outcome is not yet to be surmised, but my heart tells me that it is a wondrous thing, albeit as a dream, and that on me is laid the task to write of it."

A year afterward he published "The Jewish State."

At first it was not clear to Herzl where the Jewish state should be established. In the pamphlet he writes: "Is Palestine or Argentina to be preferred?" As he drew nearer to east European Jewry, he came to understand that the old vision of the rebirth of the Jewish state was bound up wholly and solely with the fatherland:

"The land of Israel is the land of our fathers, which we shall never forget. In remembering it our people's heart will tremble, at the sound of it many will come. As a neutral state we will preserve our links with all the nations of Europe, which will guarantee our existence there. As for the places holy to the Christian world, a surety will be found in international law and we will be the guard of honor upon those holy places, vouching with our very existence for the fulfillment of our duty. This guard of honor will be the impressive symbol of the solution of the Jewish question, after 1,800 years of our torment."

The notion of the Jewish state was not invented by Herzl. He himself wrote: "I am not propounding any new idea—on the contrary, it is a very ancient one, and it is just there that its great strength lies. Its years are as the years of the nation, which has never ceased to nourish."

But in writing "The Jewish State," he discovered more than an idea, he discovered himself: seer, leader, great political architect and commander. "Am I forming the idea?" Herzl asked in his diary. And answered, "No; the idea is forming me."

Into the old idea he was able to inject revitalizing strength and a great sweep, for he knew the secret of historic action as not one of those who went before him had. He knew the secret of political accomplishment, revealing it within himself and within the Jewish people.

For the first time since that people voyaged into exile, he transformed it into a political force and factor. Herzl created Jewish statesmanship, and forged the tools and implements the people needed in its fight for liberation and revival: a world platform, the framework of national organization, political representation, the instruments of state finance.

For hundreds of years, throughout the world, the Jewish people had been no more than a pawn and a plaything—for chastisement or for kindness—in the hands of foreign political forces. Herzl took human dust, at the mercy of any capricious wind, and made it into a nation striving to mold its own destiny and become an independent entity on the stage of international politics.

He gave his people not only a political purpose but also the means to fulfill it, and first and foremost the consciousness that the Jewish people, in spite of its dispersion and rootlessnness, is a political force, if only it will learn how to use its strength for its own redemption.

Like all great liberators, Herzl grasped the profound yet simple secret that mass suffering need not be soley a source of degradation, of helplessness and decadence, but is apt to be converted into a source of strenth and fortitude, of initiative and heroism, if there be linked with it the idea of liberation and if it thus rouse the victims to rebel against their wretched lot, so that their tribulations take on the forms of creation and salvation.

"No people can be saved except by itself, and the Jewish problem can be solved only by the Jews." So Herzl pleaded.

When Herzl called for the first instrument of political Zionism, the World Zionist Congress, he did not yet know Jewish life as it was lived in the eastern European countries, steeped in popular Jewish tradition, education, and content. Nor did he yet understand the deep, inner, indissoluble bond between the nation and its ancient birthplace. He was unaware of the treasures of creativeness, hidden in the rank and file and in the youth of the people. But what his knowledge of Jewishness lacked, the intuition of his genius made good through an understanding of human nature.

When, in July 1902, Herzl, as president of the world Zionist organization, appeared in London before the Royal Commission on Alien Immigration, he was questioned by the members of the commission on the reason for the failure of Baron Hirsch's colonization experiment in Argentina. He replied:

"It ended in failure for this reason: When a people aspires to colonization, it must have a flag and an idea. You cannot accomplish these things with finance alone. And since

these Jews had neither flag nor idea, they could not succeed. With money you cannot set going a movement of large masses. You must implant in them a faith in their future, and then you can even stir them to apply themselves to the most arduous toil."

And when in 1902–03 he conducted negotiations with the Balfour government on the settlement of Jews in El Arish and Sinai, and the British Foreign Office drew his attention to the difficult conditions that colonization meant, he wrote a letter to Lord Landsdowne, then British Foreign Secretary, saying that "even if the opinion of the experts is not particularly agreeable, Jewish distress can surely constitute such a force as will make colonization feasible even under conditions which in the case of normal settlement would be unacceptable."

The history of our settlement in Israel has verified this simple assumption. The warnings of practical men as to the impossibility of changing townsmen into tillers of the soil, the unsuitability of Jews for a life of sovereignty, our dearth of talent to become seamen or to revive the Hebrew tongue, which was deemed a dead language, all have been shown to be false and insubstantial. We have succeeded in settling on the hills and even in the desert, which all the experts argued could never be successfully colonized.

The distress of the Jewish people and the creative force of an ideal of liberation and redemption have even disproved one of Herzl's own political assumptions, one on which he insisted with the utmost vehemence at the beginning of his Zionist work, namely, that "the creation of suitable political conditions is a necessary precondition to any settlement activity."

This assumption has been refuted, in the annals if Israel renewed, by another premise, profounder and sounder, which was indeed Herzl's, too—that what iron necessity and the motive force of suffering and of an ideal can do, political logic cannot.

A unique event, to which there was no parallel, was the death of the great leader, the greatest of Israel's leaders and rulers, Moses. He did not have the privilege of reaching the Promised Land—or even of being interred within it. After 40 years' wandering in the wilderness, Moses at the end of his days ascended Mount Nebo—"and no man knoweth of his sepulcher unto this day."

Fifty-six years ago the remains of the seer of the Jewish state in our generation were buried in a foreign land—the land where Herzl saw the vision of the Jewish state, where he created the instruments for its establishment, and where he organized the Jewish people to win its independence.

"I do not know the hour when I shall die," Herzl wrote in 1898, 6 years before his passing, "but Zionism will not die. Since the days of the Zionist Congress in Basle, the Jewish people once again has a national representation and the Jewish state in the homeland will arise."

His prophecy came true, and in the second year of its independence, a year after the end of the war of independence, the people of Israel brought his remains home and interred them in the city of David, on one of the hills of Jerusalem.

PROPHET OF ZIONISM

"What glory awaits the selfless fighter for the cause. Therefore I believe that a wondrous breed of Jews will spring up from the earth. The Macabees will rise again. The Jews who will it shall achieve their state. We shall live at last as free men on our own soil."

So wrote Theodor Herzl, the founder of modern political Zionism and thus, in effect, of Israel. He was born in Budapest on May 2, 1860, 100 years ago tomorrow. At 18, he moved to Austria to study law at the University of Vienna. But on graduation, he became not a lawyer but a journalist and playwright whose works won him considerable renown.

In 1895 Herzl was the correspondent in Paris of Die Neue Freie Presse, the leading Vienna paper of the time. It was the Paris of the Dreyfus affair, and Herzl heard the mob shouting, "Death to the Jews." Out of his deep concern for the future of the Jews of Europe came his pamphlet "The Jewish State," published in German, English, and French in 1896. It led to the calling in Basle, Switzerland, in 1897 of the first World Zionist Congress, which set as its goal "a home in Palestine" for the Jewish people.

Herzl assiduously promoted the scheme in the capitals of Europe, but died in 1904, at the age of 44, with his dream far from realized. It was kept alive, however, by such dedicated successors as Chaim Weizmann and David Ben-Gurion, who saw Israel established in 1948. Weizmann became its first President and Ben-Gurion the Premier.

THE HERO

The day of Herzl's death was a day of mourning and grief for Zionists. Ben-Gurion was then 17, and in one of his letters to a friend, a few days after the bitter tidings had been received, he wrote these lines:

"My brother, it is difficult, even impossible, to sit down today and write on other matters, even those nearest to my heart. The disaster is so great, so tremendous, becoming ever more grievous as time passes. * * * Great as the sea is the magnitude of our loss. And yet, today more than ever before, I confidently believe in our victory.

"It is clear to me that a day will come—and it is not far off—when we shall return to the wonderful land * * * and the visions of the prophets will be realized; there we shall see wonderful skies shining with the light of purest blue, there we shall hearken to the murmuring of the waves of the sacred river, which long ago heard the song of the shepherd, of innocent and magical love.

"And there a mighty poet will arise and sing an exalted, wonderful song, which will resound in all the strings of our hearts of a small but great people risen to new life, and of the great hero and fighter who with his mighty strength awakened the dwellers in the tomb from the slumber of the shadow of death."

Mr. KEATING. Mr. President, today we celebrate the 12th anniversary of the reestablishment of the noble State of Israel. We as Americans celebrate it not alone in the spirit of extending congratulations to a firm ally in the traditions which we hold dear, but also to signify our recognition of the remarkable accomplishments wrought by idealism, faith, and determination.

Seldom in history have a people so mightily striven for self-determination against overwhelming odds as have the Jews to regain and rebuild their ancient homeland. And the attainment of this goal marked but the beginning of an impressive record of accomplishments.

In the brief span of time since they gained their independence, the Israeli people have succeeded in absorbing and integrating new immigrants from over 70 countries into their national life. They have managed to secure their borders against hostile forces surrounding this small country.

They have turned an arid and rocky area into an ever more fertile land, where orchards and fields and forests and towns seem to grow overnight. They have succeeded in extracting valuable minerals from sands and seas long thought of as dead and worthless, and are building industries at an impressive rate.

They have devised different forms of economic and social organization to meet their varied needs, ranging from the communal settlement to the most complex type of private enterprise. Yet all coexist side by side within a single democratic framework and work together to contribute to Israel's amazing development. Despite the diverse backgrounds and traditions existing among her people, Israel has remained a bulwark of democracy and stability in the turbulent area of the Middle East.

Today, when so many newly independent nations face the difficult problems of developing modern political, economic, and social institutions, Israel stands as an inspiring example of what can be done in the spirit of dedication and democracy.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

OBSERVANCE OF LAW DAY, U.S.A.

Mr. WILEY. Mr. President, the establishment of fair and just laws observed and respected by citizens provides the most promising foundation upon which a nation—and, yes, ultimately, the world—can ultimately establish order and peace.

To promote greater recognition of the fundamental value of a system of just and equitable laws, President Eisenhower declared May 1 as Law Day, U.S.A.

We recognize that laws of a free land reflect the principles, the morality, and the sense of justice of the people.

Contrary to popular concept, these are not inhibitive, restrictive chains on a people; instead, they establish the climate in which fundamental rights and privileges can best be exercised, as well as protected.

Without such a system, there would be chaos. Abraham Lincoln said: "Let reverence for law * * * become the political religion of the land."

Now, how can we perpetuate this idea of Law Day—not just for a 1-day observance, but throughout the year?

On May 1, special programs were held by bar associations, service clubs and organizations; school assemblies; radio-television programs; public meetings—and, yes, even the churches—for good laws, reflecting the law of God, symbolize in their own way the religious, moral, and spiritual principles of a people.

What were the goals of such observances? These, I believe, include:

Encouraging a greater respect for, understanding of, and willingness to abide by, just and fair laws; and

Resolving to continually reexamine our statute books to determine that laws, and their application, keep abreast of changing events and times.

Observances, too, help to dramatize a major difference between the American concept of freedom and justice under law, and the suppression of individual freedom under communism, which also celebrates the day, usually by attempting to paint a picture of the superiority of communism over capitalism, or, as it did yesterday, also by a display of its arsenals—threats to peace as well as weapons of power politics. Overall, efforts to encourage greater respect for law not only on May 1 but also throughout the year can do much to create ever-stronger patriotic support for our judicial system, the Constitution, and our way of life to assure liberty and justice for all our citizens.

I request unanimous consent to have the proclamation by President Eisenhower on the observance of May 1 as Law Day, U.S.A., printed at this point in the RECORD.

There being no objection, the proclamation was ordered to be printed in the RECORD, as follows:

A PROCLAMATION BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

Whereas one of the greatest heritages of American citizenship is a government of law before which all men stand as equals, and the dedication of our people to freedom under law has made possible the remarkable growth and development of our society in all its aspects; and

Whereas respect for justice under law is vital and abiding only when its roots are grounded in our many traditions of religion, ethics, and philosophy with their common teaching concerning law as the foundation of our social order; and

Whereas the widest possible understanding of these basic truths will contribute to the Nation's moral and spiritual strength, and a reaffirmation of faith in the rule of law in the daily lives of all Americans will serve to demonstrate to the peoples of the world that this Nation seeks only fairness and justice in its relations with other nations; and

Whereas the observance of Law Day is designed to foster this deeper respect for law and an awareness of its essential place in American life, as well as to encourage the efforts now being made to bring about an extension of law as an instrument of world peace and orderly progress in all international relationships for the future benefit of mankind: Now, therefore, I, Dwight D. Eisenhower, President of the United States of America, do hereby designate Sunday, May 1, 1960, as Law Day in the United States of America.

I urge the people of the United States to observe Law Day with appropriate ceremonies as a public demonstration of their devotion to the rule of law as the keystone of peace and order in our national and international life.

I also urge the members of the legal profession to bring the objectives of Law Day to public attention in all appropriate ways through religious and educational institutions, by private organizations and public bodies, and through the media of public information.

In witness whereof, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

Done at the city of Washington this 31st day of December in the year of our Lord 1959, and of the Independence of the United States of America the 184th.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE.

By the President:

CHRISTIAN A. HERTER,
Secretary of State.

Mr. KEATING. Mr. President, it is a special source of pleasure to me to bring to the attention of the Senate the celebration of May 1 as Law Day thrcughout the United States. In keeping with a worthy and honored tradition this day was commemorated by appropriate ceremonies the length and breadth of our land.

It is altogether fitting that law should be accorded the dignity and solemnity of a day dedicated to its meaning for America and for Americans. This great Nation of ours was founded and has developed through the guiding values and principles which the law of the land embodies. In the formative, pioneer years of the United States, the rule of law was the force that brought order out of chaos, that created the climate of reason and of right without which no national progress or growth would have been conceivable.

Throughout our history as a nation, law has been the handmaiden of liberty. It has charted the course within which individual liberty might exercise its rights, without unbridled veering from that course to trample or endanger the rights of others. By its guarantees of equality and freedom, by its impartial balancing of causes in the scales of justice, the law has presided over the affairs of men in such a way as to enhance the dignity of man and to promote the ever richer development of his spiritual resources.

The law is the sworn enemy of evil. It is the sworn enemy of tyranny. As humanity has marched to new frontiers of civilization, to new social, economic and political complexities, the law has kept pace with change, has risen to the challenge of new patterns of life and the problems they bring into being.

The law is not prey to the dust of time. It is a living thing, as living as the hearts and minds of the men who write it, who enforce it and who obey it. It is the inheritance our generation receives, to pass on as a rich and enduring legacy to those who will come after us.

On this Law Day, 1960, it particularly becomes each of us here present, as framers of the laws by which this great Nation lives, to reaffirm our dedication to the sacred responsibility placed upon us, and to join with all our fellow Americans in solemn commemoration of a day that symbolizes the eternal quest of humanity for justice and for liberty.

Mr. ALLOTT. Mr. President, on behalf of myself and my distinguished colleagues the senior Senator from Pennsylvania [Mr. CLARK], the junior Senator from Michigan [Mr. HART], the senior Senator from New York [Mr. JAVITS], and the junior Senator from Texas [Mr. YARBOROUGH], I present for insertion in the body of the RECORD a statement concerning Law Day, United States of America, prepared by authorization of the council of the Capitol Hill section of the Federal Bar Association.

This newly established section of the bar is composed entirely of Members of Congress and attorneys employed in the legislative branch of the Government. Its purpose is to afford a medium wherein lawyers engaged in the process of making our laws can get to know one another better and can consider and foster the high standards of integrity under the law as well as the duties that a lawyer owes his client, in this case the Government, his profession, and the public in general.

Ceremonies are taking place today throughout the Nation commemorating Law Day. This is singularly different from the ceremonies yesterday, Sunday, in Communist nations commemorating their power and worldwide aims. We in the United States deferred our ceremonies from May 1, the Sabbath, to May 2. The respect shown in this act alone is an illustration of basic differences in communism and our American way of life.

The statement that I present, Mr. President, is both appropriate and worthy of full public consideration. As a member of the Capitol Hill section and on behalf of my distinguished colleagues, I am pleased and honored to present it and ask unanimous consent that it be printed in the body of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

LAW DAY 1960—STATEMENT OF THE CAPITOL HILL SECTION OF THE FEDERAL BAR ASSOCIATION

The Capitol Hill section of the Federal Bar Association, composed entirely of members of the bar in the legislative branch of the Government, takes pleasure at this time in joining the many State and local bar associations throughout the Nation, as well as the national organizations of the American Bar Association and the Federal Bar Association in commemorating Law Day, May 1, 1960.

This year May 1 falls on Sunday. Today, Monday, May 2, ceremonies are being held in hundreds and perhaps thousands of courtrooms, public squares, and official gathering places throughout the United States. Inasmuch as the body of manmade laws under which we live derives in its basic aspects from moral law or religious principles and traditions, we have asked Rev. Frederick Brown Harris, Chaplain of the Senate to join in this statement. His statement follows:

"Of all special national days Law Day is of supreme significance. In such an emphasis there is lifted before the gaze of all our people the fundamental conception on which all else in a democracy rests.

"Law Day floodlights the vital truth engraved on the facade of the noble edifice of the U.S. Supreme Court—'Equal Justice Under Law' and of that sentence inscribed over the portal of the courthouse in Worcester, Mass.—'Obedience to law is liberty.'

"Democracy is the faith that laws should be made not by an all powerful monarch, or a dictator, whose rule is tyranny but by the whole body of 'We the People' and that laws thus made should be gladly obeyed by all people. Any willful violation of laws thus decreed is a blow at liberty itself.

"In just laws there is registered the conscience of a God-fearing people. Much is be-

ing said and written these perilous days about liberty and emancipation from restraints. More, much more, needs to be said about discipline and law. The demand, 'Don't fence me in,' needs to be interpreted in the light of the larger truth mirrored in a great hymn, 'Make me a captive, Lord, and then I shall be free.'

"Says a U.S. Senator, as he sees with deep anxiety what so many of his contemporaries are doing with their boasted 'liberty'—'Unless discipline and obedience can be brought back to America, we are on our way to the junk heap.'

"Obedience to law safeguards from the perils of a rampant selfish individualism. Laws forbid the additive of poisonous elements in food because social welfare shames personal gain and greed.

"There is no way by which the democratic experiment can be saved if mad insistence on individual freedom to do as one pleases crowds out sober recognition of social obligation.

"The true glory of the legal profession is that those so dedicated are servants of the law—the business of those so committed is not to help culprits evade the law, but to justly interpret it and to help enforce it, and to scorn to seek escape from its penalities by clever technicalities and legal fiction.

"It has been splendidly said by a present day patriot, a prophet of the eternal, 'Respect of manmade laws alone will not suffice for men will lose that respect if they do not see a divine sanction behind such ordinances, if they do not recognize the validity of the tugs of conscience, if they do not know the moral law, that rule of right reason implanted in the human mind by the Creator long before men began to draw up their own codes.'

"Catherine Lee Bates has set to music the very quintessence of obedience to law in a loved hymn which all America sings and which hallows every day as Law Day:

" 'America, America, God mend thine very flaw,

" 'Confirm thy soul in self control by liberty in law.' "

We deem it fitting that those concerned primarily with making the laws of the Nation pause and reflect on the respect given to the law as such. The full, rich meaning of the law, as well as the value of respect for it are fundamentals of the honor of our profession. These powerful but intangible attributes are matters that should be brought to the attention of laymen as well as lawyers. The role of the lawyer in carrying this message to the public is an important one. He is best fitted to do it if he is true to the vows and traditions of his profession.

In 1958, largely at the instigation of Charles S. Rhyne, Esq., then president of the American Bar Association, Law Day U.S.A. was established as a day commemorating the true values of the law. This was done by proclamation by the President of the United States. We may say also by way of contradistinction that this is not true elsewhere in the world where there are governments by virtue of dictatorial powers. May 1 was recognized in this country as the day in which we pause, reflect, and through appropriate ceremonies, say how and why we are proud of the fact that ours is a government of laws and not of men. In Mr. Rhyne's own words, the idea was not entirely his own, but came from the hearts of the thousands of lawyers with whom he had contact in the continual and extensive traveling required of a president of the American Bar Association. He stated that the message of Law Day is "the dedication of Americans to the highest ideals and moral principles ever espoused by any nation since the dawn of civilization. Those are the ideals and principles known as the rule of law."

The 85th Congress by Public Law 85-529 designated May 1 as Loyalty Day. Thus, the same day is both Law Day and Loyalty Day. We deem it most fitting that these two themes are combined because loyalty to the United States is loyalty to the great principles of the law on which our Nation was founded and which have caused it to grow to the greatness in more ways than military power that it now realizes. One of the greatest tests of loyalty or love for country is the respect one has of the rights of his fellow man. A neighbor's right to voice his own opinion, to enjoy the right of privacy and to own his own property are cornerstones of the concept of loyalty to our American ideal or tradition. They find effect and fruition through the law.

The officially pronounced aims of Law Day are:

1. To foster increased respect for law, enabling the Nation to grow in more strength as it grows in population, resources, and world leadership.

2. To provide an occasion for the American people to rededicate themselves to freedom for the individual under just laws administered by independent courts, and in so doing to emphasize before the world the contrast between the rule of law in the United States and the rule of force and fear under totalitarian systems.

What could be more appropriate than for us who are engaged in the process of drafting and enacting the Federal statutory law of this Nation to join in these aims and to reflect over their meaning? A majority of the House and the Senate of the United States are lawyers, but these aims and purposes are by no means confined to them. They apply to all Members of Congress and to all people in this great land of ours.

When we say that we should "rededicate" ourselves to freedom for the individual under just laws, we imply that we have heretofore been so dedicated. Indeed, this is true if we consider the Constitution of the United States and the circumstances surrounding its promulgation. The Bill of Rights of that great document is ringing with sanction of, and protection for, individual freedom. Thomas Jefferson's statute of religious freedom is filled with it. The Declaration of Independence is a great part of our prior dedication. The spirit which underlies these documents; yes, the spirit of Jamestown and Plymouth Rock also, dates back in tradition and evolution in our legal system to Magna Carta. When we think of this great background and these great traditions, we can "rededicate" ourselves with strength and vision.

We must be mindful of the fact that the guarantees of our tradition have fostered the full and free development of the spiritual resources of our people. Freedom from fear of the tyrant has released the energies of our people and has aided our great economic growth. The assurance that the fruits of one's labor will not be taken away without due process of law has occasioned by way of incentive an industry and thrift among our people which in itself has now become a part of our American tradition.

All of this in retrospect is refreshing and strengthening. Yet is not self-sustaining. The respect for the law, the support which the American people give it, are most important in carrying on our growth and progress. This does not mean a complete and uniform agreement with every detail of the law—every statute—every court decision. It means a general respect for the law and an understanding of what it means in the conduct of personal affairs and in the relations between men and nations.

We are mindful of the fact that numerous Governors of States and mayors of cities have proclaimed Law Day, U.S.A., with appropriate official proclamations. Bar associations are taking the lead in bringing to the attention of the public the importance of the values of the law which we see and use but sometimes do not realize its meaning.

The Capitol Hill section of the Federal Bar Association was founded officially here in the Capitol on January 20 of this year. It was founded in the Old Supreme Court room in the Capitol. No more fitting place could be selected for its establishment. Its establishment in such august surroundings bespeaks the message of Law Day. The section takes pleasure in participating in Law Day and in affirming its belief in devotion to the law and in greater knowledge of the law and respect for it.

Mr. JAVITS. Mr. President, the events which we see daily at home and abroad involving basic human rights and liberties should make us particularly aware of Law Day, 1960, which was celebrated yesterday. It has always been our proudest boast that we are a Nation ruled by law—and not by men—that the individual's status is guaranteed by the Constitution, the laws, and the courts, and need not rely upon the personal whims of those in positions of power.

The sad events which we have recently witnessed in widely separated areas even of the free world, the apartheid in the Union of South Africa, and the failure to assure certain fundamental rights in the Republic of Korea, the sitdowns in the Southern States, should make us especially aware of the urgent need of our important heritage of love and respect for law which we celebrated yesterday.

It is fitting that there should be celebrated at the same time Loyalty Day, also proclaimed by the President of the United States and by Congress. The dual events are a most fitting reminder to the American people of their stake in democracy, and give us an opportunity to renew our dedication to the concepts of freedom and dignity of man.

There is now pending before the President for his approval the Civil Rights Act of 1960, the result of many weeks of deliberation in the Congress and the Nation. During every moment of that consideration these principles of law and justice were in the minds of many of us. There is a great difference between even such a limited bill—limited also by an archaic Senate rule on dealing with filibusters—which is law and the violence which we have seen throughout the world when peoples whose liberties are denied attempt to assert them. Much as the southern sit-ins concern these, too, we look to the respect for law in the final analysis.

It would be particularly fitting for us to turn our equal attention on this Law Day to the rule of law among nations. The recent action by the Foreign Relations Committee in postponing action on Senate Resolution 94—the repeal of the so-called Connally reservation to our adherence to the International Court of Justice—is a blow to our efforts in this area which should be a source of special concern on this occasion. Our faith

in law and judicial process should extend not only to all the people of our Nation, but beyond our frontiers, so that the rule of law instead of force will become the law of nations also. This principle of world peace through world law is of particular significance today as we seek means to control weapons and dictators.

I hope that the public observance associated with Law Day creates a renewed support for this proposal and that the action on it may be considered at an early date.

I believe that the expressions of dedication contained in the proclamations of Law Day and Loyalty Day issued by Governor Rockefeller to the people of my own New York State and the remarks by the Governor on that occasion, were particularly appropriate to this occasion, and I ask unanimous consent that the proclamations and Governor Rockefeller's remarks may be printed in the RECORD following my remarks.

There being no objection, the proclamations and remarks were ordered to be printed in the RECORD, as follows:

PROCLAMATION BY GOV. NELSON ROCKEFELLER, OF NEW YORK

The Veterans of Foreign Wars have asked me to designate the 30th of April as Loyalty Day. It is a privilege to comply.

For all too many years subversive groups preempted the 1st of May as an occasion for airing insidious propaganda which bordered upon treason.

Appreciation is due to the Veterans of Foreign Wars of the Empire State for shifting the emphasis to loyalty to the United States and enabling us to renew our dedication to the timeless ideals and aspirations of Americans.

Now, therefore, I, Nelson A. Rockefeller, Governor of the State of New York, do hereby proclaim April 30, 1960, as Loyalty Day in New York State and I call upon our citizens to join in ceremonies in honor of the occasion.

Given under my hand and the privy seal of the State at the capitol in the city of Albany this 21st day of April in the year of our Lord 1960.

NELSON A. ROCKEFELLER.

By the Governor:

WILLIAM J. RONAN,
Secretary to the Governor.

PROCLAMATION BY GOV. NELSON ROCKEFELLER, OF NEW YORK

The 1st day of May has become established in our calendar, by custom and by Presidential proclamation, as Law Day. This is a highly appropriate observance for Americans.

The law of the land is made by the people themselves through their elected representatives. A respect for law is ingrained in us as a part of our daily lives. It is an essential complement to our belief in freedom. The law indeed is the custodian of our liberties and our rights.

Since Law Day this year falls on Sunday, its observance will also symbolize our deeply cherished privilege, freedom of worship. It will thus serve doubly to underscore our respect for the integrity of the individual in relation both to his fellow man and to his God.

Now, therefore, I, Nelson A. Rockefeller, Governor of the State of New York, do hereby proclaim May 1, 1960, as Law Day in New York State, and I urge wide public cooperation in its observance.

Given under my hand and the privy seal of the State at the capitol in the city of Albany this 12th day of April in the year of our Lord 1960.

NELSON A. ROCKEFELLER.

By the Governor:

WILLIAM J. RONAN,
Secretary to the Governor.

EXCERPTS OF REMARKS BY GOVERNOR ROCKEFELLER AT CEREMONIES IN OBSERVANCE OF LAW DAY, COURT OF APPEALS BUILDING, ALBANY, N.Y., APRIL 29, 1960

Law Day is an occasion with deep meaning for all Americans. It is a day of dedication to the rule of law in American life, a reminder that our liberties, our guarantees of fair and equal treatment, rest upon the verities of the law rather than the arbitrary commands of men.

But Law Day is something more than this, something even more basic. For it is a testimony to the spiritual heritage of our Nation and to the body of principle which gives meaning to the belief in individual worth underlying our whole political structure.

This Nation was founded to give expression to an abiding faith in the value of the individual human being as a creature of God. Its whole reason for being grew out of a passion for justice based upon this spiritual heritage. And the political framework created for this Nation in the rule of law gives continuing and contemporary reality to our spiritual heritage as it fulfills this passion for justice, as it serves our belief in the worth of the individual.

Thus, as we foster increased respect for the law, we honor our religious heritage, build the moral strength of our Nation, and enrich the blessings of freedom.

As this day reminds us of the moral basis of the rule of law, it also serves to remind us that our individual rights and freedoms under law involve individual obligations. Not the least of these obligations is that of law observance. For as all men stand equal before the government of law in this Nation, so too, do they stand equal in their duty to uphold the rule of law by respecting and cherishing it.

There is something infinitely precious about this rule of law that we here acclaim. For it reaches to the very roots of our conviction that every person is equal before God to every other person, that all men are brothers, that justice is the God-given right of all free men, and that freedom itself lives and grows only within a framework of morally valid law.

Let us, then, honor this occasion of Law Day with a new resolve for individual rededication to our spiritual heritage and the rule of law which gives this heritage living reality in our own lives.

Let us as citizens of a free land strengthen freedom, elevate human dignity and give new hope to all men and women everywhere by our constant striving for perfection of the rule of law.

For thus shall we bring closer to realization that day when the value of every individual in the world shall be respected and guarded by the laws of men, serving the laws of God.

ANNIVERSARY OF POLISH CONSTITUTION DAY

Mr. WILEY. Mr. President, tomorrow, May 3, marks the anniversary of Poland's Constitution Day. In our country and around the world, tribute is traditionally paid to the people of Poland, and those of Polish descent, for the heroic fight which these outstanding people have made for freedom.

This year, 1960, also marks events in recognition of two great sons of Poland: the 100th anniversary of the birth of the great Polish artist, humanitarian and statesman, Ignace Paderewski; as well as the 150th anniversary of the birth of the foremost Polish composer, Frédéric Chopin, whose music has contributed so much to enriching the cultural life not only of Poland but also of the world.

Despite the fact that the Communists by deceptive tactics have gained control of the reins of Government of Poland, as well as other countries of Eastern Europe, the flame of liberty has been kept alive in the hearts of the many freedom-loving people.

The 1960's—as rarely before in history—will be an age of political and intellectual ferment as well as a time of unprecedented efforts to influence the minds of people, particularly in their adoption of political-economic systems.

As we well know, the major contest rages between freedom and communism. As we face the Communist challenges to freedom—indeed, to our survival—the symbol of unrelenting dedication to freedom which liberty-loving Polish patriots have demonstrated will stand as symbols for freedom fighters during the continued East-West competition in the years ahead.

LOYALTY DAY

Mr. KEATING. Mr. President, the virtue of patriotism is timeless in its significance, yet it is well that we have seen fit to enshrine it annually in our hearts by the observance of May 1 as Loyalty Day.

In the face of present menacing challenges to our freedom, and to the principles on which this great Nation of ours was founded and has endured, Loyalty Day stands as a symbol to all Americans of that they have fought for in the past, what they must continue to fight for in the future. Indeed, it is eminently fitting that we should remind ourselves from time to time of the precious gift of liberty that we possess, and of the need for vigilance in preserving that liberty against those who would steal it from us.

Loyalty Day provided a timely opportunity not merely to reaffirm our love of country but to rededicate ourselves to the guarding of our great heritage, and of strengthening the resolve to maintain the freedom for which so many Americans in the past have made the supreme sacrifice of their lives.

It must never be forgotten that loyalty is more than the waving of flags and the playing of anthems. It is, above all, the sacred responsibility of freemen. It is the personal commitment of one's self to the preservation of a kind of government responsive to the deep-felt needs of the human spirit. That is the Government our forefathers have handed down to us. That is the Government which remains our sacred trust for as long as we live.

AID TO AUTHORITARIAN REGIMES

Mr. GORE. Mr. President, late Friday afternoon I addressed the Senate

on the problems arising out of the giving of U.S. aid to dictatorships and authoritarian regimes.

U.S. identification with authoritarian regimes has long been a matter of concern to me. Early this year, in an address before the American Association of Colleges for Teacher Training in Chicago, I stated:

> In country after country, we have attempted to promote stability on a short-range basis. The process often followed has been that of establishing and supporting governments whose policies in the long run may do us harm. A virtual dictatorship in South Korea has been maintained in power with the assistance of our foreign aid programs.

I hope President Eisenhower will soon recognize this problem, not only as it affects our relations with the nations and peoples of Latin America, but throughout the world. I shall surely call this problem to the attention of the next President of the United States, whoever he may be.

Fortunately, a correction has been made in South Korea. I am not advised as to the extent to which the U.S. Government participated in that correction, but I believe the result is an improvement.

We have followed the apparently easy road of temporary stability. We have extended the warm embrace, and put on the foreign aid payroll, just about any dictator, would-be dictator, or authoritarian regime which appeared willing to fight communism. We have willingly closed our eyes to the methods used and to the fact that genuinely liberal movements were often being suppressed with as much, if not more, enthusiasm and vigor than were local Communist and fellow-traveling groups.

There is one solid action which can be initiated immediately, and carried through eventually, which will bear the fruit of friendship of the peoples of the world. That action, Mr. President, is simply and bluntly, to correct the relationships which the Government of the United States bears to various dictatorships or authoritarian governments.

The specific actions to be taken in any given instance, of course, require thought and common sense. But, first of all, we must acknowledge and understand the problem and decide on the principle we are to follow—indeed, recognize and understand the problem, and decide that we will proceed on principle, a principle that is deeply imbedded in the heart and consciousness and traditions of the United States.

The future can only be secure in a democratic world. We can no more live at peace in a world of dictatorships of the right than we can in a world dominated by dictatorship of the left.

Especially in the administration of our foreign-aid programs must we use extreme care to see that our aid benefits the people of the world rather than repressive regimes.

Where it is necessary to deal with authoritarian governments—and I recognize that there are extreme instances when it seems necessary temporarily to do so—let us do so at arms length. Let us reserve the warm handclasp and enthusiastic support for governments compatible with the principles of freedom.

Unless we recognize this problem and deal intelligently with it, our moral leadership among our allies, and in the world at large, will come to serious question and challenge. Without moral leadership, the Western alliance will surely fall. Material force and power, no matter how great, will then avail us little.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. GORE. Mr. President, I ask unanimous consent that I may proceed for 3 additional minutes so that I may yield to the distinguished Senator from Alaska.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee requests 3 additional minutes. Is there objection? The Chair hears none, and the Senator may proceed.

Mr. GORE. I yield.

Mr. GRUENING. I should like to commend the distinguished Senator from Tennessee very highly for his very pertinent comments. I wonder, however, how he is going to achieve the results he hopes for, because there has been nothing in the conduct of the administration to show any differentiation in its attitude toward dictatorships and democratically inclined regimes; in fact, it has seemed to favor dictatorships.

All over the world we have seen and see the administration coddling dictators, with the tragic result that we have observed at several points in the world. Fortunately, in South Korea the people of that country are grateful to us for the intercession of our State Department, but they make the comment that it should have come much earlier than it did. I agree with that view.

I wonder whether the Senator from Tennessee has any suggestion to make or how his very sound ideas can be made to penetrate the administration's policy.

Mr. GORE. Mr. President, only the President of the United States, under our Constitution, can lead our country in the field of foreign policy. The Senate has a limited constitutional responsibility with the President in this field, but its power of initiation is limited, essentially, to advice and information. To the extent that I feel capable of doing so from time to time, I have undertaken to advise the administration of the existence of a problem and have volunteered whatever ideas I may have had for its possible solution. It is in the course of this function and procedure that I have spoken today.

Mr. GRUENING. I should like to suggest that the situation has changed in recent years since the policy which the Senator refers to has existed. The limitation on the part of the Senate with respect to merely advising has been changed by the use of the dollar as an instrument of foreign policy. That situation did not exist prior to a decade ago. We are now spending $4½ billion as an instrument of our foreign policy. These are American taxpayers' dollars. It seems to me that we in the Congress and particularly in the Senate therefore have the responsibility to make ourselves much more effective than we have been before, and to do more than just advise. We have, I feel, the responsibility as well as the constitutional authority to do that.

Mr. GORE. The able Senator has made a very pertinent comment, because through the power of the purse and the limitations and conditions which Congress can attach to appropriations and authorizations the Congress can make its influence felt. Though some initiative can thus be taken, such as the creation of the Development Loan Fund and the International Development Association, a limitation on funds is essentially negative in nature. Moreover, the administration of a program enacted by Congress is exclusively an executive function.

To the extent that we can advisedly do so, I should like to implement the application to traditional American principles to this problem. Certainly our actions should comport with our basic principles.

DEFENSE PHYSIOLOGY

Mr. SALTONSTALL. Mr. President, yesterday there appeared a very important article in the Washington Post. It is entitled "Uncle Sam Still Has the Muscle." It contains statements with which I certainly agree, and it is worthy of being printed in the body of the RECORD. I therefore ask unanimous consent that it may be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 1, 1960]

DEFENSE PHYSIOLOGY—UNCLE SAM STILL HAS THE MUSCLE

(By Roscoe Drummond)

The administration has expounded its defense program so badly and its critics have attacked it so persistently that many Americans may be led to believe that the United States is perilously vulnerable.

We aren't—unless an enemy wants to take massive destruction in reply.

An earlier column pointed out that while it may be militarily sound for the Soviets to rely primarily on the intercontinental missile because they have no oversea bases, it is militarily sound for the United States at this stage to rely primarily on the manned bomber. One reason is that we do have overseas bases from which bombers and intermediate missiles can be used.

I am not arguing that we couldn't or shouldn't strengthen our military posture. My own conviction is that our greatest danger is from limited, nonnuclear aggression and that our greatest weakness is in our lack of limited war, nonnuclear capability.

But what I want to report in this column is that, as far as all-out war is concerned, there is no deterrent gap in American military strength today. If we keep it that way, we're all right.

Here is a rounded picture of what the experts call the "mix" of our deterrent power, and, without relying on any classified information, I am putting the facts just as concretely as possible since generalities will not convince anybody and certainly not deter the

Soviets. The strategic striking forces of the United States are these:

More than 2,000 long-range strategic bombers—greatly outnumbering Soviet aircraft of comparable capability. This force is highly trained, completely equipped and ready, and maintained in varying stages of alert, including a large number on 15-minute ground alert and a small number actually airborne at all times. Each of these bombers can deliver the destructive potential of several ICBM's.

Two wings of tactical bombers, each with nuclear capability, deployed on many bases strategically located in advanced positions around the world.

Fourteen aircraft carriers, several of which are deployed about the periphery of the Soviet Union. From these floating air bases, which are virtually invulnerable to ballistic missile attack because of their shifting positions, nuclear strikes can be made into almost any area of the Communist bloc. The aircraft in these carriers alone outnumber the heavy bombers in the Soviet Union.

An operational ICBM squadron equipped with Snark, a 5,500-mile, air-breathing missile with a very large warhead.

Two cruisers and five submarines squipped with the Regulus I, surface-to-surface weapon.

Four operational squadrons equipped with a mix of Matador and Mace missiles, any one of which exceeds the total explosive power expended against all Axis military targets in Europe during World War II.

Sixty intermediate-range ballistic missiles—the Thor—in the hands of the Allied forces in the United Kingdom.

All of this, it seems to me, spells superiority over Soviet striking power today. They are producing more long-range missiles than the United States. But our superior strength in manned bombers and intermediate missiles gives us time to perfect improved second-generation missiles before going into full production.

SECRETARY GATES AND THE JOINT CHIEFS OF STAFF

Mr. SALTONSTALL. Mr. President, in yesterday's New York Times there appeared an article entitled "Gates Takes Decisive Role in Joint Chiefs' Deadlocks."

It is an effort by the Secretary of Defense to carry out the responsibilities of civilian leadership and to get action in connection with many important problems where the Joint Chiefs of Staff have been in disagreement. It shows the efforts being made by the Secretary of Defense to carry out the principles of the Defense Department Unification Act as it was passed by Congress. I think it is worthy of being printed in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GATES TAKES DECISIVE ROLE IN JOINT CHIEFS' DEADLOCKS

(By Hanson W. Baldwin)

WASHINGTON, April 30.—Secretary of Defense Thomas S. Gates has galvanized the decisionmaking process of Government by the simple expedient of making decisions. Last December, Mr. Gates announced that he would join the meetings of the Joint Chiefs of Staff whenever matters on which they disagreed were under discussion.

This simple practice, since broadened to bring the civilian Secretary into the military decisionmaking process, has broken quite a few of the minor logjams that obstructed the actions of the Joint Chiefs of Staff.

In time, it may lead to solutions of some of the major disagreements in the Defense Department.

Secretaries of Defense prior to Mr. Gates had the right to meet with the Joint Chiefs and the authority to make decisions about matters on which the Chiefs did not agree.

But none of them ever met regularly with the Joint Chiefs and few of them exercised—except on minor matters—the power of decision that was theirs.

Since his December directive, Mr. Gates' meetings with the Joint Chiefs have become periodic instead of intermittent. Each Monday at 2 p.m. he attends a meeting whether or not a so-called split paper, or disagreement, is under discussion. In addition to his regular weekly meeting he has attended other sessions.

Mr. Gates has already had 10 meetings with the Joint Chiefs since December and the frequency of the meetings will be stepped up between now and summer as problems that go to the heart of the Nation's defense policies are considered.

Three of the 10 meetings were more or less get-together meetings and general discussions. These were felt to be necessary so that the presence of the Secretary would not inhibit the free discussions of the military Chiefs of the individual services and their military Chairman, Gen. Nathan J. Twining.

Two of the meetings were devoted to briefings or presentations of major new problems to the Secretary and the Chiefs.

At four of the meetings decisions were made prior to adjournment. After listening to the discussion of a command problem at the 10th meeting, Mr. Gates gave a decision within 1 week as promised.

The latter decision concerned the long-mooted question of a planning and command organization for the Middle East. It had been under intermittent discussion for several months and upon its solution depended about a score of lesser decisions.

SETUP RETAINED

Mr. Gates' decision, in essence, retained the present high command and London headquarters, with Adm. Harold P. Smith wearing two hats as Commander in Chief U.S. Naval Forces, Europe, and also as Commander in Chief, eastern Atlantic and Mediterranean.

The former is a naval command and is a so-called specified command, answerable to the Joint Chiefs of Staff.

The staffs of the two commands will be separated, and a joint staff, headed by a deputy commander, will be established for the eastern Atlantic and Mediterranean command.

The deputy will be either an Army or Air Force officer, with the position rotated between the two services. He will be responsible primarily for planning for the Middle East, but the staff presumably will become an operational one in time of emergency.

QUESTION OF RANK

Details of the organization still have not been worked out; the rank of the deputy commander, for instance, is still undetermined. The Army advocates a three-star position; the Navy thinks two is adequate.

Another of Mr. Gates' decisions, in which he was joined by the Deputy Secretary of Defense, James S. Douglas, overruled the unanimous opposition of the Joint Chiefs.

It directed that a total of three British and Canadian military students be permitted to attend the National War College next year with American officers and civilians.

He also decided another split paper, in which the Navy was in opposition, and ordered that U.S. naval missions assigned to Latin American countries be grouped for supervision and policy direction under Lt. Gen. Ridgely Gaither, Commander in Chief Caribbean, with headquarters in Panama. He was already responsible for Army and Air Force missions.

NEW AGENCY WEIGHED

Mr. Gates is also about to sign a directive that will group all of the armed services long-line, or long-range, communications systems under one new agency responsible to the Joint Chiefs. The agency will be headed by a director appointed from one of the services.

Mr. Gates has also participated with the Joint Chiefs in discussions that contribute to decisions on speeding up the Atlas and Polaris missile programs; to the cutback of the Bomarc long-range interceptor missile program and the SAGE radar warning program, and to various detailed but tentative conclusions concerning problems of nuclear test cessation and arms limitations.

All these were relatively minor problems—difficult though they were—compared to what now faces the Joint Chiefs and the Secretary.

The Joint Chiefs, with Mr. Gates in attendance at least once a week, have been meeting 5 days a week for the last 2 weeks.

Next week, they tackle the thorny problem of the Nation's unified command plan.

ROTATION FAVORED

This may produce some prolonged and difficult discussions. Some officers in the Air Force and Army, for instance, would like to see the unified overall Atlantic and Pacific Commands rotated periodically among the three services. The Navy, which has held them since their inception, does not view this suggestion with any enthusiasm.

Upon his return from the summit conference in May, the Secretary and the Joint Chiefs will start wrestling with the toughest of all the Pentagon problems—the problem of targeting and all it implies.

This discussion deals with the Nation's strategic concepts, its military doctrine, its weapons systems, and its military command organization. It will go to the heart of defense policy.

Optimists hope that these meetings may be concluded within a month to 6 weeks, but other observers think the scope and importance of the subjects will necessitate a far more lengthy series of meetings.

This problem will center on our present procedure for identifying and assigning to various commands and services targets that would be objectives of our nuclear strike forces in case of all-out war.

A targeting committee under the Joint Chiefs of Staff now list such targets and the Joint Chiefs approve target assignments to the Strategic Air Command, the Navy's carriers, to unified commands overseas, and to all other units that might have under their command weapons systems capable of delivering nuclear strikes.

The targets selected and their assignment to various weapons systems and to the individual commands almost automatically determine the Nation's strategic concept and the kind of military force maintained.

The Air Force, for instance, has long maintained that the Nation must have a "preemptive war" capability; that is, we must be able to strike, when danger of an enemy attack is apparent, at enemy missile sites and airbases in order to blunt the impending enemy attack.

The Air Force also maintains that we must have the capability not only of deterring the outbreak of a nuclear war, but of winning it, if it occurs.

The Army and Navy believe that in the age of missile submarines and hidden bases it will be impossible to wage a "preemptive war" and that no nuclear war can really be won.

This concept, they hold, leads to an ever-increasing number of targets; the more air and missile bases the enemy builds, the more we must build.

This concept has already resulted, it is held, in a so-called overkill capability; that is, we have far more than enough nuclear delivery systems to destroy the enemy many times over.

Cities and industrial and political centers would be the major targets under the Army-Navy doctrine of so-called finite deterrent.

THE SITUATION IN KOREA

Mr. LAUSCHE. Mr. President, I wish that I could view with the same degree of confidence the assertion made by the Senator from Tennessee [Mr. GORE] about what our course of action should have been in Korea at an earlier date.

I cannot forget the fact that Syngman Rhee was the man who led the Korean people in a most vigorous and valiant resistance against the march of communism at a time when it seemed that communism could not be stopped.

It was Syngman Rhee whose untiring and valiant view and belief in the fact that communism should be stopped made the fight. It was Syngman Rhee who, together with President Truman, resolved that there would be no yielding in Korea.

I am not one who at this time will suddenly label that man as an enemy of democracy in the world.

Perhaps what is happening in South Korea may be setting the groundwork for an invasion of that land by the North Koreans and the Communists. I cannot dismiss from my mind the fact that immediately following the developments in South Korea, a revolt should break out in Turkey. Nowhere in the world are there any nations which have given greater comfort and greater available support to our cause than South Korea and Turkey.

Conditions in Turkey are not good today. Ten thousand boys aged 17 to 18 are on the march. Anyone who has read of the tactics and the operations of the Communists cannot conclude they have been completely absent in South Korea and in Turkey.

Let us assume that there was a march of 10,000 boys in New York tomorrow. Should the suppression of that march be labeled immediately as dictatorship? If it happens, it will be partly through the propagandizing, the propagation, and the actions of Communists who are operating hiddenly and without coming to the surface.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LAUSCHE. In just a moment.

The ACTING PRESIDENT pro tempore. The Senator from Ohio has used all his time.

Mr. LAUSCHE. Mr. President, I ask unanimous consent that I may have 2 more minutes.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Senator from Ohio is recognized for 2 more minutes.

Mr. LAUSCHE. On the matter of extending foreign aid, I may say that I have been in the Senate for 3 years and have been a member of the Committee on Foreign Relations for 2 years. Time and again I have heard the argument made that the United States should not interfere with the domestic operations of the various governments of the world; that we should not tie strings to the granting of foreign aid. I cannot understand how a policy which is good one day can overnight become so abysmally bad.

I do not want to aid dictators. More than a year ago, when Castro took charge of the Government of Cuba, the argument was made that the United States should stay out of the affair, that it was a revolt of the people, that we should let Castro run it. We stayed out.

While I subscribe basically to the principles enunciated by the Senator from Tennessee [Mr. GORE], the evidence is not so clear as to justify the people of the United States resting secure in the belief that the millennium has come in Korea and in Turkey by the removal of Syngman Rhee, and the uprising that is now in progress against Adnan Menderes.

The PRESIDING OFFICER. The time of the Senator from Ohio has expired.

CONFERENCE ON AFRICAN RESOURCES

Mr. CLARK. Mr. President, I call the attention of the Senate to the Conference on African Resources which is scheduled to be held at New York University in September. This project is jointly sponsored by New York University and African Fair, Inc., a nonprofit corporation.

The conference is planned to provide, for the first time, an economic forum which would clearly demonstrate to the peoples of Africa the active interest of American business, education, and the professions. The governments of various African states and territories have already made evident their strong support for this project.

A number of corporations and banks have indicated their support for the project. The interests of these business institutions had originally been stimulated by their support of the African Fair, which is to be a vehicle through which the African nations of the sub-Sahara will be able to present their arts, crafts, culture, and resources to the American public.

Last Friday, April 29, the New York Times reported that some of the corporations had withdrawn from the conference scheduled for next September. The Times went on to say:

> Speculation in some quarters was that the Union of South Africa, which has 50 percent of American investments in Africa, had brought pressure to bear on the investors to shun the conference with its emphasis on the rising nations of Negro Africa.

If, as the Times has reported, the Union of South Africa has exercised such influence and caused reputable corporations to reconsider their support of this worthy project, it is to be deplored, because, as government and economic experts, including the National Planning Association, have said, this is the best organized effort to date in the important area of economic relations with this vital group of nations.

The need for American business to aid in the industrial and economic development of sub-Sahara Africa is nonpolitical, and I hope it will remain so. It is incumbent upon free enterprise to help these countries achieve economic and industrial independence. There can be no question that efforts to subvert these legitimate aims constitute a step backward in the desire of all of us to aid the underdeveloped areas of the world.

Mr. President, I ask unanimous consent that a memorandum on the Conference on African Resources may be printed at this point in my remarks.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MEMORANDUM OF CONFERENCE ON AFRICAN RESOURCES

The Conference on African Resources, to be held at New York University, September 19, 20 and 21, 1960, is being sponsored jointly by the university and African Fair, Inc. Its aim is to bring together representatives of American industry and commerce on the one hand and spokesmen for the nations of Africa on the other so that there can be a frank, comprehensive, and mutually beneficial exchange of information. To help guide the discussions and maintain the flow of information a number of recognized experts on Africa, some drawn from the academic field, will also be invited to the conference.

Emphasis throughout the conference will be on the independent future of Africa and not on its past; reference to controversial political issues will be avoided and it will be made clear that what is envisaged is a two-way traffic designed to increase the volume and variety of trade rather than turn existing trade into new channels. That extent to which other outside countries are active in African commerce and industry will, of course, be studied, but not in a context of rivalry. Similarly, no time can be spared for discourses on African history or on the constitutional status of the various territories.

Substantial support has been received from the governments of the African states and territories. Ambassadors and other high level representatives of most African sub-Sahara countries attended a dinner given by former Governor Harriman on January 22. They pledged their complete support.

The conference will differ from most of the recent academic gatherings at which Africa has been the dominant theme in that the emphasis will be not on formal addresses but on panel discussions. Plenary session will be reduced to a minimum and most of the time will be spent in relatively small groups, each presided over by an expert who will be able to call on the assistance of a number of African representatives. It may be assumed that many questions which arise will be the subject of further conversation on social occasions outside conference hours.

Since many of the corporation executives attending the conference will be interested, not in the whole of Africa, but in some limited area, it has been decided to divide the continent, for the purposes of the conference agenda, into the following sections:

1. Western Africa, including the Republics of former French West Africa,, Guinea, Liberia, Ghana, Togoland, Nigeria, Sierra Leone, Gambia, and Portuguese Guinea.

2. Middle Africa, including the Republics of former French Equatorial Africa; the Cameroon, the Belgian Congo, Ruanda Urundi and Spanish Guinea.

3. Eastern Africa, including the Sudan, Ethiopia, Somalia, British Somaliland, French Somaliland, Kenya, Uganda, Tanganyika, and Zanzibar.

4. Southern Africa, including Angola, Mozambique, the Federation of Rhodesia and Nyasaland, the Union of South Africa, the

British High Commission territories, South West Africa and Malagasy Republic.

The designations of the four sections have been chosen to avoid any confusion with phrases normally used in political writings about Africa.

The subject matter to be dealt with under these four separate geographical heads has been divided into investment, trade, and cultures. A rough outline of topics which will be covered is given below:

INVESTMENT

Government policies and legislation affecting investment; commercial and banking practices; government and private development plans; extent and success of foreign investment; government projects seeking private investment; price and marketing controls; management and labor relations; trade unionism; personnel and distribution resources; power, transport, and communications; internship and training; urban development; cooperatives.

TRADE

Imports and exports, present status; real exports for expansion and potential exports, for pioneer development; appraisal; of import needs; government controls and policies; convertibility; licensing trading partners; barter arrangements with foreign countries; influence of regional and international trade agencies; retail distribution and domestic marketing; credit facilities.

CULTURES

Demographic cultural picture; technology and science (nutrition, health, etc.); educational systems (language, number of schools, university graduates literacy, internship, religious scruples); press, radio, publications; tribal institutions and local government; urbanization.

The detailed program for the conference will be so devised as to make it possible for each participant either to devote his entire time to one of the four geographical areas or to attend panel discussions covering more than one area. The agenda will be amended, if necessary, in the light of the wishes expressed by the corporations on the one hand or the African governments on the other.

It is hoped that one outcome of the conference will be the organization of an African Frair which will tour the larger cities of the United States with the purpose of awakening interest in the resources and needs of Africa and the opportunities for trade and investment presented by this potentially rich and rapidly developing continent. The success of the fair could, in its turn, result in the establishment of an African-American chamber of commerce through which the exchange of information set in motion by the conference would be continued on a permanent basis.

ARTHUR H. LEWIS,
Executive Director.

AIR POLLUTION

Mr. CLARK. Mr. President, a report by a Public Health Service scientist illustrates once again the urgent need for Federal leadership in combating the problems of air pollution. For some time, we have known that air pollution causes or aggravates dangerous chronic ailments, and causes billions of dollars worth of property damage per year as well. This week, however, a scientist from the Robert A. Taft Sanitary Engineering Center in Cincinnati revealed that a substance—benzpyrene—which is suspected as a cause of cancer has been found in the air of all 103 cities included in a national sample.

Public Health Service scientists are not sure why concentrations of this substance vary considerably from city to city and from region to region. They are not certain whether the efficiency of burning fuels in industrial processes has anything to do with concentrations of this harmful element. Nor do they know exactly what to do about the problem. What is obvious is that increased research activities by Federal, State, and local governments are called for if the health of all persons who live in urban and industrial areas is to be adequately safeguarded.

The problem is of particular importance to my own Commonwealth, Pennsylvania, with its heavy urban and industrial areas. I might point out that Altoona, Pa., holds the dubious distinction of having the highest concentration of this suspected cancer producer of any of the cities sampled.

The control of air pollution is a proper responsibility of the Federal Government, for whatever our desires, air masses propelled by winds show no respect for State boundaries. Local and State governments have usually recognized their responsibilities and have made some progress in research and other activities. In January of this year, a statewide air pollution control act, creating an air pollution commission within the State department of health, was signed by the Governor of Pennsylvania. The city of Philadelphia is presently conducting its own research program.

There is, in addition, a need for permanent Federal legislation and authorization which is not provided by existing statute. On February 26, the distinguished senior Senator from California [Mr. KUCHEL], who authorized the Air Pollution and Technical Assistance Act of 1955, on behalf of himself, the junior Senator from California [Mr. ENGLE], the junior senator from Pennsylvania [Mr. SCOTT], and myself, introduced S. 3108. The importance of this bill, I believe, is underlined by the findings of the Public Health Service.

Mr. President, I ask unanimous consent that there may be printed at this point in the RECORD an article entitled "Cancer Agent Found in City Air," published in the April 28, 1960, issue of the Washington Post. The article calls attention to the data uncovered by the Public Health Service.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CANCER AGENT FOUND IN CITY AIR

(By Morton Mintz)

A Public Health Service scientist reported yesterday that a poison that causes cancer in laboratory animals—and is suspected as a cause of cancer in man—has been found in the air of all 103 cities included in a nationwide sampling.

The substance is benzpyrene. It can be created in the burning or distilling of any fuel, and in many industrial processes. It also may be found in tars derived from fuels.

In the first 3 months of 1959, the mean concentration was 6.6 micrograms per thousand cubic meters of air. Every surveyed city in this region exceeded that figure.

The reading in Washington was 9.3 micrograms. Samples were taken from the roof of the Municipal Center at 300 Indiana Avenue NW.

The concentration in Richmond was 45, in Roanoke 18, in Baltimore 14, and in Norfolk 8.4.

The figures were given by Eugene Sawicki of the Robert A. Taft Sanitary Engineering Center in Cincinnati. He addressed the American Industrial Hygiene Association in Rochester, N.Y.

In an era of rising incidence of lung cancer, he said, "the disturbing question arises as to whether many cancers are not derived from constant exposure to an unsafe atmospheric level of carcinogens." Benzpyrene is only one of the suspected cancer producers in the air and in cigarette smoke.

Benzpyrene normally atttaches itself to airborne particles. Body mechanisms can remove it from the inhaled particles, permitting cells or fluids to absorb it.

Sawicki said doses as low as 0.4 micrograms have produced skin cancer in experimental animals, that a number of researchers believe "there is no tolerable dose" of a carcinogen and that carcinogens accumulate in the body.

If inhalation of benzpyrene is a measure of exposure to lung cancer, Sawicki said, the average city dweller's exposure is 100 times greater than a rural resident's.

Air samples were collected for a full year in 9 of the 103 cities. In 4 of them the average nonsmoker inhaled more benzpyrene than the average nonsmoker inhaled in rural areas, 28 of which were also surveyed.

The cigarette smoker averages 60 micrograms of benzpyrene a year. The nonsmoker inhaled 79 in Cincinnati, 110 in Detroit, 120 in Nashville and 150 in Birmingham. In London he took in 320.

In the rural test areas the average benzpyrene concentration per thousand cubic meters of air was 0.4 micrograms, a purity 16 times greater than that in the average city. On Solomons Island in Calvert County, Md., it was 0.7, or 5 percent of Baltimore's.

The city maximum was 61 in Altoona, the rural 1.9 in Pine Hill Forest, R.I. The city low was 0.11 in Helena, Mont., the rural 0.01 near Cape Blanco, Oreg.

Six 24-hour test samples were taken from each of 94 city sites during the test period—significantly, three cold-weather months in which benzpyrene concentrations run higher than in summer, when less fuel is used for heating. Sawicki said each site was judged representative of a city's overall atmosphere.

The researcher also said pyrene concentrations ran higher, generally, in the East and Midwest than in the West, where the abundant sunshine may be a factor.

But he said the data is inadequate to explain why the concentrations vary extremely. A PHS official here said the efficiency of burning may be the answer, or part of it, but that much more research is needed.

The range is great even among heavily industrialized cities. Here are some illustrative concentrations: St. Louis, 54; Newark, N.J., 4.5; Cleveland, 24; Pittsburgh, 5.1; Allentown, Pa., 3.4; Wheeling, W. Va., 21; Seattle, 9; Milwaukee, 8.5.

MINORITY RULE: THE NEW PRINCIPLE OF GOVERNMENT BY "A THIRD AND ONE"

Mr. GRUENING. Mr. President, there appears to be a new principle of government in the making. As reported in the press generally, at last Friday morning's breakfast in the White House with the Republican congressional leaders, President Eisenhower said: "Remember—one-third and one—that is the watchword—this is what I need."

"In this way," comments the New York Times columnist Arthur Krock in yester-

day's New York Times, "the President informally announced the opening of the veto season of 1960." I suggest that a new principle of government in America is in the making, the principle of government by minority. We are seeing the establishment of the principle that one-third plus one will determine the course of our Nation. This is rule by minority and not majority, a principle established since the founding of the Republic and the only principle tolerable in a democracy. True, the Constitution provides in section 7, paragraph 2, of Article 1, that the President may disapprove of legislation enacted by the Congress and then when he does so, it shall be returned to the House in which it originated and may be voted on again, and if repassed by a two-thirds vote in that House and the other House, it shall become law. But it is more than doubtful that the framers of the Constitution ever visualized an advance notice of an open season by the Executive on legislation designed for the welfare of the American people. What we are, in effect, told by the White House is that Congress shall not pass effective legislation for health insurance for the aged, effective legislation to provide adequate housing to take care of our exploding population, effective legislation to take care of our depressed areas, effective legislation to raise inadequate salaries for our Government workers, effective legislation to raise our minimum wage to have it conform to the steady rise in the cost of living, effective legislation for resource conservation and development, and much else that is needed for the welfare of the people of America.

Not so many years ago, a great President of the United States made reference to a similar fraction in an immortal inaugural address. In 1936, President Franklin Delano Roosevelt referred to the need to act to take care of the "one-third of a Nation" that was "ill-housed, ill-clad, ill-nourished." His concern for "one-third" was of a different character from that of the current Presidential concern. The whole New Deal program which lifted the Nation from the worst depression in its history and from the gravest internal crisis since the Civil War, provided those basic necessities in employment, in social security, in public works, in bank deposit insurance, in housing and in much else which brought back a prosperity that has carried the Nation ever since to new highs. These new highs, however, have been somewhat diminished by the present administration's hard-money policy and its policy of veto or threat of veto which has nullified bills to improve the condition of our depressed farm areas, our depressed urban areas, to bring adequate housing where it is needed, to aid education, clean up our polluted waters, to study the problems of our unemployed coal-mining areas and much else. How fortunate, however, we are that the framers of the Constitution, despite the provision of a veto, did not reverse the process and give the President the power to legislate affirmatively with the assistance of one-third of the Congress plus one. Had they done so, we would now be compelled to accept the President's stern injunction that we must provide housing, aid to education, aid to small business, elimination of pollution, indeed support for every conceivable project in 104 foreign countries. For the White House maintains its double standard in insisting that projects which at home it declares are inflationary, extravagant, wasteful, and will tend to unbalance the budget and, therefore, are subject to a veto, are indispensable in foreign countries and must not be cut by a nickel.

History will record the contrast between the fraction "one-third" as used by President Roosevelt in 1936 and as used by President Eisenhower in 1960.

DRUG HEARINGS BY ANTITRUST AND MONOPOLY SUBCOMMITTEE

Mr. DIRKSEN. Mr. President, I think this may be an opportune moment to refer to the fact that I have addressed to the chairman of the subcommittee a letter in which I express serious doubts about continuing these hearings until we have had an executive meeting of the subcommittee. It is rather singular that in the course of some of the testimony which was adduced last week, doctors expressed doubt about the efficacy of certain drugs, the use of which has been permitted by the Food and Drug Administration, and which have been rather widely prescribed in diabetic cases. I am rather afraid that if laymen members of a Senate committee, who certainly are not physicians, undertake to pass on the efficacy of such drugs, they may proceed far beyond their jurisdiction, which certainly does not extend into the field of passing on the efficacy of such preparations; and, in the second place, I am afraid such proceedings may generate distrust in the minds of many of the people of the country; and, third, I am afraid they may cast some doubt on the confidence of patients in their physicians. I believe that is borne out by the fact that a great many telegrams on this point have already been received; and there is deep concern.

So I thought I would allude to this matter and would discuss it with the chairman of the subcommittee, either today or tomorrow. But I believe I should make public mention of it now, in order to allay the fears and the apprehensions which have been engendered.

Mr. President, the Senate Antitrust and Monopoly Subcommittee has resumed its hearings on drugs and during the past 2 weeks we have heard testimony from eight doctors, one economist, and the president of the Pharmaceutical Manufacturers Association. I do not, at this time, wish to delve fully into the statements made by these witnesses for this matter will be treated in the report of the subcommittee with any individual views that the Senators may desire to express. However, to provide an idea of how diverse the opinions certain individual doctors or professors of medical or pharmacy schools may have, I refer to an article headlined, "Drug Gain Claim Challenged," and to the statement of the California professor, Dr. Frederick H. Meyers of the University of California Medical Center, where he has challenged the claims that the U.S. drug industries are leading the world in discovering new drugs.

Mr. President, the record will speak for itself as to the facts which show that manufacturers in the United States have brought forth 68.3 percent in the field of research and new drugs as against 31.7 percent for all of the countries in Europe during the past 20 years.

While Dr. Meyers was down-grading the efforts of the U.S. drug industry, two of his colleagues from the University of California Medical Center were in Chicago attending a conference of 12,000 biologists, participating in the discussions of new drugs. One of his colleagues was Robert M. Featherstone, a pharmacologist, who is Dr. Meyers' superior, and the other colleague was George L. Ellman, a biochemist, both of whom are from the University of California Medical Center. These doctors told of their new developments and new research at a scientific session of pharmacologists. I ask that the article covering this be inserted at this point in the RECORD.

I ask unanimous consent to have printed at this point an article entitled "Drug Found To Produce Temporary Sterility."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DRUG FOUND TO PRODUCE TEMPORARY STERILITY

(By Nate Haseltine)

CHICAGO, April 13.—A medicine once tried as an anticancer drug has opened up a new search for a perfect birth control pill, for males only.

The compound, furadroxyl, caused temporary sterility in male patients without any apparent loss of sexual vigor. Fertility returned when the daily dosings were stopped.

Biochemist George L. Ellman and pharmacologist Robert M. Featherstone, both of the University of California Medical Center, San Francisco, told of the developments and new search at a scientific session of pharmacologists.

Though furadroxyl, itself, is not the long-sought sterility pill, some members of its chemical family, the nitrofuranes, might be, they said. The ideal pill, they said, would act like furadroxyl, with certainty and without dangerous side effects, and would have to be economically feasible.

TESTS PERFORMED

After the discovery of sterility without loss of potency in cancer patients getting the drug, they said, a series of tests were run on rats to determine the mechanism of action. Dr. W. O. Nelson and his colleagues at the University of Iowa showed that the compound caused the cells which normally form the sperm to cease dividing. When the drug was removed from the diet the cells resumed production of sperm, and the males were no longer sterile.

This off-and-on effect is most desired for birth control, since it would permit couples to choose their own fertility and infertility periods.

The Ellman-Featherstone report was made to a scientific session of the current 44th annual convention of the Federation of American Societies for Experimental Biology, at the Palmer House. Some 12,000 biologists are participating.

RESEARCH ON SCHIZOPHRENIA

On another subject, schizophrenia, researchers at Wayne State University College

of Medicine, Detroit, Mich., reported uncovering an agent in blood serum from schizophrenic patients they could not obtain from blood serum of healthy individuals. Whether it is a cause or product of the mental disease is unknown, they said.

Previous studies had shown that blood serum from schizophrenics, when injected into chicks, caused a change in characteristics of formation of chicken red blood cells.

Dr. Charles Frohman, of the Medical Center, reported today that he and his colleagues broke the tainted blood fluid of the patients into 22 different fractions. One of those 22, he reported, was the active agent that causes the phenomena in chicken blood cell formation.

Mr. DIRKSEN. Mr. President, the testimony of the doctors who appeared last week received fairly wide coverage in the newspapers throughout the country, some of which I am sorry to say was testimony from doctors who I do not believe to be experts in the field they testified on but were merely presenting an individual point of view. I believe it would be interesting for the Members of Congress to get views of practicing physicians from various States, as well as leaders of colleges of pharmacology who have written to me expressing their points of view. Some of these are not submitted as expert testimony but I believe they should bear as much weight as some of the doctors who appeared recently. I ask unanimous consent that these excerpts from letters be placed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

EXCERPTS OF LETTERS RECEIVED COMMENTING ON THE PRICING POLICIES OF THE DRUG INDUSTRY

Drs. Wellmerling and Ball, Bloomington, Ill.: "I am sure most of them [doctors], at least I always do, tell the patients that this is going to be a rather expensive prescription and try to give them an idea of the cost and tell them why and explain to them that it will cost them less in proportion to buy one prescription than half a dozen of something cheaper which in the long run would cost them more and they would not recover as quickly, therefore, would lose more time. I find when I do this most people do not mind the price that some of the antibiotics cost."

Dr. Bruce F. Andreas, Mentor, Ohio: "Perhaps we do have room for improvement in American medicine and the pharmaceutical industry. But American medicine today is the best the world has ever known, and our people are receiving better medical care than citizens of any other land. This has been made possible by our existing system, by our doctors, pharmacists, scientists, and by the confidence of our people.

"It would be folly to sacrifice this proven superior system for any other theoretically more idealistic approach."

Dr. Frank A. Merlo, Big Rapids, Mich.: "Having been in practice for 27 years, I consider myself extremely fortunate to discern the revolutionary changes that have occurred in medicine and surgery and to be able to compare the old with the new. The enormous progress made from 1933 to 1960 has had a tremendous impetus from the drug industry through their research and manufacturing facilities, by their own monetary facilities, and without help from grants from public funds, which if they had been supplied, are only forgotten by the public, who are too unmindful that any appropriation from the Department of Health and Welfare eventually reflects to their own pocketbooks and taxes, something to grumble about when the tax notice arrives.

"A legitimate enterprise is entitled to a fair profit and the prices charged for any 'wonder drug' is within bounds."

Dr. Charles Sheard, Stamford, Conn.: "I have been heartsick and worried over the gullibility of the press and the public, and the great difficulty I have had—and I am sure my colleagues across the Nation have had—since so much adverse publicity recently.

"Most of our profession are slightly used to battling ignorance, but I must confess it gets tiresome when you have to battle it in your lawmakers. I think of how Dr. Harvey had his battles when he tried to establish the truth of his theories concerning the circulation of the blood years ago in London, and I take heart however."

Dr. A. M. Benshoff, Jr., Ronceverte, W. Va.: "I practice internal medicine. I have been out of medical school 10 years practicing and training, and there is hardly a day goes by that I am not truly grateful for the many wonderful drugs that I have available to help sick human beings. Some of these drugs have only been available 1 or 2 years. Most of them, except for penicillin and a few like insulin, have just come along since I got out of medical school in 1950.

"It has been a wonderful thing for me to really get medicines that do a job and do it right, and enable me to practice more and more effective medicine, and that means save more and more human life.

"My father, who is a physician, for most of his practicing life, did not have these things, and he was helpless in the face of many of the problems of which these drugs make me competent. I am sure you are well aware of the fact that these drugs are available, only because of the tremendous research that has been done by private American drug industry, to develop these things, and it certainly is obvious that these companies are highly ethical, on the whole, and that they are certainly one of the major blessings of the people in this country. There is nowhere else in the world that there is an industry that is doing this for its people."

Dr. R. R. Newell, San Francisco, Calif.: "Thank you for sending your remarks on the Senate committee hearings on drug prices. I've been deeply disturbed about the dishonesty of the investigation from almost the very first."

Dr. John H. Brush, Omaha, Nebr.: "The drug industry certainly has done a terrific job in solving the ailments of our people.

"I still feel that although the price of drugs may be high, it often, in the long run, saves much expensive hospital time which is undoubtedly a saving to the people."

Dr. R. W. Carter, Birmingham, Ala.: "Thank you very much * * * people who appreciate the advances that the drug industry and medicine have made. It is felt that many of these advances would be impossible under a system which did not permit free enterprise.

"The medical profession in the country today does a better job than the medical profession of any other nation, and any attempt to change the system is sure to decrease the quality of medical practice. If the missile industry, for example, could produce quality work as well as the drug industry, perhaps we might be as far ahead of Russia in missiles as we are now in medicine."

Dr. D. G. Miller, Jr., Morgantown, Ky.: "Although I realize the complaints about medical care at the present time, are the high cost of drugs, I also, having been the son of a pharmacist, and working in a drugstore for years, realize that there are many factors that enter into the cost of drugs that were not brought out, at least publicly, in the Kefauver investigation."

Dr. William J. Stewart, Columbia, Mo.: "The medical men of the United States are grateful to the outstanding drug firms in this country for their high quality products, for their very great research contributions that they make and things of that sort. * * * The American public should be grateful for the fact that we have these great and ethical businesses operating toward the protection and improvement of the health of all of our citizens."

Dr. J. T. Rooks, Walla Walla, Wash.: "In view of the rapid and marvelous results or cures which some of these new products bring about as compared with the old methods of treatment, some of the highest priced drugs are actually cheap. I have seen many cases of long standing infections that had been treated for months or even years by the old methods recover completely in a few days when given the advantage of the new and apparently expensive drugs. Which, then, is the more expensive?"

Dr. Kenneth M. Keane, Sioux City, Iowa: "With my limited knowledge of policies and investigations it certainly seemed that there was a great deal of false information and half truths being submitted to committees or brought out by members of committees relative to the hearing on drug prices. I'm very happy that you have been able to demonstrate how ridiculous some alleged tremendous profits relative to these prices can be.

"The thing that bothers me even more than the implications of this affair is the rather apparent fact that our chosen leaders can be led so far astray on any matter and that they can be so illogical and use such little discretion and little judgment in bringing partial truths to the foreground and influencing public opinion by half truths which to my mind is just as bad and even worse than deliberate lies. At least many people can take an out-and-out falsehood and recognize it as such but when you attach an element of truth, and sometimes a very small element, to any statement it can fool an awful lot of the people.

"I shudder to think of the consequence to the Nation on matters even more serious than drug prices and socialized medicine if the type of faulty thinking is used throughout other matters pertaining to the safety and well-being of our country. Again I appreciate your efforts in bringing a more accurate portrayal of actual circumstances to the American people."

Dr. H. A. Amesbury, Clinton, Iowa: "I am sure there is no question but what there has been a well-planned assault on the practice of medicine from all angles. This has been carried out with the idea of beating down any opposition to some socialistic scheme for the introduction of Government medicine into the United States.

"As part of their propaganda, the figures which they use have been greatly distorted. In the first place, there is no reason to assume that all people of 65 are indigent and should, therefore, be wards of the Government. In the second place noses have been counted of those past 65 and inquiries made as to income—and although a couple may have a modest although adequate income which is being paid to the husband, since the wife has no income she has been rated as an indigent—and these figures have been widely broadcast."

Mr. Samuel M. Felton, Merion, Pa.: "The drug industry with their many millions of dollars in research have saved many lives—probably in the millions. Their money has been intelligently spent by outstanding companies.

"I have stayed alive with a heart condition for over 10 years—brand-name pills at less than 10 cents each are responsible."

Dr. Mary L. Zalinger, Camp Meeker, Calif.: "I was licensed to practice medicine and sur-

gery in the State of California in August 1905.

"It has always pleased me to receive all literature sent by any pharmaceutical manufacturer.

"The smaller, old type family doctors have neither time nor money to pursue scientific research, so that the reports to us by drug manufacturers should be welcomed.

"They keep us informed about discoveries, and the proper uses and dosages. I have heard but few complaints as to price. These days most employees receive high wages, i.e., skilled workers.

"They should recognize the fact that qualified laboratory men who have had heavy costs for their college education and years of work, are entitled to be well paid. Their salaries are only one of the many costs the drug manufacturers have to meet and not complain when they pay for a prescription."

IOWA CITY, IOWA, *April 13, 1960.*

Hon. Senator EVERETT M. DIRKSEN,
Senate Office Building,
Washington, D.C.

DEAR SENATOR: I have just finished reading an AP dispatch which appeared in this evening's Iowa City Press Citizen relative to testimony given before the Senate Antitrust and Monopoly Subcommittee by Dr. William Bean, of the Iowa Medical School staff. Dr. Bean makes statements which I feel need clarification. He says, "Some medical societies are so beholden to some drug manufacturers that they won't listen to criticism of the firm's products." I have attended many State medical society meetings and many meetings of the American Academy of General Practice in Iowa and other States, and at the national level. Never have I had knowledge, "first hand or otherwise of any medical society being subservient to any drug manufacturer's free spending or otherwise." It is true that the planning and programing of any organized group requires funds and is expensive. Drug companies rent space for the privilege of presenting their products of research, and by so doing contribute to the dissemination of valuable facts and information. This rental money is used to defray the costs of obtaining scientific speakers and directly contributes to the quality of the group's "strictly professional and scientific activities." By so doing I do not believe that "scientific activities dwindle in comparison with its commercial aspects" but rather the meeting's quality is thereby directly enhanced. Dr. Bean states that "society officers urge everyone to register at each exhibit and remind the audience that the society is beholden to the exhibitors." This registration is purely an act of courtesy to commercial exhibitors, a way of saying "thank you." No individual or group is "beholden" to any commercial exhibitor and the implication is a reflection on a physician's intelligence by implying that the drugs he prescribes and recommends will be those exhibited, and not those he considers to be for the best interest of his patient. Nothing is further from the truth. Many times I have heard scientific speakers at formal society meetings criticize drug products with impunity. It then became the prerogative of the freethinking physician to choose whether or not he wished to use the product discussed and the duty of the manufacturer to improve the drug in question or have its sale damaged by failure of physicians to prescribe it. This I think is healthy free enterprise in which no one is "beholden" to anyone. I happen to be president of the Iowa chapter of the American Academy of General Practice. An organization of family physicians who use, need and whose patients benefit from research done by good pharmaceutical companies. As a private practitioner I resent the implication that I, as a member of my society am "beholden" to any so-called "free-spending drug manufacturers." I will conclude with the following bit of information. At our 1959 academy meeting in Des Moines, Iowa, Dr. William Bean was an invited speaker and was paid an honorarium for appearing on our program. He was paid from our general fund. A portion of that fund is made up of contributions donated (with no strings attached) by commercial companies. So it is entirely possible that Dr. Bean, himself, has personally benefited from those sources he so unwittingly castigated in his near-sighted testimony. This letter may be used in your hearings as you so desire.

Respectfully yours,

Dr. L. H. JACQUES, M.D.,
President of the Iowa Chapter of the American Academy of General Practice.

TEMPLE UNIVERSITY,
Philadelphia, Pa., February 26, 1960.

DEAR SENATOR DIRKSEN: I have read with great interest your address before the Senate of the United States on Friday, January 22, and I wish to congratulate you upon the honesty, courage, and perspicacity which you have demonstrated in your statements.

Unfortunately, many persons become emotional when the subject of drug prices is discussed. Perhaps this is because we seem to be placing a price upon health—perhaps even life itself. Obviously, these same considerations are involved in all other costs of medical care, whether they be hospital charges or physician's fees. Some of our legislators choose to prey upon the emotions of the electorate by focussing special attention upon these charges.

In their zeal to demonstrate concern for the public welfare, they have gone so far as to unfairly distort the facts. Attempts to demonstrate excessive profits by the use of calculations involving only the basic cost of ingredients and the ultimate selling price of finished products are, as you have indicated, gross misrepresentation of the truth. None but the most naive will be misled by such tactics. Fortunately, your testimony has served to indicate some of the other factors which must be considered before a true profit figure can be calculated.

It is quite true that the pharmaceutical industry has shown remarkable growth in the United States during the past 25 years. To an interested observer, such as myself, this is no surprise. A number of factors have contributed materially to this success; but, one of the most important of these has been research—that same research which has helped to provide for the American public the highest standard of medical care which the world has ever known.

Medical and pharmaceutical research owe their stimulus to the highest of humanitarian ideals—the desire to relieve suffering and to save lives.

On the other hand, the motive which stimulates the investment needed to make such research possible is the profit motive. Only the profit motive could bring forward the billions of dollars needed to build, equip, and staff the wonderful research laboratories which have been developed by leading pharmaceutical manufacturers. The same profit-supported research which has made our transportation and communication systems the envy of the world has also brought to us the best in lifesaving drugs.

If we are now to have legislation which prevents the making of honest profits on the manufacture and sale of drugs, then our country and our Government have certainly reached their declining years. For the only alternative is total socialism—Government-directed medical practice and research. Surely we have not reached the time when we are considering the abandonment of the competitive enterprise system and the substitution of a socialized or communistic plan? Yet, if it can happen to the pharmaceutical industry, it can happen to any other industry and the American ideal can disappear forever from the face of the earth.

Again, I am grateful that you and others like you have not taken unfair advantage of this problem—that you have been honest in your statements and firm in your convictions. We must depend upon actions such as yours to prevent us from being stampeded into emergency legislation which may be unfortunate or even disastrous. Many of the proposals which are now being made by the chairman of the investigating committee would seriously curtail the research efforts of pharmaceutical companies and would impair the discovery and development of new drugs. Let us hope that an enlightened electorate will never permit this to happen.

JOSEPH B. SPRAWLS,
Dean.

[From the American Journal of Pharmacy]

THE GENERIC NAME PITFALL

(By Dr. Linwood F. Tice, dean, Philadelphia College of Pharmacy and Science)

Every so often there is renewed effort sometimes bordering on agitation to promote the use of generic names. In recent weeks, such efforts have been intensified largely, we presume, as a means of offsetting some of the criticism which has been directed against the pharmaceutical industry by the Kefauver hearings. We do wish, however, to draw attention to some of the pitfalls which are overlooked even by well-intentioned people in their advocacy of the use of generic names and in their suggestion that physicians grant blanket approval to pharmacists to dispense a generic equivalent when a brand name is prescribed.

First, we shall take up the problem of generic names. It would be difficult to imagine the utter chaos which would result if, let us say, for the next week all prescriptions written in the United States were written using generic names. Physicians themselves are totally unfamiliar with these names and pharmacists, we suspect, do not know 1 out of 10. By no conceivable process of professional education could this situation be remedied. Generic names by their very nature are extremely difficult to remember—sometimes, we suspect, almost by intent. Even when those who are given the task of coining generic names do it with complete objectivity and follow all of the standard rules for nomenclature such as those promulgated by the World Health Organization, they come up with names which are real tongue twisters and almost impossible for the average practitioner to spell. With just a little imagination, one can picture just what might happen when such names, improperly spelled to start with, and illegibly written besides, were placed on prescriptions. The average pharmacist would be lucky indeed if he could figure out the physician's intent on half the prescriptions which he received. We presume that this difficulty might in time be remedied with an intensive educational campaign directed at both the medical and pharmaceutical professions but, until such a campaign bore fruit, we could expect all sorts of tragic errors—some of colossal magnitude.

Another aspect of the situation which deserves more attention than it has received is just how often a bona fide, high-quality pharmaceutical is available except under its brand name. There are hundreds of important prescription products that are not commercially available except under their brand names unless it be some counterfeit of doubtful identity and even more doubtful quality and purity. This same situation exists in almost all cases except with a very few drugs which are relatively old and which are manufactured by several companies of good reputation.

The most serious aspect in connection with the widespread use of generic names and efforts to make the use of generic names popular is the encouragement it would give to some of the most unprincipled duplicators and counterfeiters of pharmaceuticals on the American scene. These undercover companies have always been with us and the inroads which they have made on the sales of pharmaceuticals by our legitimate and ethical companies have at times been staggering. Almost invariably, it is found that these companies operate without proper manufacturing supervision and control and that they are constantly in trouble with the Food and Drug Administration or some State agency having similar responsibilities. These companies originate solely because of the cupidity of their owners who depend upon equal cupidity and greed on the part of certain pharmacists. Their existence and their modus operandi are so well-known in pharmaceutical circles that they need not be discussed here. Some of our finest pharmaceutical companies are constantly engaged in shaking off these leeches who have never done a single thing to advance or improve pharmacy, have never supported the slightest bit of research, do not employ competent help, and have not the slightest sense of responsibility for their actions.

If the various proposals to extend the use of generic names should be seriously accepted by the professions and some effort made to implement these proposals, we can expect a mushrooming of these submarginal operators with the eventual result that we shall return to those days of chaos when drugs rarely met prescribed standards and adulteration was the rule rather than the exception. Public confidence in the drug industry might well then be completely shaken. This could spell the end of private initiative in the drug field and bring us all under a regimented system of State medicine.

We in pharmacy in the United States have reason to be proud of our accomplishments for they are unmatched in the world. Before those who advocate some departure from our present system are taken seriously, it would be well for us to think carefully concerning what might be the eventual result of the innovations they suggest. For the first time in our history, the drug industry is being subjected to public attacks. It is time for us to stand steadfast by our guns and on the solid record of our achievements and not seek public acclaim on the basis of proposals which, while they sound good on the surface, may contain in them the seeds of the eventual destruction of our entire system of medical care.

AMERICAN PHYSICIANS FOUNDATION,
April 19, 1960.

Senator EVERETT MCK. DIRKSEN,
Senate Office Building,
Washington, D.C.

DEAR SENATOR DIRKSEN: The American Physicians Foundation is a nonprofit corporation organized and run by practicing physicans with the purpose of improving the physicians' fiscal operation. The principal vehicle of information is the manual "Physicians Financial Service."

The items enclosed might clarify the operation of the foundation. We had been hoping to enlist the aid of the pharmaceutical manufacturers in broadening the program of the foundation and we hope the unfounded statements of Dr. Bean have not precluded such help.

We hope your very competent good offices will have been effective in the results of the hearings.

Cordially,

W. H. J. HIPPLE 3d,
Executive Director.

Subject: Remarks relevant to the hearings of testimony in the investigation of the drug industry.

Submitted by: W. H. J. Hipple 3d, American Physicians Foundation, executive director.

They are perilous times when useful, law-abiding neighbors are taken to stand the pillory of public abuse. If the drug industry was required to submit to congressional examination, the least expected of such an investigation is that it be conducted in an atmosphere of courtesy. It is unthinkable that this event should have been the occasion to malign and slander the responsible members of an industry whom we have every reason to regard with respect. That such irresponsible conduct should be extended to defame those of an allied field is a most disgusting performance.

By the limits of private practice the physician is confined to a life of relative personal and professional isolation. The societies in which he holds membership are remote and sometime relationships. No real measure of loyalty is expected from them and none is tendered to them. It is inconceivable that a doctor would give or a drug company expect the concessions alleged by Dr. Bean. To have suggested that physicians have entered a subversive agreement with a manufacturer of pharmaceuticals not to criticize this or that company's product is an offensive and illogical libel.

Imagine the existence of Dr. A, Drug Co. B, and a Medical Society C.

"A" practices privately and is a member of "C" (one of many). Infrequently "A" gathers with the members of "C," who total about 50,000. Now take the case where drug company B sees fit to make a grant of $50,000 to medical society C (although this amounts to $1 per doctor, it could be $3 or $5 or $10 for the purpose of this illustration). In the course of these hearings, the committee has heard testimony that the physician A, in some instances, will be compromised by the gift B makes to C. Humbug. Such an accusation must have been made impetuously and certainly without regard to the implementation of such a vile alliance. The witness must have known of the professional autonomy that insulates the practice of medicine from such an illicit relationship; he must know of the physician's calculated hostility to a principal who dared offer this perilous and unethical compromise. From whom, indeed, would the doctor withhold criticism? The patient—for what reason? His associates—on what pretext? His journals—that are subject to public reevaluation? To whom then? Dr. Bean's suggestion is a senseless and disgusting performance which should not go unchallenged and corrected.

For the past several months I have called upon the major pharmaceutical manufacturers as executive director of the American Physicians Foundation (a nonprofit corporation) to secure a monetary gift to finance the foundation's membership drive. This industry, since it is best equipped to measure the physicians' needs, was the logical selection for solicitation. It is the intent of the directors (all physicians) to collect, assemble, and distribute information to the members that they will find useful in the fiscal control and efficiency of their practice. First of all there has been no real encouragement from the drug industry to support a society of physicians and no—not the remotest feeling on either side that the consideration of such a grant places either in anything like a trading position. We are not unhopeful of ultimately resolving our financial needs and I would hope through the insight of a pharmaceutical house into an area of growing need whose solution must be found by an objective entity. Surely a productive effort likely to increase the physician's available time is a relevant and worthy investment of the drug industry.

The issues, upon which the pharmaceutical industry is being examined, are not altogether clear. The committee's preoccupation with the profit factor is so arbitrary an item of debate the most zealous members of the committee appear to have no fixed estimate of what they think it ought to be and react with virginal astonishment when they find out what it is.

A hard look at the nature of the drug industry discloses an operation whose financial romance is constantly menaced by the threat of product obsolescence and ultimately by definitive chemical therapy, ironically enough a cherished development of its own design. No sane member of society would delay the advent of so profound a gift to society. Such promise is not wrought by custodial proprietorship that endures in a kind of static hibernation fixed securely by the set formula of equitable profit. The grand corollary of great reward—greater risks attracted by an incentive for profit has supplied this splendid industry with the machinery and talent to serve the Nation and the world as none other have served it. No quasi-social entity with its bureaucratic suffocation could meet a challenge that demands swiftness and determination where only the creative can survive. Restrict and control it and you risk the peril of reducing the momentum of humanity's greatest promise.

The diversion of manpower from the daily operation of the several drug houses to attend to the discussions taking place in the hearing chambers ought to be foreshortened by the prudent judgment of the committee. So long as they continue the compelling fiducial responsibility of management is obliged to protect the interests of a company that is the provider for many thousands of employees and stockholders whose capital has made the wide and effective distribution of medicine possible. Many of these shareholders are minor legatees to whom the company and the committee owe a yet greater measure of care. If drug securities were depressed, how anxious would any of us regard the loss of the stockholders' equity? We all know the answer: we should reply that the risk-taking element is the definitive characteristic of the common stock investment unlimited on the downside as it is on the upside. The investor can lose all and often does.

It has been claimed by many reasonable witnesses that a reduction in the type and quantity of advertising should be urged on the pharmaceutical industry on the grounds that manifest scientific enlightenment ought not be augmented by artful copy and such other attention-getting displays as are commonly employed to publicize drugs. That point is rightfully made but haven't we all wished at one time or another, perhaps in every election campaign, that one might stand or fall on performance and consideration of issues to the exclusion of frivolous and immaterial appeal. Yet the gravest movements are implemented by resourceful appeal to which the reflexes are conditioned to respond. Physicians, as Dr. Leek emphasized, are not simpletons; still they are ordinary men exposed to a conglomerate of communication and its colorless and wearisome presentation adds nothing to its accuracy.

To meet the enormous and critical need of the sick and ailing the drugmaker must maintain and renew his equipment and employ a very highly competent work force: No affront to the committee is intended when we add: this takes money. The capital to sustain and improve this medical entity must be attracted by a program of product exposure that the prospective investor will regard favorably. The heavy cost of advertis-

ing is not an elective expense of doing business so long as ordinary men and women respond to the attractive stimuli calculated to arrest attention: generic identification and statistical support of the professional authority testing the product either precedes or follows whatever graphic appeal introduces the subject. As for the wider application of generic terminology, we are advised that it should continue to be the choice of the physician. The labeling of medicine is most useful to the patient when brand identity is used: to him generic description is putting the unknown in terms of the not worth knowing.

It is not the business of the American Physicians Foundation to defend the operation of the pharmaceutical industry. It is or should be the interest of all to correct misstatements of so substantial an influence as those made before a Senate committee and to object to the abuse on an industry worthy of our highest opinion. When the alternative method of running the delicate machinery of producing medicine is considered, all we have to say is, the more it is understood the less it is desired.

REMARKS ON INVESTIGATION OF THE DRUG INDUSTRY BY DR. OSCAR ALDEN, RED OAK, IOWA—LETTER DATED DECEMBER 9, 1959, TO SENATOR HICKENLOOPER

DEAR SIR: The Government is now going to investigate the drug companies. In a quotation from the Wall Street Journal, Senator KEFAUVER said their investigations of other industries had not created much interest but thought this one would create a lot of interest. My immediate reaction was: "Is Senator KEFAUVER conducting these investigations for the good of the people and the industry, or for the good of KEFAUVER?" His statement makes me inclined to think the latter is all too true. I have been in practice in Red Oak, Iowa, since July 1936, and during that period we have had the most fantastic growth in knowledge of the care, treatment, and prevention of diseases, accidents, and infirmities of people since the beginning of recorded time. It is interesting to note that this growth occurred among free people of the world. Each succeeding country, to lose that freedom, fell behind in advancing this knowledge. Germany went from the top to near the very bottom. American scientists in medicine have won 36 percent of the Nobel prizes in medicine, in fact, 2.7 times more than any other country. Almost all of this advancement has been due to the combined development of technique and new drugs. One impossible without the other.

Commonplace surgery today would be unheard of and impossible without the development of antibiotics, anesthetic materials, (drugs and gases), and knowledge of the basic body needs for vitamins, minerals, caloric requirements and the development by the drug industries of materials and means of replacing these for long periods of time, even to unconscious or anesthesized people.

The development of the miracle drugs, (steroid compounds), for arthritis has been phenomenal both in discovery and improvement, as well as lower cost, which has been consistent since its first discovery. What is the proper reward for the people who developed and improved both the product and the means of producing all these drugs? George Washington died probably due to a strep throat infection; a condition treated routinely in our offices today with very little loss of time and practically no deaths. Calvin Coolidge's son died from an infected blister on his heel from playing tennis; a condition that we treat with complete recovery in a relatively few hours today. What is the cost of these drugs today? Both men could have been saved for the price of a case of beer, a fifth of whisky, or a few cartons of cigarettes.

If Senator KEFAUVER and his subcommittee find that the drug industry as a whole are not shysters or thieves, or vultures preying on old defenseless people, will this committee give them a "good housekeeping seal of approval," or will it be up to the president of one of these companies to send letters to all physicians of the country stating that after spending numerous man-hours, and thousands of dollars, they were acquitted, leaving the bogeyman picture he created in the minds of our elderly people and those on fixed income.

This will undoubtedly take the time of many qualified men and untold sums of money thus added to the costs of drugs, with no improvement in a single lifesaving or pain-relieving drug.

If the pharmaceutical companies as a whole are found to be crooks and thieves by this investigation, then I would like to be permitted one request, i.e., that I be allowed to stand up and be counted with such thieves and crooks who have made the health and care of the American people the best in the world.

Our Public Health Department is very good. They made the standards for testing polio vaccines, but did they offer to defend Cutter Laboratories in the many lawsuits they had because of live virus in their vaccine, not found by public health standards—I'll take company name and product pride over all Government control.

Small companies sell for less money. It has been said "Nothing has been made but what someone could make it with inferior materials and sell it for less money." One very prominent (not to their desire) small drug company specialized in selling the same drugs for less money to dispensing physicians, and they brought out and sold elixir of sulfanilamide. The rest of that story is history in our time. No thank you. I would not give any cheap drugs from a small company to either my family or my patients. They might be just as good, and again—funerals are so expensive.

Yours very truly,

OSCAR ALDEN, M.D.

AROMA PARK, ILL., *April 18, 1960.*

Hon. EVERETT DIRKSEN,
Senator from Illinois,
Washington, D.C.

DEAR SIR: I have been reading in the press that you intend to challenge Senator KEFAUVER on some of his statements and conclusions in the drug company investigations.

Senator KEFAUVER thinks that physicians should write the chemical formulas instead of "brand names" in all prescriptions. You might suggest that he inform himself upon some of the very complicated chemical formulas which are being constantly developed by the skilled drug company chemists.

As an example, one drug company has a product whose brand name is "Peritrate." Its chemical name is penterythritol tetranitrate. It is a coronary vasi-dilator. The company also puts it up in a convenient tablet combined with nitroglycerin and another with phenobarbital. Also, all of these in sustained action capsules. Which means that one capsule will maintain a certain level of the drug action for a given period of hours and this result is obtained by tiny particles which disintegrate at varying periods of time. Is anyone naive enough to assume that such a product could be developed and manufactured without enormous expense?

Imagine the time which would be consumed by busy doctors in writing the prescriptions for these medications out in full, including the name of the manufacturer, and picture, if you can, the confusion of the pharmacist who would have to decipher them. The illegibility of prescriptions has forever been the headache and pet peeve of pharmacists and the standing joke of the laity.

This illustration I have given is a very simple one compared with many of the standard and effective drug preparations which are daily used by physicians. The brand names are by no means secret, nor patent medicines. Complete literature regarding them is supplied to physicians and pharmacists by the drug manufacturers, including the details of the experimental work done in developing and producing them. The brand names are for convenience and also for identification. Each drughouse has certain products which physicians find useful and effective in their practice. Stocking them by pharmacists is also made possible by brand names.

Most truly yours as a "50-year club" member of the medical profession.

JOY R. CORRELL, M.D.

THE MUTUAL SECURITY ACT OF 1960

Mr. WILEY. Mr. President, I rise in the morning hour to pay a compliment to the chairman of the Foreign Relations Committee, the Senator from Arkansas [Mr. FULBRIGHT] who has been working very, very hard on the Mutual Security Act.

Thus far, I have had very little to say about that measure. The Senator from Arkansas has had the problem of handling its presentation to the Senate. The problem is the Nation's; he has been doing a good job.

I agree with the statement made by the Senator from Arkansas that most of the people of this country do not realize the significance of mutual security at this time. We talk about the danger of a world war, we talk about a shrunken earth, and we talk about every nation being the neighbor of all other nations; but then we forget that mutual security is the main weapon for peace; we need it in order to stave off a world conflagration or a bonfire.

Although to many of my constituents the funds requested seem to involve a giveaway, yet in my opinion, no particular waste is involved, because, first of all, the use of these funds gives employment to between 500,000 and 600,000 Americans; in the second place, this program helps us get rid of surplus commodities which we have; and, over and above all else, the program has back of it the purpose of meeting situations which are threatening, and which might result in open warfare.

Because of the responsibility of the United States of America, with her tremendous wealth, her extensive productivity, and her great working force of 70-odd million persons, I believe this situation presents to us a challenge to keep our country on an even keel economically and in good working shape. Mutual security is a great aid in that direction.

I agree fully with the general attitude of the committee, even though, I might disagree in regard to several items.

The ACTING PRESIDENT pro tempore. The time of the Senator from Wisconsin has expired.

Mr. WILEY. Mr. President, I ask unanimous consent that I be granted an additional 2 minutes.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Wisconsin? The Chair hears none, the Senator from Wisconsin is granted an additional 2 minutes.

Mr. WILEY. Mr. President, the provisions of the pending bill are fully described in the report of the Committee on Foreign Relations and I will not therefore retrace that ground. Nor is it my intention to go into the reasons for the action taken by the committee with respect to the bill, for the report also covers them well. My remarks, rather, will be confined to some general observations on the mutual security program.

Mr. President, to see the mutual security program in its proper perspective, it seems to me that we have to view the world of today as it really is, for the two are vitally interwoven. It used to be that our relationships revolved around small units; the extent of our external affairs was pretty well encompassed in our abilities to get along with our next-door neighbors. As our Nation grew both in population and importance, as our trade and commerce increased, we found it necessary to broaden our horizons and deal with those folks who lived beyond our own main street. Even so, we could still stay mostly within our own national yard. Today, all that has changed. We are now living in an age we couldn't have imagined a few years back, an age in which the streaking jets and whizzing rockets can portend ominousness—or omniscience—depending on man's will and the way he goes about expressing it. No longer can our lives and our visions be confined to a "Main Street, U.S.A.," a Chippewa Falls, Wis., or even a Washington, D.C. In this thrashing and turbulent world, it became quite obvious that we could no longer adequately protect our own security from within our own boundaries alone, and, indeed, obvious that our security interests themselves were no longer a matter of our own shorelines. Thus, in a shrinking world, but a world with expanding problems, the United States formulated the mutual security program to mark step with the changing times.

Now, Mr. President, there are those who said in the beginning—and there are those who are still saying—that we can't really afford the mutual security program, that it is a cool invitation to national bankruptcy and a sure move to economic disaster. Assuredly, the program does have an effect on our domestic economy; but it does not have the dire impact some people think. As a matter of fact, the expenditures made under the program are less than 1 percent of our gross national product and about 5 percent of our total Federal budget expenditures. And some five to six hundred thousand workers are employed in the United States as a result of foreign aid expenditures.

I do not wish to be construed as belittling the amount spent on this program, however. Every nickel counts, and when the administration witnesses appeared before the Committee on Foreign Relations to justify the program, I sharply questioned where that nickel goes. Well, of the total military aid moneys spent, 90 percent of them are initially spent in the United States. Moreover, an outside factor, one not directly related to our military aid contributions, but generated by the collective defense efforts we are making with our free world partners, is the purchase in this country of spare parts and other military equipment by our allies. That this is no small item is indicated by the fact that purchases of equipment, supplies and services by European NATO countries under the authority of military sales provisions of the Mutual Security Act were $237.5 million in fiscal year 1958 and $310.9 million in fiscal year 1959. And those totals, it might be added, do not include purchases by those countries which were made direct from U.S. commercial sources.

Speaking of our European NATO allies, there has been a trend toward significant increases in their own defense spending. In 1953 we were paying about 28 percent of their total defense costs; today, the figure is down to about 8 percent. That is a healthy trend, and one certainly to be encouraged.

Another factor to be remembered in appraising the militairy aid program is that the amount spent in this way makes it possible for us to spend less on defense here at home. I will not belabor the point—a point which has been made on the floor of the Senate many times before—but, through this program, we can often achieve far more in the way of defense when we contribute to the maintenance of allied countries' troops than if we were to have to station our own soldiers abroad.

The bill before the Senate does not, of course, deal this year with an authorization for military assistance. That category of aid, though, is the largest single component in the total program. I, therefore, felt it might be appropriate at this time to bring out certain facts as the Senate will soon be passing on the amount and the American taxpayer is going to be footing the bill.

It seems to me, too, that we all might do with a reminder that this program was designed to meet a mounting Communist military threat to the free world. That threat has not subsided one iota, even though the Communist overlords would like to entice us into thinking so, by relatively meaningless troop reductions and by twirls of peaceful coexistence banners. While the original threat had its origin in Moscow, and that threat still steams ahead, I would caution my colleagues that a newer and perhaps more deadlier threat may well lie ahead in the mammoth protrusions of a surging Red Chinese regime.

Nor should we lose sight of the Communist economic threat. Not only is the growing economic prowess of the Soviet Union and Communist China a threat in terms of their inner growth potential, but the Sino-Soviet bloc also has touring aid programs, which need not be feared were it not for the fact of the accompaniment by technicians highly indoctrinated in Communist ideology and skilled in takeover tactics. That the Sino-Soviet bloc feels that its aid programs to underdeveloped areas offers promise can be noted by the fact of their steady increase. During 1959 the bloc extended some $921 million in credits and grants, almost entirely in the economic realm.

It is not by reason of Communist activities in the aid field, however, that our economic aid programs derive their validity. It is strictly in our own national interests to assist the underdeveloped nations of the world make some meaningful economic strides.

Our economic aid helps create conditions in which economic viability can emerge and political freedom progress.

We would also do well to think of the economic program in terms of our own economy. Underdeveloped countries cannot buy much from the United States. They cannot afford to. It logically can be expected, though, that with improved economic conditions, they will become better customers for our products, which means more exports, more jobs for Americans.

In this connection, I might say that the economic aid money is not being shipped abroad in barrels, as some of the opponents of this program would have us believe. As a matter of fact, half of the dollars we spend on economic aid are spent, in the first instance, in the United States. And, of course, as in the case of military aid, there are many indirect expenditures here which stem from our economic contributions to other countries. And much effort is being made in this area toward a welcome shift toward loans from grants.

Mr. President, I am a supporter of the mutual security program, because I believe it is in the interests of the American people. Not all of the projects undertaken under the program have been glorious successes; there have obviously been failures which always make good copy and attractive headlines, despite the fact that they may have been small failures. I do not wish to minimize the mistakes which have been made, Mr. President, nor to say that it is all right to continue making the same ones over and over. I do say that the most important thing is that there is not an unreasonable amount of them and that those which have been made are not repeated. Improvements are being made every day, quietly but assuredly.

One fitting comparison of this program might be made by stacking it up with an American's venture into the stock market. There he is investing in America's future. Here, under the aid program, we are investing in America's future and in the future of the free world. Some of our investments may not pan out. Others may be spectacular. Still others may take a while to materialize. And mistakes, both in judgment and management, may occur. But if the investments are not made, there will not be any opportunity for growth. If we

are careful—and I think we are—in making our investments in the mutual security program, those showing reasonably good prospects for success, over the long run, Mr. President, I think our efforts will succeed.

CONSTITUTIONAL GOVERNMENT

Mr. THURMOND. Mr. President, on Thursday, April 28, 1960, the very distinguished and scholarly constitutional lawyer, the Honorable Charles J. Bloch, of Macon, Ga., made a very able and outstanding address before the Richland County Bar Association in Columbia, S.C. This great American has won much admiration and respect throughout this country as an authority on constitutional law and the rights of the States. In 1958 his excellent book entitled "States Rights—The Law of the Land," was published, which I feel should be read by every American. Members of Congress, particularly those on the Judiciary Committees of both Houses, are especially well acquainted with Mr. Bloch, because of the most favorable impressions he has left with them in eloquently arguing time and again before the Judiciary Committees in behalf of adherence to the Constitution, the rights of the States, and the importance of preserving local self-government and individual liberty in America.

I ask unanimous consent, Mr. President, that the text of Mr. Bloch's address, which appeared in the May 1 issue of the State, Columbia, S.C., be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

TEXT OF BLOCH'S SPEECH BEFORE BAR ASSOCIATION

One hundred years ago this month a debate raged on the floor of the Senate of the United States.

There was pending a bill for a Federal appropriation to support public schools in the District of Columbia. Senator Henry Wilson, of Massachusetts, proposed an amendment to it providing funds for the education of Negroes.

Senator Jefferson Davis, of Mississippi, characterized the amendment as "but one of many evidences which daily events bring to us of the hastening of that period when our brethren shall no longer stand united as the descendants of our ancestry, and the maintainers of our Government. This pseudo-philanthropy is an excrescence upon the American mind, sprung from a foreign germ, inoculated here to the destruction of the healthy growth of our political tree."

The year before, that germ, conceived in foreign lands, nurtured in New England, produced the raid of John Brown, of Kansas, intended to liberate slaves by force. Leaving "bloody Kansas," John Brown and his followers invaded Virginia, to be met and subdued at Harpers Ferry by U.S. Marines, with Col. Robert E. Lee, 2d U.S. Cavalry, in command.

Tried for treason, John Brown was convicted and hanged December 2, 1859.

SOLDIERS SANG

When Union soldiers marched into Virginia a few years later they sang:

"John Brown's body lies a-moldering in the grave, but his soul goes marching on."

That, though, was then still in the future.

Shortly after that April 1860, debate on the floor of the U.S. Senate, the conventions of the Republican and Democratic Parties assembled.

William H. Seward, of New York, former Governor of New York, was the leading candidate for the Republican nomination. But Abraham Lincoln defeated him. Lincoln was pledged against every principle held dear by the States of the South.

When Lincoln was elected in November over his Democratic opponents, South Carolina, on December 20, 1860, seceded from the Union, followed by Mississippi, Florida, Alabama, Georgia, Louisiana, and Texas.

They formed the provisional government of the Confederate States of America and on February 9, 1861, at Montgomery, Ala., chose Jefferson Davis, President.

State troops seized U.S. forts and arsenals throughout the South.

For 40 days ensuing from his inauguration until April 14, 1861, Lincoln wavered between abandoning Fort Sumter, in Charleston Harbor, and seeking to reprovision it.

Finally, he chose the latter course.

SOUTH CAROLINA LED ASSAULT

When he did, South Carolinians led the assault upon it. On April 14, 1861, Fort Sumter fell. The next day, Lincoln called for 75,000 volunteers. And 2 days later, Virginia joined the band of brothers followed shortly by Arkansas and North Carolina. Tennessee entered into a military league with the Confederacy. Under the protection of Confederate troops, Missouri's Legislature adopted a resolution of secession.

Those 11 States elected Jefferson Davis permanent President of the Confederate States of America, October 16, 1861.

He was inaugurated in Richmond on Washington's birthday, 1862. In the meantime, General Lee had resigned from the U.S. Army. He became the peerless leader of the soldiers of the Confederacy—your honored sires and mine.

After struggling for 4 years, Lee surrendered what remained of his troops.

I have read and studied much history.

The bravest people of whom I have ever read, or ever heard, were the southern women and men of the Confederate States of America. They were valiant, they could and did face hardship after hardship, far, far greater than the closing of public schools, hour after hour, day after day, month after month, year after year.

HAD COURAGE

They had the courage and the fortitude to endure hardships because they knew they were right. They knew, as we know now, that only through adherence to the Constitution of the United States could this Nation hope to survive.

They did not fight, bleed, and die, they did not pauperize themselves and their children to save the institution of slavery.

They knew that if the States of the North could violate the solemn provisions of the Constitution of the United States forbidding the taking of private property without due process of law, that the Constitution was a mere scrap of paper. They knew that if the compact or contract entered into by their forefathers could be by might cast away in one respect, greater might could cast it away in all respects.

They knew, therefore, that the Union could not survive if, in any or all respects, might was to be the master of right.

The men of the South fought for that principle even though it meant the utter devastation of the land they loved.

For 4 long years they fought.

When the tide turned at Gettysburg, when Vicksburg fell, when Sherman burned Atlanta, when he marched through Georgia to the sea, burning and destroying, and pillaging; when he turned from Georgia into South Carolina, and continued his burning and pillaging, then and only then did our beloved General Lee surrender to Sherman—Lee on April 9, 1865, and Johnston just 95 years ago—April 26, 1865, at Durham Station, N.C.

NO MARSHALL PLAN

Repeating what I said on the floor of the Democratic National Convention in Philadelphia 12 years ago—there was no Marshall plan for us of the South. The Humphreys and the Kennedys and the Douglases and the Javitses and the Paul Butlers of that day seized upon the assassination of President Lincoln as an excuse for tyranny which has never been known in our subjugation of a foreign nation.

There was no treaty of peace.

There were the three war amendments to the Constitution supposedly adopted in the period between 1865 and 1870.

Loudly had Lincoln proclaimed in 1861 that no State had a right to secede from the Union.

Just as loudly did the Reconstruction Republicans of the tragic area of 1865–70 proclaim that the States of the South could not be readmitted to the Union until they had ratified those war amendments.

The law of the land in 1865–70 seemed to to be: You can not leave the Union; you have never legally left it; but we will not let you back in the Union until you have ratified these amendments because without you we have not sufficient States to ratify them and thus make them a part of the Constitution.

So, these war amendments became a part of the Constitution—the 13th, 14th, and 15th.

FIFTEENTH AMENDMENT

The 15th provided that no State should deny or abridge the right of any one to vote on account of his race, color, or previous condition of servitude. But it did not provide that a State must permit whites and Negroes to cast their vote in the same boxes, side by side.

The 14th provided for equal protection of the laws for all people. Even that 14th was not strong enough to compel States to permit women to vote. It took a separate amendment for that, enacted a half century later.

The 13th abolished slavery.

Ratified December 18, 1865, 8 months after Appomattox, it provides:

"Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction."

Ironically, that amendment, first proposed in the Congress in the very week of the surrender at Appomattox, recognized one of the very principles for which the South had fought—the principle of indestructible States having formed a more perfect Union.

Does that amendment treat the United States as singular and say "its jurisdiction"? It does not. It says "within the United States, or any place subject to their jurisdiction."

CASES CAME

Year after year cases came before the Supreme Court of the United States involving those amendments—particularly the 14th. Year after year the principles of constitutional government were read into them by practically unanimous courts composed of judges such as Chief Justices Fuller, White, and Taft, and Associate Justices Field, Brown, Peckham, Holmes, Cardozo, and Brandeis.

"No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws."

Those were and are the words of the 14th amendment.

The spirit breathed into those words, which became the living law of the land declared by judges who knew not Myrdal, proclaimed that a State did not violate the Constitution and did not deny to any person within its jurisdiction the equal protection of the laws when it furnished equal facilities to all, whether those facilities were steamboat cabins or railroad cars, or schools or colleges. Not many people in those days were playing golf or going to the seashore, so neither Blackstone nor Myrdal had yet invaded the bathing beach or the golf course.

LONE DISSENTER

Solemnly did a Justice—the very Justice who had been the lone dissenter in *Plessy* v. *Ferguson*, the first case expounding the separate but equal doctrine—say some 10 years later:

"While this Court should guard with firmness every right appertaining to life, liberty, or property as secured to the individual by the supreme law of the land, it is of the last importance that it should not invade the domain of local authority except when it is plainly necessary to enforce that law. The safety and health of the people of Massachusetts are, in the first instance, for that Commonwealth to guard and protect. They are matters that do not ordinarily concern the National Government. So far as they can be reached by any government, they depend, primarily, upon such action as the State in its wisdom may take."

Those are the words of Justice John Marshall Harlan, uttered February 20, 1905 (197 U.S. at p. 38).

In those words are embraced the essence of the doctrine of States rights in the defense of which your grandfather may have died at Gettysburg 40 years before.

Justice Oliver Wendell Holmes of Massachusetts had been a captain in a Massachusetts regiment in the War Between the States. Fifty years later, as an Associate Justice of the Supreme Court of the United States, he wrote:

"And yet again the extent to which legislation may modify and restrict the use of property consistently with the Constitution is not a question for pure abstract theory alone. Tradition and the habits of the community count for more than logic."

SUCCINCT STATEMENT

Those words are a succinct statement of the principle of States rights for the perpetuation of which your grandfather may have faced the rifles of Captain Holmes' soldiers of Massachusetts at Balls Bluff in Maryland in the early days of the war.

Justice Holmes on February 21, 1910 (216 U.S. at p. 366) in his maturity, saw the light, and expressed the principle which had been buried for him by the propaganda of the abolitionists a half century before.

The words which Justice Holmes wrote for himself, and those giants of the law who were his colleagues on the Bench of the Supreme Court of the United States 50 years ago, were translated into a principle of constitutional law succinctly stated:

"Tradition and habits of the community count for more than logic in determining constitutionality of laws enacted for the public welfare under the police power."

Those principles of constitutional government illustrated by the utterances of Harlan and Holmes, followed by Taft, and Brandeis and their associates, were the promise of the Federal Government to the States which created it, which then composed it.

As the States of the South emerged from the ravages of war, as step by step they and the magnificent men and women who formed them laboriously climbed the steps from the abyss into which war and its might, reconstruction and the illegality which created it, had plunged them, these words were the beacon light which they considered to mark the safety of their harbor.

HABITS, TRADITION

We know your habits and traditions, this Court composed of lawyers and judges, had said to them. The safety and health of your communities are yours to guard and protect, the highest Court said.

We relied on those solemn statements—we relied on the word of the Federal Government, and, as we recovered, spent our money, raised from taxing our people and our property, in building magnificent public schools and colleges and universities—separate but equal.

Recently, an Associate Justice of the Supreme Court has said: "Great nations, like great men, should keep their word."

That very same Justice was one of those who has repeatedly joined in the breaking of the promises made by the Courts of former days to the people of the South.

"Great nations, like great men, should keep their word," said Associate Justice Hugo Black in *Federal Power Commission* v. *Tuscarora Indian Nation* (80 S. Ct. 543, 567), on March 7, 1960.

They should.

All that we ask is that the United States of America keep their word as expressed to us by Chief Justices Taft and Fuller and their colleagues.

VIOLATED PLEDGE

They departed from their pledged word in *Brown* v. *Topeka*, on May 17, 1954, and the cases which followed it.

They departed from their pledged word, and the reason for their departure has never been better expressed than Jefferson Davis expressed it on the floor of the U.S. Senate 94 years before, on a day when Gettysburg, Vicksburg, Sharpsburg, Manassas, Fredericksburg, Stone River, and Murfreesboro were only places on maps; on a day months before those names were enshrined in our hearts as battlefields upon which men were proud to die fighting for principles—men whom a hundred years later we remember—principles which still endure.

I repeat today what Mr. Davis said on April 12, 1860:

"This pseudo-philanthropy is an excrescence upon the American mind, sprung from a foreign germ, inoculated here to the destruction of the healthy growth of our political tree."

But, we cannot live in the past.

Certainly the war of 1861–65 will not be repeated.

The problem remains.

For all that the War Between the States proved was that, after 4 years the States of the North were strong enough to force the Southern States back into the Union.

There still remains for solution for us of the South—and of the North and East and West, the problem.

HOW TO EXCISE IT

How shall this excrescence upon the American mind, sprung from a foreign germ, be excised so that we of America may continue to grow and prosper, and not succumb to those who are spreading the germs of discontent and disunion in order that they may divide us, and conquer us?

That is the problem to which all good men, men of all sections, are beginning to address themselves.

The good men are separating themselves from the latter day John Browns who would destroy constitutional government to satisfy personal ambitions.

Good men of all sections are becoming more and more aware of the problem, and its origin, its purpose, its implications, its danger.

John Brown's soul does go marching on—probably burning on—as a warning of what hypocritical fanaticism can bring to a people.

Recently during the debate over the so-called Civil Rights Act of 1960 (H.R. 8601), that great southerner and Senator, JAMES O. EASTLAND, of Mississippi, was speaking. (CONGRESSIONAL RECORD, Apr. 6, 1960, p. 7439). There occurred a dialog between Senator EASTLAND and Senator KEATING, of New York, who though labeled "Republican," is one of those liberals who make it very difficult for us to distinguish between the Democrats and Republicans of other sections.

This was the colloquy:

"Mr. KEATING. I did not hear the last statement of the Senator.

"Mr. EASTLAND. The Senator can sit closer to me, and get a good education.

"Mr. KEATING. I should be glad to come closer.

"Mr. EASTLAND. Come over closer. It will be worth a year's instruction on constitutional law."

COME CLOSER

If the so-called liberals would just all come over closer and listen to the southern Senators and learn what the Constitution of the United States really meant in 1789 and means now, there would be greater hope for the restoration of constitutional government in these United States.

Recently, too, the remark was made in the presence of a very well educated person: "The United States now have a new flag." The educated person said: "Don't you mean to say: 'The United States now has a new flag?'" The retort was: "I meant just what I said."

And it occurred to us that that little exchange illustrated the ignorance of so many people, even some in the judicial, executive, and legislative branches of our Government, as to our constitutional form of government.

"The United States has," or

"The United States have."

Therein lies the fundamental difference in the concepts of federal government.

If "the United States has," then all power may constitutionally be concentrated in Washington bureaucracies. But if "the United States have," then the States of the Union still have the power to regulate their own internal affairs which they retained in 1789, and which retention was confirmed and affirmed by the adoption of the Bill of Rights contained in the 9th and 10th amendments in 1791, and in the war amendments as construed by the Supreme Court prior to 1950.

PROVES IT

The Constitution, by its very verbiage, proves time and time again that the phrase "United States" is plural, not singular.

The judicial power of the United States extends to all cases in law and equity arising under the Constitution, the laws of the United States, and "treaties made, or which should be made, under their authority * * *" article III, section 3.

Note well that the word is "their," not "its."

Does treason against the United States consist in levying war against "it," or in adhering to "its" enemies?

It does not.

"Treason against the United States shall consist only in levying war against 'them,' or in adhering to 'their' enemies, giving them aid and comfort." Constitution of the United States, article III, section 3.

Another illustration: No person holding any office of profit or trust under the United States shall, without the consent of the Congress, accept certain presents from foreign nations.

How is that expressed in the Constitution? Article I, section 9, paragraph 8, thereof provides:

"No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under 'them' shall, without the consent of Congress, accept any present, emolument, office or title of any kind whatever from any king, prince or foreign state."

PERFECT UNION

They, the Thirteen Original States, formed a "more perfect union," "more perfect" than that which had existed under the Articles of Confederation.

They, in that contract or compact between them, known as the "Constitution for the United States of America" (its preamble), provided how other States might become parties to that contract of partnership. In article IV, section 3, they agreed: "New States may be admitted by the Congress into 'this Union.'"

The Constitution not only looks to an indestructible union of indestructible States (*Texas* v. *White*, 7 Wall. 700, 725) but to a union of equal States as well. So, even as to a State, not one of the original 13, Congress, in admitting such State, may not impose conditions relating wholly to matters under State control.

As demonstrating the nature of this Union, Congress cannot deprive a new State of its essential power to locate its own seat of government, its own capital, and to change it as it sees fit. *Coyl* v. *Smith* (221 U.S. 559).

Perhaps we of the South should send out teaching missionaries. Senators JAVITS and KEATING have set the example. They came to Georgia after their election to carry out campaign promises. Perhaps we should send instructors to teach what is the nature of this Union which we of the South seek to preserve as a constitutional, indestructible union of indestructible States.

JUSTICE CHASE

Three years after Appomattox, Chief Justice Salmon Portland Chase, he who presided at the impeachment trial of President Andrew Johnson, joined by Justices Nelson and Clifford, Davis and Field, not a southerner among them, said:

"The preservation of the States, and the maintenance of their governments, are as much within the design and care of the Constitution as the preservation of the Union and the maintenance of the National Government" (7 Howard at p. 725).

Is that solemn declaration of the law of the land now to be ignored and swept aside?

Is that landmark of the law, that commandment as to the form and nature of our constitutional republic, to be nullified in order that certain officials may be elected to office by those who have no respect for our form of government, and scoff and ridicule those of us who have?

Let us teach them: "The people of each State compose a State, having its own government, and endowed with all the functions essential to separate and independent existences. The States disunited might continue to exist. Without the States in union there could be no such political body as the United States" (7 Howard at p. 76).

Let us teach them that doctrine of constitutional law and government is not merely a southern view. That fundamental doctrine of the law of this Union was pronounced by a Chief Justice, native of Ohio, concurred in by another Justice from Ohio, and others from New York, Pennsylvania, Maine, Iowa, Illinois, and California.

Let us teach them that doctrine shall not and will not be subverted by those who, for one reason or another, wish to exchange the form of government under which we live.

And thus may through the lawyers of the South, the excrescence upon the American mind, sprung from a foreign germ, be excised from the life of America.

OWN PEOPLE, TOO

We need to teach our own people, too.

It is your duty and mine, to be performed from now on, to prevent the election of any one to any office from coroner and councilman to President who does not adhere to the principles we espouse.

Every day—particularly election day—should be Memorial Day.

It is your duty and mine, day by day, to teach our people that today we face a crisis as grave as that our forefathers faced 100 years ago.

This time it is not only the Thaddeus Stevenses, the Republicans, who rail against us on the floors of the Congress.

The modern day Thad Stevenses who would incite the modern day John Browns—not to do violence but to sit and engage in so-called prayer—are of both parties—Douglas and Javits—Hennings and Keating—Humphreys, Symington, Kennedy, Nixon, and Rockefeller.

This time they attempt to subjugate us by ballots rather than bullets.

We can prevent that subjugation only by a realization of its danger—that the peril which faces us is not merely of the taking over of our public schools. The peril goes far beyond that. The aim of the latter day John Browns is to supplant the southern white people as political leaders—from the lowliest office to the highest.

That is what they had in mind with their Federal registrars bill. That is what they still have in mind.

After realization must come organization—a concert of action between southern individuals, Southern States.

Leagues of white voters, pledged to vote at every election for the candidates of their choice and in opposition to those who seek control through organized minorities, must be created.

Our problem is local.

But the State has its problem, too. So have all of the States of the South. Eight of them hold the balance of power if they will but organize and use their power.

As each day dawns and becomes a Memorial Day upon which we rededicate ourselves to the principles for which men and women died a 100 years ago, we should recite with our prayers the words of the English poet:

"Lord God of Hosts,
Be with us yet,
Lest we forget."

REPORT OF COMPTROLLER GENERAL ON EXAMINATION OF ADDITIONAL FEES PAID BY THE GOVERNMENT FOR CONTRACTOR FINANCING EXPENSES UNDER DEPARTMENT OF DEFENSE CONTRACTS

Mr. BYRD of Virginia. Mr. President, as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures, I am today in receipt of a report by the Comptroller General of the United States, dated April 29, 1960, on his examination of "additional fees paid by the Government for contractor financing expenses under Department of Defense contracts."

I ask unanimous consent that a statement by me commenting on this report be published in the body of the RECORD as a part of these remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BYRD OF VIRGINIA

The Department of Defense is paying millions of dollars in "additional fees" to cost-plus-fee contractors for which the Comptroller General of the United States finds the Government is receiving "no significant benefit."

Such wasteful public spending in any area is serious; but these nonessential Federal expenditures are largely in the vital area of military missile and aircraft production. They represent fiscal irresponsibility at the core. They should be stopped.

It is impossible to obtain complete information on the subject. Much of it is hidden beyond practical audit. Army auditors say the information will become less ascertainable in the future. The Navy, as a matter of policy, does not identify the elements used in determining the total fee paid under these contracts.

But the Comptroller General has found up to $17.6 million in nonessential fees in 26 recently examined Air Force contracts. The three military departments have entered into hundreds of these cost-plus-fee contracts, and the number is increasing. They involve billions of dollars; and there is reason to believe if this policy is continued these nonessential fees will run to hundreds of millions.

These nonessential fees are being paid under a gimmick born 3 years ago in subterfuge. It should not be conceded that reason for them ever existed. The gimmick was devised to provide temporary relief from expenditure pressure resulting from Department of Defense obligations.

If any relief was afforded, it was of a temporary, one-shot nature which vanished upon delivery of end items under the contracts involved. At this late date, not even fictitious reason exists for continuation of the unsound practice involved, which in the past 3 years has been written into military expenditure doctrine.

Under cost-plus-fee contracts the Government reimburses contractors for their costs as the work progresses. The fee is added as a profit. Prior to November 1, 1957, these contractors were reimbursed for 100 percent of costs while the job was being done.

In 1957 the Air Force found itself $2 billion over the Department of Defense expenditure limit, while the whole Government was scraping the statutory debt ceiling. The present wasteful practice under cost-plus-fee contracts was originated as an expedient temporarily to defer cash expenditures.

The Government held up 20 percent of its payments for current costs until delivery of the end items under these cost-reimbursement contracts. The contractor was required temporarily to finance this so-called 20-percent withholding pending delivery when he was reimbursed in full. This requirement is still imposed.

But under this arrangement the contractor is given additional fee, or profit, to compensate him for the financing service he renders the Government. This payment is in the form of additional fee, instead of cost, to evade the armed services procurement regulation which prohibits interest as an item of cost under cost-plus-fee contracts.

This additional fee is negotiated on the basis of an estimate in advance, by the contractor, including interest and charges allowable to him in connection with services to be rendered in temporarily financing 20 percent of the cost of his own performance on the contract.

In one case, involving Boeing Airplane Co., the Comptroller General found that the Government paid the withheld 20 percent upon delivery, plus more than $1.1 million in the additional fee. This amounted to 25 percent a year for the use of the money.

There is no provision for recovery in the event an overestimate is negotiated for purposes of the additional fee, and to the extent that overestimates are negotiated, aspects of windfall appear.

The Comptroller General's report does not fix the blame for this wasteful practice on the contractors. In a separate report, in more detail, on contracts with the Northrop

Corp., its president, Whitley C. Collins, is quoted as saying:

"No contractor engaged in defense business has any choice but to follow policy directives and procurement regulations issued by the Department of Defense. None of us in industry are in a position to question the circumstances or exigencies which motivated the issuance of this particular directive, nor are we accountable for the effects of its application to defense contracting."

Former Assistant Secretary of Defense (Comptroller) W. J. McNeil said the contractor-financing practice "provides the contractor an incentive to reduce its costs and the funds needed to finance the costs of contract performance." But the Comptroller General's examination of activities under 26 contracts revealed:

"In contrast to the theoretical benefits claimed for the practice, our review has disclosed that the practice results in substantial additional costs to the Government without evidence of any offsetting benefits."

The president of the Northrop Corp. was quoted as saying it is improbable that the practice has accomplished measurable cost saving under contracts with the company.

Cost-plus-fee contracts at their best are bad. If, under limited conditions they are necessary, the number should be held to a minimum. In the absence of emergency, cash should be available for current working costs.

If borrowing is absolutely necessary, the Comptroller General finds that for the 26 contracts examined, the Government could have financed short-term loans for half the total cost of the so-called additional fees which are being paid under these contracts.

This practice of paying cost-plus-fee contractors additional fees for temporarily financing 20 percent of the cost of their own performance was conceived in irresponsibility, and it is being pursued in wastefulness. It should be stopped immediately.

This statement is based on information contained in two reports by the Comptroller General of the United States, the Honorable Joseph Campbell.

The latest report, dated April 29, 1960, covered his examination of "additional fees paid by the Government for contractor financing expenses under Department of Defense contracts."

The other report, dated January 29, 1960, covered the Comptroller General's examination of "the negotiation of additional fees for contractor financing expenses under Department of the Air Force contracts—with Northrop Corp., Hawthorne, Calif."

AWARD TO FREMONT, NEBR., FOR ITS "DECLARATION OF INDEPENDENCE FROM FEDERAL DEPENDENCE"

Mr. CURTIS. Mr. President, on April 12, 1960, the citizens of the city of Fremont, Nebr., and the Fremont Chamber of Commerce were honored by receiving an award by the Freedom's Foundation of Valley Forge for the chamber's "declaration of independence from Federal dependence." With the U.S. Chamber of Commerce holding its annual meeting here at this time it seems fitting that the honor which has been bestowed on this group be called to the attention of the Members of Congress. The chamber's "declaration of independence from Federal dependence" was made a part of the proceedings of the Congress some months ago.

Mr. E. A. Jaksha, the prime originator of the "declaration," has made a number of talks throughout the State of Nebraska on this subject. One such address was so widely accepted that American Mercury magazine asked for, and received, permission to publish his comments. The article is entitled "What's Going on Here?"

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHAT'S GOING ON HERE?

(By E. A. Jaksha)

I am a dues paying member of an exclusive, but very expensive, club. It is the oldest club of its kind in existence today. I am proud to be a member. I am hopeful that my club will remain a source of pride for my children, too.

This club was organized by some of my ancestors about 180 years ago. They originally belonged to another club, but the board of directors and the chairman of the board did not give the dues-paying members much say about running the club. As a result, these people had a tea party, as well as a couple of other meetings, and they decided to set up their own organization—that's the one I belong to now.

We have branches all over the country, with offices in city halls, county courthouses, State capitols and in Washington. We used to do most of our business with our local branches, since they were staffed with local people who understood our needs and knew how much dues we could pay. Lately, it appears that more and more of this staff have moved, and more of our dues are needed at the head office. Of course, we can get some of the dues back, that is, when we get permission from the the boys at the head office, and follow their rules and regulations. Some of the local branches have changed their bylaws to get permission to use some of the dues they originally paid in.

Sometimes, I get the feeling that the boys at the head office are engaged in a program of redistribution of wealth. At times their actions remind me of the writings of a fellow by the name of Karl Marx, who preached on a political philosophy, which says, "From each according to his ability, to each according to his need."

In the club I belong to now all dues payers pay the the same dues. The boys at the head office have got it figured out that some of us are more able to pay than others. There is also a kind of benefit system called "federal aid" run by several departments, to help divide up the dues among those who are not able to get everything they want today. This bothers me, and some of the other dues-paying members. We dues payers are the sole support of this club and we used to think we ran it, but things seem to be changing.

I have a credit card. On it is the treasurer's signature. It was issued in 1939. In the middle there is a picture of one of the club founders—a fellow by the name of Washington. When I first got it, it would cover the cost of a fair evening meal. Something has happened, however; now it hardly covers the cost of breakfast. The way things are going, it soon won't cover the cost of a coffee break.

What's going on in these United States? Our American dollar used to be solid as a rock; a respected symbol of economic stability and security throughout the world.

While my dues are high and the club is in debt, this credit card—this dollar bill—seems to be shrinking in value continually. When it was printed in 1939, it was worth $1. It will purchase less than 50 cents worth of beans, or shoes, or concrete for highways today. The popular term for this eating away process is "inflation." There are some popular theorists who contend that a "little" inflation—2 to 3 percent a year—is good, it helps keep the club prosperous. If that is the case, then we have been so prosperous for the past few years, that we ought to have paid a little on the debt we owe at the head office, as well as some at the branch offices.

Some years ago a popular public figure was quoted as saying, "What this country needs is a good 5-cent cigar." I respectfully suggest that what this country really needs today is, a good 5-cent nickel.

It is time to get off our dead complacencies and get deadly serious. Let's ask ourselves, "What's Going On Here?"

Here are some of the facts:

The dollar printed in 1939 is worth only 48 cents today.

The dollar printed in 1948 is worth only 83 cents today.

Since 1939 the annual rate of loss in the value of the dollar has averaged 4 percent a year. Hot dogs today are more expensive than round steak in 1945. The price of bread has doubled. Hamburger has gone up 90 percent.

In 1885 the U.S. public debt was being paid off at the rate of $100,000 a day, and for 20 years during that period U.S. public debt was being paid off at the rate of $100 million per year.

Today the total public debt exceeds $334 billion, with no reduction in sight. This in a time when wages are high and employment is at a high level. To keep owing this huge amount, we must pay service charges—interest equal to about $46 a year for every man, woman, and child in the land. In fiscal 1958 taxes paid to all levels of Government amounted to about $568 for every person in the country.

Of all persons in the United States who receive an income, one-third receive all or part of their income directly from the Government. In addition, there are about 8 million others who receive their income indirectly from the Government, as employees of businesses dependent upon Government orders.

The number of laws in this so-called free country is incredible. Four years ago it was estimated that there were over 2 million of them, and this is a count only of formal laws. In addition, there are directives, decisions, and orders promulgated by the executive, legislative, and judicial departments, as well as the rules and regulations required and enforced by various departments and bureaus in carrying out their delegated functions.

To insure that everyone is getting his fair share of freedom, as well as paying his fair share of dues, and receiving his fair share of control, we are provided with several hundred thousand Government employees who watch, check, record, inspect, investigate, and supervise us. The number of Government workers of all types has more than tripled in the last 30 years, the Commerce Department has reported. Expansion of Government payrolls has far outpaced private employment.

About 15 percent of all jobholders work for Federal, State, or local governments, the Department said. In 1929 the proportion was about 7 percent.

Government payrolls have soared from a total of $3,184,000 in 1929 to $9,918,000 in 1957, the most recent year for which complete data is available.

Many things threaten our national security, our economic stability, and our individual freedoms. The present trend in political philosophy and fiscal policy will ultimately destroy our free institutions and leave this idea referred to as the "American way of life" as just another passage in recorded history if we do not take concerted action now.

Let's think about some of the things that are going on here:

Let's consider inflation and its threat to our national security and economic stability. President Eisenhower is quoted in a National Security Council conference as saying, "When are you going to learn that national security and a sound economy are the same thing?"

Senator HARRY BYRD, Democratic Senator from Virginia since 1933, says, "Everybody knows now that America is menaced in the years ahead with an inflation that could wipe out savings and impoverish millions who are living on fixed incomes. We must never forget that so long as this cold war continues, we have to sustain two fronts. First, we must remain economically strong. At the same time, we must be militarily invulnerable." He also says, "The most important step we must take, if we wish to halt inflation, is to balance the Federal budget and assure our people that it will stay balanced. The menace of a disastrous inflation is real. All the pressure groups and special interests that campaign for more and more Federal spending are helping to bring it on and are thereby doing a grave disservice in the long run to their own people."

Maurice H. Stans, Director, Bureau of the Budget, makes these statements: "I must pass on to you a solemn warning. Unless we as a government insist right now upon living within our income, we face certain hard inevitabilities: whether there will be more tax increases, piled on top of our already heavy tax load; or there will be a mounting national debt and growing inflation with disastrous rises in the cost of living and a dangerous weakening of our national strength. Inflation feeds on the delusion that the Federal Treasury is a free-flowing well, that money from Washington doesn't cost anyone a cent. It is this something-for-nothing delusion that allows special interest groups to smooth-talk the public into believing that all their Federal spending proposals are possible. Federal expenditures have multiplied 25 times in the last 30 years, and half of that is due to inflation. How much more taxation can the people take? We must curb spending now."

The fiscal policy of the Government at all levels permits a continually rising debt. Even in very recent history, in large and respected governments, bread has been purchased with baskets of paper money, and personal savings have been wiped out almost overnight. Even today in our own country, State governments are faced with insolvency and the U.S. Treasury has difficulty in financing.

What justice is there; what equality before the law is there in our present fiscal policy with its system of enormous unpaid debt, high taxes, and other levies upon the citizens who are the very source of revenue? What is going on here?

The prevalent political philosophy, with its trend toward the welfare state and socialism, is a matter of serious concern. As a matter of fact, we may already be deeply involved in socialism. In the past generation, we have had repeated warnings and heard expression of fear over socialism and the possible infiltration of communism. The voters of this country have repeatedly turned thumbs down when asked to endorse the Socialist ticket at the polls. Yet, by default during this same period, there have been proposed and placed into effect state-planned, state-administered, and state-enforced policies entirely in accord with Socialist theory, for which we all pay without choice. These programs and policies begin to move in practice closely toward the Marxist line of "From each according to his ability, to each according to his need."

Supporters of such programs will deny socialistic tendencies and will be vehement in their denial of communistic ideas. Some of these people are deceitful with their eyes only on 30 pieces of silver. Others are either warped or embittered idealists; and others are probably naive and innocent do-gooders who honestly believe that the almighty state is infallible in its beneficence and that a little control is for the good of all. These people, too, must learn that there cannot be just a little state control. The very programs set up to control bring about the need for more control. These people must learn and remember that the state is made up of free, productive, liberty-loving citizens, and that the state is only a composite of these people. Anything which takes away from, or destroys the individual parts, must inevitably and ultimately destroy the whole.

Should this be going on here?

Federal aid, in its 60 or 70 forms, with its remote controls and seeming low-cost "matching-fund" program, is a misnomer. It is Federal only because of the level of the administering body. The money is not Federal—it is your money, and mine sent to Washington in trust, and returned to us less brokerage fees and freight, plus restrictions with which we must comply. In this booming, prosperous era, it seems a paradox that we need a program of aid. Or—are our States and communities reduced to panhandling, begging for funds from each other because they can no longer foot the bill for wants beyond their ability to pay? Are Federal aid programs designed to meet minority needs, and developed in response to self-centered short-sighted pressure groups? Let's ask these questions when an aid program is proposed.

Is it necessary?

Is it a function of government?

Can we afford it?

Federal aid programs once started never seem to stop. They grow more costly year by year. They contribute to our heavy tax load and to the inflationary debt now on our shoulders. In return for Federal aid favors we must submit to controls, be they laws or directives. Every Federal control added is a local control removed and more freedom taken away.

In 1934, there were 18 aid programs costing $126 million a year. In 1957 there were 57 programs costing over $4 billion, 16 times as much. The 1959 program was somewhat greater; but after all we need more aid now because we are more prosperous now.

Everyone should be aware that an aid program with matching fund requirements, demands matching by the very citizens who supplied the funds being matched. It is a pretty expensive merry-go-round ride.

Federal aid programs have contributed to the fallacious philosophy which says, "If we don't get it, someone else will." Many well-meaning citizens have been deluded by talk to the effect that money coming from Washington is free.

What right have we to jeopardize today for ourselves, and tomorrow for our children? The principles upon which this country was founded, and upon which it grew great, are:

Free people.

Free enterprise,

Limited government.

If we believe in these principles, then we should become an informed and aroused citizenry. Being informed is an elementary duty in a society of free men. We will become knowing and participating and demanding citizens. We know that government and bureaus can give nothing; we know that any power to government or bureau was given either by consent or default. A free society that is passive, inert, and preoccupied with its own diversions and comforts will not last long.

We do not own freedom, we are only trustees for those who have dreamed it, conceived it, fought for it, and worked for it, and we are obliged to keep it whole.

The survival of the idea for which this Nation stands is not divinely guaranteed. It may survive if enough Americans care enough.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 10401) making appropriations for the Department of the Interior and related agencies for the fiscal year ending June 30, 1961, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. KIRWAN, Mr. NORRELL, Mr. CANNON, Mr. JENSEN, and Mr. TABER were appointed managers on the part of the House at the conference.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H.R. 4781) to amend the Watershed Protection and Flood Prevention Act to provide that its loan provisions shall be applicable to certain other projects, and for other purposes, and it was signed by the President pro tempore.

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

MUTUAL SECURITY ACT OF 1960

The ACTING PRESIDENT pro tempore. Without objection, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment lettered "L" submitted by the Senator from Alaska [Mr. GRUENING]. On this question, the yeas and nays have previously been ordered.

Under the unanimous-consent agreement, 5 minutes of additional debate are available to each side on the question of agreeing to the amendment.

Mr. GRUENING. Mr. President, I ask unanimous consent to have considered at this time my amendment identified as "4–28–60—H," instead of my amendment lettered "I."

Mr. JOHNSON of Texas. Mr. President, is this the other amendment to which the Senator from Alaska has referred?

Mr. GRUENING. Yes. I simply wish to reverse the order of their consideration.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

Mr. GRUENING. Mr. President, at this time I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that further proceedings under the call be dispensed with, and that the time consumed under the quorum call we have just had be charged equally against the time on the bill.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. JOHNSON of Texas. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. JOHNSON of Texas. Under the arrangement now in effect, the Senator from Alaska will have the full 5 minutes allotted to him, and the majority leader the other 5 minutes. Is that correct?

The ACTING PRESIDENT pro tempore. If he asks for it.

The clerk will state the amendment which has been proposed by the Senator from Alaska [Mr. GRUENING].

The CHIEF CLERK. It is proposed to amend section 401 by renumbering subsections e, f, g, h, and i as f, g, h, i, and j, respectively, and insert after subsection (d) the following new subsection:

(e) Section 517, which relates to completion of plans and cost estimates, is amended as follows:

"(1) Insert '(a)' immediately after 'SEC. 517.' and following section 517(a) as renumbered, insert the following new subsection:

"'(b) All nonmilitary flood control, reclamation, and other water and related land resource programs or projects proposed for construction under titles I, II, or III (except section 306) of chapter II, under section 400, or under section 451 of this Act, shall be examined by qualified engineers, financed under this Act, in accordance with the general procedures prescribed in Circular A–47 of the Bureau of the Budget, dated December 31, 1952, for flood control, reclamation, and other water and related land resource programs and projects proposed for construction within the continental limits of the United States of America. In all cases the benefits and costs shall be determined, and a copy of the determination shall be submitted to the Speaker of the House of Representatives and the Foreign Relations Committee and the Appropriations Committee of the Senate. No such program or project shall be undertaken on which the benefits do not exceed the costs and which does not otherwise meet the standards and criteria used in determining the feasibility of flood control, reclamation, and other water and related land resource programs and projects proposed for construction within the continental limits of the United States of America as per Circular A–47 of the Bureau of the Budget, dated December 31, 1952.'"

The ACTING PRESIDENT pro tempore. The yeas and nays have not been ordered on this amendment.

Mr. JOHNSON of Texas. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The ACTING PRESIDENT pro tempore. The Senator from Alaska is recognized for 5 minutes.

Mr. GRUENING. Mr. President, this is essentially a very simple amendment.

On December 31, 1952, the Bureau of the Budget issued Budget Circular A–47, establishing standards for judging the worth of projects for conservation, development, or use of water and related land resources. All of us who have, from time to time, had occasion to urge the authorization of such a project are well aware of these standards and of the importance attached to strict adherence to its requirements by the administration and the Congress if approval of a particular project is to be won.

However, heretofore, these standards have been applied only to domestic projects.

They do not even apply to identical projects built abroad with American dollars under the foreign aid program.

The amendment which I am now offering would require the application of the domestic standards to foreign projects for resource development.

A similar amendment was considered by the House Committee on Foreign Affairs, and a provision containing wording identical to that of my proposed amendment is now in the House-passed bill.

Of this provision, the House Committee on Foreign Affairs had this to say:

The committee is convinced that had this requirement been in effect in prior years a number of projects which have not turned out as intended would have been planned on a sounder basis or might not have been started, with a significant saving to the U.S. taxpayer and a perceptible enhancement of U.S. prestige.

Mr. McCLELLAN. Mr. President, will the Senator yield?

The ACTING PRESIDENT pro tempore. Does the Senator from Alaska yield to the Senator from Arkansas?

Mr. GRUENING. I yield.

Mr. McCLELLAN. What the Senator from Alaska is undertaking to do by his amendment is to see that the foreign projects contemplated are constructed under the same rules of economic justification that apply on domestic projects, and give to the respective committees of Congress the same duties and responsibilities with respect to screening and approving them as we do with our own projects in this country. Is that correct?

Mr. GRUENING. That is correct. That is precisely the objective of this amendment. The House has already approved such language. It is in the House bill which the other body has already enacted.

Mr. President, I conclude by saying that I urge the Senate to join with the House in taking the first step toward ending the double standard, a double standard which judges natural resource development projects proposed for construction abroad by different—and lower—criteria than are used in judging similar projects at home.

I trust that those Senators who are in favor of foreign aid and wish to see its administration improved will support this amendment.

I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. The Chair is advised that under the unanimous-consent agreement in effect the Senator from Texas has control of the time if he opposes the amendment. Is a Senator prepared to speak for the Senator from Texas?

Mr. FULBRIGHT. Mr. President, I am prepared to speak against the amendment.

Mr. MANSFIELD. Mr. President, I yield 5 minutes to the Senator from Arkansas.

The ACTING PRESIDENT pro tempore. The Senator from Arkansas is recognized for 5 minutes.

Mr. FULBRIGHT. Mr. President, this amendment is along the lines of a similar amendment the Senator from Alaska submitted last year, and it was voted down last year. He submitted it again this year. The committee voted it down this year. I hope the Senate will not accept it.

The projects abroad are surrounded by circumstances that are different from those which attend our domestic projects. It is quite feasible in my State, or in the State of Louisiana, for example, or in any other State, to calculate very closely the benefits, and allocate one benefit to flood control, one to power, and so on, and also to ascertain the allocation of the part that the local community has to contribute. This very complicated formula is gone through for determining the justification.

As a matter of fact, I am a cosponsor of a bill right now to revise the present formula for allocating benefits. All of the Members of Congress from my State feel the same way. Representative TRIMBLE, of my State, is also a sponsor of such a measure. We think that the formula for flood control now being applied by the Army Engineers is quite in error. The formula takes no account of recreational benefits and other categories of benefits. There is a difference of opinion as to what is the proper formula to apply in arriving at allocation of costs, in order to arrive at power rates, for example, in multipurpose projects. It is a very complicated subject.

I think the only thing that can be fairly said is that there is no pretense that the justification for such projects abroad is the same as for those at home. There is a large element of political necessity in these projects abroad. We go into those countries for reasons quite different from those for which we go into Arkansas, Utah, and Colorado, for example. We try to help underdeveloped countries and we try to administer the programs in accordance with the best budgetary practices; but we cannot administer those programs—and the administration agrees—by following the standard submitted by the Senator from Alaska. The Senator brought this subject up last year by an overall amendment. Now he is taking up, piece by piece, what he offered as a whole last year. The committee believed, unanimously, I think, that it was unworkable.

The objective of efficient administration is a laudable one. We all wish to have better administration. This is not the way to achieve it. We do not believe these restrictions could possibly be applied in a manner which would permit the operation of the program at all.

Furthermore, if we make these people come to Congress to justify every project with the same minute detail required in the United States, it simply will not work. All of us who have spoken for projects know how much

time is required to give testimony, as I have already done a half dozen times for each project in my State. We are glad to do it, of course, because we have constituents who are interested in the projects. How much interest would Senators have in the minute details of projects for India or Vietnam, and how many would be willing to study the details as we do for projects in our own States?

I think the whole character of the program is very different. This proposal is utterly unrealistic. We should not try to apply the same restrictions upon the program abroad. If we are going to have the program for the purposes which we all understand, then I think the administration of it has about all the restrictions we can afford to put upon it.

If one is opposed to the program, as the Senator from Alaska is, this is one way to destroy it. We could put restrictions on it. If one cannot defeat the program by a frontal attack, one can ask for little restrictions upon it, to defeat it in that way. In my opinion, that is what the amendment is designed to do. I hope the Senate will not agree to the amendment.

The ACTING PRESIDENT pro tempore. If the Senate will indulge the Chair a moment, the Senator from Texas has 1 more minute. Does the Senator from Illinois desire recognition?

Mr. DIRKSEN. Mr. President, I will take the minute, and 1 additional minute from the time on the bill.

The ACTING PRESIDENT pro tempore. To keep the record straight, the agreement is that control of the time in opposition to an amendment will be in the hands of the Senator from Texas [Mr. JOHNSON], if he is in opposition. If the majority leader is not in opposition, the control of the time automatically goes to the minority leader under the agreement. The Chair states that for the record. The Chair recognized the Senator from Arkansas [Mr. FULBRIGHT], the chairman of the committee, but it was with consent.

The time for this statement will not be charged to either side.

The Senator from Illinois is recognized for 1 minute.

Mr. DIRKSEN. Mr. President, I yield myself 1 additional minute from the time on the bill.

The ACTING PRESIDENT pro tempore. The Senator from Illinois is recognized for 2 minutes.

Mr. DIRKSEN. Mr. President, the distinguished Senator from Alaska said that this is a very simple amendment. It is indeed. It is as simple as a well-directed shot out of a Colt .44 that hits a person right over the heart. It will put him out of business. This amendment, if agreed to, will put the program out of business.

I think the distinguished chairman of the committee alluded to the fact that every project of a nonmilitary character over $1 million relating to airports, hospitals, highways, reclamation, railroads, housing, and navigation would have to be separately authorized. That would mean we would have to have engineering data. The matter would have to come before the committee. It would have to be justified. It would have to be approved. The difficulties would stop the program in its tracks.

The chairman of the committee is exactly correct. If we want to liquidate the program, I know of no more felicitous and painless way of doing it than to agree to the amendment. But we are dealing on a worldwide basis with a program of this kind, and I earnestly hope the problems which go with a program of this nature will not be further aggravated. I hope that these restrictions will not be imposed upon the ICA.

As I read the language, it would apply to nearly $1 billion of the $1.4 billion-plus which is involved under the bill, because it would apply to all nonmilitary items under titles I, II, and III. That includes the contingent fund. That includes the special assistance fund. That includes the defense support, where it is nonmilitary. It includes technical cooperation, United Nations assistance, and all the rest.

It is a simple amendment. It is an excellent liquidating amendment. I, therefore, hope it will be roundly defeated.

The ACTING PRESIDENT pro tempore. All time on the amendment has expired.

Mr. GRUENING. Mr. President, I ask unanimous consent that I may ask the minority leader a question.

Mr. MANSFIELD. Mr. President, I must object. We are operating under a time limitation.

The ACTING PRESIDENT pro tempore. The Senator from Alaska has 3 minutes remaining.

Mr. FULBRIGHT. Mr. President, the Senator from Alaska yielded back the remainder of his time.

Mr. GRUENING. The Senator from Illinois is addressing himself not to the amendment before us but to another amendment which I have offered. There is a difference between the amendments.

Mr. DIRKSEN. Mr. President, we are talking about amendment I, which the Senator offered the other day.

Mr. FULBRIGHT. Mr. President, amendment "H" is exactly the same.

Mr. DIRKSEN. There is only a difference of degree. There would be a little more liquidation involved in one than in the other, if that is possible.

Mr. GRUENING. Does the minority leader think the House is willing to wreck this program? The language is in the House bill.

Mr. DIRKSEN. I do not know about what the House wants to do, but I think our distinguished friend from Alaska is trying to wreck the program.

Mr. GRUENING. The language of the amendment is now incorporated in the House bill. If this amendment is agreed to, the language will be identical with the House language, in the bill which has already been passed by the other body.

Mr. DIRKSEN. All I can say is that from long experience in regard to appropriations and on legislative committees, if this does not represent a liquidation, then I simply have not seen one.

The ACTING PRESIDENT pro tempore. The time on the amendment has expired. The question is on agreeing to the amendment offered by the Senator from Alaska. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Alabama [Mr. HILL], the Senator from Oklahoma [Mr. KERR], the Senator from Maine [Mr. MUSKIE], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from North Carolina [Mr. JORDAN], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

On this vote the Senator from Minnesota [Mr. HUMPHREY] is paired with the Senator from Oklahoma [Mr. KERR]. If present and voting, the Senator from Minnesota would vote "nay," and the Senator from Oklahoma would vote "yea."

The Senator from North Carolina [Mr. JORDAN] is paired with the Senator from Missouri [Mr. SYMINGTON]. If present and voting, the Senator from North Carolina would vote "yea," and the Senator from Missouri would vote "nay."

I further announce that if present and voting, the Senator from Massachusetts [Mr. KENNEDY] and the Senator from Ohio [Mr. YOUNG] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES], the Senator from Connecticut [Mr. BUSH] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

On this vote the Senator from Indiana [Mr. CAPEHART] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from Indiana would vote "nay," and the Senator from Nebraska would vote "yea."

The result was announced—yeas 40, nays 45, as follows:

[No. 175]

YEAS—40

Bartlett	Frear	O'Mahoney
Bible	Goldwater	Proxmire
Brunsdale	Gruening	Randolph
Byrd, Va.	Hartke	Robertson
Byrd, W. Va.	Jackson	Russell
Cannon	Johnston, S.C.	Schoeppel
Case, N. Dak.	Long, Hawaii	Stennis
Chavez	Long, La.	Talmadge
Curtis	McClellan	Thurmond
Douglas	Magnuson	Williams, Del.
Dworshak	Morse	Yarborough
Eastland	Moss	Young, N. Dak.
Ellender	Mundt	
Ervin	Murray	

NAYS—45

Aiken	Church	Fulbright
Allott	Clark	Gore
Beall	Cooper	Green
Bennett	Cotton	Hart
Butler	Dirksen	Hayden
Carlson	Dodd	Hennings
Carroll	Engle	Hickenlooper
Case, N.J.	Fong	Holland

Javits	McCarthy	Prouty
Johnson, Tex.	McGee	Saltonstall
Keating	McNamara	Scott
Kefauver	Mansfield	Smathers
Kuchel	Martin	Smith
Lausche	Monroney	Wiley
Lusk	Pastore	Williams, N.J.

NOT VOTING—15

Anderson	Hruska	Morton
Bridges	Humphrey	Muskie
Bush	Jordan	Sparkman
Capehart	Kennedy	Symington
Hill	Kerr	Young, Ohio

So Mr. GRUENING's amendment to the committee amendment was rejected.

Mr. DIRKSEN. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JOHNSON of Texas. Mr. President, I move to lay that motion on the table.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion to lay on the table the motion to reconsider the vote whereby the amendment was defeated.

The motion to table was agreed to.

The ACTING PRESIDENT pro tempore. By previous agreement the Senate has ordered the yeas and nays on the amendment lettered "I" offered by the Senator from Alaska. Under the unanimous-consent agreement 5 minutes of additional debate is allowed to each side, to be controlled by the sponsor of the amendment and by the Senator from Texas, if he is in opposition to the amendment; if not, by the Senator from Illinois [Mr. DIRKSEN].

These are very far-reaching amendments which are being offered. I am sure some Senators would like to know their substance and to hear the debate, and the Chair asks that order be maintained on the floor.

The Chair now recognizes the Senator from Alaska.

Mr. GRUENING. Mr. President, I call up my amendment identified as "4–28–60—I," and ask that it be stated, and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment has already been stated at this session.

Mr. GRUENING. Mr. President, this amendment would require congressional authorization for large foreign public works programs and projects and for such other large endeavors as airfields, highways, railways, and so forth. This is the requirement for programs at home. I ask only that the same requirement be made applicable to foreign projects under the foreign-aid program.

My amendment would still continue an element of the "double standard" for it requires approval only for projects or programs involving an aggregate expenditure of foreign-aid funds of $1 million. No such floor is applicable to domestic projects.

H.R. 7634, a bill authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes, is now before the Senate Public Works Committee. In it we have such relatively small projects as $388,000 to improve navigation on the Mississippi River, $170,400 to improve navigation at Red Wing Harbor, Minn., $117,200 to improve navigation at Everglades Harbor in Florida, $240,000 to improve navigation in Southwest Harbor, Maine, and so on, ranging up to projects in the hundreds of millions of dollars.

Scores of projects must therefore periodically be presented individually to the Congress, be reviewed as to their merits by the appropriate committees of both Houses of the Congress, and then must be approved by both Houses, and, finally, must be approved by the President.

Why should not a similar project of, for example, $15,051,000 for railway rehabilitation in India or $1,280,000 for the development of Lake Pezayeh navigation in Iran—why should not all these large foreign projects and programs also require specific justification too and approval by Congress?

I urge the adoption of my amendment to treat the same things the same way whether they are to be built in one of the 50 States or in a foreign country.

Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. Does the Senator from Alaska yield back the remainder of his time?

Mr. GRUENING. I do.

Mr. FULBRIGHT. Mr. President, before I comment on the pending amendment, in view of the good attendance on the floor at the present time, I should like to call to the attention of Senators a copy of a letter which is on the desks. It is signed by the Acting Secretary of State, and relates to another matter which will come up later. I believe that Members of the Senate should have an opportunity to consider this letter during the next few hours. It does not relate to the pending amendment. It relates to the Douglas amendment that we discussed last Thursday.

There is very little difference between the pending amendment and the one which has just been turned down by the Senate. It would require an administrative procedure which would make the program unworkable. That is my view. That was the view of the committee. That is the view of the State Department. It would make the program unworkable.

Under existing law, section 517 of the Mutual Security Act requires completion of cost estimates and engineering plans prior to obligation of funds for projects. Section 202(b) requires the Development Loan Fund to take technical and economic feasibility of proposed projects into account before approving projects. Section 103 of the Mutual Security Appropriation Act, 1960, requires a determination of feasibility of water and related land resource projects in accordance with domestic standards and criteria.

The proposal of the Senator from Alaska would operate to bring each project to the committees in Congress and have it gone over in the same way that we go over every dam in Washington and every flood control project in Arkansas, for example. It is utterly and completely unnecessary.

If one is against the bill and does not want the bill, the adoption of such an amendment would be one way to destroy it. I do not wish to comment on the motives of the proposer, but he always has voted against the mutual security bill and is against the bill. This is one way to destroy it. It is that simple. The amendment is utterly unworkable.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. CLARK. I am for the bill; I always have been for the bill. I think my motives are reasonably pure. Why is this an unworkable amendment, and should not the American people know the cost of each of these projects?

Mr. FULBRIGHT. The American people do know. The State Department furnishes the committees with a list of the projects and of the programs which they propose to initiate in the various countries. Adequate engineering facilities and statistics do not exist in many of the countries, and it is necessary to devise some formula for them in order to try to determine whether the projects are feasible.

For instance, the question of the marketability of power, in a power production program, would be involved in many cases where the projects are developed in a primitive country, a country completely different from our own.

When the Senator says that under similar conditions he wants similar procedures to apply, it simply is unrealistic to say that conditions in Vietnam or India or Pakistan are the same as conditions in Pennsylvania. They are not; they are completely different.

Mr. CLARK. I wholly agree with the Senator from Arkansas. This amendment has nothing to do with the previous amendment, which I voted against. This amendment says, in effect, that if a project is to cost more than $1 million, Congress should be told how much it will cost.

Mr. FULBRIGHT. Oh, no; not at all. It provides for a separate authorization for each project. A certain procedure must be followed for each proposed project—a dam, a road, or an airport in a particular country. Before anything is done by way of commitment, that procedure must be followed. I say it is absolutely unworkable. It cannot possibly be done.

If we had tried to follow this procedure, the Communists would long since, if they were interested, have undertaken the project in that country with its own kind of procedure.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. JACKSON. While I voted for the previous amendment, believing there should be some standards which the department should follow, this amendment will simply make it impossible for our foreign-aid program to be usable and effective.

One thing which the administrators of the foreign-aid program have had to contend with is that our competitors, the Soviets and the Soviet bloc, have been able to make decisions on offers of aid without delay. If we are to be effective in this area, then I submit that time is of the essence. We should not slow down the decision-making process.

If this provision is placed in the bill, it will mean that it will be necessary to call people from far away places to justify in detail given projects. The time factor involved will be of great concern. If that is the objective of the amendment, then there is no point in seeking an authorization. It will be too late to do any good.

Mr. HOLLAND. Mr. President, will the Senator from Arkansas yield?

Mr. FULBRIGHT. I yield.

Mr. HOLLAND. Does the Senator know of any device which could more nearly uphold the contention of many people throughout the world, who are hostile to us, that we are imperialists, trying to control, in this Congress, every single move of any consequence for the presumptive purpose of helping people elsewhere, than to have Congress assume the responsibility of approving and authorizing every substantial public works project in the 45 nations throughout the world which we are trying to help?

Mr. FULBRIGHT. The Senator is quite correct. I wonder which committee will undertake the duty of conducting hearings on all these projects, and itemizing the cost of them, project by project.

The ACTING PRESIDENT pro tempore. The Chair is compelled to advise the Senator that his time on the amendment has been exhausted. The Senator from Alaska has yielded his time back. All time on the amendment has been exhausted.

Mr. LONG of Louisiana. Mr. President, I ask unanimous consent that the Senator from Alaska may yield me 2 minutes.

Mr. JOHNSON of Texas. Mr. President, may I get recognition?

The ACTING PRESIDENT pro tempore. The Chair wishes to finish his statement. Under the unanimous consent agreement, a copy of which is on the desk of every Senator, all time on the amendment has been exhausted. Time is available on the bill, and it is under the control of the majority leader and the minority leader.

Mr. JOHNSON of Texas. Mr. President, if I can get recognition, I propose to yield to the Senator from Louisiana such time as he may need.

The ACTING PRESIDENT pro tempore. The Senate is entitled to a statement by the Chair about the time situation.

Mr. JOHNSON of Texas. The majority leader is prepared to yield 2 minutes to the Senator from Louisiana.

Mr. LONG of Louisiana. The Senator from Alaska, in both the previous amendment and this amendment, has put his finger on one of the soft spots in the foreign aid program. The loose manner in which some of these foreign public works is undertaken is inexcusable. It is fantastic and ridiculous.

Some of these projects are proposed left and right and cannot possibly be justified; yet we are asked to agree to them without even knowing what they are.

I venture the guess that the chairman of the committee cannot tell us how many projects costing more than a million dollars have been planned for construction with foreign aid money right now. I do not know the number; I doubt that anyone in Congress knows.

If flood control or navigation projects are proposed for construction in our own country, it takes on the average about 8 years before they are authorized, and before the first dollar of construction money is appropriated. Such projects must first be studied and approved by the district engineer, then by the Board of Engineers, then by the Bureau of the Budget, and then by Congress. After the American public works projects have been carefully studied, Congress authorizes the money for their construction, and later Congress begins to appropriate the money.

I was informed last year that about half of the foreign aid public works projects have been abandoned before completion. That represents a fantastic waste of money. Why should not Congress carefully examine each of the proposed projects? The Committee on Public Works carefully examines and selects the projects which it recommends for construction; but the Committee on Foreign Relations simply proposes to give all the money which is asked for the construction of projects abroad.

All the amendment really seeks to do is to require that Congress be apprised of the cost of each of these fantastic projects before we authorize the spending of millions of dollars for their construction, and before we end by finding out that half of the projects for which we have spent money have been abandoned.

All the amendment provides is that if we are to spend more than a million dollars, we will at least know what the project is and will examine into it first. At present, no one knows what the projects are.

The ACTING PRESIDENT pro tempore. The time of the Senator from Louisiana has expired.

Mr. JOHNSON of Texas. Mr. President, I yield 1 minute to the Senator from Pennsylvania [Mr. CLARK], then 1 minute to the Senator from Louisiana [Mr. ELLENDER], and then 1 minute to the Senator from South Dakota [Mr. CASE].

The ACTING PRESIDENT pro tempore. One minute on the bill has been yielded to each of the Senators named by the Senator from Texas.

Mr. CLARK. Mr. President, the arguments made by the Senator from Washington [Mr. JACKSON] and the Senator from Arkansas [Mr. FULBRIGHT] have persuaded me to vote against the amendment, but I should like to ask the chairman of the committee one question: Does he not agree that the American people and Congress are entitled to know, before Congress votes, the cost of each of these projects? If that cannot be assured by the adoption of this amendment, how can it be done?

Mr. FULBRIGHT. The Senate is given a list of the programs which are projected and detailed unclassified information about them. They are only projected; these are not commitments. They have not finally resulted in agreements with the countries concerned. We are simply given a blueprint of what the administration proposes to do in those countries.

Mr. CLARK. But the American people do not know what is being proposed.

Mr. FULBRIGHT. The operation is on an annual basis. I sympathize with the Senator's idea that the program is not properly administered. We tried to remedy the situation last year and submitted to the Senate a plan to put these projects on a more businesslike basis, but the Senate rejected it. We are operating on an annual basis.

The ACTING PRESIDENT pro tempore. The time of the Senator from Pennsylvania has been exhausted.

The Chair recognizes the senior Senator from Louisiana for 1 minute.

Mr. ELLENDER. Mr. President, I was rather amused at the statement made by the Senator from Washington [Mr. JACKSON] when he said that unless we proceed with our current foreign aid program, the Communists will do us some harm. There is trouble in Korea today, which is due, in part, to the fact that we have undertaken many projects in that country without completing necessary and proper studies. As a result of this failure on our part there has been much waste and graft in the Korean aid program. The same thing has occurred in other countries and will continue unless Congress takes control of this wasteful giveaway.

We have permitted the dreamy-eyed planners in ICA and in the State Department to construct any project they wanted to build without regard to the ultimate cost of the project. In my travels I have come across many projects which in the end have cost four or five times more than the original cost estimates.

The Senator from Washington talks about the Communists coming in. What has happened in Korea has been caused in part by our poorly administered foreign aid program and this is exactly what the Commies want. The same thing will happen in Turkey, Thailand, and in every other country unless we inject some sanity in our foreign aid program, and give proper study to the countless projects dreamed up by the boys with the rose-colored glasses.

Mr. JOHNSON of Texas. Mr. President, I yield 1 additional minute to the junior Senator from Louisiana.

Mr. LONG of Louisiana. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I yield one additional minute to the Senator from Louisiana.

The ACTING PRESIDENT pro tempore. The Senator from Louisiana is recognized for one minute.

Mr. LONG of Louisiana. Mr. President, I venture to assert that not one Member of the Senate can tell me how many projects costing over $1 million are called for by the bill, or can name five of these projects, anywhere in the world, on which it is proposed that $1 million or more will be spent.

Yet when we ask what the money is to be spent for, we are unable to obtain the detailed information; either the projects

are labeled secret—although the Communists and the foreign politicians know all about them. If we do obtain the information, we are foreclosed from telling about it on the feeble pretense that national security would be jeopardized.

If this amendment is adopted, we shall at least know what the money is to be spent for.

Mr. JOHNSON of Texas. Mr. President, how much time has the Senator from Alaska yielded back?

The ACTING PRESIDENT pro tempore. Two minutes.

Mr. JOHNSON of Texas. I ask that that time be restored to the time available on the bill.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

Mr. CASE of South Dakota. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I yield 2 minutes to the Senator from South Dakota.

The ACTING PRESIDENT pro tempore. The Senator from South Dakota is recognized for 2 minutes.

Mr. CASE of South Dakota. Mr. President, Senators who may wish to vote for the amendment should volunteer to conduct the hearings which will be necessary if we are to examine each individual project abroad. I thoroughly agree with what the Senator from Washington [Mr. JACKSON] has said.

I voted for the previous Gruening amendment because I would not object to having set up some standards for the engineers to follow. But I do not believe that either a Senate committee or any individual Senator has available sufficient time to be able to go into the individual authorizations for each public works project which might be undertaken abroad. Such a procedure would place an insufferable burden upon any Senate committee or any Senator. What Senator would wish to undertake the responsibility for authorizing any particular project?

If Senators are opposed to the entire program, let them vote for the amendment, and thus vote against the bill.

But it seems to me that we should set up guidelines, and then should permit the individual engineers to go forward with these programs.

Mr. CARROLL. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I yield 1 minute to the Senator from Colorado.

Mr. CARROLL. Mr. President, I should like to have the attention of the Senator from Arkansas [Mr. FULBRIGHT].

This amendment is a very important one. If we are not careful, the program will be killed by means of this amendment, because on the last amendment there was a majority of only 5 votes. I voted against the amendment because I do not want to have a straitjacket imposed on a program in regard to which there should be some responsibility.

The able Senator from South Dakota has correctly stated what will be the impact on the program if this amendment is adopted.

I commend the able Senator from Alaska for offering the amendments; but I agree that we should enable the committee to ride herd and to make reports to the Congress, so we shall know what we are doing. Then the committee can make the necessary reports.

Perhaps some amendment of this sort should be submitted; but I point out that if we are not careful, the entire program will be killed.

It seems to me that we should have a statement by the chairman of the committee as to the willingness of the committee to submit a report to the Congress, so we shall have some idea of what is happening.

As the able Senator from Pennsylvania has said, let us have some disclosure. Our constituents are entitled to that information.

Mr. FULBRIGHT. Mr. President, if the Senator will yield, let me say all this is very amusing. Enormously detailed reports are made every year, but I dare say the Senator from Colorado has not read them. We conduct very detailed hearings, but it is almost impossible to get Senators to attend the hearings and to hear the testimony taken there.

All these suggestions are nonsense. In an election year, Senators get "all steamed up" about foreign aid. If Senators want to kill the foreign-aid program, let them vote to kill it.

I realize that last year the vote on a similar amendment was 53 to 37; and it is true that this year the sentiment in favor of agreeing to such an amendment is increasing. But of course this is an election year, and in an election year everybody is "for America."

Mr. O'MAHONEY. Mr. President——

Mr JOHNSON of Texas. Mr. President, I yield 2 minutes to the Senator from Wyoming.

Mr. O'MAHONEY. Mr. President, I ask for order; I should like to be heard for just a moment.

The ACTING PRESIDENT pro tempore. The Senate will be in order. The Senator from Wyoming has been recognized for 2 minutes.

Mr. O'MAHONEY. Mr. President, the Congress of the United States is gradually surrendering to the Executive its legislative power. Unless this is stopped, and stopped soon, Congress might just as well go home.

The Constitution of the United States declares specifically in article I, in the first section, that all legislative power is granted to the Congress.

In section 9 of article I, clause 7, these words are to be found:

> No money shall be drawn from the Treasury, but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

The power of the purse was given to the Congress. The reason why we have the great national debt now is, not because of spending by Congress, but because of spending by the Executive. The President's budget speaks of a surplus of some $4 billion; but here we have in the foreign aid program proposals to spend we know not how much of the money of the people of the United States.

I shall vote in favor of agreeing to the amendment submitted by the Senator from Alaska [Mr. GRUENING].

Mr. GRUENING. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I yield to the Senator from Alaska 1 additional minute.

The ACTING PRESIDENT pro tempore. The Senator from Alaska is recognized for 1 minute.

Mr. GRUENING. Mr. President, in response to the statement made by the distinguished chairman of the committee—who, I regret to say, is not now in the Chamber—I wish to point out that he said that in an election year everyone is "for America." Mr. President, I was "for America" last year, when I submitted a similar amendment; and I am not ashamed to be for America at any time and in any year. I intend to continue to be.

I think one of the issues with which we must deal and to which I have repeatedly called attention and intend to again, is the double standard that is attempted to be applied when the administration and some Senators insist that every penny of the funds proposed for expenditure in the United States for the benefit of the American people be carefully accounted for, through established budgetary procedures, but are apparently willing to permit some unseen bureaucrat downtown to spend billions of dollars on foreign aid programs without any such vigilant control.

In response to the statement made by the Senator from South Dakota [Mr. CASE], let me say that I believe it is the duty of all Senators to find out, if they can, how the funds are being spent. As one Senator, I should be glad to sit through the hearings if the same budgetary controls that are applied to projects in our own country are applied to spending in foreign countries, and find out how the money of the taxpayers is being spent. That would be one way to diminish the waste and some of the other follies that have been committed in the so-called mutual security program.

Mr. CHAVEZ. Mr. President——

Mr. JOHNSON of Texas. I yield 2 minutes to the Senator from New Mexico.

The ACTING PRESIDENT pro tempore. The Senator from Mexico is recognized for 2 minutes.

Mr. CHAVEZ. Mr. President, I shall vote for the amendment of the Senator from Alaska. I serve on the committee which handles the bills which provide the funds for the programs proposed by the Senator from Arkansas.

I should like to be able to vote, once in a while, for funds to aid the American people, notwithstanding how charitable we may wish to be in dealing with other countries. I want to be a good neighbor; but I have seen the committees refuse to recommend the appropriation of funds to be used to combat water pollution on the Potomac River, right here in the city of Washington, at the same time that the Congress votes for the expenditure of billions of dollars to be used to take care of people in Iran, Turkey, or other countries.

Mr. President, it is about time for charity to begin at home. It is about time for us not to neglect our own people. We are now neglecting them so much that pretty soon we shall not even have enough money to give them.

Mr. President, I am in sympathy with the amendment, and I hope the Senate will, at least one day, be American.

The ACTING PRESIDENT pro tempore. The Senator from Texas has control of the other time.

Mr. DIRKSEN. Mr. President, I yield myself 2 minutes.

I think the Senator from South Dakota has certainly put his finger on the problem that is before the Senate. The language of the amendment that is before us is very clear and specific. It says that any of these projects where "the estimated total cost is $1 million or more shall be separately authorized by the Congress and no funds for such projects shall be appropriated without such prior authorization."

We shall be going home in early July. At least, I hope so. Then there will be a nearly 6-month period when the Congress will not be in session. If there must be a separate authorization before the money can be used under this bill, the program will come to an absolute, dead standstill. If we make this standard a precedent now, and if it is going to continue in future bills, then the program is as good as nothing.

I can concur with what the distinguished Senator from Wyoming has said about the authority of the Congress and the authority of the executive; and I can understand the argument made by the Senator from Louisiana; but this program is justified under the general heading of the common defense of the country. It does not involve the Potomac. It does not involve the city of Chicago. It does not involve the Mississippi or some dam or project in the West. Under the Constitution, we are dealing with the common defense, and the perimeter of the common defense is not what it was in 1812, or during the Mexican War, or in 1898. There is a 20,000-mile perimeter that extends a long distance beyond the blue water that once shielded this country, which we must consider in an effort to build up our defense, even though the bill applies to nonmilitary projects.

The important point is that if, on every project, we must obtain engineering data, somebody will have to furnish the data, somebody will have to make the survey, somebody in the Congress will have to listen to those who made it, the procedure will become almost interminable, and the program will have been slowed to the point where it will have no efficacy for the purpose for which it was begun in the first instance.

I, therefore, hope this amendment will be defeated.

Mr. JOHNSON of Texas. Mr. President, I yield the Senator from Florida [Mr. HOLLAND] 2 minutes.

The PRESIDING OFFICER. The Senator from Florida is recognized for 2 minutes.

Mr. HOLLAND. Mr. President, I think the points made about delay, difficulty, and the tremendous expenditure of time and effort which would be required if the amendment should be adopted are all true; but I think the biggest point is that we would be placing in the hands of hostile people, who are attacking us as imperialists, the most effective weapon for their use we could give them, by insisting that to this Congress they must come, and that our engineers must go to the foreign countries and return with reports, and that this Congress must authorize the projects just as if they were to be constructed in a part of the United States—which is just what those who are hostile to us are saying about us all around the world—before any substantial amount can go to the people in the foreign countries, in a generous and gracious effort by us to help them. It does not make sense.

This is the most difficult bill we have to pass each year; and to have this kind of standard applied would, it seems to me, repel people all over the world who are now friendly to us and add them to those who are hostile, because it would certainly look like imperialism, in its crudest form, to have a requirement that those projects should be brought here for authorization, not by their people, not by the administrators, but by this Congress, just as in the case of our own domestic projects, when those projects are for the purpose of giving those people help, which I think we have been giving them generously, although not always wisely, but with a clear showing of anti-imperialism designed to be helpful to others.

Mr. DIRKSEN. Mr. President, I yield 1 minute on the bill to the Senator from Arizona [Mr. GOLDWATER].

The ACTING PRESIDENT pro tempore. The Senator from Arizona is recognized for 1 minute.

Mr. GOLDWATER. Mr. President, I have listened with a great deal of interest to this discussion. I ask the proponents of this foreign economic aid to inform me of one project which Communist Russia has built for any country. Communist Russia is engaged in taking over the world, and we are engaging in a cold war not to let her win the cold war. I suggest that the squandering of our billions of dollars around the world has done more to lose friends for us than to gain them for us. I cannot recall one instance in which Communist Russia has spent one dime in a foreign country, but I can recall our spending billions and billions of dollars, and losing friends all over the world.

I think the pending proposal is a good amendment. I intend to vote for it. I intend to vote against the bill.

Mr. CASE of South Dakota. Has the Senator heard of the financing of the Aswan Dam?

Mr. DIRKSEN. Mr. President, I yield 1 minute to the Senator from Kentucky [Mr. COOPER].

The ACTING PRESIDENT pro tempore. The Senator from Kentucky is recognized for 1 minute.

Mr. COOPER. Mr. President, the question presented by this amendment is whether we support a foreign aid bill or wish to defeat it. If the pending amendment should be adopted, the bill would be made wholly unworkable. A vote for the amendment will be a vote against the foreign aid bill.

I wish to support the Senator from Florida [Mr. HOLLAND]. He has gone to the basic issue involved. If this amendment should be adopted, it would transfer to the Congress of the United States the job of making political as well as economic determinations on every project to be constructed under the program all over the world. We would be charged throughout the world as imperialists, as impinging on the sovereignty of other nations when our standing before the world is so important.

I am sure there is waste in the foreign aid program, and as I said on last Friday, a reorganization of our foreign aid ought to be devised. But this amendment is not the means. I support fully the argument made by the Senator from Florida, that the adoption of the amendment would defeat not only the bill, but the purpose of our aid program. The amendment should be defeated.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that each side may have an additional 30 minutes on the bill.

The ACTING PRESIDENT pro tempore. The Senator from Texas requests that an additional time of 30 minutes to each side be allowed on the bill, under the present conditions in the unanimous-consent agreement. Is there objection? The Chair hears none, and it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I yield 1 minute to the Senator from Oklahoma [Mr. MONRONEY].

The ACTING PRESIDENT pro tempore. The Senator from Oklahoma is recognized for 1 minute.

Mr. MONRONEY. Mr. President, I should like to ask the distinguished junior Senator from Idaho [Mr. CHURCH] if we are not talking mostly about loans, and not about grants? We do not know whether loans will be made, or whether certain parties will close the loans. I should like to understand what we are talking about in this bill.

Mr. CHURCH. Mr. President, I think about 80 percent of the money involved does take the form of loans, and some of those loans are very complicated. They are loans that involve moneys under the Development Loan Fund; frequently they involve money to be expended in joint projects in which the World Bank may participate. Sometimes they involve some use of soft currencies which have been generated through Public Law 480. This is a very complex field.

Moreover, the procedural questions which are raised by the amendment have not been faced. If the amendment were agreed to, would it mean that the Committee on Interior and Insular Affairs would have to pass upon any proposed reclamation projects? Would it mean that the Committee on Public Works would have to pass upon any road program proposed? Would it mean that the Congress, which cannot be conversant with subtle political conditions in distant foreign countries, would have to

bring its political judgment to bear on each project in separate authorization bills? If so, the usefulness of the program will be destroyed.

I say this is a procedural matter. It is not a matter of constitutional prerogatives.

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. CHURCH. It is a matter of practical realities.

Mr. MONRONEY. I thank the Senator.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Alaska [Mr. GRUENING]. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Alabama [Mr. HILL], the Senator from Oklahoma [Mr. KERR], the Senator from Montana [Mr. MURRAY], the Senator from Maine [Mr. MUSKIE], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oregon [Mr. MORSE], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

On this vote the Senator from Minnesota [Mr. HUMPHREY] is paired with the Senator from Montana [Mr. MURRAY]. If present and voting, the Senator from Minnesota would vote "nay," and the Senator from Montana would vote "yea."

The Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from Oklahoma [Mr. KERR]. If present and voting, the Senator from Massachusetts would vote "nay," and the Senator from Oklahoma would vote "yea."

I further announce that if present and voting, the Senator from Missouri [Mr. SYMINGTON] and the Senator from Ohio [Mr. YOUNG] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES], the Senator from Connecticut [Mr. BUSH] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

On this vote the Senator from Indiana [Mr. CAPEHART] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from Indiana would vote "nay," and the Senator from Nebraska would vote "yea."

The result was announced—yeas 32, nays 52, as follows:

[No. 176]

YEAS—32

Bartlett	Curtis	Goldwater
Bible	Dworshak	Gruening
Byrd, Va.	Eastland	Hartke
Byrd, W. Va.	Ellender	Johnston, S.C.
Cannon	Ervin	Jordan
Chavez	Frear	Long, Hawaii
Long, La.	Proxmire	Talmadge
McClellan	Randolph	Thurmond
Magnuson	Robertson	Yarborough
Moss	Russell	Young, N. Dak.
O'Mahoney	Stennis	

NAYS—52

Aiken	Fong	McGee
Allott	Fulbright	McNamara
Beall	Gore	Mansfield
Bennett	Green	Martin
Brunsdale	Hart	Monroney
Butler	Hayden	Mundt
Carlson	Hennings	Pastore
Carroll	Hickenlooper	Prouty
Case, N.J.	Holland	Saltonstall
Case, S. Dak.	Jackson	Schoeppel
Church	Javits	Scott
Clark	Johnson, Tex.	Smathers
Cooper	Keating	Smith
Cotton	Kefauver	Wiley
Dirksen	Kuchel	Williams, Del.
Dodd	Lausche	Williams, N.J.
Douglas	Lusk	
Engle	McCarthy	

NOT VOTING—16

Anderson	Humphrey	Muskie
Bridges	Kennedy	Sparkman
Bush	Kerr	Symington
Capehart	Morse	Young, Ohio
Hill	Morton	
Hruska	Murray	

So Mr. GRUENING's amendment to the committee amendment was rejected.

Mr. KUCHEL. Mr. President, I move to reconsider the vote by which the amendment of the Senator from Alaska to the committee amendment was rejected.

Mr. JOHNSON of Texas. Mr. President, I move to lay that motion on the table.

The motion to reconsider was laid on the table.

Mr. ELLENDER obtained the floor.

The ACTING PRESIDENT pro tempore. As the present occupant of the chair understands the parliamentary situation, on Friday last it was agreed by the Senate that the Senator from Louisiana [Mr. ELLENDER] might offer four amendments en bloc at this time and that his time would be totaled, which would allow 20 minutes for the proponents and 20 minutes for the opposition. Does the Senator from Louisiana wish to be recognized under that arrangement?

Mr. ELLENDER. I desire to offer first my amendment designated "4–28–60—K." If that amendment prevails, my other three amendments will not be offered.

I wish to allocate 14 of the total 20 minutes allowed me to amendment "K," and 2 minutes to each of the three remaining amendments.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none.

Mr. SALTONSTALL. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. SALTONSTALL. Which amendment is offered?

Mr. ELLENDER. The amendment designated "4–28–60—K."

The ACTING PRESIDENT pro tempore. The Senator from Louisiana has announced that he is offering his amendment designated "4–28–60—K," which will be stated.

The LEGISLATIVE CLERK. On page 23, beginning with line 16, it is proposed to strike out all through line 10 on page 24.

The ACTING PRESIDENT pro tempore. The Senator from Louisiana is recognized for 14 minutes.

Mr. ELLENDER. I will take 8 minutes at this time.

The ACTING PRESIDENT pro tempore. The Senator from Louisiana is recognized for 8 minutes at this time, and for a total of 14 minutes on the amendment designated "4–28–60—K."

Mr. ELLENDER. Mr. President, the purpose of my amendment is to delete from the bill the amendments proposed by the Foreign Relations Committee to Public Law 480.

As we all know, the Agricultural Trade, Development, and Assistance Act of 1954, or, as it is more commonly called, Public Law 480, was originally considered by the Committee on Agriculture and Forestry of the Senate during the 83d Congress. Since that time the Committee on Agriculture and Forestry has reconsidered this act and has continued its life through the year 1961.

The amendments proposed by the Senate Foreign Relations Committee would make three drastic changes in Public Law 480.

I wish to point out, Mr. President, that on Friday last I introduced, at the request of the Department of Agriculture, a bill which would further amend Public Law 480. This bill is the appropriate vehicle for basic amendments to that act, of which these are several, and I ask the Senate to adopt my amendment with the assurance that the substance of the amendments proposed by the Foreign Relations Committee will be considered by the Senate Committee on Agriculture and Forestry this year.

Last year when we considered the extension of Public Law 480, we made certain that no foreign currencies would be allocated under any provision of Public Law 480 unless the money had been previously appropriated. The Senate Agriculture Committee went into great detail on that point in its report.

The proposal before us would nullify that provision of the present law.

The second change sought to be accomplished pertains to section 202 of title II of Public Law 480. Under this authority, in cases of disaster or extreme emergency, it is possible to use surplus agriculture commodities on a grant basis. The Committee on Foreign Relations seeks to change that provision entirely by making it possible for grants to be made for economic development. What is actually sought is authority to pay local workers on any project in surplus commodities rather than in local currency.

Mr. President, this is simply a method of obtaining additional grant aid at the expense of the agricultural program. I doubt the wisdom of further broadening title 2 of Public Law 480 to include grants of surplus commodities for economic aid without otherwise reducing the amount of economic aid which countries would receive under the pertinent sections of the Mutual Security Act. In other words, if country X is programed to receive, say, $50 million in grant assistance under the Mutual Security Act,

and, subsequently, is authorized $10 million in surplus agricultural commodities under the authority proposed in the committee bill, then it strikes me that the $50 million in grant assistance should be reduced by the amount of economic aid made available in the way of surplus agricultural commodities. I need not remind Senators that last year we heard a lot about so-called back-door financing. That cry will doubtless be raised again when the Senate considers a housing bill this year. I most respectfully suggest that the committee amendment constitutes back-door financing of the most flagrant kind, and for this reason too, it should be modified to provide that assistance made available thereunder will not be in addition to other economic aid authorized under the act. If this is done, we can truly begin to use our agricultural commodities as a means of reducing dollar grant aid.

The only reason I can see for the committee amendment is to open up the prospect of using grants of agricultural commodities as a new and huge economic aid, programed without any detailed congressional scrutiny. As a practical matter, title II has already been used for the purposes suggested by the committee. The committee report indicates that without its amendment it will not be possible for workers on highways and related projects to be paid in kind, that is, in grain or other foodstuffs. Yet, according to the February 11 "Semiannual Report on Operations Under Public Law 480," language is found on page 54 which shows that some 42,000 tons of wheat grain will be supplied to Tunisia to extend the emergency work relief program through December 1960. I quote therefrom:

About 42,000 tons of wheat and feed grains will also be supplied to Tunisia to extend the emergency work relief program through December 1960. The additional amount of grain provided will permit some program expansion and it is expected that a total of 75,000 workers may be employed on a rotation basis. About two-thirds of the workers' wages, estimated at the equivalent of 70 cents per day, are paid in U.S. grain and the remainder in cash contributed by the Tunisian Government. Work projects include construction and renovation of earth dams, cisterns, and wells, tree planting, building of firebreaks, and various soil conservation and reclamation activities. Work progress has been excellent and results can be seen in many parts of the country.

On page 55 we find this language:

About 2,000 bales of raw cotton are being made available to two American voluntary agencies to manufacture about 80,000 comforters for free distribution to the poor in China (Taiwan). The voluntary agencies will finance the cost of the other materials needed and will supervise the manufacturing process.

In other words, Mr. President, the Department of Agriculture has been doing what the Committee on Foreign Relations claims that this amendment and only this amendment will permit, and the Department has been doing this under existing law. Once this is realized, then, the only logical conclusion that can be drawn is that the real purpose of the committee amendment is to turn title II of Public Law 480 into a mammoth economic grant program. Whether this is prudent or not, I am not in a position to say. I do say it is a problem which involves further study and, I wish to emphasize, study which should be conducted by the legislative committee having jurisdiction over Public Law 480—that is, the Committee on Agriculture and Forestry.

There is a third proposal in the bill as reported by the Foreign Relations Committee which would permit the Federal Government to pay for the transportation of surplus products beyond the port of entry of the country where the goods are to be delivered.

The PRESIDING OFFICER (Mr. CANNON in the chair). The Senator's time has expired.

Mr. ELLENDER. I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 additional minutes.

Mr. ELLENDER. Mr. President, Afghanistan presents us with a good example. If the surplus commodities are landed at Karachi, our Government will pay the inland freight from Karachi through the Khyber Pass and on to Kabul.

I say that is going too far. I believe we are doing enough by paying for the ocean freight. The next thing they will want us to do is to cook the surplus commodities so that they will not have that problem. These proposals of the Foreign Relations Committee should not be adopted within the purview of the Mutual Security Act, but should be considered by the Committee on Agriculture and Forestry.

Of my remaining time I now yield 2 minutes to the Senator from Vermont.

Mr. AIKEN. Mr. President, the proviso in the bill which the Ellender amendment would delete would transfer from the Department of Agriculture part of the authority for the disposal of farm products abroad.

The Department of Agriculture has done an excellent job under Public Law 480. I believe that the Department of Agriculture approved the proviso in the bill against its better judgment.

The plan to pay workers in foreign countries in commodities instead of in local currencies would lend itself to a great deal of corruption, as it would be almost impossible to police it. It would be almost impossible to determine the dietary requirements of every African or south Asian family. The approval would injure normal channels of trade. It is also unnecessary to accomplish the purpose sought to be accomplished in an orderly and workable manner. The mutual security program is no place in which to open old sores, particularly between the Department of Agriculture and the Department of State. That is what the proposal would certainly do. It is not possible to divide that authority, unless the Department of State takes over the disposal of farm commodities abroad.

After the Department of Agriculture has done such a good job, we should not add such a provision to the bill. If the provision remains in the bill, the mutual security program will be badly damaged.

Public Law 480 was developed in the Committee on Agriculture. That committee has always had jurisdiction over it, and any amendment to the act. The provision in the bill which would change that situation should be defeated, and the provisions referred to the Committee on Agriculture and Forestry for consideration.

Mr. ELLENDER. Mr. President, as I said before, last Friday I introduced a bill at the request of the Department of Agriculture to carry out the very purpose the Senator has discussed.

Mr. AIKEN. That is before the Committee on Agriculture and Forestry. The Department of Agriculture approved this provision, I believe, under direction, and most reluctantly.

Mr. LAUSCHE. Mr. President, will the Senator yield for a question?

Mr. ELLENDER. I have only 2 minutes remaining.

The PRESIDING OFFICER. The Senator from Louisiana has 3 minutes remaining. The Senator from Vermont did not use all the time allotted to him.

Mr. ELLENDER. I yield to the Senator from Ohio.

Mr. LAUSCHE. Does the discussion which the Senator from Vermont has engaged in cover completely the item contemplated to be dealt with by the amendment of the Senator from Louisiana?

Mr. AIKEN. I discussed only one part of the Ellender amendment. I am not so much opposed to the other provision in the bill which would be deleted by the Ellender amendment. The part I discussed is so harmful, I believe it is better to take out all amendments pertaining to Public Law 480, and refer them to the Committee on Agriculture and Forestry, where they are already pending.

Mr. ELLENDER. Mr. President, of the remaining time, I yield 2 minutes to the Senator from Florida.

Mr. HOLLAND. Mr. President, we have heard much in the Senate in recent sessions about backdoor financing. The proposal now before the Senate is as excellent an instance of backdoor emasculation of the jurisdiction of a committee and of the benevolent effects of the finest program for the distribution of our surpluses of agricultural products, along with doing good to friendly nations throughout the world, as could possibly be imagined.

In these proposed amendments to Pubic Law 480, the Committee on Foreign Relations seeks to completely change the direction of Public Law 480, without the Committee on Agriculture and Forestry, which has worked for 6 years in this field—and with good results—even being advised of what is going on.

I do not believe the Senate wants to stand for that kind of elimination of jurisdiction; that kind of elimination of responsibility; and that kind of changing and perverting of a fine program which has been created under Public Law 480. We were asked to establish a program under Public Law 480, and we did. The present speaker has sat on

every one of the conference committees and every one of the committees which has brought out this act and its various amendments. He knows something about the hard work which has gone into it on the part of the 17 Members of the Senate who comprise the Committee on Agriculture and Forestry.

To have this kind of emasculation of committee responsibility and of the fine programs created by that committee is, I think, totally wrong. Aside from that, to take away from the Department of Agriculture, which is the agency charged primarily with the handling of the programs under which surpluses have been built up, and then with the handling of the surpluses themselves under Public Law 480, so as to confuse and admix the responsibility of two great Departments—the Department of Agriculture and the Department of State—so that the Department of Agriculture handles one program under title I for the development of friendly nations, and the Department of State handles another program under title II for the development of friendly nations, one with surplus commodities from one bin, and the other with surplus commodities from the other bin, simply does not make sense. It is not responsible government to have those two different great agencies working with the same authority, toward the same purpose, and at cross-purposes.

I hope the amendment will be agreed to, and that the committee which has this matter in charge will be given the opportunity to handle it properly.

Mr. CASE of South Dakota. Mr. President, I offer my amendment to the Ellender amendment, which is at the desk.

The PRESIDING OFFICER. The Senator from Louisiana has not used all his time. The amendment of the Senator from South Dakota will not be in order until the time of the Senator from Louisiana has expired or has been yielded back. There is some time in opposition, if those in control of the time in opposition desire to yield time for this purpose.

Mr. CASE of South Dakota. Is it not in order to offer an amendment to the Ellender amendment?

The PRESIDING OFFICER. At the appropriate time. It will not be in order until the time of the Senator who has offered the amendment has expired.

Mr. CASE of South Dakota. I thought he might want some time on that.

The PRESIDING OFFICER. Does the opposition desire to use any time or to yield any time to the Senator from South Dakota?

Mr. DIRKSEN. The distinguished Senator from Texas [Mr. JOHNSON] would, I think, control the time in opposition to the amendment.

Mr. FULBRIGHT. I wish to speak in opposition to the Ellender amendment. If the Senator from South Dakota wishes to offer an amendment to that amendment, I should like to see what will happen then, because it may change the situation; I do not know.

Mr. DIRKSEN. That would not affect the time against both the original amendment and the amendment to the amendment.

Mr. FULBRIGHT. I am opposed to the Ellender amendment. I am awaiting the proper time to speak in opposition.

The PRESIDING OFFICER. Under the rule, there would be 5 minutes allotted to each side.

Mr. DIRKSEN. We would not be foreclosed in the use of that time, I am sure.

The PRESIDING OFFICER. The Senator would not be foreclosed in the use of that time.

Mr. DIRKSEN. So the time in favor of the Ellender amendment would be intact, and the time against the amendment would be intact.

The PRESIDING OFFICER. By unanimous consent, the Senator from South Dakota could offer his amendment at this time.

Mr. CASE of South Dakota. Mr. President, if it is necessary to ask unanimous consent in order to offer the amendment at this time, I shall ask unanimous consent, although it seems to me that the amendment to the amendment should be disposed of before the time on the original amendment has been fully exhausted.

The PRESIDING OFFICER. The Chair is informed by the Parliamentarian that that is not in accordance with the precedents.

Mr. CASE of South Dakota. Then I ask unanimous consent to offer my amendment to the amendment of the Senator from Louisiana at this time, so as to preserve the remaining time on the original amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. On page 23, beginning with line 16, it is proposed to strike out all through line 5, page 24.

The PRESIDING OFFICER. The Senator from South Dakota is recognized for 5 minutes.

Mr. ELLENDER. Mr. President, will the Senator from South Dakota yield?

Mr. CASE of South Dakota. I yield.

Mr. ELLENDER. As I understand the Senator's amendment, it would delete from my amendment the section to strike from the committee bill authority for the Government to pay freight costs to deliver surplus commodities from a port to a landlocked area.

Mr. CASE of South Dakota. That is correct.

Mr. ELLENDER. If the Senator from South Dakota is agreeable, I shall modify my amendment to that effect.

Mr. CASE of South Dakota. That accomplishes the purpose of my amendment. If the Senator from Louisiana will so modify his amendment, I am willing to withdraw my amendment.

Mr. ELLENDER. Mr. President, I so modify my amendment.

Mr. CASE of South Dakota. I should like to take 1 minute to explain the purpose of my amendment. It leaves paragraphs A and B of the Ellender amendment, but it removes paragraph C. The reason why I thought paragraph C should be removed was my desire to leave with the Foreign Aid Administration the authority to pay the freight from the ocean port into the port of entry of a landlocked country, if it so desires. I should like to make this a matter of record. I do so based on the very instance or illustration which the Senator from Louisiana used.

When President Eisenhower was in Karachi, he thought it so important to go to Kabul that he changed his whole itinerary in order to fly to Kabul. He thought it was important that we maintain friendly relationships with Afghanistan.

I happened to be in Karachi within just a few days after that happened. I talked with the Ambassador from Afghanistan to the United States. He was in a very friendly mood. He said the people of Afghanistan appreciated the visit by the President.

I believe it would be unfortunate at this time, following that visit, if we said that we would put the material in Karachi but would not carry it to Kabul, even if we could do so.

The Senator from Louisiana has kindly offered to modify his amendment so as to remove paragraph C. I think that is an improvement.

Mr. FULBRIGHT. Mr. President——

The PRESIDING OFFICER. The Senator from Arkansas has time in opposition to the Ellender amendment.

Mr. JOHNSON of Texas. Mr. President, I yield to the Senator from Arkansas as much time as he may desire.

Mr. FULBRIGHT. Mr. President, I am glad the Senator from Louisiana has accepted the suggestion not to delete the third paragraph. That will save some time. I believe this paragraph applies only to those commodities which private organizations ship to these landlocked countries. There are very few of them that I can think of offhand, such as Afghanistan, Laos, Nepal, and Bolivia. The committee bill applies to landdocked countries, where there are no seaports. It is designed to assist private charities. It is a very small matter. Even though it may violate the principle of jurisdiction of the Committee on Agriculture and Forestry, I am very much pleased that the Senator from Louisiana has accepted the amendment of the Senator from South Dakota.

With regard to jurisdiction, I think this is a very clear example of an instance of overlapping jurisdiction. It is unavoidable. The end use of these commodities in the foreign countries strikes me as certainly being the concern of the Committee on Foreign Relations. I do not know how we can escape that fact. I recognize that the motive of the original Public Law 480 was not to help foreign countries; it was to relieve our agriculture of the burdensome surpluses, but certainly our humanitarian instincts and desires could be satisfied also in this convenient way. This program now serves a dual purpose. Certainly the purpose is not solely to relieve the burden of our agricultural surpluses. One purpose is to help the country to dispose of its agricultural surpluses; the other is to aid in foreign lands in diverse ways.

I think it is quite proper for the Committee on Foreign Relations to consider

any proposed improvement in the end use of the surplus commodities. That is all these amendments seek to do. They were proposed by the administration. I think they make much sense.

The first one, section 601, looks complicated in the report. I refer to page 30 of the report, in which the proposal is set forth as carefully as the staff and the administration could put it, because three different subsections—sections (k), (p), and (r), of section 104, Public Law 480—are involved. The end result is simply and solely to make available the use of foreign currencies, without an appropriation, for health and education related to economic development.

I think Congress has a great prejudice against education—though not the Senate, I may say. The attitude of the Senate has been quite enlightened. But in Congress there is a great prejudice against education in this country. That is why our educational system has run down. In any case, we ought not to allow prejudice to interfere with our effort to educate foreign peoples who need education and desire it.

All in the world that this very complicated amendment does, an amendment proposed by the administration and accepted enthusiastically by the committee, is to enable the use of foreign currencies for the purpose of improving health and education in ways which contribute to economic development.

Such currencies are used under circumstances similar to those we propose in this case, for other economic development activities, such as the construction of highways and similar projects, without appropriations. We propose that health and education be placed on at least a parity with the building of railroads or highways. It seems to me that education should be entitled to as much leeway, under our program, as are these other worthy objectives. That is all we seek to do.

Subsection (b) of section 601 is a procedural provision. Title II of Public Law 480 provides for the use of surplus agricultural commodities for relief—for instance, for the relief of famine. There is an overall ceiling that is equivalent to $300 million a year. Under that authority, such commodities can be given directly to those who are suffering from famine.

Under title I, the same commodities can be sold for local currencies—not for dollars—and the local currencies can be loaned or granted back to the country involved, for the same kind of process. It is necessary to go through an extra step of bookkeeping, and that complicates the program. It tends to pile up more foreign currencies in some of the most hard-pressed countries, where the needs are the greatest.

I do not pretend that this amendment involves a matter of life or death. The purpose can still be achieved, I believe, even if the amendment is agreed to; but the amendment would make its achievement more difficult.

I grant that almost every amendment that has been submitted is designed to make achievement of the program as difficult as possible. But then in the next breath those who submit the amendments complain about the maladministration of the program. That attitude involves the strangest sort of schizophrenia I have ever observed in connection with any legislation proposed here. Those who complain most bitterly about the waste and graft, as alleged, also urge the imposition of restrictions which would make proper administration impossible. On the one hand, Senators say they wish to get rid of the surpluses of our agricultural commodities. On the other hand, Senators attempt to place obstructions in the way of getting rid of those surplus agricultural commodities through the program under subsection (b). This amendment will make it more and more difficult to distribute our surplus agricultural commodities—for instance, in Tunisia, which is the location of the pilot project on which the program is based. This program enables the building of irrigation canals—a project of the type which does not require the use of very much technical equipment. Virtually all the demand in connection with the project is for labor. The cost of the project can be paid in part by giving the laborers wheat, rice, or corn, and so forth.

Mr. DIRKSEN. Mr. President, will the chairman of the committee yield?

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Illinois?

Mr. FULBRIGHT. I yield.

Mr. DIRKSEN. First, let me say that, as I understand, the only commodity actually involved here is wheat. Is that correct?

Mr. FULBRIGHT. That happens to be the one involved here. The proposed legislation would not restrict to wheat the commodities used, but wheat is the one that is actually used in this instance.

Mr. DIRKSEN. Second, nothing in the proposed provision we are now discussing would enlarge the authority to modify the so-called surplus agricultural products program, would it?

Mr. FULBRIGHT. This involves only the end use of it.

Mr. DIRKSEN. Third, this provision would simply permit the issuing of grain which already is in storage, instead of cash, and simply would obviate a second step. Is that correct?

Mr. FULBRIGHT. Yes. Local funds, not American dollars, are involved.

Mr. DIRKSEN. That is correct.

Mr. FULBRIGHT. Yes; it simplifies the program.

The amendment of the Senator from Louisiana would simply put another obstacle in the way of the administration.

Mr. DIRKSEN. Let me say that I think I can understand the jurisdictional question which has arisen here. But the fact is that no broad change would be made in the so-called surplus farm commodity program; only an additional transfer would be available for economic development purposes.

Mr. FULBRIGHT. Yes. The amendment was proposed last year in connection with a bill sponsored by the Department of Agriculture under Public Law 480. That indicates the position of the Department of Agriculture. It favors this use of these commodities. The Department of Agriculture has approved the resubmission of this language in connection with this bill. The Department of Agriculture is in favor of this.

Mr. DIRKSEN. I think that states the whole case quite well.

Mr. FULBRIGHT. It is not a very complicated matter. I cannot understand why Senators would not wish this to be used; for example, for education. All these countries want improvement in education; and that can be provided by building schoolhouses and other projects which involve local costs, and which do not involve dollars.

I submit that these will be very helpful provisions of the bill.

Mr. AIKEN. Mr. President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. Yes, if I have any time remaining available to me.

Mr. DIRKSEN. Mr. President, I yield to the distinguished Senator from Vermont 2 minutes on the bill.

The PRESIDING OFFICER. The Senator from Vermont is recognized for 2 minutes on the bill.

Mr. AIKEN. Mr. President, I simply wish to say that I am not impressed by an argument that it is simpler to pay laborers on foreign public-works projects in commodities than it is to pay them in local currencies. I do not think we should undertake to tell the laborers in foreign countries what is good for them, particularly in the way of diet. Wheat is not the only commodity that is involved here; but even if we assume that it is the only one, do we know what an African worker on such a project would do with his pay, at the end of a week's work? Perhaps he would buy a shirt or some soap or some aspirin. But under the provision now proposed, when he received his pay, instead of receiving local currency, which would enable him to buy such articles, he would be given 24 boxes of Crispy Crunchy Crackles, made by the Crispy Crunchy Crackles Corp., of Cracklesville, U.S.A. Of course the boxes would be very nicely lithographed, and the worker probably would receive, in that way, more of such processed, packaged food than he had ever received before. But I do not think we should undertake to determine what would be the dietary requirements of every foreign family, and undertake to pay those workers on such a basis—as the State Department has said it would like to do. It has said it would not pay them more than they could use for their own families.

Mr. President, what kind of nonsense is this, anyway? As a matter of fact, this amounts to a toe in the door or a nose under the tent, in an effort to transfer the program for the disposal of surplus U.S. farm commodities from the Department of Agriculture to the State Department. That has been going on for 10 years; and this time it has a little more promise of success than it has had in previous years.

Mr. DIRKSEN. Mr. President, I yield myself 1 minute on the bill.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 1 minute.

Mr. DIRKSEN. Mr. President, I can concur in everything the distinguished Senator from Vermont has said. But the weakness of that case is that if partial pay is not accepted in the form of some sort of acceptable commodity which the family of the worker needs and uses, the individual worker in question simply will not have a job. The issue is that simple. If he is to be paid partly in kind, if he is willing, obviously it will be possible to increase the number of jobs in the economic development field. So that is the real benefit that is involved.

Mr. ELLENDER. Mr. President, since I have withdrawn one of my amendments by acceptance of Senator CASE'S language, I believe I have 2 minutes remaining on that amendment. I ask for that 2 minutes at this time.

The PRESIDING OFFICER. The Senator from Louisiana has 6 minutes remaining.

Mr. ELLENDER. Then, Mr. President, at this time I yield myself 2 of those 6 minutes.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for 2 minutes.

Mr. ELLENDER. Mr. President, as was correctly pointed out by my good friend, the Senator from Florida, title I of Public Law 480, provides for the sale of the surplus commodities and for the use of the proceeds from these sales for economic development within the country to which the surpluses have been sold, title II funds are to be used exclusively in case of famine or other disaster. Now it is desired to add to title II a proposal that the $300 million now allocated to that purpose can be used to promote economic development.

Mr. President, I believe that it is up to the Committee on Agriculture and Forestry to make that determination. Title II of Public Law 480 presently is subject to an authorization of only $300 million, and it is entirely possible that amount could be gobbled up overnight if it were used for economic development; if a famine or disaster should occur somewhere in the world, we would have to provide additional authority.

I repeat that when the Public Law 480 program was put on the statute books, under title I there were to be sales, and under title II gifts or donations, but such gifts were to be limited to cases of famines or other disasters.

What is sought to be done here today is to simply add more economic aid than the amounts apparently otherwise provided in the bill. The Foreign Relations Committee has limited the total amount to be authorized to $4 billion-plus, including military aid, but unless my amendment is adopted, it is possible that $300 million more in surplus commodities, can be added to the total amount.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. ELLENDER. I will yield on the Senator's time.

Mr. FULBRIGHT. Very well. I think the Senator ought to be at least accurate in his statement. We do not disturb the limitation of $300 million under title II, or what is provided under existing legislation.

Mr. ELLENDER. Then it is an addition to the $4 billion-plus otherwise provided in the bill. In other words, the committee would make available up to $300 million additional, and that is what I am opposing. Furthermore, in the brief time available, a study of Public Law 480 and other applicable statutes reveals no apparent prohibition against the resale of surplus agricultural commodities which might be donated to a recipient country for economic assistance under title II of Public Law 480 as it is sought to be amended by the committee amendment.

Thus, in theory, at least, it would be possible for wheat to be donated to country X for economic aid. Country X could then sell this wheat to country Y and realize benefits therefrom.

I realize that any transaction which the committee amendment would authorize would doubtless be the subject of an agreement between our country and the recipient country and the terms of this agreement could govern all aspects of this transaction. The avowed purpose of the amendment is to permit foreign countries receiving U.S. economic assistance or other aid to pay individuals in those countries in food or other agricultural commodities for labor which might be performed, or other services rendered.

If the language of the amendment were limited to this purpose, and if there were not committee jurisdictional problems involved, it would appear that the amendment is not harmful. On the other hand, the language of the amendment is so broad it at least offers the possibility of gross abuses of the assistance it would authorize.

It should also be noted that title II of Public Law 480, specifies that "the President shall take reasonable precaution that such transfers will not displace or interfere with sales which might otherwise be made."

This would seem to protect our sales or other transactions, but would it protect normal transactions between the recipient country and third countries?

For example, assuming that the recipient country normally purchased large amounts of rice from Burma, and assuming further that we donated large amounts of rice to the recipient country under the authority proposed in the bill, would the President, in making such donation have to bear in mind that the donation might reduce normal sales from Burma to the recipient country, thus leaving the way open to injure third countries while helping recipient countries?

Mr. HOLLAND. Mr. President, will the Senator yield to me 2 minutes?

Mr. DIRKSEN. I yield the distinguished Senator from Florida 2 minutes on the bill.

The PRESIDING OFFICER. The Senator from Florida is recognized for 2 minutes.

Mr. HOLLAND. I thank the Senator from Illinois. The report itself bears out exactly what the Senator from Louisiana has just said. If Senators will turn to page 31 of the committee report, they will find this sentence as the first sentence of the page:

> The amendment would make it possible to furnish surplus agricultural commodities, on a grant basis—

That is under title II—

> for purposes of economic development in underdeveloped countries where famine or other emergency situations do not exist.

If Senators will go to the last sentence in that same paragraph, they will note that, even by the committee report, this new use is more far reaching than has been shown here on the floor, and I quote:

> It will also have the effect of enabling Public Law 480 to be used, to some extent, to supplement funds for defense support and special assistance, but it cannot, of course, be used as a substitute for dollar programs.

It is just as clear as a bell that this proposed change not only takes from grants to relieve suffering and famine and great disaster and emergency, so as to diminish that which is the most gracious part of our program, but, also, deliberately earmarks those funds for three additional purposes, as shown by the report, for the building up of economic development in underdeveloped countries where there is not such deprivation, and for the supplementing of funds for defense support and special assistance.

I close by pointing out to the Senate that not only is that true, but this plan puts a competing organization, the Department of State, in these three fields to handle what is being done under Public Law 480 by the Department of Agriculture. Could it be made clearer than the report itself demonstrates that this is not just the camel's nose under the tent, but is a major blow to take away control of surplus commodities from the Department of Agriculture?

Mr. FULBRIGHT. Mr. President, do I have any time?

The PRESIDING OFFICER. 10 minutes remain to the Senator.

Mr. FULBRIGHT. I yield myself 3 minutes.

I do not know how a committee can possibly make anything clearer, so far as the way I read the language is concerned, and yet be so completely misinterpreted. If Senators will consider the next sentence after what the Senator from Florida read, they will see it reads:

> It should be borne in mind in this connection, however, that this new authority will be subject to the overall limitation of $300 million a year on the value of commodities which can be furnished under title II of Public Law 480.

The Senator has stated this will be done at the expense of poor, suffering, starving people. Under this authority, the maximum that has been used is $130 million in equivalent currencies. I want to qualify the figures we are applying to foreign currency. The $130 million would be equivalent currencies. We are not dealing with dollars. These are funds from the sale of foreign currencies.

I do not see how this language could be plainer. We are not adding anything at all. Under existing authority there is

now the right to use the equivalent of $300 million of commodities for the relief of starving people in an emergency. All in the world we are doing is stating that, within that limit, in addition to relieving them in the event of a disaster, we may be permitted to pay the local unemployed people to dig a ditch or build a road, or do some similar work. The pilot project that was used was the building of an irrigation ditch, in which most of the work is hand labor in these rather underdeveloped countries. The use of such funds does not impose any additional burden on the program at all. It will to some extent utilize unused authority under the $300 million limitation. That is as far as it could possibly be used.

The authorization would make possible getting rid of a little more of the accumulating bushels of wheat, which I thought everybody interested in agriculture desired to see done. The Department of Agriculture is for it. If the Committee on Agriculture and Forestry is to use this as a test case to see that the Committees on Foreign Relations shall never have anything to say about what is done with foreign currencies, I deny their jurisdiction. I think it is a complete misinterpretation of the concept of jurisdiction. The Foreign Relations Committee has a very important interest in what is done in foreign countries with the currencies that are developed from the disposal of commodities; and I would not for a moment let such a provision be interpreted as my acquiescence in assertion of exclusive jurisdiction over everything that is done beyond our shores in this field.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

The PRESIDING OFFICER. The 3 minutes the Senator yielded have expired.

Mr. FULBRIGHT. Mr. President, I yield myself 3 more minutes.

Mr. DIRKSEN. I thought a moment ago the distinguished Senator from Florida made the point that there would be duplication of administrative activities as between the Department of Agriculture and the State Department. My understanding is that actually the State Department, through ICA, already administers title II of Public Law 480. Therefore, I could detect no duplication of administrative functions.

Mr. FULBRIGHT. I am absolutely at a loss to understand the feeling that we ought not to have anything to say, except upon the jurisdictional basis. From an efficiency point of view, it seems much more sensible to avoid the round-about procedure of having to sell a bushel of wheat for a local currency, and to take the franc, if it happens to be in Tunisia, and give it to the workman, who will go out to buy a bushel of wheat. That is about what it amounts to.

Mr. ELLENDER. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. DIRKSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. What is the pending question?

The PRESIDING OFFICER. The question is on agreeing to the Ellender amendment "K," as modified. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Alabama [Mr. HILL], the Senator from Oklahoma [Mr. KERR], the Senator from Oregon [Mr. LUSK], the Senator from Montana [Mr. MURRAY], the Senator from Maine [Mr. MUSKIE], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

On this vote the Senator from Oklahoma [Mr. KERR] is paired with the Senator from Oregon [Mr. LUSK]. If present and voting, the Senator from Oklahoma would vote "yea" and the Senator from Oregon would vote "nay."

I further announce that if present and voting, the Senator from New Mexico [Mr. CHAVEZ] and the Senator from Montana [Mr. MURRAY] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES], the Senator from Connecticut [Mr. BUSH], and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

The Senator from Indiana [Mr. CAPEHART] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from Indiana would vote "nay," and the Senator from Nebraska would vote "yea."

The result was announced—yeas 45, nays 38, as follows:

[No. 177]

Hill	Morton	

So Mr. ELLENDER's modified amendment to the committee amendment was agreed to.

Mr. ELLENDER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. AIKEN. Mr. President, I move to lay that motion on the table.

The motion to table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. ELLENDER. I call up my amendment identified as "4–28–60—O."

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. On page 11, line 25, strike out the period and add the following: "but in no case shall any reimbursement by the International Cooperation Administration to the Department of Defense, or any agency thereof, for such excess equipment exceed the usual value of excess equipment as determined under section 545(h) of this Act."

The PRESIDING OFFICER. Five minutes are available on each side on the amendment.

Mr. ELLENDER. I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 minutes.

Mr. ELLENDER. Mr. President, the sole purpose of this amendment is to prevent unjust enrichment of the Defense Department at the cost of the mutual security program. Under existing law, when excess equipment is transferred from the military to the mutual security program, the mutual security program is charged only the rehabilitation cost of such equipment.

The committee amendment, I fear, may leave a loophole with regard to equipment which can be shipped to Latin America.

I do not desire to tinker with the $55 million limitation on such shipments provided under the bill. However, I do fear that under the committee's language, which specifies that excess equipment is to be valued at acquisition cost for the purposes of the limitation, it may be interpreted by the executive agencies that the committee desires the Defense Department or any agency thereof to be reimbursed from mutual security accounts on the basis of not rehabilitation cost, as is the case with excess equipment, but on acquisition cost.

My amendment merely seeks to make it clear that for the purposes of meeting the $55 million limitation, excess equipment is to be assigned the value of acquisition cost, but for the purposes of reimbursement from MSA accounts, such equipment is to be valued at rehabilitation cost, as is now specified under section 545(h) of the Mutual Security Act, as amended.

I realize that perhaps my amendment is not artfully drawn, but I think the purpose of it is clear, and let me repeat, if my amendment should be adopted, there would actually be two values assigned to excess equipment shipped to Latin American areas.

First, for the purposes of the $55 million limitation, and for no other purpose, such equipment would have to be assessed at acquisition cost, but second, for the purposes of reimbursement from MSA to Department of Defense account, reimbursement must be based upon rehabilitation cost, in accordance with the existing provisions of section 545(h), and not acquisition cost, which, if applied for reimbursement, would unjustly enrich the Department of Defense and agencies thereof at the expense of the mutual security program.

Mr. FULBRIGHT. I yield myself 3 minutes.

As I interpret the amendment, it has no application here. If the Senator seeks to change the formula by which excess equipment is valued, he should seek to amend section 545(h) of the act.

It is not the intent of this section in the bill to change that formula, and we do not believe we have changed it. All that the section on page 11 of the committee amendment seeks to do is to set the ceiling on the amount of the military aid given to Latin America at $55 million. We have no intention of changing the formula for valuing the equipment. I refer to the language in parentheses on page 11: "(as excess is defined in section 545(h) of this act)."

We do not wish to change that language. If we have inadvertently made an error, we will be glad to correct it. I believe the Senator from Louisiana is in error as to the meaning of that section. In other words, the International Cooperation Administration does not reimburse anyone, under this section, for anything. This is military assistance. The ICA does not now nor would it under this language reimburse for anything under the formula that is used.

The formula for arriving at $55 million is the existing formula in section 545(h), in the opinion of the chairman and in the opinion of the staff of the Committee on Foreign Relations. I think that either the Senator or I misinterpreted the language.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. ELLENDER. Am I to understand that the ICA is not charged with collecting for the sale?

Mr. FULBRIGHT. Yes.

Mr. ELLENDER. Probably some branch of the military will administer the transaction. Whatever agency does administer it cannot charge more for the excess equipment than the cost of rehabilitating it. That is the intent of my amendment.

Mr. FULBRIGHT. What we believe this means is that in arriving at the ceiling of $55 million as to the amount of the material that is included, the agency will use the formula now in existence in section 545(h).

Mr. ELLENDER. Which is what?

Mr. FULBRIGHT. It is a very complicated formula, as the Senator knows. I will not undertake to describe it, without reading it to the Senator. It involves a variety of elements. We do not seek to change it in the bill; that is all I am saying. We do not touch the existing formula for arriving at the value of excess equipment.

Mr. ELLENDER. Mr. President, will the Senator further yield?

Mr. FULBRIGHT. I yield.

Mr. ELLENDER. The Senator is familiar with what happened several years ago in the Defense Department, when a good deal of secondhand material was sold to the mutual security program at either original cost or replacement cost. The military got a windfall.

Mr. FULBRIGHT. Yes.

Mr. ELLENDER. In that way they were able to get brandnew material and at the same time drain off their excess stocks.

Mr. FULBRIGHT. Yes. The formula I referred to was worked out as a result of that. We do not change the formula.

Mr. ELLENDER. So as to make legislative history, I understand it is the intention of the committee not to change the formula at all. Is that correct?

Mr. FULBRIGHT. Absolutely.

Mr. ELLENDER. Which means in no case will the MSA account be charged for excess military equipment more than rehabilitation cost. Is that correct?

Mr. FULBRIGHT. I do not want to undertake to say, off the cuff, what 545(h) means. I will get it and read it. It has in it more than what the Senator from Louisiana says is in it. That is a formula which was worked out as the result of experience, as he stated. We are not changing the formula. If the Senator wishes to change it, he should direct his amendment to the formula, not to this particular section of the bill.

Mr. ELLENDER. The language I propose is:

> But in no case shall any reimbursement by the International Cooperation Administration—

I can change that to read "by the agency," rather than "International Cooperation Administration." The amendment will then read:

> But in no case shall any reimbursement by the agency to the Department of Defense, or any agency thereof, for such excess equipment exceed the usual value of excess equipment as determined under section 545(h) of this act.

Mr. FULBRIGHT. I think it is unnecessary to have such language, but if it gives the Senator from Louisiana any great pleasure, and the Senate wishes to accept it, they can accept it. I think it is utterly superfluous, because we do not intend to change the formula.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. SALTONSTALL. Section 545(h), as I read it, was worked out by the Senator from Georgia and me in the original mutual security bill.

Mr. FULBRIGHT. That is correct.

Mr. SALTONSTALL. In all the years since then, so far as I know, the Committee on Appropriations has never had a case in which this question has arisen. I do not see that the amendment of the Senator from Louisiana adds to or detracts in any way from the situation.

Mr. FULBRIGHT. Neither do I.

Mr. SALTONSTALL. If the Army, for example, has miscalculated the amount that is needed for weapons, all it needs to do is to change the figures, but I have never heard of a case coming before the Committee on Appropriations.

Mr. FULBRIGHT. We say "excess as defined in section 545(h)."

The PRESIDING OFFICER. The time of the Senator from Arkansas has expired. The Senator from Louisiana has 1 minute remaining.

Mr. ELLENDER. What is the meaning of the language on page 11, line 24, "shall mean the acquisition cost to the Armed Forces of the United States for such equipment and material"?

It strikes me that that language changes the act to which the Senator from Massachusetts has just referred. That is what bothers me.

Mr. FULBRIGHT. I think that relates to material—the excess equipment. The bill reads: "(as excess is defined in sec. 545(h))."

I think this is what we had in mind. The materials may not be excess equipment, but materials which are excess and do not come under that provision.

Mr. ELLENDER. I wonder if the Senator would accept the amendment. I think he can see what I have in mind.

Mr. FULBRIGHT. Yes. It is not the ICA.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. FULBRIGHT. I have no objection.

Mr. President, do I have any time left?

Mr. DIRKSEN. Mr. President, I yield the Senator from Arkansas 2 minutes on the bill.

Mr. FULBRIGHT. I do not object to the objective. I am willing to accept the amendment. But how does the Senator wish to amend it?

Mr. ELLENDER. Instead of the International Cooperation Administration, let the amendment apply to the account from which reimbursement is made, in the following manner:

> On page 11, line 25, strike out the period and add the following: "but in no case shall any reimbursement to the Department of Defense, or any agency thereof, for such excess equipment exceed the usual value of excess equipment as determined under section 545(h) of this Act."

Mr. FULBRIGHT. I am willing to accept the amendment as modified and

take it to conference. The objective of the Senator is perfectly all right.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, offered by the Senator from Louisiana.

The amendment, as modified, was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. ELLENDER. I call up my amendment designated "4–28–60—N" and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 20, beginning with line 15, it is proposed to strike all through line 21.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for 5 minutes.

Mr. ELLENDER. I yield myself 4 minutes. The language that is sought to be deleted reads:

(c) In section 505(a), which relates to loan assistance and sales, insert after the first sentence the following new sentence: "Commodities, equipment, and materials transferred to the United States as repayment may be used for assistance authorized by this act, other than title II of chapter II, in accordance with the provisions of this act applicable to the furnishing of such assistance."

What I seek to do is to prevent the United States from accepting from a foreign government wornout equipment in payment for good, modern equipment, and then taking the wornout equipment given by a foreign country and transferring it to some other foreign country.

The explanation given by the Committee on Foreign Relations, according to an excerpt from which I shall read, is that an ambiguity arises in connection with commodities, equipment, and materials received by the United States in return for assistance furnished on a barter basis. As consistently explained and interpreted by the agencies administering the program, these materials cannot be further used.

The amendment will make possible an arrangement whereby, for example, the United States may furnish one type of military equipment to a European country in return for a second type of military equipment, and then the second type could be furnished to a third country.

As the law is now interpreted, this transaction can be accomplished only if the United States sells this military equipment for foreign currency, and uses the currency to buy the second type of equipment.

What could happen, if this language were to remain in the bill, is that the United States could furnish to a country—let us say England, France, or Italy—brandnew equipment; and instead of getting paid in cash for it, there would be authority to accept that country's secondhand equipment or obsolescent equipment as payment. My purpose is to prevent that.

In other words, if we are to furnish a country in Western Europe with brandnew equipment, I do not believe we should accept in payment for it anything but cash or equipment of equal value. It is true, and it may be argued, that the equipment obtained from a country abroad can be made use of by the United States, by our giving it to another country. I do not believe we should permit that practice, because I can visualize the countries of Western Europe getting brandnew equipment from us and dumping their own worn out, obsolescent equipment into our laps as "payment." That is what I seek to prevent.

Mr. FULBRIGHT. Mr. President, I yield myself 4 minutes. I am, of course, always impressed by the laudable objectives of the Senator from Louisiana. We all want to have a better administration of the act. I do not believe it is possible by any legislative act to legislate against any misjudgment or lack of a high type of wisdom in the administration of these programs.

All this amendment expresses is a sentiment, I think, that our military people are so stupid that they would barter away our material for inferior equipment. Under existing law, they have the authority to sell our equipment for local currency. They can then turn around and purchase the type of equipment to which the Senator objects. If they are idiots and do not have any sense, they will purchase obsolete, nogood equipment and will pass it on. This gives the authority to barter.

The administration feels this is the more efficient way. The executive branch states that it fails to understand why the Congress would authorize barter transactions, but would refuse to authorize, in a manner which would clearly permit more efficient and simplified administration, the use of equipment and commodities resulting from such transactions.

That is all that is involved here. It is an effort on the part of the administration to achieve a more efficient and simplified administration of the program.

As I have noted before, of course, a Senator who is opposed to the bill does not want the program to be efficiently administered and does not want to have a good reputation established for the program. In the view of such a Senator, the more one can blacken the reputation of the program or the more one can make the administration of the program inefficient, the more likely it is, in the opinion of such Senators, that the program can be completely abolished.

I pointed out that this provision is included at the request of the administration, to make more efficient the administration of the military assistance program, and to simplify it. This proposal reminds me somewhat of the proposal in regard to the use of commodities. The Senate rejected that proposal, and thus refused to make that operation more simplified and more efficient. So perhaps the Senate will reject this proposal. I can only say that the administration and those who are best qualified to administer this program believe this provision will enable them to administer the military assistance program more efficiently than it is now being administered.

Mr. ELLENDER. Mr. President, I am glad to have had that statement made by my good friend.

This provision in the committee bill merely permits the barter of new equipment for poor equipment or secondhand equipment. For the life of me, I cannot understand why it is considered so much trouble to go through the process of purchasing the equipment or selling the equipment. Certainly the money can be used to buy equipment, rather than to barter it. I feel that if that language remains in the bill, we shall find a great deal of our brandnew, costly equipment bartered with some countries of Western Europe for their old, obsolete equipment. If we accepted it and then sold it, perhaps we could get something for it. But in any event it would be obsolete equipment which we could not use, although we might be able to let some other country have it.

On many occasions we have been criticized by our friends for giving them obsolete equipment, yet, the committee amendment would make it possible for the United States to receive military equipment from European countries excess to their own needs, in return for equipment which these European countries might think they needed, and would then permit the United States to donate the used, obsolescent European equipment to other countries. It would seem that the committee amendment offers a means for the Europeans to siphon off their obsolete military equipment at our expense.

Furthermore, as I have said, it would permit the Department of Defense and the International Cooperation Administration to claim that we were actually receiving payment for missiles or other modern equipment which we would supply to the European countries, whereas, the fact of the matter is we would only be receiving antiquated material for which the European countries had no further need.

If Europe wants to get rid of its antiquated equipment, it can well afford to undertake its own mutual security program, or assist us in the military aid we are extending to countries whose continued existence is as important to the security of the Western European countries as to our own; namely, Formosa, Vietnam, Korea, and others.

Mr. FULBRIGHT. Mr. President, perhaps there is no need to say more about this matter. If it were desired, the same money could be used to purchase poor equipment. If Senators do not trust the administration of the program, there is little that they can do in this case. We must assume that those who administer the program are skilled and will proceed in a wise fashion, and will not act foolishly.

Mr. SALTONSTALL. Mr. President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. Yes, if I have time in which to do so.

The PRESIDING OFFICER. The time available to the Senator from Arkansas has expired.

Mr. DIRKSEN. Mr. President, I yield to the Senator from Massachusetts 3 minutes on the bill.

Mr. SALTONSTALL. I thank the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized for 3 minutes on the bill.

Mr. SALTONSTALL. Is it the purpose of this provision—which is included for the first time by the committee—to permit materiel and equipment which no longer is useful in, let us say, England or France, for example, to be used in South Vietnam or elsewhere?

Mr. FULBRIGHT. That is correct; they can use it wherever they believe it is wise to use it.

Mr. SALTONSTALL. And our country would not take it unless the administrators believed it could be used to good advantage elsewhere; is that correct?

Mr. FULBRIGHT. I assume so. I cannot see any harm in this provision if such a circumstance should arise. There is considerable difference between the usefulness of a piece of equipment in Europe, where the military forces might possess highly mechanized equipment, for mechanized warfare, and in the jungles of Vietnam, for instance. Such equipment might be obsolete under the circumstances in Europe, but might be highly effective for use in the jungles of Vietnam. I do not understand why the administrators should not be allowed to use such equipment wherever it would be most useful.

Mr. SALTONSTALL. Will not this provision result in the saving of money?

Mr. FULBRIGHT. I think so. I cannot understand why the Senator from Louisiana wishes to hamstring the administration of this program all the time. How does he expect those in charge of the program to administer it effectively if they are surrounded with great amounts of red tape?

Mr. ELLENDER. Mr. President, the Senator from Arkansas admits that the program under this provision is a barter arrangement, does he not?

Mr. FULBRIGHT. Yes; but those who administer the program now have authority to sell for local currencies. So what is the difference?

Mr. ELLENDER. But, in my judgment, the point is that these foreign governments will then be able to say, "We paid for your missiles. We are not getting it for nothing." But what would they pay with? They would pay with obsolete equipment that they no longer desired—perhaps even equipment that we regularly donated to them.

We have given many airplanes to our NATO allies, either directly or through offshore procurement. These aircraft are now obsolete and we are giving missiles to our so-called allies in Western Europe. The American people are getting sick of this kind of program. Yet, under this bill, it would be possible for our "generous" allies in Europe to pay for our missiles with airplanes which we regularly donated to them. This is the kind of situation which I wish to prevent.

The PRESIDING OFFICER. The question is on agreeing to the amendment lettered "N," of the Senator from Louisiana.

Mr. ELLENDER. Mr. President, on this question, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

The yeas and nays were ordered.

Mr. DIRKSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that further proceedings under the call be suspended.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIRKSEN. Mr. President, I yield myself 2 minutes on the bill.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 2 minutes.

Mr. DIRKSEN. Mr. President, I may say that there is pending an amendment offered by the Senator from Louisiana [Mr. ELLENDER] which proposes to strike out language that has been inserted by the Foreign Relations Committee in section 505 of the Mutual Security Act. That section deals with loan assistance and savings, and, among other things, it says that the United States may receive materials for stockpiling in the form of foreign currency, or, generally speaking, it can receive materials and equipment, except that they have got to be reduced to foreign currencies, and then the money can be used for further assistance.

The committee wrote a provision in the bill which states in effect that we can, in return for our assistance, accept commodities; that they can be stockpiled; that we can accept equipment; that we can accept the materials as repayment, which may be used for assistance authorized by this act or other than under title II.

I simply make the point that if this amendment prevails, those who administer the program are going to have to sell the material they accept, convert it into local currencies in foreign countries, and then they can use the same currencies for assistance.

The PRESIDING OFFICER. The 2 minutes of the Senator from Illinois have expired.

Mr. DIRKSEN. Mr. President, I yield myself 1 additional minute.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 1 additional minute.

Mr. DIRKSEN. What the committee has said is that the material can be used virtually on a barter basis; and in so doing, it would appear to me, among other things, there would be a very substantial saving in the form of transportation cost. But the chairman of the Foreign Relations Committee makes the important point that, surely, the persons who are going to administer the program will use their best judgment with respect to the interest of the United States.

The background that goes with the question has not been adequately presented at all, in my judgment. This looks like another suggestion for tying the hands of the administration officials, and for that reason I hope the amendment will not prevail. I am ready for the yeas and nays.

The PRESIDING OFFICER. All time on the amendment has expired. The question is on agreeing to the amendment identified as "N," offered by the Senator from Louisiana [Mr. ELLENDER] to the committee amendment. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Alabama [Mr. HILL], the Senator from Oklahoma [Mr. KERR], the Senator from Montana [Mr. MURRAY], the Senator from Virginia [Mr. ROBERTSON], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

On this vote the Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from Virginia [Mr. ROBERTSON]. If present and voting, the Senator from Massachusetts would vote "nay" and the Senator from Virginia would vote "yea."

The Senator from Oklahoma [Mr. KERR] is paired with the Senator from Missouri [Mr. SYMINGTON]. If present and voting, the Senator from Oklahoma would vote "yea" and the Senator from Missouri would vote "nay."

I further announce that if present and voting, the Senator from Minnesota [Mr. HUMPHREY] and the Senator from Ohio [Mr. YOUNG] would each vote "nay."

I further announce that if present and voting, the Senator from Montana [Mr. MURRAY] would vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES], the Senator from Connecticut [Mr. BUSH], and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent, and, if present and voting, would vote "nay."

The Senator from Indiana [Mr. CAPEHART] is absent on official business, and, if present and voting, would vote "nay."

The result was announced—yeas 28, nays 57, as follows:

[No. 178]

So Mr. ELLENDER'S amendment "N" to the committee amendment was rejected.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. ELLENDER. Mr. President, I offer the amendment which I send to the desk and ask to have stated. It is designated "4–28–60—P."

The PRESIDING OFFICER. The amendment offered by the Senator from Louisiana will be stated.

The LEGISLATIVE CLERK. At the appropriate place in the committee amendment, it is proposed to insert the following:

Chapter III of the Mutual Security Act of 1954, as amended, is further amended by adding to section 451(b) thereof the following sentence: "But in no instance shall the funds authorized under this chapter be used to augment any other category of assistance for which appropriations have been provided pursuant to the authority of this Act, unless the President finds that such augmentations are made necessary by considerations which were either entirely unforeseen or foreseen so tentatively as not to justify firm programing at the time programs authorized under this Act were submitted to the Congress."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Louisiana.

Mr. ELLENDER. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

Mr. ELLENDER. Mr. President, as is well known, the contingency fund was created to meet the requirements of our foreign-aid program which at the time of congressional presentation are either entirely unforeseen or foreseen so tentatively as not to justify programing.

Prior to fiscal year 1960, the contingency fund had been used to assist us in meeting the crises that developed throughout the world, such as those enumerated on page 23 of the report of the Senate Foreign Relations Committee, from which I now read:

Among the major uses to which the fund has been put in recent years have been additional assistance to Taiwan to meet the crisis in the Taiwan Straits, additional assistance to several countries in the Middle East to meet the crisis in that area stemming from the Iraqi revolution and the Lebanese disturbances, and relief work in the wake of a variety of natural disasters around the globe.

The crises referred to above, Mr. President, occurred prior to fiscal year 1960. During fiscal year 1960, no such crises occurred. However, notwithstanding this, our do-gooders have found a way to rape the contingency fund.

Since the money in this fund can be used for furnishing military assistance, defense support, special assistance, technical cooperation, or any of the other purposes of the Mutual Security Act, except for the Development Loan Fund, these squanderers of the taxpayers' money have proceeded to transfer from the contingency fund the following amounts during fiscal year 1960 through January of 1960:

To military assistance, $31,247,000.
To defense support, $67,473,000.
To special assistance, $14,663,000.
To technical cooperation, $1,832,000.
To other programs, $1,970,000.

What my amendment seeks to do is to require the contingency fund to be used for the purpose for which it was created, namely, to meet bona fide crises.

The only purpose of my amendment is to confine defense support and other categories of aid to the amounts which Congress appropriates. I think it is wrong, both morally and legally, for the executive department to use a special fund, the contingency fund, to restore congressional cuts in appropriations. I believe that the contingency fund ought to be used only for the purposes for which it was created.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired.

Mr. ELLENDER. Mr. President, I ask unanimous consent to proceed for an additional half minute.

The PRESIDING OFFICER. Without objection, the Senator may proceed.

Mr. YARBOROUGH. Did I correctly understand the Senator to say that for the past fiscal year money appropriated for the contingency fund was divided among other items listed on page 2?

Mr. ELLENDER. The Senator is correct. That is exactly what happened, because there were no crises. Yet, the administrators found a way to gobble up the money.

Mr. YARBOROUGH. The contingency fund was set up to take care of crises.

Mr. ELLENDER. Yes. What really happened was that the cuts that were made by Congress were restored in an indirect way by using the contingency funds.

Mr. YARBOROUGH. I thank the Senator for clarifying the matter.

Mr. FULBRIGHT. Mr. President, I yield myself 4 minutes. It has been said here today that Congress is losing its control to the executive. This is an example of Congress taking over the discretion which we have traditionally given to the executive in connection with these funds.

The contingency fund is less than 5 percent of the total appropriation. The provisions of this modest flexibility clearly indicate that its purpose and potential are to reflect marginal adjustments rather than fundamental alterations in the use of funds.

The effect of the Senator's amendment would be to tie the hands of the executive, and the executive would not have the freedom for making readjustments which now exists.

He says there are no crises in the world today. I wish I could believe that. It seems to me that anywhere one looks there is some kind of a crisis. There is one in Korea. One is threatening in Turkey. There are crises in the Caribbean. I do not know of any place in the world where there has not been a crisis.

Mr. ELLENDER. But the money was not used on a "crisis" basis I may say. It was used to restore congressional cuts in appropriations.

Mr. FULBRIGHT. The amendment assumes that we can always tell precisely what is going to be needed in any given area, whether it be programed or not programed. We know from our own experience that supplemental appropriations are made from time to time, and in some cases those appropriations are almost as large as the original appropriations. That shows the inability of Congress even in domestic situations to foresee exactly the size of a program and the needs of a particular program. That is also true in the foreign field.

It is the same procedure that we use in a domestic field in connection with supplemental appropriations. I submit it is impossible for the administration to foresee what contingency may arise, or to determine precisely the size of a given program.

The amendment would unduly interfere with the orderly administration of the program. Here again is an example of an effort to put obstacles in the way of an orderly administration of the program, which is a very difficult and complicated program. Again I say it is not a coincidence that those who support the amendment are those who are opposed to the program in toto. If we were to accept all the amendments that have been offered along this line, it would hamstring the whole program, and next year, I suppose, we would have to adandon it, because it would be completely futile. I assume this is part of the purpose of such amendments. It surely would do that. If we were to accept this amendment and amendments of a similar nature that is what would happen. I congratulate the Senator from Louisiana on his ingenuity in finding ways to make the administration of the program impossible. I hope the Senate will not accept the amendment.

I ask unanimous consent to have printed in the RECORD at this point a statement in explanation of the amendment.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR FULBRIGHT

USE OF CONTINGENCY FUND

Senator ELLENDER has proposed an amendment providing that no part of the contingency fund in section 451(b) may be used to augment any other appropriation in the Mutual Security Act unless the President finds that such augmentations are made necessary by considerations which were either entirely unforeseen or foreseen so tentatively as not to justify firm programing at the time of the presentation to the Congress.

The executive branch is opposed to this amendment since it is either unnecessary or intended to withdraw a very important and essential degree of flexibility on the use of the contingency fund to meet the requirements of our national interests.

For a number of years the Congress has authorized and appropriated funds under this section which could be used not only to meet needs which were unforeseen or were foreseen so tentatively as not to justify firm programing at the time of the presentation to Congress but also to make adjustments in various other aid categories above the amounts specifically appropriated for those categories of assistance. The facts of such use and of all other uses of the contingency fund have been fully and promptly reported to the Congress.

The need for this flexibility stems from the impossibility of either the executive branch or the Congress being able to forecast with precision the political, military and economic developments which will occur throughout the globe over a period extending from 6 to 18 months after the program is presented to the Congress. Particularly in the categories of defense support and special assistance the amounts proposed by the executive branch for authorization and for appropriation are necessarily forecasts of requirements which are based on assumptions as to the course of international developments over this future period. Similarly when the Congress acts to authorize and appropriate money for these categories of assistance it also makes judgments which are necessarily based on its assumptions as to what will transpire during this future period.

After appropriations have been made available, which is normally an appointed time, approximately a year after the executive branch estimates were formulated for presentation, it has been the practice of the executive branch to reassess needs in all categories of assistance in the light of fund availabilities and recent developments. Similar reassessments are made throughout the course of the fiscal year. The Congress has wisely provided in the contingency fund a means by which modest adjustments can be made in amounts available for various categories of assistance, when in the judgment of the executive branch such action is necessary in the national interest. Monthly reports of the use of funds are provided to the Congress and set forth the reasons for each such action.

The dimension of the contingency fund is less than 5 percent of the total appropriation being sought. The provisions of this modest flexibility clearly indicates that its purpose and potential are to reflect marginal adjustments rather than fundamental alterations in the use of funds.

If the sort of adjustments described which are necessitated by a reconsideration of the international situation at a later point in time are comprehended within the exception provided in the amendment, then the amendment has no effect and is unnecessary since it would merely describe the procedure being followed. If on the other hand the intention of the amendment is to prevent revisions in aid categories when a reconsideration of the situation in the light of existing facts warrant such action in the judgment of the executive branch, then it would represent an unwarranted and highly objectionable degree of rigidity and inflexibility in the handling of this program to which the executive branch would be strongly opposed.

Mr. LONG of Louisiana. Mr. President——

Mr. FULBRIGHT. I yield 1 minute to the Senator.

Mr. LONG of Louisiana. I am in opposition to the committee provision.

Mr. FULBRIGHT. That is all right.

Mr. LONG of Louisiana. I believe the amendment has a great deal of merit. It merely provides that the contingency fund shall be used for the purposes for which it was set up.

Every time we try to reduce the waste in the program we are told that we are against the whole program. Many of us are not opposed to the program itself but to the waste and graft and corruption in the program. If we could devise a foreign aid program which would eliminate most of the waste and mishandling of funds, I would be pleased to vote for it. However I for one will not be coerced to vote against an amendment merely because we are told that we do so because we are opposed to the whole aid program.

Mr. FULBRIGHT. Mr. President, did the Senator say that he would vote for an aid program?

Mr. LONG of Louisiana. Yes; if the program were limited to the purposes it espouses, rather than permitting such waste and mismanagement. I would be pleased to vote for that kind of program.

Mr. FULBRIGHT. Did the Senator vote for the one that was reported last year?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. LONG of Louisiana. Mr. President, will the Senator yield me 30 seconds more?

Mr. FULBRIGHT. I yield 30 seconds more.

Mr. LONG of Louisiana. I started out by voting for the program. I heard Arthur Vandenberg speak for it. I believe I voted for about the first $30 billion. Then I began to discover the fantastic mismanagement and graft. The more of this I see the more I am inclined to vote against it, in the hope that we can bring about an end to all this mismanagement and waste. Here there is an instance in which the advocates of this program have restored as contingency funds many of the same expenditures which Congress considered and refused to allow. I admire the senior Senator from Louisiana for trying to correct the situation.

Mr. DIRKSEN. Mr. President, I yield 2 minutes to the Senator from Idaho.

Mr. CHURCH. Mr. President, I feel constrained to support this amendment. I am not one who is generally opposed to the aid program. Rather, I am one who has supported it. The amendment merely undertakes to implement what Congress intended to provide at the time the President's contingency fund was written into this law.

I call attention to the language in the amendment. It reads:

> But in no instance shall the funds authorized under this chapter be used to augment any other category of assistance for which appropriations have been provided pursuant to the authority of this Act, unless the President finds that such augmentations are made necessary by considerations which were either entirely unforeseen or foreseen so tentatively as not to justify firm programing at the time programs authorized under this Act were submitted to the Congress.

This language is merely a restatement of the very purpose that Congress had in mind when the contingency fund was established. We expect the President to come to Congress, whenever he can foresee the need for money and present his argument for an authorization. We gave him a contingency fund for those cases where he cannot foresee the need, where an emergency develops, or where circumstances arise which were either entirely unforeseen, or foreseen so tentatively as not to justify firm programing at the time the regular programs are authorized.

Therefore, I suggest that all that is intended here is to prevent the use of the contingency fund for purposes which were never intended by Congress. It was never meant to be a general supplemental fund into which the President could dip whenever he wanted additional money for regular programs, in excess of the amount authorized by Congress. The fund was intended to be used in a contingency. The amendment is consistent with the purpose of the contingency fund as originally intended by Congress. I therefore shall support the amendment.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DIRKSEN. Mr. President, I yield 1 minute to the Senator from Arkansas.

Mr. FULBRIGHT. Interpreted as the Senator from Idaho interprets the amendment, it has meaning. Under the law the President must find that a contingency exists and report to the Congress. If that is the meaning which is intended by the author, I would be willing to accept it, but I think it is a very equivocal amendment, and would provide less discretion in the administration of the act.

Mr. DIRKSEN. Mr. President, I yield myself 2 minutes. I believe it is generally agreed that this is a pretty fluid world. When we made provision for the contingency fund we had in mind situations which could not be readily foreseen.

The provision we are considering involves only 5 percent of the total money in the authorization bill. However, there is a requirement that the authorization must be reported every 30 days, and the reasons for the expenditure out of the contingency fund have to be set forth.

How is the President going to foresee, or reasonably foresee, or tentatively foresee, what expenditure will be necessary? Who could foresee that the Turkish students would strike? Who could readily foresee the Korean situation? Who could foresee that the United States would send marines to Lebanon? Who could foresee some of the situations which have arisen in Africa?

Yet this amendment provides that unless the President finds—he has to make a finding—that such augmentations, meaning increases, are rendered necessary as a result of considerations which were either entirely unforeseen or tentatively foreseen, programing at the time is not justified.

Think of $175 million as a contingency fund for a country having a population of 180 million, and which is the most powerful nation in the world. If that is not a bagatelle, I never saw one. If we are to write words into the statute which are difficult to interpret, to begin with, we will tie the hands, not of the Presi-

dent, but of the Commander in Chief, which is quite another consideration.

I hope this amendment, with its rather singular language, will be rejected. I am prepared to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana [Mr. ELLENDER]. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from West Virginia [Mr. BYRD], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Alabama [Mr. HILL], the Senator from Oklahoma [Mr. KERR], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

I further announce that if present and voting, the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], and the Senator from Missouri [Mr. SYMINGTON] would each vote "nay."

On this vote, the Senator from Oklahoma [Mr. KERR] is paired with the Senator from Ohio [Mr. YOUNG]. If present and voting, the Senator from Oklahoma would vote "yea," and the Senator from Ohio would vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

The Senator from Indiana [Mr. CAPEHART] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from Indiana would vote "nay," and the Senator from Nebraska would vote "yea."

The yeas and nays resulted—yeas 43, nays 43, as follows:

[No. 179]

The PRESIDING OFFICER (Mr. CANNON in the chair). On this vote, the yeas are 43; the nays are 43; and the amendment is rejected.

Mr. DIRKSEN. Mr. President, I move that the vote on the amendment be reconsidered.

Mr. KUCHEL. Mr. President, I move to lay on the table the motion to reconsider.

Mr. ELLENDER. Mr. President, on the question of agreeing to the motion to lay on the table the motion to reconsider, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

The yeas and nays were not ordered.

Mr. MANSFIELD. Mr. President, I ask for the yeas and nays on this question.

The PRESIDING OFFICER. Is there a sufficient second?

The yeas and nays were ordered.

Mr. DOUGLAS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Illinois will state it.

Mr. DOUGLAS. What is the pending question?

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

Mr. DOUGLAS. The vote will be on the motion to lay on the table, will it not?

The PRESIDING OFFICER. The vote will be taken on the question of agreeing to the motion to lay on the table the motion to reconsider.

On this question, the yeas and nays have been ordered; and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Alabama [Mr. HILL], the Senator from Oklahoma [Mr. KERR], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

If present and voting, the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Ohio [Mr. YOUNG] would each vote "yea."

I further announce that if present and voting the Senator from Oklahoma [Mr. KERR] would vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent and, if present and voting, would vote "yea."

The Senator from Indiana [Mr. CAPEHART] is absent on official business, and if present and voting, would vote "yea."

The yeas and nays resulted—yeas 44, nays 44, as follows:

NOT VOTING—12

Anderson	Hruska	Morton
Bridges	Humphrey	Sparkman
Capehart	Kennedy	Symington
Hill	Kerr	Young, Ohio

The VICE PRESIDENT. Under the Constitution, the Vice President, having the right to vote in the case of a tie, casts his vote in the affirmative.

So the motion to lay on the table the motion to reconsider the vote by which the Ellender amendment to the committee amendment was rejected, was agreed to.

Mr. LONG of Louisiana. Mr. President, I call up my amendment at the desk and ask that it be stated.

The VICE PRESIDENT. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. On page 19, line 15, it is proposed to strike out "$175,000,000" and to insert "$155,000,000."

Mr. LONG of Louisiana. Mr. President, the effect of this amendment would be to reduce the amount of money available to that allowed last year.

The Senate has, by a tie vote, refused to require that the contingency fund be limited to contingencies. In the last year, for the contingency fund, the Congress voted an amount of $155 million. The amendment I have offered would limit the contingency fund to the amount voted.

The committee report states that this money is to be used for things like the situation which developed on Taiwan, or the crisis which developed in Indochina some time ago. None of those things happened this last year. In spite of the fact that there was no genuine contingency which developed in the first 6 months of this year, this fund has been

used in many instances to restore the cuts which Congress made when it carefully considered the appropriations for foreign aid last year.

For example, last year Congress cut the defense support funds. That misleading term represents nothing more than economic aid for countries which are also getting military aid. Otherwise it is called special assistance. Congress cut the amount some $55 million. Although there has been no genuine contingency anywhere in the world upon which to base the expenditure, $67 million of defense support has been restored already. That figure exceeds the cut by $12 million, and there was still 5 months to go as of the date of these figures.

Senators realize there is no real need for economic aid which could be classified as a genuine contingency.

Congress cut the amount for special assistance last year by $23 million, yet $14 million has already been put back into the fund. This is simply economic aid to countries which do not get military aid. At the rate things are going, the entire amount will be restored by the time the fiscal year is ended.

The House of Representatives, having knowledge of these same facts, cut the amount from a $175 million request to $100 million. The Senate committee approved the administration request without any reduction whatever.

Mr. President, when this matter was voted on in the committee I wrote on my ledger sheet that this was simply a little extra amount being put in, an amount of 75 percent more, an extra $75 million over the House figure, so that the conferees would have something with which to bargain, so that they might be able to pry a little more from the House and end up with a bigger figure.

As Senators know, if Senators will vote for this amendment they will vote to make a $20 million saving, and the chances are that we will wind up with a saving of about $10 million by the time the matter has finished the conference, since no doubt it will be adjusted in the conference, and usually there is an agreement between the two Houses at somewhere near the midway point between the figures in dispute.

This is an amount simply for contingencies, none of which we see at the moment. We should hold the amount down to what was granted last year. We should realize fully that as of January 30 there had been spent some $118 million, from the $155 million, with no real contingency.

If we really do get into some trouble in Korea, or if we really do get into some trouble in Vietnam, it will be necessary to call the Congress back into session, so that we can appropriate some money, which should have been available for contingencies, simply because two-thirds of the money, or almost three-fourths of the money, has been used for things which are not real contingencies at all.

We ought to limit the amount to what we made available last year, recognizing that the money has not been used for the purposes for which it was appropriated, anyway.

Mr. FULBRIGHT. Mr. President, I yield myself 4 minutes.

The VICE PRESIDENT. The Senator from Arkansas is recognized for 4 minutes.

Mr. FULBRIGHT. I do not know that it is necessary for me to say anything in this regard. The issue is very simple. The House allowed $100 million, and we recommended $175 million.

I need not tell the Members of this body what are the usual procedures in the Congress. We can forecast approximately where this item will end. The Senator from Louisiana wants to limit the amount to $155 million. That would, in effect, lower the amount.

The Senator says that he cannot foresee any contingencies. If I had greater confidence in the foresight of the Senator, and if I could take his statement as an assurance that there would be no contingencies and that we would have peace in the world, I would gladly go along with the Senator on his request. For some reason or other, I cannot bring myself to accept the Senator's prophecy as to what the state of the world will be during the next 12 or 18 months. I think it is much more likely that there will be need for the money.

This is, in effect, that element in the program which gives the administration some degree of flexibility. The Secretary of State, in discussing the action of the House with me, made it clear that this is one element which he thinks is most important.

Of course, the critics of the program are against it. Again, we see an amendment offered by those who are against the whole program, not simply against the provision for contingencies. The Senators are not really concerned about this item, but they are against the whole program. They have consistently sought to defeat the entire activity.

This is a very sad bill, which we have to consider each year. It is a bill none of us likes to present, and we do so without a great deal of pleasure, and only because it is a necessity for our defense.

I think the section we are considering is one of the most important parts of the bill, because it will enable the President to meet the contingencies which we do not foresee. No man can foresee what will be the necessities in a variety of places in the world. If we assume that the President has reasonable honesty and integrity, then if there are no contingencies, he will not spend the money.

The fact of the matter is that the needs involved in this program are much larger, overall, than are apparent. Of course, there must be a scrambling around, and the President must use much of the contingency fund, because the needs are much greater than the appropriations, in the regular program.

I do not know that I can add much to what all Senators know about the program. We have gone over this precise argument year after year, for 10 years. This item is always subject to attack, because it is not programed precisely.

I hope the Senate will not put a further obstacle in the way of a reasonably orderly administration of the bill.

Mr. DIRKSEN. Mr. President, I yield myself 2 minutes from the time on the bill.

The VICE PRESIDENT. The Senator from Illinois is recognized for 2 minutes.

Mr. DIRKSEN. Mr. President, there is little to add to what the chairman of the Committee on Foreign Relations has already said. The language of the bill provides that there is authorized to be appropriated not to exceed $175 million. The Appropriations Committee, in good time, may have occasion to cut the amount. Who can say? This is a ceiling.

Certainly, in a fluid, feverish world, this is not too much.

I made the point before that when we make available the contingency fund we might think of it as a fund for the President; but it is also a fund for the Commander in Chief. As these sporadic situations develop in all parts of the world, if the Congress is not in session the fund has to be available.

A report is made each and every month. Reasons are assigned for expenditures. Those are set out in detail. If there is no need to expend the funds, they will not be expended.

Mr. President, I hope that the $20 million cut from $175 million to $155 million, as proposed, will not be made. I hope the amendment will be defeated.

I am prepared to vote.

The VICE PRESIDENT. Does the Senator from Arkansas yield back the balance of his time?

Mr. LONG of Louisiana. Mr. President, I do not yield back my remaining time.

The VICE PRESIDENT. The Senator from Louisiana has 1 minute remaining.

Mr. LONG of Louisiana. Mr. President, the administration has already been authorized to spend, for this year, $700 million more in military aid than was provided last year. The contingency funds used some $67 million in the first 6 months of this year, as I say, without any real contingency at all, for the defense support, and for military assistance there has been spent $31 million.

We expect that foreign aid expenditures for this year will exceed last year's expenditures, anyway. In addition, we have the fact that two-thirds of the money has already been spent simply to restore the cuts which Congress voted last year.

If there is any real contingency, Mr. President, Congress will have to come back into session and provide the money, anyway. This is one item we can take a second look at. If we make a mistake, we can always come back and vote to provide another $155 million, if necessary.

Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

The VICE PRESIDENT. Does the Senator from Arkansas yield back the balance of his time?

Mr. FULBRIGHT. Mr. President, I yield back the balance of my time.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Louisiana [Mr. LONG]. On this question the yeas and

nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Alabama [Mr. HILL], the Senator from Oklahoma [Mr. KERR], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Ohio [Mr. YOUNG] would each vote "nay."

On this vote, the Senator from Oklahoma [Mr. KERR] is paired with the Senator from Massachusetts [Mr. KENNEDY]. If present and voting, the Senator from Oklahoma would vote "yea," and the Senator from Massachusetts would vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

The Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Indiana [Mr. CAPEHART]. If present and voting, the Senator from Nebraska would vote "yea," and the Senator from Indiana would vote "nay."

The result was announced—yeas 48, nays 40, as follows:

NOT VOTING—12

Anderson	Hruska	Morton
Bridges	Humphrey	Sparkman
Capehart	Kennedy	Symington
Hill	Kerr	Young, Ohio

So the amendment of Mr. LONG of Louisiana to the committee amendment was agreed to.

Mr. LONG of Louisiana. Mr. President, I move that the Senate reconsider the vote by which the amendment was agreed to.

Mr. RUSSELL. Mr. President, I move that that motion be laid on the table.

The motion to table was agreed to.

Mr. ELLENDER. Mr. President, I call up my amendment identified as "4-28-60—J."

The PRESIDING OFFICER (Mr. MUSKIE in the chair). The clerk will state the amendment.

The CHIEF CLERK. At the proper place insert the following:

Section 401 of the Mutual Security Act of 1954, as amended, is further amended by deleting the last sentence thereof, striking the period after the word "force", inserting a comma in lieu thereof, and adding the following: *"Provided, however,* That no funds authorized under this Act shall be used to extend financial or other support to the United Nations Emergency Force in the Middle East in excess of the contribution levied upon the United States by the United Nations, in accordance with the regular assessment scale for the United Nations budget."

Mr. ELLENDER. Mr. President, I yield myself 4 minutes.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for 4 minutes.

Mr. ELLENDER. Mr. President, this amendment deletes authority presently provided in the Mutual Security Act for the United States to contribute special assistance funds to augment financial support for the United Nations Emergency Force in the Middle East over and above the contribution levied upon the United States by the United Nations in accordance with its regular assessment scale.

The pertinent portion of the committee report reads as follows:

The Force's budget for calendar year 1960 is $20 million, which is met in part through assessments of U.N. members according to the regular assessment scale for the U.N. budget. Inasmuch as the total U.N. budget, other than UNEF, is only $60 million, this results in a substantial addition to the assessments and has been found particularly burdensome by some of the smaller, poorer members. Because of their very great interest in maintaining peace in the area, the United States and the United Kingdom have made voluntary contributions to UNEF over and above their assessments, and these contributions are used to reduce the assessments of U.N. members least able to pay.

In calendar year 1957, the United States contributed $12.9 million over and above its assessment toward a UNEF budget of $30 million. In 1958, it contributed nothing and in 1959, $3.5 million out of fiscal 1960 funds. It is proposed to contribute $3.2 million in calendar 1960 out of fiscal 1961 funds. This contribution, plus the U.S. assessment of $6.5 million, will mean a U.S. payment of 48.5 percent of UNEF's budget.

Some of us have worked hard on the floor of the Senate in order to reduce the payments made by the United States to the U.N. to not more than one-third cost of any U.N. agency. Yes, we are contributing to the United Nations Emergency Force a certain sum over and above our usual assessment. The reason given is that some of the nations which are members of the United Nations are too poor, too small, and so on to pay their assessed share.

How is it possible for anyone to argue that the United States can continue to pour billions of dollars into the foreign aid program and still remain solvent? We have fought for many hours on this very floor in order to reduce the contributions which we make to the United Nations, to not more than one-third. Now we are confronted with an effort to break our rule, and to make our contribution to UNEF instead of one-third, 48½ percent. The argument given is that many of the smaller countries are too poor to make their own contributions.

The United States today owes $290 billion. How are we going to pay it? Only God knows. If the truth were known, we are incapable of continuing the large contributions and donations which we are now making.

I ask that the amendment be agreed to.

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired.

Mr. MANSFIELD. Mr. President, I yield myself 2 minutes in opposition to the amendment.

I recall the fights put up year after year by the distinguished senior Senator from Louisiana, seeking to bring down the percentage which the U.S. Government pays into the United Nations and its subsidiary organizations. However, I point out that the United Nations Emergency Force in the Middle East has been established on a special basis to take care of a particular and a most delicate situation.

I believe that when we speak in terms of a few extra dollars or a few added percentage points, we are making a contribution to an investment in peace in an area which has been in the grip of an uneasy truce since long before the United Nations Force was sent there.

We realize that 48½ percent of the total appropriation to maintain the United Nations Force in the Middle East is much more than the 33⅓ percent which we contribute to the United Nations in general, but I think it is money well spent. I believe the United Nations Force, which really ought to be expanded into a United Nations police force, on call at all times, more than repays the United States for the amount of money which we contribute toward its maintenance. I think 48½ percent of the total cost is a very cheap price.

I hope the amendment will be rejected.

Mr. MORSE. Mr. President, will the Senator from Montana yield me 1 minute?

Mr. MANSFIELD. I yield.

Mr. MORSE. I have supported the Senator from Louisiana in most of his amendments aimed at eliminating the millions and millions of dollars of waste in our economic and military aid programs—particularly the military aid program. I agree with his general thesis that we have to stop the tapping of the American Treasury and the taxpayers

of the United States in order to perpetuate this horrible waste, because much of the money is going down the drain.

I am opposed to this amendment, because the funds authorized in this section of the bill are aimed at strengthening the United Nations in consideration of the great goal we have to accomplish namely, the establishment of a system of international justice through law for the settlement of issues which threaten the peace, enforced by the United Nations. In my judgment, this money is needed in order to strengthen that principle. Therefore, on this occasion, I shall vote against the amendment of the Senator from Louisiana.

Mr. FULBRIGHT. Mr. President, I yield myself 2 minutes. I hope the Senate will not accept this amendment. As has already been stated by the Senator from Montana [Mr. MANSFIELD] and the Senator from Oregon [Mr. MORSE], this is a very important item. The sum is comparatively very small. There is involved a total of $3,200,000. In relation to the total amount involved in the bill, this is a very small amount.

Many dangerous outbreaks have occurred in this area. Some have taken place this spring. It would be very shortsighted, in my opinion, to liquidate the United Nations Emergency Force in this area.

I hope the Senate will reject the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. ELLENDER. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment offered by the Senator from Louisiana.

The amendment was rejected.

Mr. ELLENDER. Mr. President, I call up my amendment designated "4–28–60—Q," and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 22, beginning with line 18, it is proposed to strike out all through line 20.

Mr. ELLENDER. Mr. President, the purpose of the amendment is to delete from the bill a provision which calls for an increase from $2.75 million to $4.25 million in the present ceiling on the amount of funds available in foreign countries, excluding Korea, for the construction or acquisition of living quarters, office space, and other facilities for use by personnel employed under the mutual security program. For further details, I refer Senators to page 29 of the committee report.

In this connection, it should be noted that one of the major reasons cited for the need for this increase is the fact that Pakistan is moving its capital from Karachi to Rawalpindi. This factor alone would eat up $1 million in the new authority.

It should also be noted that the committee report asserts that the facilities constructed will have "residual value to the United States or to the host government when the aid program terminates."

In other words, we will probably have to do exactly what we have done in Germany, that is, turn the facilities built by us over to the local government, if any, when we terminate the foreign aid program.

Mr. President, one of the things which has caused us much trouble abroad is that our people have built lavish homes in countries like India, and by lavish, I mean homes equal to the homes which are built in the United States—homes lavish by foreign standards. This has caused much dissatisfaction in countries with aid missions, and lends credence to the theory that Uncle Sam is rich, and well able to support a huge aid program. It now seems we are embarking on a large-scale, worldwide program to build offices and homes for the people who administer the foreign aid program. In other words, this is a step in the direction of making these programs permanent. We are using good, hard cash—borrowed money, at that—to build offices and homes for the Americans who will administer the foreign aid program abroad.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. YARBOROUGH. I desire to ask the distinguished Senator from Tennessee what——

Mr. ELLENDER. Excuse me; I am from Louisiana, although I admire the State of Tennessee.

Mr. YARBOROUGH. I beg the Sentor's pardon. The Senator's State of Louisiana sent many volunteers to the Texan army in the Texas revolution. I had confused Louisiana with Tennessee, which is known as the Volunteer State. But both States contributed a large number of volunteers to the battle for the independence of Texas.

My question is this: When foreign aid money is used to build better homes for the American administrators of the program than the natives of those countries are able to build for themselves, what effect does such building on our part have on them? Does it build up resentment against Americans?

Mr. ELLENDER. It builds up a great deal of resentment. The Senator knows of the difficulty we had in Korea. The Koreans resented the fact that our people live in much better homes than anyone else in Korea, even the richest people there.

The same has occurred in Formosa, and in the Philippines.

In this case we are embarking on a building program in Africa. I presume that the homes and offices which would be built for our people in those countries would be somewhat similar to those in the United States. This program would be just a foot in the door.

We curtailed the building program in Korea. I hope no more buildings will be constructed for our people in Korea. If we begin this program in Africa and in other countries where the foreign-aid program has just taken root, there will be no telling how much will be spent in the future.

I would rather see our administrators use the facilities which exist there, rather than build sumptuous homes and office buildings to carry on this program.

Mr. FULBRIGHT. Mr. President, I yield myself 4 minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 4 minutes.

Mr. FULBRIGHT. As the Senator from Louisiana has pointed out, one of the major costs in this case is that of providing facilities for living quarters in the new capital of Pakistan. This is a move which we cannot avoid if we are to carry on the program at all in this very important country. Some quarters must be made available for our personnel there.

I have not been to Rawalpindi, but I have been to Pakistan; and the quarters there are very inadequate.

In Africa, no quarters at all exist for our personnel in many of the countries.

So this is not a question of building fine homes; it is a question of having available any facilities at all for living and for education. The money is to be used primarily for those purposes, in these areas.

This is another instance in which some Senators attempt to pull in two different directions. Senators who oppose the bill complain about graft; but one of the reasons for the resignation of many of the very well qualified people is the lack of quarters for them to live in and the lack of educational facilities for their children. So it is extremely difficult to get well-qualified people to serve in this program.

In most of the established countries we have done a fairly good job of providing such facilities for our Foreign Service personnel. That has been a quite expensive process; but all of us are familiar with it, and I do not think there is much complaint about that activity. But in this field, such facilities are very badly needed.

Senators should make up their minds about either having a program, and then trying to get well-qualified persons who are enthusiastic about this program to serve in connection with it; or the program should be eliminated. The continual attempt to weaken the program and prevent the procuring of good personnel for it is, in my opinion, practically disastrous, because we spend our money, but we do not get good results.

After all these years, I believe Senators should make up their minds. I believe the Senate should decide, as a body, whether the program is to be continued or whether it is to be ended. If the program is to be continued—and I believe that decision has been reached—we should not vote to put obstacles in the way of the efforts of the administration to improve the quality of the personnel who administer the ICA.

This amendment is a very simple one; I do not know that there is much more to be said about it.

I hope the Senate will reject the amendment.

Mr. HICKENLOOPER. Mr. President, will the Senator from Arkansas yield briefly to me?

Mr. FULBRIGHT. I yield to the Senator from Iowa the remaining time available to me.

Mr. HICKENLOOPER. I do not wish to take much time.

Mr. FULBRIGHT. I do not believe very much time remains available to me.

Mr. HICKENLOOPER. I wish to say that on this question I agree with the Senator from Arkansas. Housing is very urgently needed for these people. Either we are to have a program of this sort, or we are not going to have one. I certainly hope the amendment will be rejected.

The PRESIDING OFFICER. Is all remaining time on the amendment yielded back?

Mr. ELLENDER. I yield back the remainder of the time under my control, Mr. President.

Mr. FULBRIGHT. Mr. President, I yield back the remainder of the time under my control.

The PRESIDING OFFICER. All remaining time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Louisiana.

Mr. ELLENDER. Mr. President, on this question, I ask for a division.

Mr. FULBRIGHT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. KUCHEL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment lettered "Q" of the Senator from Louisiana.

Mr. KUCHEL. Mr. President, on this question, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment lettered "Q" of the Senator from Louisiana. On this question, the yeas and nays have been ordered; and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Alabama [Mr. HILL], the Senator from Montana [Mr. MURRAY], the Senator from Virginia [Mr. ROBERTSON], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

On this vote, the Senator from Minnesota [Mr. HUMPHREY] is paired with the Senator from Montana [Mr. MURRAY]. If present and voting, the Senator from Minnesota would vote "nay," and the Senator from Montana would vote "yea."

The Senator from Virginia [Mr. ROBERTSON] is paired with the Senator from Missouri [Mr. SYMINGTON]. If present and voting, the Senator from Virginia would vote "yea," and the Senator from Missouri would vote "nay."

I further announce that if present and voting, the Senator from Massachusetts [Mr. KENNEDY] and the Senator from Ohio [Mr. YOUNG] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

The Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Indiana [Mr. CAPEHART]. If present and voting, the Senator from Nebraska would vote "yea," and the Senator from Indiana would vote "nay."

The result was announced—yeas 38, nays 49, as follows:

[No. 182]

YEAS—38

Bartlett	Eastland	Magnuson
Beall	Ellender	Moss
Bible	Ervin	O'Mahoney
Butler	Frear	Proxmire

Anderson	Humphrey	Sparkman
Bridges	Kennedy	Symington
Capehart	Morton	Young, Ohio
Hill	Murray	
Hruska	Robertson	

So Mr. ELLENDER's amendment to the committee amendment was rejected.

Mr. FULBRIGHT. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. KUCHEL. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California to lay on the table the motion of the Senator from Arkansas to reconsider.

The motion to lay on the table was agreed to.

Mr. ELLENDER. Mr. President, I call up my amendment "4–28–60—R."

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. On page 21, beginning with line 17, it is proposed to strike out through line 20.

Mr. ELLENDER. Mr. President, this is a very simple amendment and one which I think every Senator ought to vote for.

This amendment would delete the committee amendment which authorizes six additional supergrades in ICA. As the committee report points out, last year Congress approved an increase of 10 supergrade positions. This has proved to be an insufficient number, and ICA wants authority to increase by six the number of persons who may be compensated at rates from $12,700 per year to $17,500 per year, without regard to the provisions of the Classification Act. All of these persons would be employed in the United States—in other words, six more high-powered, high-paid bureaucrats to run the already top-heavy ICA program.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. ELLENDER. I hope the amendment will be agreed to.

Mr. JOHNSTON of South Carolina. The Committee on Post Office and Civil Service is supposed to handle these matters. Our committee is supposed to hold hearings and to pass upon the supergrades. Now requests are being made for these supergrades in the various bills, as they come before the Senate, instead of having the matter brought to the attention of the proper committee, to let the committee decide what grades there ought to be in the various and sundry departments. If we are going to start this procedure, then we will have some headaches in the future.

Mr. ELLENDER. Mr. President, I hope that the amendment will be agreed to. I am not going to argue further.

Mr. JOHNSTON of South Carolina. I am supporting the amendment.

Mr. ELLENDER. I thank the Senator.

Mr. FULBRIGHT. Mr. President, I yield myself 4 minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 4 minutes.

Mr. FULBRIGHT. Mr. President, the reason for the increase in personnel is that the personnel are needed because of the action of the Congress, and particularly of the Senate. I think the Senator from Louisiana certainly had something to do with the matter. We required that there be created an Office of Inspector General and Comptroller. That was the main part of the problem. There was also a decision by the executive branch that the Development Loan Fund had to have an additional supergrade for its administration.

This is an example of much the same thing we have considered before. We require that steps be taken to prevent maladministration. We say, "You must set up an Office of Inspector General." Then, when there is a request for personnel to staff the Office, we are asked to say, "You cannot have the personnel. This would be wasteful. We cannot permit you to have this."

It seems to me that this is much the same as the other amendments offered by the Senator from Louisiana. The Inspector General has been created, in a sense, for the special benefit of the Senator from Louisiana and his colleagues who believe that there is maladministration in the program. I suggest if we

are not going to staff the Office properly, to try to improve the quality of administration, we ought to abolish it altogether.

I often wonder what would happen if we would say tomorrow, "There will be no more foreign aid program." We could stay at home and let everything take its course outside the boundaries of the United States. That would be a very interesting experiment. I am sometimes inclined to think it would relieve us from a lot of internal pulling and hauling every year.

If we are going to have a program, we might as well make some effort to administer it properly. If we have an Inspector General, he should be able to report to the Congress about the so-called and alleged mismanagement and waste.

I would hope that the Inspector General not only would report but also would, in his activities, find ways to improve administration and to prevent whatever waste and maladministration exists.

I agree with the Senator, this does not present a difficult problem. It is a very simple problem. If we do not wish the Department to have the staff for these offices which Congress required them to create, it would be obviously a rather ridiculous situation.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. ELLENDER. Mr. President, I yield the rest of my time to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. JOHNSTON of South Carolina. Mr. President, I should like to state that in the Reorganization Act the duties of the committees were set out. The Post Office and Civil Service Committee has the right and the duty to set up the different regulations in regard to various and sundry departments and the workers in the various and sundry departments, as well as the classifications of them. If the Senate is going to take the work away from that committee, then the Senate can vote to keep this item in the bill and can vote against the amendment before us at the present time. If the departments want extra help, they can come before the committee. We have some hearings which are scheduled to start next Tuesday at 10 o'clock. We are going to hold hearings in the committee in regard to salaries, and when we are discussing salaries we will discuss classifications.

Mr. FULBRIGHT. Mr. President, will the Senator yield on that point?

Mr. JOHNSTON of South Carolina. I yield.

Mr. FULBRIGHT. These people are employed from year to year. These are not civil servants, or at least most of them are not. We cannot get people to come into these grades on an annual basis. These are the supergrades, for this particular service.

Mr. JOHNSTON of South Carolina. We pass upon the supergrades also.

Mr. ELLENDER. I will say that all the six additional supergrades involved would be in Washington, D.C. These people would not go abroad; but they would be in Washington.

Mr. FULBRIGHT. As I say, the Inspector General has a home base in this city. As an illustration, as a result of the study of the Senator from Montana [Mr. MANSFIELD] of the Vietnam situation, as I recall, the Senator instructed the Inspector General to perform some very effective reporting and investigation.

It was to deal with such situations that the Office was created. The Inspector General's Office is here, but his work is all over the world, wherever investigation is needed. That is what the main part of the activity is for.

Mr. GRUENING. Are the new officials, the Comptroller General and the Inspector General, to be outside officials, or are they members of the ICA, who are merely to be promoted within the organization?

Mr. FULBRIGHT. They are in the State Department, reporting directly to Under Secretary Dillon, I believe.

Mr. ELLENDER. But they were all already employed by the ICA. Mr. Murphy, the Inspector General, was. He was Comptroller of ICA.

Mr. FULBRIGHT. Yes.

Mr. MANSFIELD. They occupy a unique and independent status, in that they are not subject to what the ICA desires.

Mr. ELLENDER. But they are former employees of ICA.

Mr. MANSFIELD. They are employees of the Inspector General, and they occupy a unique and special position.

Mr. President, I yield 2 minutes to the distinguished Senator from Kansas.

Mr. CARLSON. Mr. President, I opposed the section of the bill which permitted the creation of six additional supergrades when the question was before the committee. I stressed the fact that the supergrade positions should be authorized and approved by the Post Office and Civil Service Committee. I did not oppose the proposal because I did not believe the administration was entitled to those grades and salaries, but I felt that the recommendation should come from the proper committee, and that we should not start authorizing supergrade positions in every bill before the Congress.

So far as I am personally concerned—and I am sure the chairman of the committee will agree with me—when this matter is before the committee I shall ask that we allow six additional supergrades for these positions, provided they are justified—and I believe they are. But I do not believe we ought to do it in connection with the pending bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Louisiana [Mr. ELLENDER]. Is all time yielded back?

Mr. ELLENDER. Mr. President, I yield back the remainder of my time.

Mr. FULBRIGHT. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Louisiana [Mr. ELLENDER].

Mr. ELLENDER. Mr. President, I ask for a division.

On a division the amendment to the committee amendment was agreed to.

Mr. JOHNSTON of South Carolina. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment offered by the Senator from South Carolina will be stated.

The CHIEF CLERK. On page 20, in the committee amendment, between lines 21 and 22, it is proposed to insert the following:

(d) In section 510, which relates to purchase of commodities, strike out the third sentence and substitute the following: "Funds made available under chapter II of this Act may not be used for the procurement of a commodity outside the United States: *Provided*, That not more than 65 per centum of such funds from appropriations for the fiscal year ending on the date of enactment of the Mutual Security Act of 1960 may be used for the procurement of a commodity outside the United States if the President determines that such procurement will not result in adverse effects upon the economy of the United States, with special reference to any areas of labor surplus, or upon the industrial mobilization base, or to the net position of the United States in its balance of trade with the rest of the world, which outweigh the economic advantages to the United States of less costly procurement abroad, except that if the President determines that the rate of employment in an industry producing a commodity is depressed, none of such funds shall be used for the procurement of such commodity outside the United States."

It is proposed to redesignate subsections (d) to (i) inclusive, as (e) to (j), respectively.

Mr. JOHNSTON of South Carolina. Mr. President, I yield myself 4 minutes.

Under existing law, the President of the United States is given authority to use defense support funds and development loan funds in any amount for procurement outside the United States, unless in his opinion the expenditure of such funds would be detrimental to the general economy of the United States, with special reference to any areas of labor surplus, our net balance of trade on the world market, and similar situations.

This amendment would modify the law to confine the President's discretion in such purchases to 65 percent of the defense support funds, the development loan funds and additionally the funds contained in the special assistance programs contained in chapter 2 of the bill.

It is now argued that more than the 35 percent of the funds my amendment requires to be spent in the United States is now already spent in the United States under the program. This may be true, but it is not done so because it is law. Insofar as I am concerned, it is a coincidence and I think American labor, American industry, and the American economy is entitled to the guaranteed protection outlined in my amendment. If the program already is spending more in the United States than my amendment requires, then there should be no objection to my amendment.

Someone has called my amendment a "buy American" amendment.

If one wants to call it that, then I proudly accept the label, because I think it is high time we begin thinking in terms of buying American and protecting our American economy. I can think of no better place to start protecting the American economy than to adopt my amendment; unless it would be the cutting back of foreign-aid funds or the cutting out of foreign aid altogether. It is at least an expression of the Congress and the American people that we are in the mood to reverse present thinking and place America first, for a change.

This amendment requires the purchase of only 35 percent of American goods. It is claimed that 50 percent of American goods is now being purchased. That was the testimony. But purchases of American goods are being cut back every year. Last year, for example, for the first time since the Civil War, England sold us more than we sold to England. It will be found that the same thing is true throughout our economy. We have reached the point where we are purchasing more than we are selling, and our gold is being shifted out of balance. So I am urging a little protection by requiring that 35 percent of the money be used for purchases from the United States, to protect our American industry and our American labor.

It is up to the Senate to decide what to do in regard to this particular amendment. I think the chairman of the committee will admit that more than 35 percent of the money is being used at the present time for purchases in the United States. But when we are furnishing the money, there should be some protection in the future for our economy.

Mr. FULBRIGHT. Mr. President, I yield myself 4 minutes.

It is true that at the present time a considerably larger percentage of American goods is being bought than would be required under the first proviso of the amendment. There is a difference in administration.

First, the amendment prohibits buying anything abroad, and then places on the President the duty of finding that such purchases would not injure our industry. Up to 65 percent could be purchased abroad.

The second proviso is that if the industry producing a commodity is depressed, none of the funds can be sent abroad.

If this amendment were adopted, at least 15 or 20 supergrade positions would be necessary in order to follow out what is happening to each of the commodities involved in this kind of program.

The amendment is not clear as to whether or not the percentage applies across the board to all commodities, or whether it means 65 percent of each commodity within the whole group.

For example, take an item such as cement. If the cement industry should be depressed, no cement could be purchased abroad. It would have to be bought here and shipped abroad for whatever purpose the cement is used. Cement is one of the heaviest and most expensive commodities to ship abroad. I believe it would require an army of accountants to administer this kind of amendment, and keep up with developments—certainly that is true if each commodity is to be required to qualify under these percentages.

If we interpret the amendment as applying across the board, as the Senator has already said, we already purchase in the United States far more than his minimum. I see no reason to encumber the legislation with this kind of amendment. I do not think there is any need for this kind of amendment. If it could be administered without too many accountants, it would not do any particular harm. I yield back the remainder of my time.

Mr. JOHNSTON of South Carolina. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time for debate has expired. The question is on agreeing to the amendment offered by the Senator from South Carolina. [Putting the question.] The noes appear to have it.

Mr. JOHNSTON of South Carolina. Mr. President, I ask for a division.

On a division the amendment was rejected.

Mr. LAUSCHE. Mr. President, I call up my amendment which was originally identified as "4–20–60—A," but in which there have been some slight changes made.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 13, beginning with line 4, strike out over through line 12. Also on page 13, beginning with line 20, strike out over through line 11 on page 14.

Mr. LAUSCHE. Mr. President, the mutual security bill as it deals with the Development Loan Fund, in its purpose clause, declares that the funds in the Fund shall be used for the promotion of free enterprise in the various nations of the world where the Development Loan Fund would be applied.

The Senator from Florida [Mr. SMATHERS] and the Senator from Oregon [Mr. MORSE] submitted an amendment emphasizing the need of giving special attention, through the Development Loan Fund, to lending money and making guarantees for the purpose of establishing building and loan associations in South America.

It is my understanding that the building and loan associations of this country would like to go into South America, with the aid of loans made by the Development Loan Fund and guaranteed by that Fund to insure a recoupment of losses which might be sustained in the operation of their businesses.

The committee amendment offered by the Senator from Florida and the Senator from Oregon confines this new activity to South America.

As I have already stated, this purpose of the Development Loan Fund already makes possible the use of the Development Loan Fund specifically for the intentions contemplated by the amendment submitted by the Senator from Florida and the Senator from Oregon.

In my opinion, we will make a mistake if we change the purpose clause and add a new section emphasizing that the Development Loan Fund must primarily be used in the financing of building and loan associations in South America.

Senators might ask me why I feel that we will be making a mistake. In a measure we will be earmarking funds in the Development Loan Fund. If this year we emphasize that they shall be used for the establishment of building and loan associations, next year a Senator may come before the Senate and say, "Now let us earmark and emphasize the use for schools and hospitals and other purposes." The result will be that we will have a series of amendments offered for the use of these funds for one purpose or another.

Inasmuch as the law as it now exists allows the use of this money for the purposes embodied in the amendment of the Senator from Florida and the Senator from Oregon, it is my belief that the amendment ought not to be included in the bill. The State Department does not favor this provision in the bill. It points out that since we have highlighted South America, other parts of the world will come in and say, "Why do you give preferential treatment there, and subordinate treatment to us?" The Senator from Florida—and there may be some justification for this argument—might say that we have been subordinating South America. In some measure I think we have. However that wrong, if it has been committed, can be cured in a manner other than through this effort to give special treatment through the pending bill.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield.

Mr. CASE of South Dakota. I should like to observe that our experience in guaranteeing rentals on military housing abroad has not been such as to encourage the establishment of a guarantee for private effort in the housing field. I believe that the amendment of the Senator from Ohio should be supported.

The PRESIDING OFFICER. The time of the Senator from Ohio has expired.

Mr. MANSFIELD. Mr. President, I yield 1 additional minute on the bill to the Senator from Ohio.

Mr. LAUSCHE. My amendment strikes out of section 207 that part of the language which deals with the purpose clause. One word further. In my opinion, we will be making a serious mistake if we enter into a program, either in a minor degree or in a major degree, of providing housing in South America. We cannot provide it for that area alone, because if we do, even by pilot projects, we will be establishing a precedent, and thereafter demands will be made upon us from every other area of the world along the same line. I ask Senators to support the amendment.

Mr. FULBRIGHT. Mr. President, I yield 2 minutes to the Senator from Florida.

Mr. SMATHERS. Mr. President, first I believe we should get clear what we are talking about. I regret to say that it is not clear from listening to the Senator from Ohio. This particular committee amendment does not call for any

new authorization or for any new appropriation of funds. Let me read the language contained in the bill:

It is the sense of the Congress that in order to stimulate private home ownership, encourage the development——

Mr. LAUSCHE. Mr. President, a point of order.

Mr. SMATHERS. I do not yield at this time.

Mr. LAUSCHE. The Senator from Florida has implied that I did not correctly state the purpose of the amendment. The Senator from Florida was not in the Chamber when I said that the law as it exists today already allows what the Senator from Florida proposes.

Mr. SMATHERS. I did not intend to reflect on the integrity of the very able Senator from Ohio. I merely want to read the language in the bill to point out with clarity the issue before us.

I continue to read:

It is the sense of the Congress that in order to stimulate private ownership, encourage the development of financial institutions, and assist in the development of a stable economy, the authority conferred by this title should be utilized for the purpose of assisting in the development in the American Republics of self-liquidating pilot housing projects designed to provide experience in countries at various stages of economic development by providing capital for the establishment of—

And so forth. Let me quote what Mr. Dillon of the Department of State had to say about this matter in committee:

We are in favor of housing programs particularly where we can spend local currencies for them. We have just entered or are entering into a program in Pakistan where we hope to rehouse a very substantial number of people in Karachi with grants of Public Law 480 counterpart rupees that we have available in Pakistan. We think that for Latin America the same thing should apply.

So apparently the State Department does not oppose the amendment. Actually the amendment, which is section 207 of the bill, and which has been approved by the Committee on Foreign Relations, does not call for new authority or for additional funds. It is true that existing laws authorize the Development Loan Fund for this purpose but the fact of the matter is that the Development Loan Fund and other agencies have refused to utilize the authority given to them by Congress. The committee amendment is designed to reemphasize the desires of the Congress.

What better way is there to spend money already appropriated than by helping the countries of Latin America, or for that matter any other countries, to enable the people of those countries to procure for themselves a housing program by which they can put roofs over their heads. Make no mistake about it, United States-Latin American relations have been and still are in a continued state of deterioration. The area is beset with many problems. We must assist our friends to the south in solving them or else they will become the victims of the Soviet economic onslaught. This is a consequence that must be avoided in our self-interest as well as theirs.

The PRESIDING OFFICER. The time of the Senator from Florida has expired.

Mr. SMATHERS. Mr. President, I ask that I may have 1 more minute.

Mr. FULBRIGHT. I yield 1 minute to the Senator from Florida.

Mr. SMATHERS. We can spend $400 million from the Development Loan Fund for a hydroelectric program, or a project of that character, but the people do not even know what is happening. But if we can help them put a house over their head—for many of them, for the first time in their lives—we can move them out of riverbeds and out of slums. This type of help they understand. It is no giveaway program. It is a loan program and a guarantee program for U.S. investors who stand ready to assist in setting up FHA type programs in the area. With imagination of such an approach, I think that we then will have made for ourselves an effective, useful, and appreciated foreign aid program. All countries of Latin America are included. So far as I am concerned, that is the best kind of use we can make of this particular money. This type of program will prove to be of inestimable value toward promoting good will with our neighbors to the south and a program which will provide an effective answer to the Soviet economic offensive in the area. I sincerely trust that the amendment offered by the Senator from Ohio will be overwhelmingly defeated by the Senate.

Mr. FULBRIGHT. Mr. President, I yield 2 minutes to the Senator from Vermont.

Mr. AIKEN. Mr. President, people who try to raise families under a couple pieces of tin roofing or fiber or thatched roofs are not good apostles of democracy. Nowhere is the need for relief greater than in the countries of South America and Central America.

The proposal in the bill, as has been stated by the Senator from Florida, does not provide new money; it does not authorize any new expenditures whatsoever. It simply encourages building and loan associations in Latin American countries. The reason why building and loan associations are desirable is that many people who have only a little money are afraid to put it in the banks. They are afraid they will not be able to get it out. But they will, with a little encouragement, invest in building and loan associations.

We have recently made an investment of this kind in Peru, lending Peru $2 million for the purpose of starting new housing projects. One million dollars of this money is in Peruvian currency—in soles; the other million is in American dollars. It is a very small investment, but it is an important one. I believe we are making a similar contribution in Chile, although I am not sure whether it has actually been made yet.

The second part of the proposal, "guaranteeing private United States capital available for investment in Latin America countries for the purposes set forth herein," would, I understand, cover a possible situation in Panama, where the need for decent housing is acute. Housing conditions in Panama are really a disgrace.

The PRESIDING OFFICER. The time of the Senator from Vermont has expired.

Mr. MANSFIELD. Mr. President, I yield 1 additional minute to the Senator from Vermont on the bill.

Mr. AIKEN. There is a great need for decent housing in Panama. I understand it is proposed to build a few thousand decent houses, which will probably be occupied by people who work in the Canal Zone. At the same time, these houses will furnish a working base for many other persons who will not directly live in the houses to be constructed. The housing program will go on from that point. I believe the lack of anything like suitable housing is more responsible for the widespread unrest in Latin America today than almost anything else.

Mr. MANSFIELD. Mr. President, I yield 2 minutes to the able junior Senator from Kansas.

Mr. CARLSON. Mr. President, I endorse the position taken by the Senator from Vermont concerning the need for a housing program in Latin America. I can think of nothing which would be of greater benefit to the stabilization of communities in any country than good homes. I am proud of the project in Lima, Peru, which is being built by the W. W. Garvey Corp., of Wichita, Kans., one of the largest building construction firms in the Nation. They have already started to build a project of 100 two-bedroom homes, which will have large garden areas, and can be expanded to four bedrooms.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement entitled "Home Ownership—The Free World's Unused Weapon," and also a statement prepared by Willard W. Garvey with respect to the corporate structure of the group which is known as Peru Homes, Inc., Lima, Peru, and is a wholly owned subsidiary of Builders, Inc., of Wichita, Kans.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

HOME OWNERSHIP—THE FREE WORLD'S UNUSED WEAPON

The pride of homeownership provides the emotional appeal that is the taproot of private initiative. This spirit of individual initiative has brought America the highest standard of living in history and to the pinnacle as a world power. Yet, home ownership has been all but forgotten by our foreign aid planners who admittedly seek to raise the standard of living in the newly developing countries while at the same time preserving free institutions. Communism would be on the defensive if the major effort of the United States for 1960 would be the encouragement of investment and financing of low cost private housing in key countries, namely, India, Pakistan, Peru, Ecuador, and Colombia. Why? Because through home ownership you can reach the individual. If a man has some property of real value, that is, a home, communism has no appeal. Home ownership affects his outlook in many ways:

1. Economically: Home ownership meets one of the five basic wants (food, shelter,

clothing, acceptance by peers, and power). It also satisfies the urge to own property, which is deep in the natural and cultural heritage of people everywhere. The homeowner has pride of ownership; he develops his property, he improves it, works on it, concentrates his energies and attention on it, and becomes emotionally attached to it. A home is the most valuable property that most people ever own. Through ownership, a man becomes conscious of fundamental economics, principal, interest, taxes, insurance, maintenance, and repair.

2. Politically: The homeowner, in reviewing his economics, comes across taxes and begins to wonder what he is getting for his tax dollar. Generally, he will check into his city government, county government, school board, and the like and become a more interested citizen since he is paying the bill.

3. Socially and morally: The homeowner puts his roots down, builds his fences, works toward becoming a better neighbor, joins the church, joins civic organizations, and gets involved in other cultural, social, spiritual, and intellectual institutions in his city.

4. Creatively: The homeowner, having established his economic, political, and social base, has a foundation upon which to create and achieve the acceptance and power aspects of his basic wants. In Wichita, Kans., United States, 29,000 workers were laid off after World War II by wartime aircraft industry in 1944 and 1945. Fortunately for Wichita, 65 percent of these discharged workers were homeowners. The 65 percent generally exercised individual initiative and creative talents. They formed new small businesses and industries to create goods and services and make a living in the community where they had established their roots. In effect, these Wichita homeowners were an example of the creative power of private initiative going to work literally to save their homes.

5. Ideologically: The sum of the above parts 1 through 4 is the responsible self-reliant individual. Communism holds little appeal for the homeowner. Once a man has worked hard and saved to buy property, he doesn't want to turn it over to the state. In short, the homeowner tends to be a champion of capitalism and individual initiative.

What is it that the free world can offer that communism can't? Homeownership. Homeownership is one thing that separates communism from capitalism—the private ownership of property as opposed to the collectivist ideal of public ownership of property. In the showdown between the two ideologies, a man will defend his private property against the collectivist themes.

Yet, only a minute amount of the foreign economic assistance of any free country, both in loans and aid, has in the past been devoted to the creation of broad homeownership in the newly developing countries.

STATEMENT BY WILLARD W. GARVEY

I am here for one simple purpose: To try to focus public attention on what I call the free world's unused weapon—homeownership—and to help put that weapon to work.

Three basic problems that concern us today are our own national security, the fate of 3 billion people around the world who are trying to win a better life for themselves, and the disposal of our staggering farm surpluses.

I am convinced that there is a simple, direct method that has been overlooked to help solve all three of these problems.

I have just returned from a five-nation tour of Latin America. I found there, as I found in the Far East last summer, a desperate and growing shortage of housing. The missing ingredient in each case was financing—a means of enabling people in those lands to buy homes on relatively long-term credit at prices they can afford to pay.

One big, untapped source for this financing lies in the vast American farm surpluses that have been distributed in underdeveloped countries. In effect, our surpluses can provide both food and shelter for millions of families in many countries of the world. In India alone, the so-called Cooley amendment funds accrued in rupees from the sale of American grains could finance the construction of 500,000 low-cost homes within the next 12 months. If the project were undertaken on a self-help basis, with the people of India putting "sweat equity" into their homes, that figure could easily be doubled.

But financing and need, by themselves, are not enough. What is required now is a catalyst. That catalyst is the private American homebuilder; hundreds of builders who will be willing to undertake this mission, to launch their own private industry point 4 program. The feasibility of this program has already been demonstrated in Lima, Peru, where our company has just begun a 100-home pilot project using Public Law 480 Cooley amendment funds.

The know-how for this operation is available to any American builder who wants to get into it. I feel confident that hundreds will do so if the need and the opportunity are properly presented to them.

The significance of housing in our country's struggle against world communism was underscored during President Eisenhower's recent journeys to the Far East and Latin America. Of all the places he visited, places where tens of billions of American dollars have been spent in foreign aid, he was moved most deeply by a workers' housing development in Santiago, Chile. The development, launched and carried forward by American builders, represented a U.S. investment of less than $100,000.

In President Eisenhower's own words:

"I was impressed by what I saw in Chile. I visited a low-cost housing project. The Government had provided land and utilities. The homeowners were helping one another build the new houses. They will pay for them monthly, over a period of years. Personal accomplishments brought pride to their eyes; self-reliance to their bearing. Their new homes are modest in size and character—but I cannot possibly describe the intense satisfaction they take in the knowledge that they themselves have brought about this great forward step in their living conditions."

EVERY MAN A HOME OWNER

(Peru Homes, Inc., Lima, Peru)

1. CORPORATE STRUCTURE

Peru Homes, Inc., is a wholly owned subsidiary of Builders, Inc., Wichita, Kans.

The board of directors consists of Willard W. Garvey, president of Builders, Inc.; Dr. Eduardo Olaechea, a prominent Lima attorney who is also legal counsel for the firm; and E. Howard Wenzel, Jr., of Wichita, who is a resident manager.

The company has an initial authorized capital of 3,500,000 soles (1 sol approximately 3.6 U.S. cents).

2. FIRST PROJECT

The first project of Peru Homes, Inc., is now underway in a newly developed subdivision on the northern side of Lima bordering the Pan-American Highway. The company is building 100 two-bedroom homes on lots of 160 square meters. The homes have large garden areas and can be expanded to four bedrooms.

The homes will sell for 99,000 soles (about $3,000) with a downpayment of 20 percent and monthly installments of 950 soles over 10 years. (This is approximately half the price of the comparable homes now available in Lima.)

3. FINANCING

The homes will be built with the aid of a 4-million-sol (about $140,000) loan from Public Law 480 wheat sale balances available to U.S. investors in Lima. The loans will be for 10 years at 8 percent interest. The Banco Continental of Peru has agreed to guarantee and service the repayment of the loan and to act as agent for Peru Homes, Inc., in making loans to individual home buyers and collecting monthly payments. The interest and servicing charges for home buyers will amount to 10 percent on the unpaid balance, consisting of the 8 percent charged on Public Law 480 funds, and 2 percent charged by Banco Continental. This compares with going rates for interest and service charges ranging from 15 to 30 percent for terms not longer than 3 to 4 years and with downpayments of 50 percent.

4. RELIANCE ON LOCAL RESOURCES

With the exception of Mr. Wenzel, the resident manager, every phase of Peru Homes' operations relies on local resources. The model house for the first project was designed by a noted Lima architect, Ernesto Aramburu Menchaca. The houses are being built by local contractors employing local workers and using exclusively local materials.

Mr. JAVITS. Mr. President, will the Senator from Kansas yield?

Mr. CARLSON. I yield.

Mr. JAVITS. A number of savings and loan associations in the northeastern area of the country have been in communication with me. They are interested in doing exactly what is contemplated by the provision in the bill. I think it would be a shame to frustrate them by agreeing to the amendment offered by the Senator from Ohio. I hope the amendment will be rejected.

Mr. LAUSCHE. Mr. President, may I have 1 additional minute?

Mr. MANSFIELD. Mr. President, I yield to the Senator from Ohio 2 minutes on the bill.

Mr. LAUSCHE. To clarify the record, at the very beginning of my statement I declared that the present law authorizes these payments. I, however, felt that this item should not be highlighted, because of the danger that sponsors of other programs might come forward later and try to highlight their purposes.

Mr. SMATHERS. Mr. President, it is true that I did not hear the beginning of the Senator's statement. I know that his motives are exactly 100 percent proper. If I cast any reflection on his statement, I certainly did not intend to do so.

Mr. LAUSCHE. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Virginia [Mr. BYRD], the Senator from Alabama [Mr. HILL], the Senator from Montana [Mr. MURRAY], the Senator from Virginia [Mr. ROBERTSON], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

I further announce that if present and voting, the Senator from Virginia [Mr. BYRD] and the Senator from Virginia [Mr. ROBERTSON] would each vote "yea."

I further announce that if present and voting, the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Ohio [Mr. YOUNG] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

The Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Indiana [Mr. CAPEHART]. If present and voting, the Senator from Nebraska would vote "yea," and the Senator from Indiana would vote "nay."

The result was announced—yeas 26, nays 60, as follows:

[No. 183]

YEAS—26

Allott	Fong	Russell
Butler	Goldwater	Saltonstall
Cannon	Gruening	Schoeppel
Case, S. Dak.	Hickenlooper	Stennis
Cotton	Johnston, S.C.	Talmadge
Curtis	Jordan	Thurmond
Dworshak	Lausche	Williams, Del.
Ellender	Martin	Young, N. Dak.
Ervin	Mundt	

NAYS—60

Aiken	Frear	McClellan
Bartlett	Fulbright	McGee
Beall	Gore	McNamara
Bennett	Green	Magnuson
Bible	Hart	Mansfield
Brunsdale	Hartke	Monroney
Bush	Hayden	Morse
Byrd, W. Va.	Hennings	Moss
Carlson	Holland	Muskie
Carroll	Jackson	O'Mahoney
Case, N.J.	Javits	Pastore
Chavez	Johnson, Tex.	Prouty
Church	Keating	Proxmire
Clark	Kefauver	Randolph
Cooper	Kerr	Scott
Dirksen	Kuchel	Smathers
Dodd	Long, Hawaii	Smith
Douglas	Long, La.	Wiley
Eastland	Lusk	Williams, N.J.
Engle	McCarthy	Yarborough

NOT VOTING—14

Anderson	Hruska	Robertson
Bridges	Humphrey	Sparkman
Byrd, Va.	Kennedy	Symington
Capehart	Morton	Young, Ohio
Hill	Murray	

So Mr. LAUSCHE'S amendment was rejected.

The PRESIDING OFFICER. The Senator from Ohio [Mr. LAUSCHE] is recognized.

Mr. LAUSCHE. Mr. President, I call up my amendment, identified as "4–28–60—B," and ask the Senate to consider it at this time.

The PRESIDING OFFICER. The amendment offered by the Senator from Ohio will be stated.

The LEGISLATIVE CLERK. It is proposed, on page 19, beginning with line 21, to strike out over through line 12 on page 20.

The PRESIDING OFFICER. How much time does the Senator from Ohio yield to himself?

Mr. LAUSCHE. Five minutes.

The PRESIDING OFFICER. The Senator from Ohio is recognized for 5 minutes.

Mr. LAUSCHE. Mr. President, this amendment contemplates striking from the bill those provisions which authorize the President to enter into an agreement with other nations of the world for the purpose of forming a fund to be used in saving the ancient monuments of Nubia. The Aswan Dam is being built. It will be 200 miles long in the Arab Republic and 100 miles in Nubia. It will have a depth of 200 feet at certain places, and will inundate relics of ancient Egypt. There are 21 of these relics supposedly of great value historically and archeologically.

There has been formed in the United States a group of archeologists who are deeply interested in preserving the monuments. The United Nations has considered the project, and has made no recommendation for the appropriation of funds, but has given the project its aegis of good will, and has suggested that the nations of the world should contribute to it.

There appeared before the committee an archeologist from Chicago by the name of Mr. Wilson. I listened to him with great joy describing the finds they expected to make in excavating for relics and monuments which have been covered during the ages by sediment. I asked him who had made an expert study of the cost. He said no one had made it, but a group of engineers are now studying it. He said it would cost between $60 million and $90 million. I asked him, "Are you certain that that would be the maximum?" He said, "Of course, I cannot say that $90 million will be the maximum. We shall know when the engineers make the study."

His suggestion was that we contribute 33⅓ percent of the cost, and he now expects that £7½ million of Arabian Republic money will be spent. Seven and a half million pounds means approximately $20 million.

Mr. President, in my judgment, this project has not been adequately studied. It is not known what it will cost. The engineers are now applying themselves to that study.

No other nation has indicated a purpose to participate. Regardless of what one's thoughts may be on the question of the U.S. Government including in the mutual aid program this proposal to save the monuments of the Nile, we should more carefully consider the question. One suggestion, my colleagues, is that one of these ancient monuments might be brought to the United States and installed at some place where our citizens would be able to gain esthetic and cultural enjoyment from it.

In my judgment, the project has not been adequately studied and ought not be included in this bill.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield.

Mr. SALTONSTALL. How are we to get started on this project if we do not provide for it in the bill? The Senator has said that perhaps we ought to bring one of those monuments to this country. The inclusion of this provision in the bill would give us an impetus toward getting started on the program, as compared with Egypt or other countries. There might be a number of separate exhibits. Unless we get started on this undertaking and get it under way, the dam will be built and the cultural monuments will be under water. How are we going to get started if we do not make such a provision?

Mr. LAUSCHE. I may say to my colleague it is estimated the Aswan Dam will be completed in 5 years. Mr. Wilson stated that, in this first year, it is contemplated digging up those monuments and relics which are now covered by sedimentation, but that the actual work of removing existing valuable monuments would not be started until next year, and that the cost of doing the excavating will be borne by private contributions.

Mr. PASTORE. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MANSFIELD. Mr. President, I yield the Senator from Ohio 1 minute on the bill.

Mr. PASTORE. Do we have the permission of the country of Egypt to remove a monument?

Mr. LAUSCHE. There was no direct testimony on that point, but Mr. Wilson testified, and I think the inference may properly be drawn, that they will welcome the participation of the nations of the world.

Mr. PASTORE. But it is only an inference.

Mr. LAUSCHE. Yes.

Mr. PASTORE. I am talking about removing the monument physically out of the country.

Mr. LAUSCHE. There has been some arrangement proposed, which has not yet been settled as to detail, to divide 50–50 the discoveries made in the excavations. There are two very important monuments which I doubt Egypt will allow to be removed, but there is evidence that they will allow the removal of monuments. On that score, may I point out that we may become a nation of monuments; we may spend more money on the dead than on the living; and that day may come sooner than we think.

Mr. FULBRIGHT. Mr. President, there are several very important conditions to this proposal. The first is that it must be an international organization. The U.S. contribution will be entirely in the local currencies of the United Arab Republic and of the Sudan. There will be no dollars involved in this proj-

ect. These funds already exist in respect to those countries. Our contribution will be limited to one-third of whatever is agreed upon. The U.S. participation must be found by the President to be something that will promote the foreign policy of the United States. Then, and most important of all, whatever agreement may be arrived at during the course of next year, it must come back and be submitted to the Congress for its approval.

This is a tentative plan. These persons from the Universities of Pennsylvania and Chicago are very responsible individuals, and they are very anxious that this proposal be approved, in order to give them an opportunity to help formulate the plan. I do not understand there is an agreement upon the division of the spoils at all. They insist that, whatever agreement is developed, it will be the result of negotiations which will create an international organization. The reason for it would be largely a matter of much interest in the history of Egypt, and the good will, I would say, that would result from this project.

We have this alternative. This local currency exists. It will have to be used either for this kind of purpose or for some other local development, such as an irrigation system, a road, or a school. We can choose what we think is the most important item.

The President can choose in this regard. The President has to find that it is, in his opinion, in the interest of this country to take the action. The President does not have to go through with it, but he is permitted to consider it and to enter into whatever plan is developed. It is very problematical that anything will be developed. It would seem to be good for international relations to make at least a preliminary gesture; to say that if other people are interested we will go along and contribute some of these local currencies to a joint project.

Mr. SALTONSTALL. Mr. President, will the Senator yield for one question?

Mr. FULBRIGHT. I yield.

Mr. SALTONSTALL. Is it not very important that we start on this tentative agreement this year, or otherwise it will not be possible to consummate it? The dam cannot be stopped. The water level will go up, and then nothing can be done.

Mr. FULBRIGHT. That is quite correct. Unless we get this project underway and provide the authority to negotiate, it will soon be too late.

We were told by some of the witnesses that several countries in Europe are interested, and it is expected these countries will join and will make a contribution. One witness stated he had had a communication from the Minister of Education—or Information—in Egypt. stating interest in this.

This is all in the preliminary stage. All that is requested is authority for the President to enter into discussions on the matter. The President will have to make the decision first, and then we will make a decision.

Mr. SALTONSTALL. Mr. President, will the Senator yield for one more question?

Mr. FULBRIGHT. I yield.

Mr. SALTONSTALL. Is it not important to do this, so that we can get these agreements and ultimately get some of these cultural objects in the United States, in our museums?

Mr. FULBRIGHT. I cannot guarantee anything. It will all depend upon the negotiation. There is no agreement that anything is going to be taken out. This is all part of the negotiating which will take place. Some of the things may be removed. Some may have levees put around them.

Mr. President, I will now yield 2 minutes to the Senator from Pennsylvania [Mr. CLARK]. The University of Pennsylvania has an interest in this matter.

Mr. CLARK. Mr. President, I read to the Senate the testimony of John A. Wilson, professor of Egyptology, University of Chicago:

> This is an area in which man has lived for 10,000 years. It is an area which has 21 temples within it, ancient temples, of which 2 are world famous temples, the superb rock-cut temples of Abu Simbel which is one of the most magnificent temples in the world, and 19 others. The artificial lake will cover over an untold number of as yet unexplored unexcavated sites. In other words, to the archeologist this is catastrophe.

There is an international appeal which is being made for the rescue of the monuments in this area. There will be all sorts of international activity in regard to them.

The matter is already being explored by the University of Pennsylvania and by the University of Chicago. There will then be a united effort by scholars of the world. Negatively, if American scholars are not involved in this, it will be a blow to our prestige. Positively, it will be a great gain.

Mr. President, I turn to consideration of the committee amendment which the Senator from Ohio seeks to strike. The amendment provides that if the President of the United States thinks this is a good thing, he may, subject to the approval of the Congress, enter into agreements with friendly nations to pay, in foreign currencies, no more than 33⅓ percent of the cost.

I say to Senators, this seems to me to be one of those rare occasions when the Senate can stand up for education. I think the amendment of the Senator from Ohio represents a revolt against civilization. I hope it will be defeated.

Mr. MANSFIELD. Mr. President, I yield 1 minute to the Senator from North Carolina, from the time on the bill.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. ERVIN. Mr. President, I rise merely for the purpose of making the suggestion that after we have transported one of these Egyptian monuments to the United States at the expense of the American taxpayers we should place a tablet upon it reciting that at the time the Senate voted to do so the United States owed $284,705,907,078, because the Congress for 25 years had been appropriating more money than it had the moral courage to raise taxes to cover; and that at the time the Senate voted to transport this Egyptian monument to the United States each child who then came into the world in the United States was finding himself saddled with a pro rata responsibility for the national debt of $1,607.91. We might record also on the tablet that at that time the national debt of the United States was higher than the highest pyramid in Egypt.

Mr. MONRONEY. Mr. President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. Mr. President, I yield 2 minutes to the Senator from Oklahoma.

Mr. MONRONEY. As I understand the situation, this has no relationship to dollars at all. We have something like $80 million worth of Egyptian pounds. The only exportable thing which I know the Egyptians have is long staple cotton, and unfortunately these Egyptian pounds we hold cannot even be used to purchase that.

As a matter of fact, if we do not authorize the President, conferring with international organizations, to see if we can preserve these historic monuments, we are going to have to hold these local currencies in warehouses. Pretty soon the storage charge for the warehousing of these local currencies may approach the problem of the storage charges on wheat. As a matter of fact, if this matter is left in its present position, and if we do not use the local currency, the Egyptian pounds, we will be making an interest-free loan to Mr. Nasser, because our action will stabilize his currency.

The PRESIDING OFFICER. All time on the amendment has expired.

Mr. DIRKSEN. Mr. President, I yield 1 minute to the distinguished Senator from New Hampshire from the time on the bill.

Mr. COTTON. Mr. President, I asked for the minute because I wanted to satisfy myself in regard to one point. I should like to have the attention of the chairman of the Committee on Foreign Relations.

It has been explained to us most carefully that this provision is entirely harmless, because the President will only negotiate. It is said that no agreement can result for at least a year, and that the President will have to come back to the Congress for the authority and the sanction required. If that is all true, I cannot understand why the provision is even necessary. Is there anything in the language at all now to prevent the President of the United States from negotiating and finding out what agreement he can make, and then coming back to the Congress with a specific agreement and securing a sanction in a year?

Mr. CLARK. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER. The time of the Senator from New Hampshire has expired.

Mr. COTTON. Mr. President, will the Senator yield me 1 minute more?

Mr. DIRKSEN. Mr. President, I yield 2 minutes to the Senator from New Hampshire from the time on the bill.

Mr. CLARK. Mr. President, will the Senator yield to me?

Mr. COTTON. I will yield to the Senator in just a moment.

I am forced to the conclusion that there is a real purpose in mind in the inclusion of the provision in the bill. I am not at the moment debating the laudable intentions of the project. However, this is what we constantly do in this body, in this country, and in this Congress. We hold out to the world an idea that we have in advance given sanction to something, to which, technically, we have not given sanction. Then we find ourselves with a moral responsibility to agree.

I will now yield to the Senator such time as I have remaining.

Mr. CLARK. I would answer my friend from New Hampshire by saying that what his statement implies is exactly what this language would do. This is not a legal commitment. It is not even a moral commitment. It is simply some encouragement to the people of the world that if they can come up with a good international agreement we will pay our share of the cost. I am perfectly willing to do that.

Mr. COTTON. Either the language will do something or it will not do something. If it will do something, we should know what it is. If it will not do something, why is the language there at all?

Mr. LAUSCHE. The language is provided because the committee did not dare make a direct recommendation that we participate. This is the smooth and the constantly used method of finally achieving the objective, without facing the problem immediately.

Mr. COTTON. That was my conclusion.

Mr. JOHNSON of Texas. Mr. President, I yield 2 minutes from the time on the bill to Senator from Louisiana [Mr. LONG].

Mr. LONG of Louisiana. Mr. President, I have voted for every amendment offered to the bill which would have reduced the cost. I did vote for the committee amendment in this instance. It will not cost the United States a penny.

What the amendment provides is that if other countries are willing to pay two-thirds of the cost we would be willing to pay one-third of the cost with the Egyptian pounds, for which we have no other use, anyway. This will be a mere gesture.

The language provides that before anything could be done the Congress would have to approve whatever agreement was reached. We have been talking about the authorizing of projects. This is one project the Congress will have a chance to authorize. It will be necessary to come back to the Congress, so that we can be informed of what is the desire of the other nations, and what they will pay. We will pay only one-third. All the rest will be paid by other countries.

This is simply a gesture of good will to Egypt, Sudan, and archeologists. We are simply saying, "If the other countries were willing to pay two-thirds of the cost, we would be willing to use the Egyptian pounds to help out in regard to one-third of the cost." My guess is that nothing will result from this, because I do not believe the other countries are going to put up two-thirds of the cost, in good money, on their part. We say, "If the others who are interested will put up two-thirds of the cost, we will put up one-third of the cost."

That is all it is; a gesture. I believe it is a good idea.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Ohio [Mr. LAUSCHE].

Mr. DIRKSEN. Mr. President, I yield 1 minute to the distinguished Senator from Delaware [Mr. WILLIAMS].

Mr. WILLIAMS of Delaware. Mr. President, without getting into the merits of this particular amendment, I should like to clear up one point which I think is perhaps misunderstood, and that is the idea that we have a barrel full of Egyptian pounds which are not worth anything. How did we get them? We put up good merchandise to get those pounds. They are worth about $2.80 in the international market. Furthermore, instead of having $80 million we doubt that we have anywhere near that amount.

I do not think any Senator can say how much of this foreign currency we do have, or had as of any given date. For 2 months I have been trying to find out from the departments how much we have in foreign currencies of the various countries with particular reference to Egypt. They do not know. I have been furnished different reports as of the same date, and they cannot be reconciled. Apparently they are being valued and accounted for by the executive department in the same irresponsible manner as that in which we are valuing them in the Senate. It is said that these Egyptian pounds are not worth anything. Therefore, it is asked, "Why keep track of them?"

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. Just a moment.

I think it is time to impress upon the executive branch as well as upon ourselves that these foreign currencies are worth something and that they should be properly accounted for. These funds belong to the American taxpayers.

I have not found any department which can tell me what is the right amount of Egyptian pounds that are not committed. The nearest I can come to an estimate is that we have between $20 million and $50 million in these currencies.

Mr. LONG of Louisiana. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I yield 1 minute to the Senator from Louisiana.

Mr. LONG of Louisiana. The money the Senator from Delaware is talking about is Public Law 480 money. That money got there because we were trying to get rid of surplus wheat. Those who administered the program say that the idea is to move the commodity, whether we can use the currency or not.

So far as I know, we have no use for this currency. I doubt if other countries are going to put up their hard-earned money to match money for which we have no other use. We have large amounts of such currency; and if we do not make this gesture, which would not cost us anything, my guess is that the currency will never be used for any other purpose.

Mr. LAUSCHE. Mr. President, may I have 1 minute?

Mr. DIRKSEN. First, I yield 1 minute to the distinguished Senator from Colorado [Mr. ALLOTT].

Mr. ALLOTT. Mr. President, I should like to make one or two observations.

I am very much interested in where we have been, but I am also interested in where we are going. It seems to me that by this section we do exactly as the Senator from New Hampshire has said. We morally commit ourselves to certain action in the future, because we are asking the President, in effect, to negotiate for us if he can.

If the proposed dam were to be built in the United States, and it was about to cover up some great artifacts of this country, we, the people who would be benefiting under the dam, would be asked to pay for the preservation of those artifacts.

I would rather spend the money for food, for medicine, for education, for clothing, for housing for the Egyptians, if Egypt is the only place where we can spend it, than to spend it in this way, with no assurance that we will ever get any part of it back. I do not believe we would.

Mr. DIRKSEN. Mr. President, I yield 1 minute to the distinguished Senator from Ohio [Mr. LAUSCHE].

Mr. LAUSCHE. Mr. President, the terms offered are set forth on page 585, showing how these relics will be divided in the event they are found. I submit to my colleagues that one highlight has come out of this discussion. The U.S. Senate is beginning to admit that the foreign currency which we hold is worth nothing, and it is frantically trying to find ways and means of dissipating it, so that it will not appear on our records as being in our possession.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio [Mr. LAUSCHE] to the committee amendment. [Putting the question.]

Mr. ELLENDER and Mr. LAUSCHE asked for a division.

The Senate proceeded to divide.

Mr. LAUSCHE. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered, and the legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Michigan [Mr. HART], the Senator from Alabama [Mr. HILL], the Senator from Oklahoma [Mr. KERR], the Senator from Montana [Mr. MURRAY], and the

Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

On this vote, if present and voting, the Senator from New Mexico [Mr. CHAVEZ] and the Senator from Oklahoma [Mr. KERR] would each vote "yea."

I further announce that if present and voting the Senator from Michigan [Mr. HART], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Montana [Mr. MURRAY], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Ohio [Mr. YOUNG] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

The Senator from North Dakota [Mr. YOUNG] is detained on official business.

On this vote the Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Indiana [Mr. CAPEHART]. If present and voting, the Senator from Nebraska would vote "yea," and the Senator from Indiana would vote "nay."

The result was announced—yeas 40, nays 44, as follows:

[No. 184]

YEAS—40

Allott	Ervin	Magnuson
Bible	Fong	O'Mahoney
Brunsdale	Frear	Pastore
Butler	Goldwater	Prouty
Byrd, Va.	Green	Randolph
Byrd, W. Va.	Gruening	Robertson

NOT VOTING—16

Anderson	Hruska	Sparkman
Bridges	Humphrey	Symington
Capehart	Kennedy	Young, N. Dak.
Chavez	Kerr	Young, Ohio
Hart	Morton	
Hill	Murray	

So Mr. LAUSCHE'S amendment was rejected.

Mr. DIRKSEN. Mr. President, I move that the Senate reconsider the vote by which the amendment was rejected.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to table was agreed to.

Mr. HICKENLOOPER. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 23, line 19, insert the following new subsection (a) in section 601 of the bill and redesignate the other subsections of section 601 accordingly:

(a) In section 104, which relates to use of foreign currencies, insert the following after the word "Act" in the final proviso: "other than sections 104(e) and 104(g)".

Mr. HICKENLOOPER. Mr. President, earlier today, when the Senate agreed to the amendment offered by the Senator from Louisiana [Mr. ELLENDER], affecting the section of the bill dealing with Public Law 480, it was motivated, I believe, mainly by opposition to the subsection which broadened title II of Public Law 480 to include grants for purposes of economic development as well as for purposes of famine relief.

The amendment of the Senator from Louisiana, however, also struck out another subsection of the bill, which appears on lines 19 through 21 on page 23 and which makes a technical amendment in section 104 of Public Law 480 so as to remove a restriction resulting from the interaction of two amendments added to the law last year in regard to use of foreign currencies for health and education.

I believe the effect which has resulted from the action of the Congress last year was not intended by the Congress. I likewise believe that the action of the Senate this morning was not directed to this point so much as to the authority in title II. The amendment which I have offered is designed to correct both of these actions. The difficulty with the law as it now stands, and as it will continue to stand unless my amendment is adopted, is described on page 30 of the committee report as follows:

Subsections (k), (p), and (r) of section 104 of Public Law 480 authorize the use for purposes of health and education, among others, of foreign currencies accruing from the sale of surplus agricultural commodities under title I of that law. A proviso to subsection (k) makes foreign currencies available for the purposes of that subsection only in such amounts as may be specified in appropriation acts. A similar proviso is applicable to subsection (p), and currencies under subsection (r) are limited to the equivalent of $2.5 million a year.

The uses contemplated by these subsections embrace both uses for the benefit of the United States (e.g., collection and translation of scientific and technological information) and uses for the benefit of the foreign country (e.g., support of educational development). This latter category of uses is also embraced under subsections (e) and (g) which make foreign currency available, without appropriation requirement, for purposes of economic development. However, a final proviso to section 104 forbids allocation of foreign currencies "under any provision of this act after June 30, 1930, for the purposes specified in subsections (k), (p), and (r)" except as specified in appropriation acts. The effect of this last proviso is to make it impossible to use foreign currencies for purposes of economic development through health and education under subsections (e) and (g) except as the currencies may be appropriated. Since none of the other uses under subsections (e) and (g) are thus restricted, the proviso curtails rather drastically the work that can be carried on in these two fields which are basic to economic development.

My amendment is different from the language of the committee bill, but it would accomplish the same result by excepting purposes of economic development from the requirement of appropriations for subsections (k), (p), and (r).

I may say that this is particularly necessary for the malaria eradication program as well as for similar programs relating to health and education.

Mr. President, this morning I supported the amendment of the Senator from Louisiana [Mr. ELLENDER], to which I believe this corrective amendment should now be applied, because the amendment of the Senator from Louisiana struck out an entire group of subjects, of which this one particular sentence in section 104 of Public Law 480 is a part. I intended to ask the Senator from Louisiana, if he were present, if it was his intention to strike out that part of the sentence.

Mr. FULBRIGHT. Mr. President, I think the Senator from Iowa is quite correct. I am prepared to accept the amendment. I think it is a necessary one. I do not see the need to have a vote on it.

Mr. HICKENLOOPER. I thank the Senator from Arkansas. I felt it was an oversight on this section. I supported the original amendment of the Senator from Louisiana.

Mr. FULBRIGHT. I yield back the remainder of my time.

Mr. AIKEN. Mr. President, will the Senator from Iowa yield?

The PRESIDING OFFICER. The time of the Senator from Iowa has expired.

Mr. AIKEN. Mr. President, may I have 1 minute?

Mr. DIRKSEN. I yield 1 minute to the Senator from Vermont.

Mr. AIKEN. As one who supported the Ellender amendment in order to eliminate divided authority over commodities, I believe it would be well to approve the amendment offered by the Senator from Iowa. It certainly was not my intention to prohibit the use of these funds for educational development, health, nutrition, and sanitation. I believe the amendment offered by the Senator from Iowa should be approved.

The PRESIDING OFFICER. Without objection, the amendment offered by the Senator from Iowa is agreed to.

Mr. LAUSCHE. Mr. President, I call up my amendment designated "4–28–60—C" and ask that it be read.

The PRESIDING OFFICER. The Chair is advised that that amendment has already been agreed to.

Mr. LAUSCHE. It is my understanding that the chairman of the committee believes the amendment conforms to the general purposes of the section and that, therefore, he is willing to accept it.

Mr. FULBRIGHT. I am willing to accept the amendment of the Senator from Ohio.

Mr. LAUSCHE. I ask that my amendment be read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 20, before the period in line 12, it is proposed to insert the following:

And no such currencies shall be so used until the President is satisfied that expenditures representing the remainder of such cost have been or will be made by other interested nations or organizations thereof.

Mr. FULBRIGHT. Mr. President, I am willing to accept that amendment, and I yield back my time.

The PRESIDING OFFICER. Does the Senator from Ohio yield back his time?

Mr. LAUSCHE. Yes.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Ohio is agreed to.

Mr. GRUENING. Mr. President, I call up my amendment designated "4–28–60—G," and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. It is proposed to amend section 537(f) so as to read as follows:

During the annual presentation to the Congress of requests for authorizations and appropriations of military assistance under this Act, there shall be submitted a clear and detailed explanation on a country-by-country basis of the force objectives toward the support of which such assistance is proposed to be furnished; the projected costs of equipping and the annual recurring costs of maintaining such force objectives, together with the estimated costs of present plans for modernizing such force objectives; and explanation of the degree to which such force objectives had been equipped, maintained, and modernized under programs already approved; the accomplishments to be achieved with the funds currently being requested, and estimates of the time-phased costs for carrying out the remainder of the program.

Mr. GRUENING. Mr. President, I call this the "required planning amendment."

The amendment has been suggested by the Comptroller General, as will be seen by his statement in the middle of page 628 of the printed hearings. Of this proposal the Comptroller General has said:

Although the Department of Defense has taken measures to project the program costs 3 years into the future, the present budget justification submitted to the Congress by the executive agencies does not contain information which we consider necessary to provide the Congress with a fully informed basis for appropriating funds and for reviewing program performance.

This amendment applies only to military assistance.

It requires only that certain information be made available to Congress. But because it requires this information to be submitted to Congress, it will, in turn, require the Department of Defense and the Department of State to plan ahead—to think through—with respect to military assistance; to consider where we are, where we are going, and how much it will cost to get there.

It will require that Congress be furnished information as to time-phased costs for carrying out our military assistance program on a country-by-country basis.

As the Comptroller General has stated, the amendment will provide the answers to the oft-raised questions on how long military assistance will be continued with respect to each country, at what level, how much it will cost, at what rate it will be "phased out," and so forth.

This kind of foresighted planning is essential if the program is not to continue on a short-range planning basis for a long-range program. The amendment does not affect the national security.

I urge the adoption of my amendment, and I ask for the yeas and nays.

Mr. FULBRIGHT. Mr. President, will the Senator withhold his request for the yeas and nays?

Mr. GRUENING. I withhold my request.

Mr. FULBRIGHT. The amendment is not objectionable, because the Senator from Alaska is trying to improve the quality of planning on the part of the military. I would be willing to take the amendment to conference and study it. I would not want to make a final commitment that I would fight, bleed, and die for it; but I think it would not be too bad to accept it and see if we cannot work out the problem in conference. The administration does not object to the intent, but it has some criticisms as to the way in which it is expressed. So I am willing to take the amendment to conference.

Mr. GRUENING. I appreciate the attitude of the chairman of the committee.

Mr. AIKEN. Mr. President, will the Senator from Arkansas yield for 1 minute to me, so that I may ask a question?

The PRESIDING OFFICER (Mr. BARTLETT in the chair). Does the Senator from Arkansas yield to the Senator from Vermont?

Mr. FULBRIGHT. I yield.

Mr. AIKEN. Would not this amendment require the publicizing of our plans for military assistance to all the countries we assist?

Mr. GRUENING. Not at all.

Mr. FULBRIGHT. If such publicizing of our plans would be required by the amendment, that would be objectionable, and that part would have to be deleted in conference. But the major objective; namely, for better planning—is not objectionable.

Mr. AIKEN. If the purpose of the amendment is to have reports made to the Congress, that would be one thing. But if the result would be to inform all the other countries in the world what we expect our military contributions to certain countries to be, I believe that would be objectionable.

Mr. FULBRIGHT. Then that part would have to be deleted in conference.

Mr. GRUENING. I think the information required by the amendment would be in the same classification that any other information desired from the Department of Defense would be in.

Mr. FULBRIGHT. Mr. President, I am ready to vote on the amendment.

The PRESIDING OFFICER. Does the Senator from Alaska yield back the remainder of the time available to him?

Mr. GRUENING. I do.

Mr. FULBRIGHT. I do likewise, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment was agreed to.

Mr. GRUENING. Mr. President, I call up my amendment identified as "4–28–60—F," and ask that it be stated and considered.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. It is proposed to amend section 401 by adding at the end thereof an appropriately lettered new subsection as follows:

Section 537(f) is amended to read as follows:

"Within ninety calendar days after the enactment of the Act making appropriations for the fiscal year 1960 and subsequent fiscal years for carrying out the purposes of this Act, there shall be submitted to the cognizant committees of the House and Senate detailed budgets on a country-by-country basis setting forth, with respect to defense support, technical cooperation, and special assistance, the specific purposes in detail by amounts for which the funds available will be obligated during the respective fiscal year, and such funds shall be available only for the purposes thus specified: *Provided*, That this subsection shall not apply to funds affected by the use of sections 451(a) or 501 of this Act, or to reasonable variations in the use of funds within a country for purposes other than those specified in the detailed budgets."

Mr. GRUENING. Mr. President, this amendment attempts to reassert congressional control over expenditures for foreign aid. It is an attempt to apply to the foreign-aid program the same budgetary and accounting controls which are now applicable to our domestic programs. It is an attempt to end illustrative budgets under which requests to the Congress for funds are justified only by the submission of "maybe" budgets—that is, budgets which are not firm, which do not bind the administrators of the foreign-aid program to spend any of the funds for any of the purposes stated in their illustrative budgets.

That is not the way domestic programs are justified before the committees of Congress. I do know, of course, that unless restrictions are written into law, the administrators of domestic programs are not legally required to spend the funds appropriated for the exact items for which the funds were justified in their budgets.

But I know also, Mr. President, that it would be a most unwise and unusual administrator of a domestic program who would justify the funds requested on one basis, before the appropriations committees and before the Congress, and then spend the funds for a totally unrelated purpose. Such an administrator would speedily find that the Appropriations Committees do know how to write legal restrictions into an appropriations bill.

My amendment does not go as far as the Comptroller General suggests. Senators will find his comments at page 628

of the Senate committee hearings. He would curtail drastically the President's discretionary funds. I am not offering such an amendment at this time. So, even if my amendment is included, the President will still have discretion to move funds from one project to another, under sections 451 and 501.

Earlier in the day an amendment proposed by the distinguished Senator from Louisiana—to strike out certain salary increases and increased classifications—was defeated; and the chairman of the committee argued that it is important that we have an Inspector General and Comptroller to make sure this program is well administered. That would have cost a considerable amount of money.

Here is an opportunity to provide for a means of control by the one person who is a servant of the Congress; namely, the Comptroller General of the United States. The control would be had without a nickel of extra cost, and the control would be the kind we should have. The control would not be had by an official who was a part of the program and was not anxious to uncover its defects. Instead, the control would be by a servant of the Congress in this field.

Mr. President, I call for the adoption of the amendment; and on the question of agreeing to the amendment, I ask for the yeas and nays.

Mr. JOHNSON of Texas. Mr. President, I ask the Senator from Alaska, did we not have an agreement as to the yeas and nays in this case?

Mr. GRUENING. I did not so understand it; but that will be all right. I think this amendment is an important one. When it was proposed last year, I believe there were 37 votes in favor of its adoption.

But if the majority leader desires to hasten the procedure——

Mr. JOHNSON of Texas. Mr. President, if the Senator from Alaska did not understand that he had an agreement with me in regard to not having the yeas and nays taken on this amendment, then I shall ask that the yeas and nays be ordered. However, I understood that we had an agreement that the yeas and nays would be ordered on two of the Senator's amendments, but not on the other two. But if there is any question about that, I now ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

The yeas and nays were ordered.

Mr. FULBRIGHT. Mr. President, this is an amendment which I cannot accept. It is a very bad amendment; it is an unworkable amendment.

Existing law already provides that the Congress be informed, within 60 days after the appropriation of mutual security funds, of changes in the programs as originally submitted to the Congress. During the rest of the year, any program change of $1 million or more or 5 percent of the amount of the appropriation also must be reported to the Congress.

The Senator from Alaska says that a program of this sort is followed in the other parts of the Government. But there is no freezing of a program, so that it cannot be changed 90 days after the appropriation is made.

This amendment is utterly unworkable, and it would make the administration of the program wholly impossible. It would destroy any capacity to negotiate with the foreign countries involved in these matters.

Mr. MANSFIELD. Mr. President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. I yield.

Mr. MANSFIELD. I should like to ask the Senator from Arkansas a question. Is it not true that on the basis of a committee recommendation, we provided by law that the Office of Inspector General be set up, and that at periodic intervals he report to the committee, by means of detailed reports, about what is going on in each individual country?

Mr. FULBRIGHT. Precisely.

Mr. AIKEN. Mr. President, will the Senator from Arkansas yield 1 minute to me?

Mr. FULBRIGHT. I yield 1 minute to the Senator from Vermont.

Mr. AIKEN. I wish to say that this amendment is even more unworkable than the Senator from Arkansas says it is. The amendment provides that within 90 days after the beginning of the year, all appropriations for defense support, technical cooperation, special assistance, and so forth, must be committed and frozen, and cannot be used for any other purpose. Such a provision would make the program one of the most unworkable that we have ever had before us.

Our attitude in regard to such countries often change after the fiscal year begins, and the needs also change. So this amendment would be a most disastrous one to adopt.

Mr. DIRKSEN. Mr. President, just to make the legislative history of this matter, let me say that during my service on the Appropriations Committee, I believe I have heard all the testimony on virtually every one of the mutual security programs. We were constantly at pains to work out techniques to deobligate the cost, if a change in need which could not be foreseen occurred. In that event, it would be necessary to reobligate the funds and to determine what would be necessary. That would require a degree of flexibility.

But this amendment would require "within 90 calendar days" "detailed budgets on a country-by-country basis" in regard to the various items set forth in the amendment. The budgets would have to be set forth in detail; and the "detailed budgets on a country-by-country basis" would have to set forth "with respect to defense support, technical cooperation, and special assistance, the specific purposes in detail by amounts for which the funds available will be obligated during the respective fiscal year, and such funds shall be available only for the purposes thus specified"—and so forth.

In that event, the entire program would be thrown into a straitjacket. In that case, if ever there would be an incentive to waste money, it would then exist—if the law provides, in effect: "It makes no difference how much of a change has occurred; the money can be spent only for the purpose specified." That would be an open invitation to waste.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. SALTONSTALL. The Senator has sat in the consideration of many of these programs. Is it not true that these programs which are submitted to the appropriate committees are then subject to agreement by the countries involved, which submission does not take place for 3 or 4 months later, and there are bound to be some changes?

Mr. DIRKSEN. That is correct.

Mr. President, I hope the amendment will be defeated, and I am ready for a vote.

Mr. FULBRIGHT subsequently said: Mr. President, I overlooked having printed in the RECORD a letter from the Comptroller General pertaining to the amendment offered by the Senator from Alaska, which has been voted on. I ask unanimous consent that the letter from the Comptroller General be printed in the RECORD prior to the vote, in order that the RECORD will be complete.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arkansas? The Chair hears none, and it is so ordered.

The letter, ordered to be printed in the RECORD, is as follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., April 15, 1960.

Hon. J. W. FULBRIGHT,
U.S. Senate.

DEAR SENATOR FULBRIGHT: This is in response to your inquiry of April 9, 1960, concerning Senator ERNEST GRUENING's proposed amendment to section 537(f) of the Mutual Security Act of 1954. The amendment consists of two parts, one relating to economic assistance, the other to military assistance, and we are commenting therefore separately on the two categories of assistance.

ECONOMIC ASSISTANCE

We are in general accord with the objectives of the amendment, as it seeks to strengthen congressional control over mutual security funds and to improve budgeting and accounting practices for such funds. In our letter of July 2, 1959, to Senator GRUENING, we stated that, because of the special role of the mutual security program as an instrument of U.S. foreign policy, we have considered it necessary to recognize, within reasonable limits, the need for flexibility in carrying out program plans and allow for changes which affect the nature and size of planned activities. Therefore, we have not deemed it appropriate to recommend a legislative requirement holding the executive branch to strict adherence to its budget plans.

However, based on our audit work covering the economic and technical assistance activities of the mutual security program, we have questioned the use of the illustrative type program presentation for planable activities and have recommended that firmer and better thought-out programs be presented to the authorizing and appropriating committees of the Congress as a means of encouraging closer adherence to programs as presented. We have also recommended for all planable activities more complete and meaningful presentation of proposed programs and a clear accounting for funds previously authorized and appropriated. As a further means of narrowing the use of funds to programs as presented, we have suggested

that the broad use and transfer authority contained in sections 451(a) and 501 of the Mutual Security Act of 1954, as amended, may no longer be needed in view of the broad uses of funds authorized for each of the major program categories and the establishment of a contingency fund by section 451(b) which is available to meet emergency requirements not susceptible of advance planning.

With respect to the proposed legislation which would require the responsible executive agencies to follow closely the program proposals presented to the Congress 90 days after the appropriation of funds, we believe that a basic question of policy is involved which is for the Congress to decide. We have called attention to a number of provisions in the legislation now in force which permit considerable flexibility in carrying out annual mutual security programs and would tend to reduce the effectiveness of the proposed legislation. The amendment currently proposed by Senator GRUENING has been suggested by us as a revision of his earlier proposal which had been submitted for our review. The revised provision was considered by us to be a more workable means of accomplishing the Senator's objective, if such legislation should be deemed desirable by the Congress. Whereas the Senator's original proposal required that the executive branch shall be bound by its detailed annual budgets when they are presented to the congressional committees prior to the authorization and appropriation of funds, the current proposal defers the time at which budget plans shall be binding to a point as close as practicable to the time of actual implementation.

MILITARY ASSISTANCE

The amendment to section 537(f) relative to military assistance, as proposed by Senator GRUENING was suggested by us in our letters dated July 2, 1959, and April 5, 1960. This amendment is in accordance with recommendations contained in our various reports on the military assistance program, that the Department of Defense should develop and submit to the Congress the aggregate projected costs of equipping, maintaining, and modernizing military forces in the countries which the United States has agreed to support under the mutual security program.

We believe that the annual appropriation requests should show the total projected cost or ceiling for each country, the portion already funded, the portion requiring funds in the budget year, and the time-phased costs for carrying out the remainder of the program, taking into account any revisions in total estimated costs which will have to be made from time to time. Based on these data, it would be possible to relate the annual appropriation requests to the estimated cost of the overall objectives that the United States is striving to achieve in the various countries being aided. This presentation would better enable the Congress, taking into consideration the resources already available from past appropriations, to determine the amount of additional funds required to carry out each annual phase of the projected programs. The Department has recognized the desirability, from a management standpoint, of formulating long-range plans and has taken measures to project future program costs for a period of 3 years. We believe that this information should also be made available to the Congress on a country-by-country basis. We consider that such information is essential to the Congress as a basis for considering annual appropriation requests and measuring program performance.

RESTRICTIONS ON OTHER AGENCIES

You ask whether other agencies in the U.S. Government are bound by similar restrictions on the use of funds. We are not aware of a legislative provision applicable to other agencies which restricts the use of appropriations to the specific purposes detailed in a budget presented either prior to, or within 90 days after, the appropriations are made. The purposes for which appropriations are legally available are generally governed by the language used in the statutes authorizing the appropriating the funds. It may be stated, however, that legislation relating to certain construction programs, such as public works programs carried out by the Bureau of Reclamation and the Corps of Engineers and the military construction and military housing programs, generally restricts the expenditure of funds to projects specifically presented to and approved by the Congress.

Sincerely yours,

JOSEPH CAMPBELL,
Comptroller General of the United States.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska [Mr. GRUENING] to the committee amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Virginia [Mr. BYRD], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Louisiana [Mr. ELLENDER], the Senator from Michigan [Mr. HART], the Senator from Alabama [Mr. HILL], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

On this vote the Senator from New Mexico [Mr. CHAVEZ] is paired with the Senator from Minnesota [Mr. HUMPHREY]. If present and voting, the Senator from New Mexico would vote "yea," and the Senator from Minnesota would vote "nay."

If present and voting, the Senator from Virginia [Mr. BYRD] and the Senator from Louisiana [Mr. ELLENDER] would each vote "yea."

I further announce that if present and voting, the Senator from Michigan [Mr. HART], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Ohio [Mr. YOUNG] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

The Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Indiana [Mr. CAPEHART]. If present and voting, the Senator from Nebraska would vote "yea," and the Senator from Indiana would vote "nay."

The result was announced—yeas 29, nays 54, as follows:

[No. 185]

YEAS—29

Bartlett	Goldwater	Mundt
Bible	Gruening	Muskie
Byrd, W. Va.	Johnston, S.C.	Proxmire
Cannon	Jordan	Robertson
Case, S. Dak.	Kerr	Russell
Curtis	Long, Hawaii	Schoeppel

Case, N.J.	Jackson	Saltonstall
Church	Javits	Scott
Clark	Johnson, Tex.	Smathers
Cooper	Keating	Smith
Cotton	Kefauver	Stennis
Dirksen	Kuchel	Wiley
Douglas	Lausche	Williams, Del.
Dworshak	Lusk	Williams, N.J.
Engle	McCarthy	Young, N. Dak.

NOT VOTING—17

Anderson	Hart	Murray
Bridges	Hill	O'Mahoney
Byrd, Va.	Hruska	Sparkman
Capehart	Humphrey	Symington
Chavez	Kennedy	Young, Ohio
Ellender	Morton	

So Mr. GRUENING's amendment to the committee amendment was rejected.

Mr. DIRKSEN. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JOHNSON of Texas. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas to lay on the table the motion of the Senator from Illinois to reconsider.

The motion to lay on the table was agreed to.

LEGISLATIVE PROGRAM

During the consideration of Mr. FULBRIGHT's amendment, "4–29—A,"

Mr. DIRKSEN. Mr. President, will the Senator from Arkansas withhold for a moment while I query the majority leader on the program for tomorrow?

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senator from Arkansas may yield to me for this purpose, without the Senator losing his right to the floor and without the time being charged to either side, with the understanding that the colloquy will be printed at a proper place in the RECORD.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

Mr. DIRKSEN. Mr. President, for the convenience of Senators I inquire of the majority leader what is the program for tomorrow, and perhaps for the following day?

Mr. JOHNSON of Texas. Mr. President, if we conclude action on the bill presently under consideration this evening, we shall proceed to the considera-

tion of Order No. 1333, H.R. 10809, to authorize appropriations to the National Aeronautics and Space Administration.

Also, we have a conference report on the Commerce Department appropriation bill at the desk, I believe.

I am also informed that the distinguished chairman of the Committee on Banking and Currency desires to make a motion, which may consume some time, to concur in some House amendments to a bill of interest to the Committee on Banking and Currency.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. HOLLAND. As the majority leader knows, we have had a conference report available for 2 or 3 days. I have been waiting all day to try to present it to the Senate. All the conferees have signed the report. I should like to have the report considered, if possible, at a time when the senior Senator from Delaware [Mr. WILLIAMS] can be present, because he has a particular interest in the matter.

At what time in the very near future does the majority leader desire to have the conference report presented?

Mr. JOHNSON of Texas. So far as the majority leader is concerned, as soon as we complete action on the pending bill it will be proper to consider the report. If we complete action on the bill this evening, I would suggest the report be considered immediately after we convene tomorrow.

Mr. HOLLAND. I understand the Senator from Delaware will not be available until 3 o'clock tomorrow.

Mr. JOHNSON of Texas. Very well. I shall be glad to have the report considered when the Senator from Delaware is available. The report is a privileged matter. The Senator from Florida has been very cooperative.

We will be considering the appropriation bill for the National Aeronautics and Space Administration. If the Senator from Delaware is available at 2 o'clock, at 3 o'clock, or at 4 o'clock, whenever the Senator from Florida desires to have the report brought before the Senate, I shall be glad to yield to him for that purpose, and to ask the Presiding Officer to recognize the Senator. We will consider the report, and discuss it.

Mr. HOLLAND. I thank the majority leader.

I should like to ask the Senator from Maine if tomorrow afternoon would be an agreeable time to her for consideration of the report.

Mrs. SMITH. Entirely so.

Mr. HOLLAND. Mr. President, I should like to give notice to all the Members of the Senate who may have some matter or other of interest involved in the conference report that I shall expect to present the report without fail tomorrow afternoon at the first moment the Senator from Delaware is available.

Mr. JOHNSON of Texas. I have already given notice to the Senator from Illinois that we will consider the conference report.

Mr. ROBERTSON. Mr. President, will the Senator yield to me?

Mr. JOHNSON of Texas. I yield to the Senator.

Mr. ROBERTSON. The distinguished Senator from Utah [Mr. BENNETT] wishes to make a brief comment on the bank merger bill, when we consider the matter. The Senator informed me this afternoon he could not be present on Wednesday but could be present on Thursday. The chairman of the Committee on Banking and Currency, who had planned to have the bill considered Wednesday, hopes the leadership will permit him to have it considered Thursday.

Mr. JOHNSON of Texas. The leadership will attempt to have the measure considered when the Senator from Virginia desires.

Mr. ROBERTSON. So far as the chairman of the committee knows, this is not a controversial bill, but several members of the committee wish to make a legislative history.

Mr. JOHNSON of Texas. I thank my friend the Senator from Arkansas [Mr. FULBRIGHT] for yielding.

Mr. DIRKSEN. Mr. President, I have one further inquiry. I do not believe the majority leader has asked consent for an order for the time of convening tomorrow.

Mr. JOHNSON of Texas. I should like to be guided by what we do tonight, before we get the order.

Mr. DIRKSEN. I presume we will finish consideration of the bill tonight.

Mr. JOHNSON of Texas. I presume so also, but I am not sure yet.

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. FULBRIGHT. Mr. President, I call up my amendment "4-29-60—A," and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. At the proper place in the bill it is proposed to insert:

SEC. 2. Section 2 of the Mutual Security Act of 1954, as amended, which is a statement of policy, is further amended by adding at the end thereof the following:

"(g) In giving effect to the principles expressed in subsection (f) above, the President should not normally regard them as applicable to a situation wherein two or more nations receiving assistance under this Act or surpluses under the Agricultural Trade Development and Assistance Act of 1954, as amended, are engaged in actions detrimental to United Nations efforts to maintain peace and stability and application of the above-mentioned principles would in the judgment of the President constitute partiality by the United States relating to the merits of the cause advanced by any one of the antagonists."

Mr. FULBRIGHT. Mr. President, the pending amendment is intended to try to bring the statement of policy which was inserted in the bill on last Thursday more into accord with what I believe to be the real interests of the country, that is, an impartial attitude toward the conflict which has troubled the Middle East for a very long time.

There has been a good deal of misinformation about the situation in the Middle East. This arises partly because of the inadequacy of our press in reporting what goes on there. I do not intend to make a long speech on my own account, but this subject has been considered very seriously by the Department of State, and the Acting Secretary of State has sent me a letter, copies have been put on each Member's desk. I shall not read all of that letter, but there are certain parts of it to which I wish to invite attention, to impress upon Senators that intervention in our troubled international relations is a serious matter.

Taken alone, without any reference to the actual state of affairs which exist in the world, the amendment which was offered by the Senator from Illinois and adopted last Thursday would seem to be inoffensive. But taken in connection with the facts which exist in the world, it is a very explosive amendment. My amendment is an effort to try to bring our policy back into accord with what I believe to be the interests of the country.

I wish to read one or two paragraphs of the letter from the Acting Secretary of State, Mr. Dillon. On page 2 of the letter, he says:

> Incidentally, there appears to be considerable inaccurate information surrounding the Suez Canal transit question. For example, it is said that American ships are being "barred" from the canal for having called at Israeli ports. As a matter of fact, not a single American ship has thus far been denied passage through the canal.

The contrary has been asserted in many quarters. This is the Acting Secretary of State speaking:

> Out of a total U.S. maritime fleet of 498, only 23 ships have been placed on the so-called Arab blacklist because of prior calls at Israeli ports. These 23 are denied entry at Arab ports but there has been no instance of denial of their transit of the canal.
>
> In this connection you may have read in the press that American labor unions in New York have set up picketing against the United Arab Republic ship *Cleopatra*. The purpose of the picketing is to impel the United Arab Republic to abandon its restrictions against Israel shipping.

Not against American shipping, but Israeli shipping.

Continuing with the statement of Acting Secretary Dillon:

> Unfortunately, this objective is not being served. Asserting their determination to resist such pressures, the Arab countries are establishing counterpicketing against American shipping. This reaction against coercion, which is not unnatural in young emerging states, means in effect that at least 20 American ships with 1,000 seamen aboard will be affected within the next month. It also means that for every Arab ship Americans may boycott some 30 American ships may be subjected to Arab boycott.

I hold in my hand a telegram received today from the chairman of the American Committee for Flags of Necessity, Mr. Erling D. Naess. This committee represents a long list of steamship companies, including Alcoa Steamship Co., American Oil Co., Atlantic Refining Co., Gulf Oil Corp., Marine Transport Lines, Socony Mobil Oil Co., Tidewater Oil Co., and other companies. Apparently, it is a very large association of flagships.

I ask unanimous consent to have the telegram printed in the RECORD at this point as a part of my remarks, to indicate how serious the repercussions of the boycott in New York, which was inspired by a local union, are against our shipping; in addition to being highly inflammatory to our political international relations.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

NEW YORK, *April 30, 1960.*

Hon. J. W. FULBRIGHT,
Chairman, Senate Foreign Relations Committee, Washington, D. C.:

I respectfully ask that a public hearing is now appropriate by your committee to determine the need for legislation to permit Federal courts in appropriate cases to give protection to the foreign commerce of foreign-flag vessels entering U.S. ports. The purpose of such legislation would be to assure that the treaty obligations of the United States be implemented and that foreign-flag ships of all friendly foreign nations may freely enter and trade in our ports without interference and harassment in their internal economy and management in violation of principles of international law recognized by the United States and maritime nations of the world. I submit this request as chairman of the American Committee for Flags of Necessity being a committee of Beneficial owners of a substantial number of foreign-flag tankers and other bulk carriers. Continued picketing by Seafarers International Union supported by International Longshoremen's Union of Egyptian-flag vessel *Cleopatra* in protest against policies of United Arab Republic despite statement to the press Thursday, April 21, by Department of State that such conduct was "embarrassing to the conduct of our Government's foreign relations and may have unfortunate consequences," together with decision of district court denying injunctive relief against such picketing to foreign owners of the vessel shows that foreign commerce of foreign-flag vessels in U.S. ports may now be conducted only at the sufferance of American Seamen's and Longshoremen's Union such conduct may result in nullification of provisions of treaties of friendship, commerce, and navigation with over 14 friendly foreign nations providing for flag recognition and containing provisions permitting the nationals of each high contracting party freely to come with their vessels to the ports of the other party and to engage in trade and commerce without interference. An obligation rests upon the United States to take steps to assure that these provisions will not be nullified by acts of private persons and that foreign-flag vessels of treaty countries may enter U.S. ports with confidence that these treaty rights will be respected. In addition there is need for similar protection by law of the foreign-flag vessels of nontreaty countries that come to U.S. ports.

ERLING D. NAESS.

NEW YORK, *April 29, 1960.*

Hon. J. W. FULBRIGHT,
Chairman, Senate Foreign Relations Committee, Washington, D.C.:

The membership of the American Committee for Flags of Necessity referred to in my wire today requesting public hearing is as follows: Alcoa Steamship Co., American Oil Co., American Trading & Production Corp., the Atlantic Refining Co., Bernuth, Lembcke Co., Inc., Chas. Kurz & Co., Inc., Cities Service Co., Gotaas-Larsen, Inc., Gulf Oil Corp., Marine Transport Lines, Naess Shipping Co., Inc., National Bulk Carriers, Inc., Richfield Oil Corp., Sinclair Refining Corp., Socony Mobil Oil Co., Inc., Standard Oil Co. (N.J.), Standard Oil Co. of California, Texaco, Inc., Tidewater Oil Co., United Fruit Co.

ERLING D. NAESS.

Mr. FULBRIGHT. I continue to read from the letter from Acting Secretary of State Dillon:

As can be seen, outside attempts, no matter how well intentioned, to compel one or more of the Middle Eastern countries to follow a certain behavior have wide repercussions. I might add that while resentments against such pressure in Arab-Israel matters have direct repercussions on our interests in 10 Arab countries from Morocco to the Persian Gulf, the sympathy for these 10 nations is inevitably widespread throughout Africa and Asia. This is a critical juncture in the history of those two continents. Just when the young Afro-Asian nations and particularly the Arab nations appear for the first time to be becoming aware of the fact that the Communists have been falsely posing as patriotic nationalists, it ill behooves us, through an appearance of placing strings on our aid, to incur the deep resentment or hostility not only of the 10 Arab nations but of their natural friends, the states of Africa and Asia. In fact, we do not believe it is in Israel's long-range interest that such enmity be aroused and choosing of sides precipitated throughout the Afro-Asian region.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. FULBRIGHT. Mr. President, I ask for 5 additional minutes on the bill.

Mr. JOHNSON of Texas. I yield the Senator 5 additional minutes.

Mr. FULBRIGHT. I shall not read all of this letter, because I know it is growing late. I may add that this letter was prepared after all our Ambassadors in this area of the world had been questioned about the effect of the amendment referred to. It is not a matter that was taken up casually and sent to us, so to speak, off the top of the head. This is the considered opinion of the Department and the Acting Secretary of State.

Mr. President, I ask unanimous consent that the entire letter from which I have been reading be printed in the RECORD at this point as a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, D.C., May 2, 1960.

The Honorable J. W. FULBRIGHT,
Chairman, Foreign Relations Committee, U.S. Senate.

DEAR MR. CHAIRMAN: In response to your request for the views of the Department of State with respect to the implications of the Douglas amendment to the mutual security bill, I take this opportunity to set forth the following pertinent observations.

As we understand the intent of its 18 sponsors, the Douglas amendment is designed to support efforts toward eliminating trade restrictions in the Middle East, particularly with respect to those practiced against the State of Israel. I am sure you are aware that this purpose is fully consistent with long-standing objectives of the U.S. Government. It is our conviction, however, that the inclusion of this amendment in current mutual security legislation will in fact be counterproductive and will not achieve its intended purpose. In addition, such inclusion will in our view have harmful repercussions on U.S. interests in a wide area of the Middle East.

As you know, a resolution similar to the Douglas amendment was passed in the House of Representatives at an earlier date. Fully sympathetic with the objective intended, the Department made the text available to our embassies and consulates in countries which would be affected by the amendment. In a unanimous expression of opinion our field posts from Morocco to Iraq reported that the adoption of an amendment of this type would clearly not be in the interest of the United States, nor for that matter of Israel.

Our posts abroad emphasized their concurrence with the objective sought by this amendment. They also stressed, however, that regardless of the effect which the amendment might have on the actual level of our assistance to the Middle Eastern States, the amendment would be widely interpreted as: (a) demonstrating favoritism for the State of Israel—to the extent that it would render more difficult our efforts to bring about a relaxation of tensions between Israel and the Arab States; and (b) an attempt to "tie strings" to our economic aid, and, by implication, to threaten the use of aid as an instrument of political coercion. Our posts pointed out, and the Department of State fully concurs, that incorporation of this amendment would without doubt have the effect of making the task of eliminating the Arab boycott of Israel more difficult and would play into the hands of the Soviet bloc which seeks to exacerbate Middle East tensions to further its penetration of the area.

Our Government has repeatedly made clear, publicly and through diplomatic channels, its support for freedom of transit through the Suez Canal, as well as our opposition to the Arab boycott against Israel. These undesirable restrictions, as you are aware, are an outgrowth of the Palestine problem, which continues to cause tensions between Israel and the Arab States and to perpetuate unfortunate circumstances such as those whereby nearly 1 million Arab refugees are not able to return to their homes. It is our Government's firm conviction that an Arab-Israel settlement will one day come, not by coercion but by a spirit of accommodation on both sides. As progress is made in that direction, such problems as boycotts, restrictions, and homeless refugees will disappear.

Incidentally, there appears to be considerable inaccurate information surrounding the Suez Canal transit question. For example, it is said that American ships are being "barred" from the canal for having called at Israeli ports. As a matter of fact, not a single American ship has thus far been denied passage through the canal. Out of a total U.S. maritime fleet of 498, only 23 ships have been placed on the so-called Arab blacklist because of prior calls at Israeli ports. These 23 are denied entry at Arab ports but there has been no instance of denial of their transit of the canal.

In this connection you may have read in the press that American labor unions in New York have set up picketing against the United Arab Republic ship *Cleopatra*. The purpose of the picketing is to impel the United Arab Republic to abandon its restrictions against Israeli shipping. Unfortunately, this objective is not being served. Asserting their determination to resist such pressures, the Arab countries are establishing counterpicketing against American shipping. This reaction against coercion, which is not unnatural in young emerging states, means in effect that at least 20 American ships with 1,000 seamen abroad will be affected within the next month. It also means that for every Arab ship Americans may boycott some 30 American ships may be subjected to Arab boycott.

As can be seen, outside attempts, no matter how well intentioned, to compel one or more of the Middle Eastern countries to fol-

low a certain behavior have wide repercussions. I might add that while resentments against such pressure in Arab-Israel matters have direct repercussions on our interests in 10 Arab countries from Morocco to the Persian Gulf, the sympathy for these 10 nations is inevitably widespread throughout Africa and Asia. This is a critical juncture in the history of those two continents. Just when the young Afro-Asian nations and particularly the Arab nations appear for the first time to be becoming aware of the fact that the Communists have been falsely posing as patriotic nationalists, it ill behooves us, through an appearance of placing strings on our aid, to incur the deep resentment or hostility not only of the 10 Arab nations but of their natural friends, the states of Africa and Asia. In fact, we do not believe it is in Israel's long-range interest that such enmity be aroused and choosing of sides precipitated throughout the Afro-Asian region.

In our view, avoidance of coercive tactics against Israel's neighbors is in Israel's interest. In just over a decade, Israel has quadrupled its exports. Its unfavorable trade balance has steadily been reduced. Israel's gross national product per capita is now more than twice that of any of its neighbors and even exceeds that of Netherlands and Italy. While foreign funds from various sources at an average rate of nearly $1 million per day have been partly responsible, primary responsibility for this progress lies with the Israeli people themselves, their ingenuity, industriousness, and devotion to purpose. Parenthetically, I should note that our Government has been consistent in its support to Israel. We have extended to Israel with its population of under 2 million a sizable total of various types of assistance, including Public Law 480. Such assistance, as you know, is continuing. Conditions have thus far been sufficiently favorable to allow Israel to make great strides. In our view it would be a grave mistake to have that progress disturbed by actions which can only stir up area tensions to Israel's detriment.

As you know, it is the view of our Government that the tensions of the Middle East can more effectively be treated by concerted international action than by unilateral action on the part of the United States. That was the essence of President Eisenhower's address before the United Nations General Assembly during the fateful Middle East crisis in the summer of 1958. Such progress as has been recorded since that time has been in large measure due to such international agencies as the United Nations Emergency Force and the United Nations Truce Supervisory Organization. With specific reference to the restrictions on Israeli shipping in the Suez Canal, the United Nations Secretary General has actively sought a solution. Although his efforts have not succeeded and have in fact met with a number of setbacks, the Secretary General as recently as April 8 reported his continued interest in the problem and his unextinguished hope that a solution may yet be found. Our Government is giving these endeavors its fullest support.

Although this letter is somewhat lengthy, I hope it will prove helpful to you in facilitating understanding of these important questions. In particular I hope it will make clear the reasons why those of us who deal with these problems on a day-to-day basis feel strongly that no actions should be taken which will exacerbate tensions in the Middle East which are clearly harmful to the long-range interests of the United States, Israel, and the entire free world.

Sincerely yours,

_____,

The Acting Secretary.

Mr. FULBRIGHT. To show how this amendment would affect other fields once it got started, I hold in my hand a copy of a letter from the Secretary of the Treasury, Mr. Robert B. Anderson. I realize that many people—most unfairly—have a prejudice against the State Department, but surely they have respect for the Secretary of the Treasury. I do not mean by that to imply that there is any reason for any different feeling. I have great respect for both of them. But this is what the Secretary of the Treasury has to say with regard to a similar amendment which the House committee has recommended with reference to the International Development Administration. Senators may think this is not pertinent, but it is, because this is an effort to inject into that field the same policy which has been injected into this legislation. I can see now that if this statement of policy is to be permitted to stand without qualification, the Senate will be told, within a few days, when the question of the International Development Association comes before us, "You adopted this declaration with regard to mutual aid. Certainly, to be consistent, you will have to adopt it with regard to the International Development Association."

I wish to read a few lines from this letter. I do not wish to detain the Senate too long.

Secretary Anderson says in his letter to the chairman of the Committee on Banking and Currency of the other body, of which a copy was sent to me:

The amendment in question would prohibit IDA loans to a country which is impeding free navigation through international waterways.

I believe that in all probability our choice is between an IDA based on the Articles of Agreement as they now exist, or no IDA at all.

I am reading only a portion of the letter. I ask unanimous consent to insert the entire letter as part of the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF THE TREASURY,
Washington, D.C., April 29, 1960.

Hon. BRENT SPENCE,
Chairman, House Banking and Currency Committee, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I would appreciate it if you would bring to the attention of the members of the committee my views as to the effect on the establishment of the International Development Association of the proposed amendment to the authorizing legislation now before the committee which would bar IDA financing to certain countries. The amendment in question would prohibit IDA loans to a country which is impeding free navigation through international waterways.

My considered opinion is that a qualification to the U.S. instrument of acceptance embodying this principle would not be acceptable to many prospective members and would necessitate a renegotiation of the Articles of Agreement of IDA. It is my further opinion, in view of the difficulties of negotiating the present document and in the light of some of the implications of the suggested revision, that the attempted renegotiation would not be successful. I believe that in all probability our choice is between an IDA based on the Articles of Agreement as they now exist, or no IDA at all.

I am sure that the IBRD–IDA management would regard any mandate to the IDA like the one under discussion as tending to compromise the basic principle which has been observed in the Bretton Woods institutions that the resolution of disputes of a political character among members should be left to the United Nations itself or to other bodies or channels. The effectiveness of the Bank and IDA as international financial organizations would be impaired if they were to operate as political instruments or try to use their lending powers as a method of compelling enforcement of international obligations which are outside their province.

Certainly many of the member governments would also regard the proposed amendment in a similar way. These governments might well be prepared to reverse themselves and refuse their support for IDA. They have all joined the International Bank with the assurance that the United States agreed to the provisions in the Articles relating to the exclusion of political considerations, and they fully expect the provisions of the IDA's charter to be interpreted in the same way. They would be understandably reluctant to join IDA if it meant they were to be involuntarily drawn into political controversies by their participation in the organization's decisions.

The present Articles of Agreement represent a delicately balanced compromise among widely varying viewpoints, worked out laboriously over many months. To reopen negotiations on one point would invite the reopening of every other point at issue, if the United States, a prime mover in the entire IDA project, were to request a renegotiation of the Articles on a point not raised in the original negotiations. Several nations have already begun their legislative processes on the basis of the Articles as presently drafted. The difficulties and embarrassment of those governments at having to begin over with a new proposal are certain to be translated into resentment directed toward the United States.

It is, of course, for the Congress to decide whether or not it can accept the Articles as transmitted to governments by the Executive Directors. I do believe that the other governments are looking to the United States for leadership, and acceptance of the Articles by the United States without qualifying amendments is the surest method of inducing similar action in other countries. If there were to be legislative limitations on U.S. membership, the door would be open to similar provisions, some retaliatory, some pointed to other policy objectives, on the part of other countries. These would, in my view, destroy the integrity of IDA's basic document.

I am sure it is not necessary to review for committee members all of the reasons behind our support for IDA. I would like to reemphasize, however, how much it is in our own interest to see the successful establishment of this institution. IDA represents a major step in the urgent task of enlisting the resources of the advanced countries of Western Europe and elsewhere in a cooperative approach to providing the special financing required for the development of the less-developed world. We have long been alone in this endeavor, but we now have in IDA a chance to get others to join with us. We must not forgo this opportunity. Much time and effort have been invested in encouraging, persuading, and inducing other capital-providing countries to adopt, sometimes in the face of strong opposition at home, what is for them a new line of policy.

There is also beginning to be a response to our efforts to seek an expansion of the bilateral aid efforts of other countries and

an acceptance of the idea that others must play a larger role. We should not, under these circumstances, introduce a complication in the IDA proceedings which would require a renegotiation which might not be successfully carried out.

Very truly yours,

ROBERT B. ANDERSON,
Secretary of the Treasury.

Mr. FULBRIGHT. What Secretary Anderson is saying is that if this amendment remains in the articles of agreement, there will be no agreement.

The International Development Association originated from an idea or suggestion of the Senator from Oklahoma. It was considered by the Banking and Currency Committee, and later by the Foreign Relations Committee and the administration, over a period of 2 years. It is an effort to bring into the common development of the world all the highly industrialized nations, and it appears to be on the verge of success.

Mr. Anderson continues, to the effect that if such an amendment is injected into that agreement, there will be no IDA.

I am sure that the IBRD—

That is the Bank—

I am sure that the IBRD–IDA management would regard any mandate to the IDA like the one under discussion as tending to compromise the basic principle which has been observed in the Bretton Woods institutions that the resolution of disputes of a political character among members should be left to the United Nations itself or to other bodies or channels. The effectiveness of the Bank and IDA as international financial organizations would be impaired if they were to operate as political instruments or try to use their lending powers as a method of compelling enforcement of international obligations which are outside their province.

Certainly many of the member governments would also regard the proposed amendment in a similar way. These governments might well be prepared to reverse themselves and refuse their support for IDA. They have all joined the International Bank with the assurance that the United States agreed to the provisions in the articles relating to the exclusion of political considerations, and they fully expect the provisions of the IDA's charter to be interpreted in the same way. They would be understandably reluctant to join IDA if it meant they were to be involuntarily drawn into political controversies by their participation in the organization's decisions.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. FULBRIGHT. I ask for 5 additional minutes.

Mr. DIRKSEN. I yield 5 additional minutes to the Senator from Arkansas.

Mr. JAVITS. Mr. President, will the Senator yield for a question?

Mr. FULBRIGHT. I shall not read more from the letter of the Secretary. To sum up what the Secretary of the Treasury says it is that if the amendment is injected into the agreement, there will be no IDA.

I know that we have already acted in the Senate. I regret it very much. I am offering an amendment which in all earnestness I believe will tend at least to bring us back into an impartial attitude toward this unfortunate controversy which has existed in the Middle East since 1948.

It would be unfortunate if by our action we left the impression that we have no regard for the position of the opposition, so to speak, that is, the attitude of the Arab States. I realize the political significance of this matter. I do not have any Arab constituents; none of us does. There is, however, more involved than just whether or not the Arabs or the Israelis have more influence. This involves a matter of great importance to the continued interest of this country in international affairs, particularly in the Asian and Middle East and African world.

I submit it would be most wise if the Senate were to adopt this ameliorating amendment of the action we took the other day. I do not seek to change—I cannot seek to change—what we did, but I seek to do something which I believe will soften the effect of what we did.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. JAVITS. I should like to ask the Senator whether, in view of the fact that this is a "sense" resolution, he does not feel that if this stands, we would make more progress with respect to IDA than if it fails, because once we have expressed a sense to the President, that is all we can do, no matter how many times we express it in different bills.

Mr. FULBRIGHT. I do not know what the Senator means with respect to IDA. We will have to meet that situation when we come to it. The Secretary of the Treasury says that this kind of resolution would cause him to give up on IDA, that he could not get it accepted. I used IDA as an illustration only. I do not believe that Senators recognized how important this issue was when they voted on it on Thursday. I do not believe they realized the inflammatory and explosive nature of the sentiments which exist in the Middle East. Our policy, it seems to me, ought to be one of calming down that situation, in the hope that there may be some way in which these people can come back to negotiating their differences out of friendship. We should not say to these people, in connection with the aid program, "If you do not behave yourself, we will not give you any assistance." I think such an attitude would have just the opposite effect.

This is the considered opinion of the State Department, after consultation with representatives in the field. That is all I have to say about it.

Mr. JAVITS. Mr. President, will the Senator yield further?

Mr. FULBRIGHT. There is not one cent in this for Arkansas, and I apologize for taking so much of the Senate's time. [Laughter.]

Mr. JAVITS. Mr. President, will the Senator yield for one further question?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DIRKSEN. I yield 5 minutes to the Senator from New York.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I am willing to do whatever is desired. I am willing to yield either to the Senator from Ohio or to the Senator from New York for a question.

Mr. JAVITS. I shall take the floor in my own right later.

Mr. FULBRIGHT. Mr. President, may I yield for a question before I sit down?

Mr. DIRKSEN. I yield 1 minute to the Senator from Arkansas.

Mr. LAUSCHE. May I ask the Senator to illustrate how the language contained in his amendment will balance and make objective and impartial the position of the United States?

Mr. FULBRIGHT. Insofar as we were able to figure out this matter—and I can say that this was a very difficult question—representatives of the State Department and members of our staff, which is an excellent staff, struggled on this subject for some time. I call attention to the language on page 2 of the amendment, which reads "would in the judgment of the President constitute partiality by the United States relating to the merits of the cause advanced by any one of the antagonists."

Our feeling is that this is saying to the President that in administering the language in the Douglas amendment, he would administer it with due regard to an impartial attitude toward the merits of the controversy that exists between Israel and the Arab States. That is about the best we can do.

Mr. JAVITS. Mr. President, unfortunately, I was not present last week during the debate on this issue. I had to be in Europe on official business, and did not get an opportunity to participate in the debate.

I should like to address myself very briefly to the issue, and I hope that I may have the attention not only of the Senator from Arkansas but of all the proponents of the amendment, because I believe that if its meaning is spread on the record, the amendment can be of tremendous use to us in the consideration of the bill.

First, let me state that the question at issue is not partiality or impartiality in the conflict between Israel and the Arab States. The question is partiality or impartiality in connection with honoring international commitments in connection with transit through the Suez Canal. Let us not forget that Mr. Nasser blocked the canal in 1956 to the whole world, not just to Israeli shipping. We should also remember that he entered into an international commitment in 1956, when the United States came to his rescue, as the world knows, following the action at that time of the French and British and Israeli forces. Mr. Nasser, on behalf of his government, undertook the commitment that there shall be free transit through the canal without discrimination, overt or covert, and that the operation of the canal should be insulated from the politics of any country, especially his own country.

The United States is a great maritime power. It took a position that bailed out a very serious situation in which the Russians threatened to shoot rockets if the British and French and Israelis did not retire. Therefore, we have a very

burning interest in the question of whether or not there is a violation of the principle established in international law by our country and by other maritime powers, particularly with respect to an international covenant undertaken by the Egyptian Government. If that covenant is violated with respect to a small nation, it can, and undoubtedly, if it suits the political purposes of those who control the canal, will be violated later in a larger way.

The fact is that the Government of Egypt considers itself in a state of war with the Government of Israel. There is no question about that. However, the situation is not helped by condoning a violation of international law or by condoning a violation of an international covenant.

I now ask the particular attention of the chairman of the committee, if I may. The amendment as it was adopted by the House, and as it was adopted by the Senate last week, is justified. The question is, what does the amendment do? What does it commit us to do? What change will be made by the amendment now suggested by the chairman of the committee?

First, let me say that the Senator from Arkansas [Mr. FULBRIGHT] is entitled to our greatest respect because there is no question about the objective of the amendment. I read from the debate as shown in the CONGRESSIONAL RECORD at page 8977, of April 29, where the Senator from Arkansas said:

> I do not think anybody in this body, or anywhere else, does not desire that the Suez Canal be opened for all shipping, including Israeli shipping; but I submit this is not the right way to do it.

In other words, we are all seeking the same objective.

I should like to ask the proponents of the amendment and the chairman of the committee: Am I not correct in believing that this amendment, as it stands, is strictly a precatory request to the President? It can be in the strongest language in the world. I am ready to agree that the language is strong. Perhaps it is overly strong, although I think the provocation is at least as strong. Is it not a fact, as a matter of constitutional law, and following the tradition of our country, that no matter how tight or strong the language is, this amendment is no more than a request to the President? The President may, if he chooses, do nothing about it, and none of us can do anything about it.

Is it not also true, as a matter of fundamental constitutional law, that if we tried to do anything else, we would be violating the Constitution? The courts have held, time and time again, that the negotiation of foreign policy is absolutely in the hands of the President.

It seems to me that the only thing bothering the State Department is the provision at the end of the amendment which states that the President "shall report on measures taken by the administration to insure their application"; to wit, the principles which we request the President to adopt in this amendment, which the Senate and the House have already adopted.

I say advisedly, as a lawyer who has studied the Constitution, that the President of the United States could disregard that language completely. He does not have to give the Senate or the House any report at all. However, the President, being what he is, would not choose to do that, in my opinion. Nevertheless, there is nothing in this provision which requires him to give Congress a report in writing. He can send a Cabinet officer or another representative to the Committee on Foreign Relations and to the House Committee on Foreign Affairs. He can communicate in any way he chooses, either principally or by agent, to the chairman of the Committee on Foreign Relations and the chairman of the Committee on Foreign Affairs, and to the ranking members of those committees. He can do all that in executive session.

In short, the President, notwithstanding the amendment—and I invite Senators to concur in this statement, because it is very important, if this is sustained—what is being requested, which is in strong language, is that the set of principles and a certain act be effectuated. The President would be less than the President if he deeply felt that the national interest would be jeopardized or prejudiced by what we are asking. I have little doubt that he will not do that. Therefore, I do not see the danger in this. I see this virtue, that Congress is insisting upon principle.

The PRESIDING OFFICER. The time of the Senator from New York has expired.

Mr. DIRKSEN. Mr. President, I yield 3 additional minutes to the Senator from New York.

Mr. JAVITS. Congress is insisting upon morality and upon the honoring of international commitments. Congress is asking our President to do everything he can within his power, and also within cautions, which he has as the head of the foreign relations of the United States, to try to carry them through.

As to the language itself, we can well understand that since the House adopted certain language in a manner which is quite as difficult as this one, it would be discerning on the part of the Senate to adopt exactly the same language; especially as it refers only to a request, a statement of what we believe should be done, but which the President will consider in the light of the overall national interest, as I explained a moment ago.

In view of that consideration—in which I deeply feel and hope the chairman and the proponents of the amendment will concur, so that the legislative history upon that subject will be very clear—I think the amendment now suggested by the Senator from Arkansas—who under the law, I believe, will find full protection for the State Department, and all its qualms—would only be compounding an already difficult situation in his own view. This is because his amendment provides—and I quote from line 9—that the President is required to determine and make a finding—the word used is "engaged." The President is required to make a finding that nations "are engaged in actions detrimental to United Nations efforts to maintain peace and stability."

It seems to me that that is exactly the kind of request which Congress would not wish to make of the President, because that would embarrass him far more than anything contained in the amendment.

Therefore, I sum up as follows: The Senate and the House have, in strong language, expressed themselves on the sanctity of international covenants and international law. The President has complete discretion in terms of the national interest, as he sees it, over what he can do about that expression; and that even extends to the way in which he will report what he has done under this amendment.

Yet Congress is absolutely right in seeking to have the moral law enforced and in seeking to have international covenants complied with in so important a matter as free transit through a great international waterway.

I call the attention of Senators to the fact that there is a tyranny not only of strength; there is also tyranny of weakness. That tyranny can be just as damaging, just as harmful. In short, because Nasser heads a small power, a country which is not a great military power, that does not mean that he can be a pirate by the very use of his weakness.

Mr. DOUGLAS. Mr. President, will the majority leader yield me 5 minutes?

Mr. JOHNSON of Texas. I yield 5 minutes to the Senator from Illinois.

Mr. DOUGLAS. I submit that the argument of the Senator from Arkansas and the State Department rests upon a fundamental error. They contend that the question of Egypt barring entrance to the Suez Canal to Israeli shipping and other ships carrying cargoes to and from Israel, and the blacklisting of ships which have traded with Israel, involves purely a dispute between Egypt and Israel, and that, therefore, if we take any position in this matter, we are guilty of partiality.

This is not true, as the Senator from New York has pointed out. This is not primarily a dispute between Israel and Egypt. It is a case of one country, Egypt, having violated treaties, refusing to follow the rulings of the United Nations, and going back upon its own promises.

There was introduced into the RECORD on last Thursday a brief history of the Suez Canal. By the Convention of 1888, the Ottoman Empire, of which Egypt was then a part, guaranteed free movement through the Suez Canal. Then when Egypt barred Israeli ships and cargoes, following its attack on Israel in 1948, the Security Council of the United Nations declared in 1951 that that was in violation of proper terms, and demanded that Egypt allow free transit through the canal. The 1951 resolution specifically noted that the Suez restrictions and other sanctions applied by Egypt were damaging other nations not connected with the Palestine conflict.

Egypt refused to carry out this mandate of the United Nations, however, although Egypt was a member of the United Nations.

The dispute continued, and Egypt even extended the blockade to include the Gulf of Aqaba. Then, when the British troops were withdrawn from the canal and Egypt nationalized the canal, Nasser pledged, as one of the six principles, that there would be free transit for ships of all nations, and that there would be no interference with their movement, either openly or secretly.

It is certainly true that our State Department worked with Nasser to try to get his public acceptance of these principles, and there is no question as to what the international law is on this subject. But the record is also clear that Egypt has refused to go along with the mandate of the United Nations and has broken its own word. Mr. Hammarskjold has talked with Nasser, but has not been able to effect any change in his policies. Quite the contrary. In 1959 and 1960 the policy of Egypt has been far more aggressive in this matter than it was in 1957 and 1958.

Yet our State Department wrings its hands, and says, in effect, "Oh, yes. We stand for free access; but let us do nothing effective to bring it about." In the foreign aid bill and under surplus food programs, we actually increased the aid to Nasser for 1960 to come to an amount something like $100 million. And the UAR obstructions to shipping have become worse.

The question simply is: Are we to continue having ineffectual conversations, or will we try to get more general acceptance of the principle that there are moral laws in the world, and that there is some obligation to follow the decisions of international bodies? I know there is a school of thought which says that moral and legal considerations should not guide the policies of nations. Apparently the State Department agrees that these factors should not prevail.

In effect, the State Department is saying that if we stand up for international law and if we attempt to insist on free transit, we may make Colonel Nasser angry, and that this would be a bad thing to do. The Senator from Arkansas in his remarks on Friday implied that the captive nations resolution with which some of us had something to do, last summer, and the effort to have the captive nations issue included in the forthcoming summit agenda, were similary not in the national interest. Although he did not say so, I suppose it follows logically that it would not be in the national interest, because it might make Mr. Khrushchev angry—as the resolution in fact did.

Mr. FULBRIGHT. Mr. President, will the Senator from Illinois yield?

Mr. DOUGLAS. I prefer not to yield until I finish my remarks; then I shall yield.

Mr. President, I think we have before us the very simple question of whether or not we take these matters of international law seriously.

The PRESIDING OFFICER. The time available to the Senator from Illinois has expired.

Mr. JOHNSON of Texas. Mr. President, I am glad to yield additional time on the bill to the Senator from Illinois.

Mr. DOUGLAS. I have about concluded my remarks. I shall only take such time now as may be necessary to permit the Senator from Arkansas to ask the question he had in mind.

Mr. FULBRIGHT. Mr. President, the Senator from Illinois has made a great deal of the Egyptian violation of a mandate. Is it not a fact that the Israelis are in violation of a mandate in regard to settling the refugee question?

Mr. DOUGLAS. Now the Senator from Arkansas is bringing in another issue.

Mr. FULBRIGHT. Oh, no.

Mr. DOUGLAS. Let me say that I am perfectly prepared to vote for a resolution—if the Senator from Arkansas insists upon it—which will declare that we believe we should use our good offices to try to get the refugee question settled in an atmosphere of peace, and that as part of that peace settlement Israel should take back a reasonable number of the refugees. I am not here to attempt to whitewash the position of Israel on the matter of the refugees. I want to make that clear. But I think the Senator from Arkansas is trying to change the subject.

The measure which we adopted last Thursday has nothing to do with the boycott by individuals in New York Harbor or in Montreal. It has nothing to do with the International Development Association. It is confined solely to the question of administering our aid programs in a manner to assure free transit, under international law, and it is an effort to help end blockades and other economic warfare between recipients of our aid. It is therefore not only proper, but highly desirable.

Mr. MORSE. Mr. President, will the Senator from Texas yield 4 minutes to me?

Mr. JOHNSON of Texas. I yield 4 minutes to the Senator from Oregon.

Mr. MORSE. Mr. President, I ask unanimous consent to have printed at this point in the RECORD, as part of my remarks, the two amendments the Senator from Arkansas [Mr. FULBRIGHT] has had printed. One of them is the pending amendment, and the other deals with the refugee problem.

There being no objection, the amendments referred to, as submitted by Mr. FULBRIGHT, were ordered to be printed in the RECORD, as follows:

Amendment proposed by Mr. FULBRIGHT to the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes, viz: At the proper place insert:

"SEC. 2. Section 2 of the Mutual Security Act of 1954, as amended, which is a statement of policy, is further amended by adding at the end thereof the following:

"'(g) In giving effect to the principles expressed in subsection (f) above, the President should not normally regard them as applicable to a situation wherein two or more nations receiving assistance under this Act or surpluses under the Agricultural Trade Development and Assistance Act of 1954, as amended, are engaged in actions detrimental to United Nations efforts to maintain peace and stability, and application of the above mentioned principles would in the judgment of the President constitute partiality by the United States relating to the merits of the cause advanced by any one of the antagonists.'"

Amendment proposed by Mr. FULBRIGHT to the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes, viz: On page 18, end of line 13, insert the following:

"It is the sense of the Congress that the refugees wishing to return to their homes and live at peace with their neighbors should be permitted to do so at the earliest practicable date, and that compensation should be paid for the property of those choosing not to return and for loss of or damage to property which, under principles of international law or in equity, should be made good by the governments or authorities responsible."

AMENDMENT NOT CONDUCIVE TO INTERNATIONAL HARMONY

Mr. MORSE. Mr. President, I rise to oppose the Fulbright amendment because it would not be in the interest of international harmony to call upon Israel to permit Arab refugees repatriation in advance of a peace settlement. Its adoption would fortify all Arab resistance to any comprehensive proposals for the resettlement of the Arab refugees. It would vindicate Arab insistence that Israel accept the primary responsibility for the refugee burden.

Numerous studies of refugee problems recognize that the solution lies in resettlement, not repatriation. The real solution for the Arab refugee problem is integration in the Arab countries. This was envisaged in U.N. Secretary General Dag Hammarskjold's report last year—a report which was sharply attacked by Arab leaders because it ignored the political demand for repatriation.

NO REPATRIATION WITHOUT PEACE

Senator FULBRIGHT observes that his proposal is the same as a declaration approved by the U.N. General Assembly, December 11, 1948, and subsequently reaffirmed by that body. But this resolution was one paragraph—No. 11—of that 1948 resolution, which, it should be emphasized, also "called upon the governments and the authorities concerned to seek agreement by negotiations conducted with a view toward the final settlement of all questions outstanding between them."

Thus, clearly, the General Assembly intended that any Arab repatriation would be within the context of Arab-Israel peace negotiations.

All the Arab States voted against the 1948 resolution because they were opposed to peace negotiations. Nevertheless, they always invoke paragraph 11, without any reference to the fact that the same resolution also called upon them to make peace. How can Senator FULBRIGHT select one section of the U.N. resolution, ask the Senate to accept it as a statement of U.S. policy, and completely ignore the U.N. call for peace?

THE PROPOSAL IS OBSOLETE

The statement is 12 years old. Although it has been reaffirmed because of

Arab pressures at the U.N. the Arabs themselves have rendered the proposal obsolete because they have persisted in their war; they have refused to negotiate; and they have reared a new generation of Arab refugees indoctrinated with hostility. It would be suicidal for Israel to accept the return of an unlimited fifth column in advance of a peace settlement.

WHO KNOWS HOW MANY WOULD GO BACK?

Senator FULBRIGHT has argued that only a few refugees want to go back. But how does he know? Why should we expose Israel to such extraordinary peril?

In an article in America, the national Catholic weekly, Father Vincent S. Kearney, S.J., an associate editor, wrote on April 9, 1960:

Nor is it reasonable to expect Israel to commit national suicide by opening her borders to a million potential enemies—the displaced Palestine refugees. Israel still protests it is ready to negotiate a settlement. We cannot know what Israel will propose, unless the opportunity is given it to meet Arab leaders face to face.

On May 19, 1957, Bishop James Pike wrote:

The readmission of the Arab refugee population of Israel would be equivalent to the admission by the United States of nearly 71 million sworn enemies of the Nation.

THE ANALOGY OF THE REVOLUTIONARY PERIOD

What would Americans do under similar circumstances? During the American Revolution, many colonists fled to Canada, where they became the united empire loyalists. The British pressed our country to permit the loyalists to return. The U.S. Congress emphatically instructed our negotiators to reject repatriation.

On November 26, 1782, 4 days before the preliminary treaty was signed, Benjamin Franklin wrote Richard Oswald, the British negotiator:

Your ministers require that we should receive again into our bosom those who have been our bitterest enemies, and restore their properties who have destroyed ours; and while the wounds they have given us are still bleeding.

THE U.N. EMPHASIS CHANGED AFTER THE 1948 RESOLUTION

It would be a step backward for the Senate to associate itself with a repatriation demand made in 1948. Such action would ignore the fact that subsequent U.N. resolutions beginning in 1950 have spoken of "the reintegration of the refugees in the economic life of the Near East, either by repatriation or resettlement."

PAST CONGRESSIONAL FINDINGS

Spokesmen for our own Government and virtually every congressional report have stressed resettlement.

On August 26, 1955, Secretary of State Dulles announced America's willingness to lend Israel funds, to enable her to pay compensation and thus facilitate resettlement.

A special study mission of the House Committee on Foreign Affairs declared, in the Smith-Prouty report, in 1953:

The United States should serve notice that it will not support the return of the Arab refugees to their former homes within the boundaries of Israel under existing conditions.

In a special report of the Senate Foreign Relations Committee, on June 28, 1957, the Senator from Minnesota [Mr. HUMPHREY] declared:

Resettlement in Arab lands with compensation for property left in Israel is, in fact, the only effective and realistic way of solving the Arab refugee problem. The fact is that the Arab States have for 10 years used the Palestine refugees as political hostages. Nothing has been done to assist them in a practical way lest political leverage against Israel be lost.

A special study mission to the Near East, of the House Committee on Foreign Affairs, on February 25, 1954, said:

The objective should be for refugees to become citizens of the Arab states and, if necessary, they should be made wards of the Arab governments pending their admission to citizenship.

In 1953, a subcommittee of the Senate Committee on Foreign Relations, headed by the late Senator Robert A. Taft, and including Senator FULBRIGHT, held hearings on the refugee question. It did not recommend that Congress endorse the Arab demand that Israel accept the right of the refugees to come back. The subcommittee said it did not feel that—

It could pass on the feasibility of resettlement in Israel, except to say that such a solution could not handle more than a small proportion of the total number. The subcommittee feels that, apart from any action taken by Israel, the Arab states should develop definite proposals for refugee self-employment and rehabilitation outside of Israel.

It went on to say that—

The subcommittee does not believe that the Arab nations can escape responsibility to their fellow Arabs by failing to cooperate fully with the U.N. in projects designed to settle refugees.

A special study mission of the House Committee on Foreign Affairs declared, in May 1958, that—

Unlike refugees in other parts of the world, the Palestine refugees are no different in language and social organization from the other Arabs. Resettlement, therefore, would be in familiar environment.

This committee consisted of Representatives HAYS, O'HARA, and CHURCH.

THE DEMOCRATIC PLATFORM

The platform adopted by the Democratic Party in 1956 said:

The plight of the Arab refugees commands our continuing sympathy and concern. We will assist in carrying out large-scale projects for resettlement in countries where there is room and opportunity for them.

Millions of refugees have been resettled since the war—none by repatriation. In November 1957 the Carnegie Endowment for International Peace published a study on refugee problems, prepared by Dr. Elfan Rees, advisor on refugees to the World Council of Churches, which declared:

No large-scale refugee problem has ever been solved by repatriation.

ISRAEL'S OFFER

Israel has repeatedly offered to pay the Arab refugees compensation for their abandoned property and to negotiate all issues in dispute. On November 17, 1958, the Ambassador of Israel told the United Nations:

We do not exclude an extension of the uniting of families scheme under which many former Arab residents already have come back to Israel territory.

The present Arab population in Israel is already more than 200,000.

Manifestly, there must be direct peace negotiations before any progress can be made.

Mr. President, for the reasons I have here set forth, the Fulbright amendment should be rejected.

Mr. President, I wish to summarize my position by extending my very high compliments to the Senator from Illinois [Mr. DOUGLAS] who just now has made a very brilliant argument in regard to the international law principles involved in this case.

I wish to state that, once again, the Senate has before it the question of whether it will go on record in support of trying to strengthen a system of international justice through law, or whether it will again bend at the knees, at the dictates of some totalitarian nations, and to the State Department, which seems to think that whenever we seek to establish the principle of insisting upon the application of international justice through law, the Russians are "going to get us if we don't watch out."

I think the time has come for us to make perfectly clear to the Arab countries that we are not going to be blackmailed by them any longer, whether because of oil or because they might go over to the Russians or because they might go to war. If they want to go over to the Communists, let them go over and boil in that Communist oil for a while, and see how they like it.

I have never been moved by the argument that the Russians will take over the Middle East if we do not continue to support the dictatorial policies of certain Arab leaders.

The fact still remains that the Arab leaders are threatening to destroy the only free nation in the Middle East as soon as they think they are strong enough to do so, and we are being asked to continue to support such totalitarianism.

When are we going to stop supporting such a policy, which always boomerangs against us?

Consider what happened in recent weeks because we did not insist upon international law principles and did not insist that dictatorial nations stop following courses of action which increased the dangers of war.

There is no question about the fact that these Arab nations refused to negotiate a peace and refused to proceed through the United Nations. The record is perfectly clear that the United Nations time after time notified the Arab nations that it was willing to negotiate a peace.

We are seeking to make clear, through the United Nations, to both Israel and the Arab countries, that we expect both of them to follow peaceful procedures, as the Senator from Illinois [Mr. DOUGLAS] has so eloquently stated.

So, Mr. President, I am not at all moved by the arguments of the Senator from Arkansas [Mr. FULBRIGHT], the chairman of the committee on which I have the honor to serve. I am not at all moved by the argument that those of us who are standing for a system of international justice through law are playing politics with this issue. It is time for the Senate to stand firm on the resolution it agreed to last Thursday, and not modify it one iota, but make perfectly clear to the Arab states and also to Israel that we think the time has come for them to stop their threatening positions in the Middle East, and to submit these issues to an international tribunal, for determination.

Every question involved in this controversy is susceptible of determination—as the Senator from Illinois has pointed out—by international tribunal processes.

I think one of the best assurances we can obtain for an end to the kind of international blackmail politics being used against us in the Middle East is to stand firm on the amendment we adopted the other day.

Mr. KEATING. Mr. President——

Mr. DIRKSEN. Mr. President, I yield 5 minutes on the bill to the Senator from New York [Mr. KEATING].

The PRESIDING OFFICER. The Senator from New York is recognized for 5 minutes on the bill.

Mr. KEATING. Mr. President, when we read this proposal of the Senator from Arkansas, we find that it is only an effort to negate and nullify the action the Senate took on the freedom of the seas amendment. It cannot masquerade as anything else.

The amendment of the Senator from Arkansas says, in effect, that the freedom of the seas shall apply to everything except the Suez Canal. That would be like adding to the civil rights bill a provision that "Provided, however, this bill shall not apply to Negroes."

Picketing has nothing to do with this issue. The boycott in New York has nothing to do with this issue. All those are smokescreens thrown out in an effort to nullify the action the Senate took last Thursday.

The distinguished Senator from Arkansas characterized this amendment, when he offered it, as "only a very modest effort to bring the language which was put in the bill—into a better perspective."

"Modest," indeed. "Better perspective," indeed.

I would prefer to call it a gigantic effort to put into oblivion or innocuous desuetude the action the Senate already has taken.

I agree with my colleague that it would be ony a statement of the sense of the Congress. But there is no compromising on the principle of free navigation of international waterways. We could not do what the distinguished Senator calls modest things with that basic concept. We could not temporize or place in what the Senator from Arkansas calls better perspective than principle.

That is why this amendment, which seeks indirectly to negate the amendment the Senate adopted last week, should be rejected.

This amendment would, indeed, invite the President to ignore the previous amendment, precisely in the place where it should be applied, namely, in international disputes involving blockades and boycotts.

To reverse the action the Senate took on Thursday, adopting this amendment, could very well serve as a green light to Colonel Nasser and his fellow highwaymen to continue their high-handed tactics. It would be an outright retreat from our country's oft-stated dedication to free navigation in international waterways. It would cut off an effective means for this country to protest the UAR's acts of international piracy.

The action the Senate took last week in adopting that amendment was not the first action taken by the Senate in maintaining that position. The pending amendment would be an attempt to avoid any protest against economic warfare actions in that area by the United Arab Republic.

The Senator from Arkansas has had some rather harsh things to say about those of us who supported that amendment. In effect, he has said that we are yielding to efforts by pressure groups, and that we are not acting on the basis of principle. Well, Mr. President, if yielding to pressure means raising one's voice in defense of the things in which one believes, there is indeed pressure, and justifiable pressure in the present instance.

I hope the Senator would not prefer "acquiescence groups" to pressure groups when a matter of great principle is involved. There have been pressure groups, all through the history of America, that have accomplished very effective and worthwhile actions.

Mr. President, the motives and considerations of those who supported the amendment we passed, although they have been questioned, are pure, and they are not properly subject to the attacks that have been made upon them by our distinguished friend from Arkansas.

I am perfectly willing to frankly admit my reasons for joining as a sponsor of this freedom-of-the-seas proposal.

Let me state very unblushingly at the outset that I yield to no man in my admiration of the noble State of Israel and her perservering and dedicated people. I have been in that land a number of times. I have seen how, in 12 short years a teeming oasis of progress has been erected by human courage, indomitable will, and dedicated energy in a vast desert of hostility, of obstacles, of frustration.

I have seen in Israel a kind of redramatization in history of the great struggle which created our own United States. I have felt a spiritual identity that links America with Israel as comrades in the history of freedom. I found there the same yearning, the same impatience to create, to advance, to make frontiers only to trample them down in the march to new levels of achievement. I discovered in Israel human dignity in every face—the self-respect of men who know their rights, the pride of men who know their strength.

That is why I believe in Israel. That is why I have faith in her ultimate victory, in her high destiny. This dynamic nation cannot be contained or thwarted by tyranny. She represents the wave of the future, and the waters of the past must recede before it. Hatred is not a way of life. It is a denial of life—and it is foredoomed to failure, to defeat.

But in her struggle for progress and for stability, Israel needs our help and encouragement. She needs to be reassured that she is not alone in her effort to make peace with her neighbors and to live in tranquility. That is why it is so important that we retain the freedom-of-navigation amendment unfettered in this bill.

But there are additional motives which prompted me to back this amendment, Mr. President. Just as I yield to no man in my admiration for Israel, so I yield to no man in my dedication to the preservation of principles of international law. We must maintain our traditional American backing for freedom of international waterways and for international economic cooperation.

Faith in these basic concepts of international life and willingness to stand up and be counted in favor of them, willingness to fight for their preservation—these are essential in the free world's effort to build a safe, secure and peaceful world.

If we are to remain true to our traditions, we must give voice to America's belief in freedom of the seas. It will indicate clearly to the United Arab Republic and any others who would tamper with this principle that we mean business and we mean to back up our pious statements with positive action.

Mr. President, in connection with this amendment there has also been a lot of talk about minority groups, about pressure groups and about lobbies who are working for the freedom of the seas amendment. I freely admit to being a lobbyist for this amendment. I freely and proudly admit to being a lobbyist in favor of upholding principles of international law. I freely and proudly admit to being a lobbyist working very actively to put the Senate on record as favoring freedom of navigation in international waterways.

Far from fearing the effects of such lobbying, I fear the effects if our Nation is ever deprived of those who will lobby for what they believe is morally and legally right. I fear the day when Senators will not rise in this Chamber to fight for principles of moral right and for principles that are the warp and woof of international law. I fear the day when the United States abdicates its traditional role as champion of the principles of international law. Let us not today cast votes which would in any way constitute an erosion of our strong heritage in this field.

The amendment we adopted simply puts a little steel into the pious statements we have time and time again made about protecting the freedom of international waterways. It says that while protests, accusations, and oratory about Colonel Nasser's arrogant acts of piracy are fine, they are not enough. It

says that such talk merely whispers in freedom's name where shouts are needed, where positive counteraction is called for. We should not back down from that position.

The amendment we adopted is an emphatic statement to those who would not play the rules of the game in international life that we insist that they do so. It informs Colonel Nasser that he is now in the international big leagues. When he tampers with free traffic through the Suez Canal he is not fooling around in his own private waterway—he is obstructing an international body of water which, under clear principles of international law, must be open to transit by all nations. If Colonel Nasser wants to play in the big leagues, he must abide by the big-league rules. The amendment we adopted Thursday calls that fact of life to his attention and gives bread-and-butter meaning to the repeated protests of the United States and the United Nations on this issue of UAR blockades, boycotts, and general obstructionism.

It seems to me we should not retreat from the action which we took last Thursday, and we should vote down the amendment offered by the Senator from Arkansas.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. KEATING. Yes.

Mr. FULBRIGHT. Would the Senator be willing to support my other amendment which is an adaptation of the United Nations resolution with regard to refugees?

Mr. KEATING. Of course, it has nothing to do with the problem before us now, but I will say, as to that amendment, the distinguished Senator, in offering it, did not follow fully the language of the 1948 resolution of the General Assembly of the United Nations as to refugees, from which much of his language is drawn. He left out of it, whether by design or otherwise, a very important part of that resolution, which also "called upon the governments and the authorities concerned to seek agreement by negotiations conducted with a view toward the final settlement of all questions outstanding between them." In other words, the General Assembly very clearly intended that any Arab repatriation would be within the context of Arab-Israel peace negotiations.

I shall be happy to consider that amendment when the Senator offers it. I do not think it is pertinent at this time. But I do object to the Senator from Arkansas putting in only part of the story, as he has in that amendment.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JOHNSON of Texas. Mr. President, I move to lay the amendment of the Senator from Arkansas on the table.

Mr. FULBRIGHT. Mr. President, I ask for the yeas and nays.

Mr. ALLOTT. Mr. President, a parliamentary inquiry.

May I ask——

Mr. JOHNSON of Texas. I made a motion to lay on the table the amendment of the Senator from Arkansas.

The PRESIDING OFFICER. The yeas and nays have been requested.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas to lay on the table the amendment of the Senator from Arkansas. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MONRONEY (when his name was called). On this vote, I have a pair with the senior Senator from Minnesota [Mr. HUMPHREY]. If he were present and voting, he would vote "yea"; if I were permitted to vote, I would vote "nay." Therefore, I withhold my vote.

The rollcall was concluded.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Alabama [Mr. HILL], the Senator from Washington [Mr. JACKSON], the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent. If present and voting, the Senator from Washington [Mr. JACKSON], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Ohio [Mr. YOUNG] would each vote "yea."

I further announce that if present and voting, the Senator from New Mexico [Mr. CHAVEZ], would vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

The Senator from Wisconsin [Mr. WILEY] is detained on official business.

The Senator from Indiana [Mr. CAPEHART] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from Indiana would vote "yea," and the Senator from Nebraska would vote "nay."

The result was announced—yeas 45, nays 39, as follows:

[No. 186]

YEAS—45

Allott	Fong	Morse
Bartlett	Gruening	Moss
Beall	Hart	Murray
Bible	Hartke	Muskie
Bush	Javits	Pastore
Butler	Johnson, Tex.	Prouty
Byrd, W. Va.	Keating	Proxmire
Cannon	Kefauver	Randolph
Carroll	Kerr	Saltonstall
Case, N.J.	Kuchel	Schoeppel
Church	Long, Hawaii	Scott
Clark	McCarthy	Smathers
Dodd	McNamara	Smith
Douglas	Magnuson	Williams, N.J.
Engle	Mansfield	Yarborough

NAYS—39

Aiken	Case, S. Dak.	Dworshak
Bennett	Cooper	Eastland
Brunsdale	Cotton	Ellender
Byrd, Va.	Curtis	Ervin
Carlson	Dirksen	Frear
Fulbright	Johnston, S.C.	Mundt
Goldwater	Jordan	Robertson
Gore	Lausche	Russell
Green	Long, La.	Stennis
Hayden	Lusk	Talmadge
Hennings	McClellan	Thurmond
Hickenlooper	McGee	Williams, Del.
Holland	Martin	Young, N. Dak.

NOT VOTING—16

Anderson	Humphrey	Sparkman
Bridges	Jackson	Symington
Capehart	Kennedy	Wiley
Chavez	Monroney	Young, Ohio
Hill	Morton	
Hruska	O'Mahoney	

So the motion of Mr. JOHNSON of Texas to lay on the table Mr. FULBRIGHT's amendment to the committee amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

Mr. FULBRIGHT. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1322, H.R. 11510.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The CHIEF CLERK. A bill (H.R. 11510) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arkansas.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. FULBRIGHT. Mr. President, I move to strike out all after the enacting clause and to insert the language of the committee amendment to S. 3058, as amended, in lieu thereof.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arkansas.

Mr. DOUGLAS. Mr. President, will the Senator from Arkansas respond to a question?

Mr. FULBRIGHT. I yield.

Mr. DOUGLAS. Do I correctly understand that the Senator from Arkansas is now trying again to eliminate the language which the Senate has adopted?

Mr. FULBRIGHT. No. This is the customary procedure. After we perfect the Senate bill, we substitute the language of the Senate bill for the House bill.

Mr. DOUGLAS. As adopted by the Senate?

Mr. FULBRIGHT. As adopted by the Senate. That is what I asked.

Mr. DOUGLAS. I thank the Senator from Arkansas.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arkansas.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. JOHNSON of Texas. Mr. President, I ask for the yeas and nays on passage of the bill.

The yeas and nays were ordered.

Mr. CASE of South Dakota. Mr. President, will the Senator yield me 1 or 2 minutes?

Mr. DIRKSEN. I yield 2 minutes to the Senator from South Dakota.

Mr. CASE of South Dakota. Mr. President, I do not know that I really need 2 minutes. I merely wish to go on record as expressing regret that the Senate has seemingly voted, by tabling the Fulbright amendment, to convert the Mutual Security Act into a weapon of unilateral economic sanctions as a substitute for concerted international action by the United Nations. That runs counter to the position so eloquently and effectively presented by President Eisenhower at the Assembly of the United Nations during the Middle East crisis in 1958.

The tenor of the amendment offered by the Senator from Arkansas merely proposed that if the President felt unilateral action by him under the terms of the Douglas amendment, agreed to last week, would interfere with efforts by the United Nations designed to maintain peace and stability he could refrain from applying the amendment. I regret that it was tabled. Mr. President, I think it is unfortunate today if we have developed in the world such a theory of dollar diplomacy that our foreign aid program is to be looked to as a substitute for the decisions of and action by the United Nations.

Mr. President, I express the earnest hope that the Secretary-General of the United Nations will continue his efforts to effect a solution of the problems in the Middle East—and I include the refugee problem along with the use of the Suez Canal.

Mr. SALTONSTALL. Mr. President——

Mr. DIRKSEN. Mr. President, I yield 3 minutes to the distinguished Senator from Massachusetts.

Mr. SALTONSTALL. Mr. President, I should like to invite the attention of the Senate to the fact that I think it is extremely important to know how the so-called Douglas amendment, which the Senate adopted is to be interpreted. For the purpose of interpretation, I invite the attention of Senators to section 113 of the Mutual Security Appropriations Act of last year, Public Law 86-383. Section 113 of that act provides:

SEC. 113. It is the sense of Congress that any attempt by foreign nations to create distinctions because of their race or religion among American citizens in the granting of personal or commercial access or any other rights otherwise available to United States citizens generally is repugnant to our principles; and in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this Act, these principles shall be applied as the President may determine.

Those words were drafted by the State Department. I worked very hard in drafting them, with other Members of this body who were advocating the same general statement that is embodied in the Douglas amendment, which has been inserted in the bill. I call attention to those words because of the necessity of the President and the State Department putting an interpretation upon them.

The only difference between those words and the language the Senate has adopted is that they relate to different subjects. One relates to the question of citizens of various races, and the other relates to a boycott negating the purposes of the Mutual Security Act.

The only difference in the language is that under the Douglas amendment the President shall report on measures taken by the administration to insure its application. Those words are not in section 113 of the act of a year ago.

I think it is very necessary that we give the President and the State Department the opportunity to function, by making it clear to them how they are to make the report to the Senate or to the Appropriations Committees. As I see it, that may be done verbally. It may be done in writing to the chairmen of the various committees, without going further, or, of course, it could be made to the full committees. But it is important that that point be made clear, because of any negotiations which the President or the State Department may be conducting in the various countries.

We do not wish to interfere with the executive department in its negotiations with other countries. We leave it up to the President to determine when he is to give aid, with relation to the two provisos which we have inserted. We then leave it to him, after he has made his determination as to how he is going to give the aid, to determine how he is going to report to the Congress.

I hope we made it clear that the report to the Congress should not in any way make it more difficult for the President to conduct negotiations with relation to the various countries when he is determining how the Mutual Security Act shall be administered. I say that because of the fear on my part that a formal report to the Congress might negative much of the executive department actions in this very difficult area in the Near East.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. SALTONSTALL. I yield.

Mr. JAVITS. I am delighted to hear the Senator's statement. I tried to say the same thing myself.

Is it not a fact that, as a matter of constitutional law, the request of the President for a report could have no greater authority than the substantive statement of the principle itself, already contained in the amendment? We all agree that that is a request of the President, no matter how strong the language.

Mr. SALTONSTALL. That is the way I interpret it, and the way I want to see it interpreted.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. SALTONSTALL. I yield.

Mr. AIKEN. Does the Senator mean that if the President chooses to make an oral report to the Members of the Senate at a Friday morning breakfast, that will be compliance with the law?

Mr. SALTONSTALL. I should say it is entirely within his province, under the language we have just adopted, to determine how that report should be made, and to whom it should be made.

Mr. AIKEN. Does that mean that the President is not bound by the Douglas amendment, which has been approved by the Senate, and which is also in the House bill, I believe?

Mr. SALTONSTALL. Of course.

Mr. AIKEN. In what way?

Mr. SALTONSTALL. It is a precatory request by the Congress for the President to do certain things which, in his judgment, he should do under the terms of the resolution.

Mr. AIKEN. Does not the resolution request the President to withhold aid from any country we are helping which carries on economic warfare against another country?

Mr. SALTONSTALL. If he shall so determine.

Mr. AIKEN. But he can do as he pleases about so determining.

Mr. SALTONSTALL. Exactly.

Mr. DIRKSEN. Mr. President, I yield 2 minutes to the Senator from Oregon.

Mr. MORSE. Mr. President, I do not wish to leave the legislative history in the state in which the Senator from Massachusetts has left it. I think his remarks make confusion more confounded.

I think it is perfectly obvious that it is expected that the President will act in good faith and file with the Congress a written report setting forth the reasons for his course of action. That is the procedure we follow in connection with sense-of-the-Senate resolutions, and I think it is equally applicable in this case.

Mr. LONG of Louisiana. Mr. President, will the Senator yield 2 minutes?

Mr. DIRKSEN. Mr. President, I yield 2 minutes to the Senator from Louisiana.

Mr. LONG of Louisiana. For a number of years, as one Senator I have complained that there has been a great deal of mismanagement and waste in connection with the program. Before we vote, I believe it would be well to recall a story of April 28, last Thursday. I read from a U.P.I. story appearing in the newspapers of that date:

One of the first public statements of Acting President Huh Chung was aimed at what he called waste and mismanagement in the U.S. Korean aid program. Simultaneously, the United States held up approval of new economic aid until South Korea gets back to normal and some new conditions are met.

One of the factors contributing to last week's "Bloody Tuesday" climactic moment of the riotous demonstrations in the wake of the March 15 elections, was a charge of corruption in the use of U.S. aid funds. Rhee's critics said some of the $200 million a year of U.S. aid went to help Rhee supporters.

The article further states:

Speaking of relations with the United States, Huh said some unsatisfactory areas need correction. These include, he said, waste and mismanagement in administration of U.S. economic and military aid. Some of the U.S. aid money has gone to develop industry, some to support the Republic's budget.

Oddly enough, apparently one of the principal causes of the overthrow of the

government appears to have been local dissatisfaction with the mismanagement of the $200 million a year we have been spending there. Apparently it has been mismanaged, and has gone into the pockets of private individuals. The same thing is happening in many places throughout the world.

Until I feel come confidence that we have at least made a good start toward preventing that sort of thing, I do not expect to vote for this type of foreign aid bill.

Mr. DWORSHAK. Mr. President, will the Senator from Illinois yield to me?

Mr. DIRKSEN. Mr. President, I yield 4 minutes to the distinguished Senator from Idaho.

Mr. DWORSHAK. Shortly after World War II, when our Government initiated the foreign aid program, Paul Hoffman, the first administrator, gave assurances that the program would be continued for only 3 or 4 years, and would cost probably about $12 billion to $14 billion. In the intervening years we have spent about $90 billion for the ostensible purpose of creating friends and engendering good will everywhere around the globe. We know what the result has been. We are losing friends and making enemies everywhere.

I was shocked earlier today when the distinguished chairman of our Foreign Relations Committee said that crises exist everywhere we look—in Korea, in Turkey, and in the Caribbean. If we have accomplished anything worthwhile with these very generous expenditures of our American dollars, where are the results? Where is there any evidence that we are making progress?

I wish I had the time to point to some of the glaring inconsistencies which appear in the report submitted by the committee on this bill. On page 7 the committee says:

> As reflected in the hearings (pp. 328–329, 331, and 336–337), the committee was gravely concerned over the situation in Korea prior to the most recent and serious outbreak of rioting. Although, as stated, the committee sees no presently acceptable alternative to continuing the aid program in Korea, the recent events in that country raise a question, which is of wider application, as to the long-term effectiveness of an aid program conducted in the absence of an atmosphere of expanding basic freedoms.

Then, after pointing out the lack of progress and the impotency and the ineffectual results, the committee also made this comment, at page 5:

> Large sums of money and a sense of urgency have increased the probability of mistakes, and it should not be a cause for wonder that mistakes have in fact been made. So far, however, we have managed to summon the requisite combination of faith and persistence to avoid making the worst mistake of all, which would be to quit trying.

So, Mr. President, this very fine committee which handles foreign relations legislation admits the ineffectual operation of the program, and then says it would be a tragic mistake to terminate it. By implication it says that we must accept the mismanagement and blunderings which have been inherent throughout this program.

I remember a few years ago that this same committee made a survey and study of the foreign aid program, in the hope that something might be done to correct some of this mismangement and blundering.

I have joined many of my colleagues in contending that we ought to make a reappraisal of the program. We can do no less. If we recognize the impotency of the program and if we want to succeed, what is wrong with attempting to make a reappraisal of the program?

During the past few months our Appropriations Committee has been holding very interesting hearings on the defense budget of about $40 billion. We are told we need more planes and missiles and we need to modernize our Armed Forces. At the same time some of the exponents and supporters of the foreign aid program say, "That is not essential, because we have farflung allies all over the world who have been receiving these billions of dollars and who are prepared to stand up and defend us on the farflung potential battle fronts."

I shall not labor the point, but I appeal to my colleagues and say that at some time we ought to have the courage and determination and the perseverance to do something to make this program at least partially successful with respect to its constantly being expanded, instead of adding to the inflationary forces, with the possibility that ultimately we will be confronted with the insolvency of our Government, and then at some psychological time we will face the aggression of the Soviets. At that time we will stand alone and wonder where our allies are going to help us. No one in the Senate fails to realize that we will stand alone whenever we face that aggression by the Soviets.

Mr. DIRKSEN. Mr. President, I yield 2 minutes to the Senator from Arkansas.

Mr. FULBRIGHT. I wanted to comment with regard to the statement of the Senator from Louisiana [Mr. LONG] that this aid has caused corruption in Korea. If this is the cause of corruption, then Israel ought to be the most corrupt of all nations, because the total of our aid—Government aid, not private aid—has been $310,304,000 for a population of approximately 2 million.

It is estimated that private sources have provided—and these amounts are tax exempt for those who give them—approximately the same amount.

During this same period UAR has had $67,194,000, for a population of 25.3 million people.

With regard to the comment of the Senator from Idaho [Mr. DWORSHAK], I would only remind him that the administration of his program is in the hands of his party. If he thinks it is so bad, perhaps there ought to be a change of administration, so that we can improve the quality of the administration of the program.

Originally the Marshall plan was initiated under the administration of a very well-known Republican, Mr. Paul Hoffman. I think he did a very good job. The program was passed originally in a Republican Congress.

I do not wish to labor the partisan aspect of it, because Democrats have supported it, too. However, with regard to the Marshall plan I believe it is well known that Europe is back on its feet. It is so well on its feet that many people have complained about its competition infringing upon our markets. It has been extremely successful. Many of the difficulties of administration are due to amendments and restrictions which have been put upon the administration by this body and by the other body.

Mr. DWORSHAK. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DIRKSEN. I yield 1 minute to the Senator from Idaho.

Mr. DWORSHAK. Mr. President, the Senator from Idaho is also aware of the fact that while we have had a Republican Executive, for the past 6 years we have had a legislative branch controlled by the Democratic Party.

I am not critical of my colleagues on the other side of the aisle, because many of them have fought vigorously against this program at all times. However, I am pointing out that there is a general responsibility on the part of the legislative branch, and we cannot avoid or escape in any way the full responsibility for the inevitable failure of this program.

The PRESIDING OFFICER. The question is on the passage of the bill.

Mr. DIRKSEN. Mr. President, I propose to take 2 or 3 minutes. Then I shall yield back the remainder of the time and will be prepared to vote.

I point out, with respect to the overall program, that 173 years ago some men met up in Philadelphia, and one of the last things they did, after they finished writing the Constitution, was to write the preamble to it. It almost got lost in history. But they said in the preamble that one of the purposes for ordaining the Constitution was to provide for the common defense.

It was no great problem in 1814 when the British burned this wing of the Capitol. It was no great problem in 1847 when we had a controversy with Mexico. It was no great problem when we went to the rescue of an island people against the butcheries of a Spanish general.

But when we got to World War I and World War II, then the common defense took on an expanded periphery and an expanded function. It is now a line which is 20,000 miles long. We do not fight alone with weapons. We fight in the economic and political and social fields as well. We fight not only with guns, but we fight also with credit.

This bill and its transformation year after year in this annual struggle is a testimony to the fact that one of the greatest forces in the unfolding of the country is the revisionism that is so necessary to keep abreast of the problems and the needs and of what we shall do.

At least one good thing has come out of this discussion with respect to the Douglas amendment. I wish my good friend from New York [Mr. JAVITS] would give ear to this. We have discussed it a good deal. I think the size

of the vote on the motion to table is probably one of the best manifestations I know of that there has been concern and apprehension in the Senate with respect to the inclusion of language that might be regarded as unilateral in character, for one thing, and could conceivably be misconstrued and misinterpreted in other areas of the world.

I think this vote in itself will sound a note of caution, and I believe we have a right to interpret it in that fashion. So I say that is one good thing that has come out of the discussion, even though the amendment offered by the distinguished chairman of the Committee on Foreign Relations was not adopted.

So all in all I think it has been a craftsmanlike job that has been done. I am content to leave it there and vote for the bill, in the hope that whatever refinements are necessary, if any, they can be made by interpretation, but that otherwise the work of the common defense can go on.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. JAVITS. I simply wish to note that when the Senate adopted the amendment proposed by the Senator from Oregon and me to the appropriation bill which was referred to by the Senator from Massachusetts [Mr. SALTONSTALL], such qualms were also expressed. Since then, the State Department has been pressing forward and has sought reports from all its posts around the world. We have not been unreasonable about it. I think the Senator is absolutely correct when he says that these signposts, given us by the size of the vote, will be just as effective in this instance as they were in the case of the so-called Morse-Javits amendment.

Mr. DIRKSEN. I thank the Senator from New York.

Mr. President, I yield back the remainder of my time.

Mr. JOHNSON of Texas. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on the passage of the bill. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Alabama [Mr. HILL], the Senator from Washington [Mr. JACKSON], the Senator from Montana [Mr. MURRAY], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Ohio [Mr. YOUNG] would each vote "yea."

On this vote, the Senator from Missouri [Mr. SYMINGTON], is paired with the Senator from Wyoming [Mr. O'MAHONEY]. If present and voting, the Senator from Missouri would vote "yea," and the Senator from Wyoming would vote "nay."

On this vote, the Senator from New Mexico [Mr. CHAVEZ] is paired with the Senator from Washington [Mr. JACKSON]. If present and voting, the Senator from New Mexico would vote "nay," and the Senator from Washington would vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Nebraska [Mr. HRUSKA] is necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

The Senator from Wisconsin [Mr. WILEY] is detained on official business.

The Senator from Indiana [Mr. CAPEHART] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from Indiana would vote "yea," and the Senator from Nebraska would vote "nay."

I further announce that, if present and voting, the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Wisconsin [Mr. WILEY] would each vote "yea."

The result was announced—yeas 60, nays 25, as follows:

[No. 187]

YEAS—60

Aiken	Fong	McNamara
Allott	Fulbright	Magnuson
Bartlett	Gore	Mansfield
Beall	Green	Martin
Bennett	Hart	Monroney
Bush	Hartke	Morse
Butler	Hayden	Moss
Cannon	Hennings	Mundt
Carlson	Hickenlooper	Murray
Carroll	Holland	Muskie
Case, N.J.	Javits	Pastore
Case, S. Dak.	Johnson, Tex.	Prouty
Church	Keating	Proxmire
Clark	Kefauver	Randolph
Cooper	Kuchel	Saltonstall
Cotton	Lausche	Scott
Dirksen	Long, Hawaii	Smathers
Dodd	Lusk	Smith
Douglas	McCarthy	Williams, N.J.
Engle	McGee	Yarborough

NAYS—25

Bible	Frear	Russell
Brunsdale	Goldwater	Schoeppel
Byrd, Va.	Gruening	Stennis
Byrd, W. Va.	Johnston, S.C.	Talmadge
Curtis	Jordan	Thurmond
Dworshak	Kerr	Williams, Del.
Eastland	Long, La.	Young, N. Dak.
Ellender	McClellan	
Ervin	Robertson	

NOT VOTING—15

Anderson	Hruska	O'Mahoney
Bridges	Humphrey	Sparkman
Capehart	Jackson	Symington
Chavez	Kennedy	Wiley
Hill	Morton	Young, Ohio

So the bill (H.R. 11510) was passed.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate reconsider the vote by which the bill was passed.

Mr. KUCHEL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate insist on its amendment, request a conference with the House of Representatives thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer appointed Mr. FULBRIGHT, Mr. GREEN, Mr. SPARKMAN, Mr. WILEY, and Mr. HICKENLOOPER conferees on the part of the Senate.

The PRESIDING OFFICER. Without objection, Senate bill 3058 will be indefinitely postponed.

NOMINATION OF MAJ. GEN. THOMAS A. LANE TO BE PRESIDENT OF THE MISSISSIPPI RIVER COMMISSION

Mr. STENNIS. Mr. President, I should like to express my full support of the nomination of Maj. Gen. Thomas A. Lane to be president of the Mississippi River Commission, and I am highly pleased that the Senate Public Works Committee has unanimously recommended confirmation.

The Mississippi River Commission is composed of three officers from the Army Corps of Engineers, one officer from the U.S. Coast and Geodetic Survey, and three civilians. Created in 1879, the Commission is responsible for flood control, navigation, and water resource conservation on the Mississippi River and its tributaries from St. Louis to New Orleans. The presidency of the Commission is one of the most important assignments in the Corps of Engineers, and I am grateful that a man of experience and outstanding ability has been selected for this key post.

General Lane is particularly suited for his new assignment because he has full knowledge of the people and of the problems of this area. A graduate of the U.S. Military Academy, General Lane is well known throughout the Mississippi River Valley, having served as executive officer and disbursing officer in Memphis from 1933 to 1935 and as district engineer in Little Rock from 1948 to 1950. His 3 years of service as one of the Commissioners of the District of Columbia has given him broad experience in the field of municipal operations, as well as in water resource development problems. He is now commanding general, U.S. Army Training Center, Fort Leonard Wood, Mo.

General Lane will have the full support of all leaders in the Mississippi Valley. His nomination is in keeping with the long tradition of having our finest engineering officers serve on the Mississippi River Commission. He succeeds Maj. Gen. W. A. Carter, whose record has been outstanding.

In keeping with his distinguished civil and military record, I am confident that General Lane's efforts as president of the Commission will be to build up the area, and I predict that during his tenure the entire Mississippi Valley will move forward in a constructive way. I am confident his services will greatly benefit not only the Mississippi Valley, but the entire Nation.

AUTHORIZATION OF APPROPRIATIONS FOR THE NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1333, H.R. 10809.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 10809) to authorize appropriations for the National Aeronautics and Space Administration for salaries and expenses, research and development, construction and equipment, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Aeronautical and Space Sciences with amendments.

ORDER FOR ADJOURNMENT UNTIL TOMORROW

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its business today, it stand in adjournment until tomorrow, at 12 o'clock noon.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I announce that tomorrow we shall take up House bill 10809, to authorize appropriations to the National Aeronautics and Space Administration. We expect to have a yea-and-nay vote in connection with the passage of that bill.

Then we expect to take up the conference report on the Department of Commerce appropriation bill, H.R. 10234. There may be several yea-and-nay votes in that connection.

Then we expect that the Senator from Virginia will move—perhaps he will do so later in the week, but Members should be prepared for it—that the Senate concur in the amendments of the House of Representatives to the bank merger bill.

Mr. KEFAUVER. Mr. President——

Mr. JOHNSON of Texas. Mr. President, at this time I yield to the Senator from Tennessee, and ask him to see to it that at the conclusion of today's business a motion is made to have the Senate adjourn in accordance with the order previously entered.

THE PORTLAND, OREG., NEWSPAPER STRIKE

Mr. MORSE. Mr. President, will the Senator from Tennessee yield?

Mr. KEFAUVER. I yield.

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a very sad letter I have received from a constituent of mine. The letter speaks for itself. Although the letter was unsigned, it bore a return address, which I have deleted.

It is very disheartening not to be able to give this lady the prompt help which is needed for the Portland newspaper workers who have been displaced by strikebreakers. Nonetheless, I shall continue doing what I can to get a Senate committee investigation of this situation. It is very evident that the systematic use of strike insurance and the hiring of professional strikebreakers in the newspaper industry is having a bad effect upon industrial relations. Permitting these practices to continue is not in the public interest.

Certainly the Senate Committee on Labor and Public Welfare should disclose the sordid details, by conducting the study I have requested. My resolution, which calls for an investigation, should be the basis for a Senate committee investigation of the antilabor, union-busting policies of many newspapers in the country.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SENATOR WAYNE MORSE: For God's sake help us here in Portland, Oreg. I am the wife of one of the men involved in the newspaper dispute. This is not the time to write fancy phrases or give you the details—I am sure you know them all—but this is a direct appeal. Unless something concrete happens soon Portland will be a violent and bloody battleground—all the peaceful appeals have been a waste of time—and our bitterness, frustration and hatred has reached the stage where we must explode.

Over 1,200 of us marched in a parade Easter Sunday (what a farce) and when we marched past those two newspapers and saw the professional strikebreakers jeering at us, the police standing by and laughing, we wonder about the much-vaunted "American way of life"; it certainly stinks right now. There ain't no such thing as freedom of speech, and the average working person has no protection whatsoever—there isn't a law in the land that will protect us.

This really is a last desperate appeal. My own husband has lost so much weight. His sojourn on the picket line has worked him up to the stage where he is ready to kill. To stand by helpless and let out-of-State, imbecilic types go by and insult you, walk into your job, and just not be able to to do a damn thing about it, has eaten like a cancer into us all. We are ready to tear those people to pieces, and Portland will be the city that started another industrial revolution.

Please, please help us all.

A VERY UNHAPPY, BITTER, AND SAD MOTHER AND HOUSEWIFE.

EFFECTS OF FOOD ADDITIVES AND RESIDUALS ON FOOD

Mr. MORSE. Mr. President, Mr. Nelson R. Crow, publisher of the magazine, Farm Managament, in the April 19, 1960, issue of that magazine has presented effectively the position taken by many farmers who resent being, as he puts it, "the whipping boy of politicians, metropolitan newspapers, and nationally circulated magazines."

In my judgment, when he says, "Throughout the food industry, there is demand that appropriate Government action be taken to properly assess the methods of enforcement, analyze laws and regulations, and determine on a scientific and factual basis the effects of these food additives and residuals on food. President Eisenhower has asked his Science Advisory Committee headed by George B. Kistiakowsky, to make a full and complete study and 'report to him as soon as possible,'" he echoes a sentiment felt by many citizens in addition to those who are engaged in the food industry.

Certainly an early release of the Science Advisory Committee report will be welcomed by farmers, businessmen, and consumers.

I ask unanimous consent that the article to which I have alluded be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NELSON R. CROW COMMENTS

One big reason why U.S. farmers are able to continue to produce ample quantities of food at amazingly low costs is because of the substantial contributions made by chemistry and science in pest control, weed control, feed additives and so on. More people are being well fed than ever before.

Yet the farmer is the whipping boy of politicians, metropolitan newspapers and nationally circulated magazines. This in face of the fact that in the years since World War II there has been frightening inflation in the prices of everything—everything except the prices the farmer has received for production of almost every type of food. In the case of almost all foods, price increases paid by the consumer result from higher costs of transportation, processing, and retailing.

Now producers and nearly all handlers of food are badly confused by bureaucratic hairline decisions on the effects of pesticides, additives, and residuals on human health. Confusion is compounded when the experts of USDA pass food as being healthful and safe and another Government bureau, the Department of Health, Education, and Welfare, takes the attitude that the same food is dangerous to humans.

It isn't necessary to go into full details of the cranberry and poultry scares of last fall. The cranberry growers lost a big share of their market, yet later it was announced that most of the crop was entirely safe. The Government found that any residue from hormones fed to poultry was concentrated in the skin and internal organs and the meat was purchased and released for the school lunch program after these parts were removed.

Throughout the food industry, there is demand that appropriate Government action be taken to properly assess the methods of enforcement, analyze laws and regulations, and determine on a scientific and factual basis the effects of these food additives and residuals on food.

President Eisenhower has asked his Science Advisory Committee, headed by George B. Kistiakowsky, to make a full and complete study and "report to him as soon as possible."

Surely, in the interests of public health and the health of economy of the agricultural and livestock industry, such a report should be made as quickly as possible.

THE DRUG INQUIRY

Mr. KEFAUVER. Mr. President, the Subcommittee on Antitrust and Monopoly has thus far received hundreds of letters from doctors located in every part of the country. I ask unanimous consent to have printed in the RECORD, in connection with these remarks examples

which are typical of the letters in support of the inquiry, which have been received by the subcommittee.

At the same time, however, the subcommittee has received a number of letters from physicians who are critical of the inquiry. I ask unanimous consent to have printed in the RECORD examples which are typical of those letters.

Mr. President, the overall showing is such as to provide strong encouragement for continuation and extension of the inquiry.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

From a doctor in Massachusetts:

"I wish to commend you for the inquiry into price-fixing practices of the large drug companies. That these organizations excuse the outrageous prices on the grounds of humanitarian research is ludicrous. Most large industrial concerns conduct research to better their products, but do not cynically ascribe their motives as being only piety toward mankind.

"My mailbox is stuffed each day with expensive advertising (gilt edged, color printing, etc.) about a myriad of drug products 99 percent of which are completely useless. If a new product really has value, it is well reported in the scientific literature, and hardly needs the ballyhoo that the drug companies provide. If only the savings from this type of advertising would be applied to lower the prices of some of the drugs that I prescribe for my patients, I would be grateful.

"Judging by the audacious statements made before your committee by spokesmen for the large drug houses, I fear that the remedy for this situation lies in strong legislative action.

"Please keep up the good work. Responsible members of the medical community who still believe in the Hippocratic Oath still exist."

From a doctor in Illinois:

"As a physician, I am very interested in the revelations of your committee. It was reported in the newspapers that the president of Schering did not refute your figures as to the cost of the drugs, but said these are not all the expenses involved and proceeded to name others, among which was the education of physicians.

"I wish to know if any figures were given as to the cost of educating physicians. This euphemism for advertising is unfair.

"If such figures are available I would appreciate a copy."

From a doctor in Missouri:

"In my general practice here in Missouri, a rural area, I am unable to prescribe the proper drugs the patient needs 4 times out of 5 because of the price. These are usually cortisones for arthritis and antibiotics for infections.

"I am burdened by many visits by drug detail men, who I don't want to see, and who know nothing about medicine except how to high pressure a doctor on the particular drug they are selling. This is also the consensus of the other doctors I know.

"Every day I get 60 to 65 large cards advertising drugs that I already know about from reading my medical journals.

"Today (and other times) I received two LP hi-fi records advertising Miltown from Wallace Drug Co. Also 185,000 other GP's in the country did receive them today, which adds tremendously to the cost of Miltown. It is 11 cents a tablet here, and according to the paper is 1 cent a tablet in Argentina.

"Because of all this I cannot prescribe what my patient needs and he suffers more.

"I am not a crank and I write you this with great sincerity."

From a doctor in Texas (whose husband is a doctor):

"I want you to know that I am very pleased that you are investigating the drug racket. For years my husband and I have been seriously worried over the enormous number of new drugs which keep flooding the markets. He remarked some months ago that 20 years from now we will realize we killed more patients than we helped with some of the new medicines.

"Another thing which disturbs me is the type of literature the manufacturers put out to advertise these drugs. We doctors are supposed to have a superb education—spend many years learning our profession—and the material which the drug firms use in an attempt to brainwash the doctors is scaled to about the intelligence of a 6-year-old child. Personally I resent this type of advertising and yet it constantly burdens our mails. Under separate cover I am sending you some samples. For instance I once received one piece of advertising in the shape of an oil can filled with capsules and carrying the caption 'Oil Up Your Patient's Joints.' The preparation is largely aspirin. Another annoying feature of the drug advertising these days is the ads which are set up to look like news items. I think there must be some payola involved with the magazines and newspapers which put out these items.

"We surely appreciate the work that you are doing along this line."

From a doctor in California:

"Reports reaching me over the radio indicate that the drug manufacturers claim to have very high expenses due to the necessity of inducing doctors to use their new products and brands.

"As an old general practitioner in private practice as well as more recently practicing in a State institution, I want to state emphatically that the mass of advertising literature, 'free samples' propaganda by manufacturers' representatives and other more or less subtle promotions of drugs, all claimed to be wonderful improvements, is simply staggering and must indeed be a big factor in the cost of medications and medical cost in general. To me as well as to many of my physician friends this activity of the drug companies is repulsive, embarrassing, unscientific, unethical and against our better knowledge of what constitutes good practice of medicine.

"Our wastebaskets are filled daily with unsolicited literature and samples—mostly trash, wasting our time and adding to the cost of healing. As far as I am concerned, I fight this propaganda by dumping all unsolicited mail and getting my information from legitimate journals, including our AMA's. I am strongly in favor of stopping all advertising of medications, including vitamins, by radio, TV and newspapers, and having the industry instead submit all their new products to the American Medical Association laboratories for unbiased examination and trial before the final report to the profession. This testing should be reinforced by Government inspection and legal enforcement and necessary subsidy.

"Such a policy would cause a tremendous improvement in peoples' health and would save billions of money that now is wasted on drug propaganda, patent medicines, and outright quackery. But of course, 'this is a free country,' free for every manufacturer and producer to poison or defraud people if he chooses to. * * *

"I am no fanatic, religious, or moral, I am just an old general family "doc" trying to promote good health and commonsense, much as you are trying to, I am sure."

From a doctor in the South:

"I have been very much interested in your committee's inquiry into the high cost of antibiotics and other wonder drugs.

"I observe that I can buy 20 mg. aureomycin tablets put up by Lederle Co. at the feedstore for $1.57 per 100 tablets, but at the drugstore they charge for 50 mg. tablets $11.90 per hundred tablets put up by the same firm, Lederle Co. Why do they charge almost four times as much to treat a human being than they do to treat hogs and cows?

"Wishing you success in your investigation."

From a doctor in the Far West (whose wife is also a doctor):

"May I commend you for the conduct of your recent inquiry into pricing practices of the American pharmaceutical industry. If your inquiry results in any substantial lowering of prices you will have aided medical practice in this country immeasurably.

"My wife and I are practicing physicians in a rural area in Idaho. Most of our patients are people with limited incomes. For the past several years we have been increasingly aware of several cold economic facts. The drugs that we use most have not decreased in price to any observable extent. There is little or no competition as regards price from manufacturer to manufacturer.

"We are well able to control our own fees. In cases where people require our services and are actually unable to afford them it's a very simple matter to charge what they can afford. When we start to write the prescription however it's a very frustrating feeling. We know that our patients simply cannot afford the drugs for the period of time we wish them to have them.

"So in many, many cases the diagnosis is a very simple and straightforward affair. Then we move on to a very difficult problem. What is the absolute minimum of drug we can get by with in this case. All too frequently we prescribe inadequate amounts for insufficient periods of time simply because of the cost of the drugs.

"So as we read the accounts of your inquiry we were as interested as we would have been had you been bringing to light some new scientific discovery. What you are doing is a very real and tangible aid to every practicing physician.

"I am sure that many aspects of your work are discouraging. Undoubtedly there are tremendous pressures directed against you as you focus the light in uncomfortable places. Just remember if you will that your work will indirectly save as many lives and advance medical practice as much as many of the great research experiments that are presently underway. Each time I write a prescription I feel like shaking your hand."

From a doctor in Ohio:

"Congratulations on your excellent job of investigating the exorbitant costs of many of the cortisone derivative drugs. I strongly urge you to follow up with a thorough investigation of the antibiotics, the so-called wonder drugs—tetracycline and oxytetracycline groups of drugs so essential to control severe infections. These are marketed under the trade names of achromycin, panmycin, steclin, and so forth, and have been available now for at least 5 years. The capsule still sells for 50 cents per capsule, which I feel is prohibitive in cost to many patients, since four a day are necessary, and at least in my line of work has to be taken over many weeks. I say without equivocation that many patients are denied adequate medical care because of excessive costs of drugs. Keep up the good work. What you are doing now is a long neglected investigation. I hope that as a result of your study and hearings that many people whom I now see who cannot afford to buy the 'mycin' drugs, will be able to secure them at a more reasonable cost."

From a doctor in California:

"I wish to express my appreciation to you and your subcommittee for publicly exposing the outrageous pricing policies of the drug manufacturers. I hope that some effective Federal legislative controls will be forthcoming in the latter portion of this session of Congress.

"As an individual physician, my daily mail is dominated by drug advertisements and samples, which I merely throw away. In addition, in the office I am besieged by salesmen from the same companies trying to impress upon me the advantages of their new products, most of which are either unnecessary additions to a cluttered market, too new to be relied upon for general patient use, or actually hazardous.

"I believe that Congress could remedy one aspect of the advertising situation by (1) eliminating the present postal subsidy for advertising matter by adjusting postal rates for such material to reflect their actual cost to the Post Office Department for handling and (2) placing a ceiling upon the amount and/or proportion of corporate earnings that may be deducted for tax purposes when expended for advertising and promotion."

From a doctor in New York:

"You have once again performed a fine public service in your responsible investigation of the drug industry. There is one aspect of the problem I have not yet read about in the newspapers: The extent of the Government subsidy to these companies by means of lower-than-cost postal rates for their advertising brochures.

"It is a rare day when I do not get 5 to 10 pieces of mail about drugs. These advertisements contain dramatic and misleading claims for drugs whose usefulness is open to real question on any scientific grounds. Do you know of any reason the Government, via the Post Office Department, should encourage this sort of thing?

"At a time when the Postmaster General says he is operating at a huge deficit and is going to ask for raise in postal rates, I think this kind of subsidy to the drug companies is poor public policy. Would it not be better either to eliminate the subsidy, require them to make only validated statements concerning the drugs, or, perhaps, much better, find means to encourage them to test the drugs more adequately before they are foisted on a relatively ignorant medical public."

From a doctor in the South:

"First of all I want to take this opportunity to commend you on your investigation of the pharmaceutical industry. This investigation is needed and can do a tremendous amount of good.

"Some of the points which I as a practicing physician feel should be corrected have to do first of all with names of drugs. Drugs have a chemical name but often the chemical name is long and complex and it is obvious that a simple title is often required to designate the particular drug in question. The confusing thing is that often several companies will make the same product available and each company will use a different name to designate it. After a few months, this new product will be combined with well-known fundamental drugs and given still another name. The combination frequently adds nothing desirable to the product. Then as time goes on the product is changed by adding an element which frequently adds nothing to the activity of the product but a new name is again necessary. The result is that a particular drug often has an unbelievably complex name. In self-defense the physician picks one of the 'names' given by a manufacturer and uses this name in prescribing this drug, possibly influenced by the amount of advertising done by the manufacturer.

"The voluminous literature that we receive from the various drug companies and which we see in ads in our medical journals and medical newspapers tells us many things about the products which tend to confuse particularly if we compare what the different companies say about their own products.

"The practice of medicine has become increasingly complex and it is more and more difficult for a sincere physician to keep up with newer drugs and newer procedures without the addition of so much needless confusion. Then, too, such a method of introduction causes needless expense to the public. It would be much simpler to have the drugs, such as aspirin, designated by the manufacturer so that one could specify aspirin (Bayer), etc.

"In order to illustrate the amazing extent to which these products are advertised to the physicians, I have taken the liberty of sending you a couple of days' collection of literature sent to me by several pharmaceutical concerns. Since my special interest is internal medicine and tuberculosis, you can see that I am possibly not receiving as much literature as the average physician in general practice. Obviously the drug companies feel that many of these doctors are too busy to read the medical literature and will prescribe a drug after seeing it in one of these advertisements.

"Again I want to take this opportunity to congratulate you on the wonderful investigation that you are making."

From a doctor in Michigan:

"In evaluating the findings of the drug price investigation, a bit of history should be kept in mind.

"Before the Second World War most pharmacological research was done in academic centers. During that period the drug companies began to expand research activities, and many brilliant men joined their staffs. The reasons included the lack of academic research funds, low salaries, and a great increase in the cost of the studies required. The drug companies had the financial resources, and used them profitably.

"During the war this trend was accelerated by Government contracts.

"Since the war this situation has grown out of hand. Now there is too much talk of covering the high cost of research by the price of the drug. This cost should not be borne solely by the sick fraction of the public. It is in the interest of us all. Profit is not the ultimate valid reason for research, and a shift in the emphasis on research spending ought to be encouraged.

"But it's not all the fault of the drug companies. We praised this trend when it began."

From a doctor in the Southwest:

"A few months prior to the opening of my practice in April 1952, the so-called broad spectrum antibiotics represented then by aureomycin, terramycin, and chloromycetin all cost $1 per 250-milligram capsule. By April 1952 the first and last reduction in cost, known to me, was made, lowering the cost to 50 cents per capsule. This reduction obtained for the three antibiotics mentioned. A few years later the chlorine and hydroxy groups were deleted from the structural formula. The drug companies performing this major surgery claimed better gastrointestinal tolerance and better absorption of the medication. The price remained the same for these now chemically termed tetracyclines. When Upjohn & Co., and Squibb & Co., marketed the tetracyclines I felt this would effect a reduction in the cost, but, no, it remained quite fixed.

"Later I felt this must be because Pfizer & Co., Bristol Laboratories, Lederle, and the Olin-Mathieson Co., are the only manufacturers of these tetracyclines antibiotics. This appeared to me to be a real togetherness on price determinations. It is my understanding that these companies state that they all price the antibiotics and other medications at the same price so as to be competitive with one another. This may be commendable from the view of a professional esprit de corps amongst the drug firms, but hardly can be termed competitive in the real old American sense of the term.

"Competition to me means that one markets a new product or the same product at a lower price than existing products. My patient's average prescription cost for any of the broad spectrum antibiotics in this area is $12 to $15, and often it is $25 or $30. This may sometimes be twice the physician's fee. If the detail men calling on physicians would give them samples of these antibiotics only when they requested them, a considerable saving could be effected by the drug firms. Also the curtailment of the giving away of these expensive medications via the mails would produce an additional saving.

"The firms would lose nothing by merely reducing the price of these medications, because doctors would simply prescribe them more often and in greater quantity. I most often use sulfonamides with many patients because of the cost of these antibiotics.

"As for hypertensive and certain cardiac medications, I know well that many of my patients go without these very important drugs because they simply cannot afford them. Again whatever the drug firms might lose by price reduction of the steroids would be more than offset by greater use of them in more persons who could then afford them. I use very little in the way of tranquilizers for the simple reason that I do not feel that they are as effective, if effective at all, as represented. I have had the impression that they are only placebos. And speaking of placebos it would be such a fine thing if the Food and Drug Department would require the drug firms to perform the double blind placebo tests for all the new compounds meant for human consumption before detailing them to physicians and extolling them to the high heaven as a panacea for all human misery.

"In summation may I say, the prices of antibiotics, hypertensives, and steroid drugs appear to me to be much higher than is necessary to render a fair return to the druggist and the manufacturer. The status quo high plateau of the prices of antibiotics since 1952 is symptomatic to me of harmonious concert, if not outright collusion. Finally, of all drugs to appear in the past 10 years, tranquilizers are the most overrated."

From a doctor in California:

"I want to thank you for the work that you are doing in your investigation of the drug companies. I am sure that you have already saved some of my patients money. Schering Co. sent me a telegram recently saying that they had dropped the price of Griseofulvin by 35 percent. I and several of my friends have done a lot of complaining about the high price of this drug. We were aware that it was selling in England for 7 to 9 cents per tablet while here in the United States the wholesale price was 19 to 20 cents per tablet. They were retailing for 35 to 38 cents per tablet.

"It always seemed a shame that the antibiotic drugs which retail here for 55 to 65 cents per capsule sell in foreign countries for 25 cents each. A doctor told me recently that on the island of Guam he could purchase U.S. manufactured antibiotics less expensively than he can buy them here. In Guam, of course, the price is reduced to meet the competition from Italian or other companies. If they can meet the competition there, why can't the price be dropped here?

"I heard a brief mention on the news about your investigation including the drug Prednisone. I surely hope that it brings the price of that down because it doesn't make sense that the name brands have to sell at 16 to 17 cents per tablet wholesale while the nonname brands sell at 2 cents each wholesale.

"I did want to take time to thank you again for your investigation and also to give you a belated thank you for your crime investigations which you carried out several years ago. There is no question that we should be more grateful to our Government for the protection that it provides from the many unscrupulous elements about us."

From a doctor in Pennsylvania:

"As a physician I have long been concerned with the increasing cost of drugs and have heard innumerable complaints from patients. I have watched the pharmaceutical houses expanding their promotional activities until I now consider them outrageous. It is therefore most appropriate that an important governmental committee such as yours is finally bringing to light some of these practices.

"I hope you will delve deeply into every facet of this situation. They speak lightly of their promotional efforts but I wonder if your committee members and investigators realize what this phrase includes? Month by month they have increased their advertising budgets, their battalions of detail men, the storms of printed paper, their television programs and so on. Now I realize that a certain amount of advertising is necessary in every business and is part of the American way of life. But I also feel that this can be carried to absurd extremes, with consequent harm to many people who can stand it least—people who are ill and unable to earn a livelihood, people with chronic diseases, old people living on a very limited income and poor people generally. One example, which may be multiplied many times, is an ad for an antibiotic which is not particularly new. The Lederle Laboratories Division of the American Cyanamid Co. used eight color pages on special paper to introduce Declomycin in the November 28, 1959, issue of the Journal of the American Medical Association. I maintain that such extravagance is completely unnecessary. Among other results it leads to the accusation that the medical profession is in league with the pharmaceutical manufacturers to mulct the public. Obviously such expenditure helps to underwrite the cost of the Journal at the same time as the patient is forced to pay very high prices for the drugs he needs.

"Another of their expenses which should be closely scrutinized is their 'research.' Although some of their work along this line is useful, most of it consists of attempting to find some minor variation of a competitor's drug, a task which is fairly easy for the highly trained organic chemist of today. This 'discovery' is then patented and given a registered name. The new product may or may not be better than those produced by the other firms; but if the multitudes of detail men can persuade the practicing physicians to use this particular product, the manufacturer will have the patients at his mercy. This is why they are so intent on having the professional workers in the health field—physicians, pharmacists, nurses, etc.—use only their product and no other possible equivalent.

"As I said before, every single phase of their activities should be carefully scrutinized by authorities competent to evaluate their claims. It is not surprising that in the last few years the shares of pharmaceutical houses have bounded up on the stock exchanges. I am certain that the curbing of the abuses by these firms, probably aided by legislation and less liberal interpretation of expenses by the Internal Revenue Service, would reduce the cost of drugs by at least 50 percent.

"I hope your committee will take the time to probe this important matter as thoroughly as necessary."

From a doctor in Michigan:

"I have the greatest admiration for your efforts to date in the investigation of drug prices and the operation of the drug industry. It has been annoying to me, however, to note that no mention has been made of the enormous amount of nuisance 'detail' mail which every doctor receives daily. This mail is sent at bulk rate at a great expense to the Post Office Department. It is useless to the doctor and passes immediately to the incinerator, at some inconvenience and expense to the doctor. I receive about three bushels of such mail each week. My mailman frequently brings my mail by private car in the morning before he starts his rounds of the neighborhood.

"Drug company representatives and 'detail men' have told me that this mail is sent for 'saturation effect,' to use Madison Avenue terminology.

"Senator, certainly this nuisance to the postal authorities, the postman, and the doctor should be brought out and emphasized. I am very tired of sifting through this heap of advertising material each day in the mail in order to sort out the important mail. My secretary supports me in this complaint. It is also very aggravating to us to hear of requests for further advances in postal rates and to have to pay the already very high rates when such material engulfs us at bulk rates."

From a doctor in California:

"Help, help, help. Being a physician of a modest practice, I am, with others, being deluged with tons of letters, pamphlets, boxes, and cartons a year chiefly from the advertising activities of the many varied drug companies.

"I have to haul out at least two bushels of these items per week and throw out a great quantity of sample drugs of many descriptions.

"Some of the packages are small, some large, many very fancy, even plastic types and no doubt expensive.

"If we could be spared all this and get acquainted with their product through the medical journals which we normally subscribe to, it would save our time and patience, as well as untold millions of dollars which should go to the reduction of price of these drugs. Many people are unable to get our prescriptions filled, due to the terrific prices charged. We simply cannot practice medicine properly if we have to deprive our patients of some of the necessary drugs. In addition, it is my belief that the Post Office Department should well be able to operate in the black with the discontinuation of this third-, fourth-, and fifth-class mail. At any rate, please do something to get this problem off our back and help our patients. Too many drug firms and retail pharmacies are trying to get rich too quickly at the expense of our long suffering patients."

From a doctor in Missouri:

"As a doctor, I feel that the outrageous cost of most drugs is a most important issue which should be investigated thoroughly.

"Probably one of the most important reasons for the high price of drugs today is the employment by the various firms of an army of 'detail men.' These men appear at the doctor's office on the average of six times a day and attempt to influence the physician to use a certain drug through constant exposure to advertising claims, and small favors or gratuities.

"You would probably be appalled, if you knew how many times I have been invited, along with all the other resident physicians in St. Louis, to steak dinners, luncheons, and other functions given by the drug firms to promote their products. In 1 year the average physician will receive about 200 pounds of extravagant advertising matter, ballpoint pens, beautifully illustrated but almost worthless pseudoscientific publications, and free samples.

"These practices are just as unethical, in my opinion, as payola, lobbying, and any other activity where a person's opinion may be influenced by gratuities.

"Probably the simplest way of helping this situation would be to provide legislation to make the various firms sell a product under its generic name rather than under the multitude of trade names that now confound us. If this would ever be achieved, the detail men, the gratuities, and so forth, would all gradually disappear and the prices of drugs would necessarily fall to a competitive level."

From a doctor in the Northeast:

"For many years I was a practicing physician prescribing drugs, and for the past 5 years I have been a public servant administering a medical assistance program in the State of ——— and spending tax money. With the exception of penicillin, all the new wonder drugs have come on the market with an exorbitant retail price. All the new drugs either for convulsive disorders, tranquilizers, or stimulants, which appear to be in great demand, are unreasonably priced. I firmly believe that there is a collusion among the large manufacturing pharmaceutical houses to maintain the high prices on these drugs.

"Also the drug houses claim that high prices are necessary in order that they may continue research. I think that you will find that very much more money is spent by these houses in promotion of their product than is spent on their entire research program. Every physician in the United States receives bales of literature, which in most cases is not read and every physician keeps several drugs detail men waiting in his office for hours every day. In addition to these expenditures the dividends paid by manufacturing druggists seem to indicate a very unreasonably high profit. In my opinion this situation has become so out of control at the expense and discomfort of the American public, that it is time for the Federal Government to step in and control the price of drugs."

From a doctor in Indiana:

"I have heard on the radio and television, and have read with interest, the accounts in the newspapers of your committee's investigation into drug pricing. I am happy to hear of your committee's activities and heartily congratulate you for your perspicacity, awareness, and vigilance in the interest of the great American public.

"I am shocked and appalled to read some of the falsehoods which have been submitted to your august body in the name of scientific advancement. May I point out to you, as a medical educator and practitioner of internal medicine, that the current costs of drugs are appalling and represent a perpetration of a malicious influence for the purpose of individual gain under the guise of research education and medical advancement.

"May I categorically state that, if 90 percent of the publications dispatched by the drug companies to the doctors would cease tomorrow, there would not be one iota decrease in the current quality of medical care. Most of this material takes the time of the doctor or his assistant to open and sift it from essential communications, and then it is consigned to the wastebasket immediately. Much of this expensive material reaches the wastebasket without ever being opened. Not only does this waste the doctor's and his assistant's time, but it burdens the U.S. postal service, which already has multitudinous duties to perform.

"With regard to the myth of detail men, or so-called medical service representatives, during the past 6 years I have personally spent more time getting rid of these monsters than I have listening to anything valuable that they have to say. I will agree that the drug companies spend fortunes paying these men, but in most instances they spend hours waiting to see a doctor to foist upon him information he neither wants or already knows. These individuals set themselves up as teachers to the medical profession, yet all well-qualified and competent physicians learn their medicine from journals and scientific meetings—not from prejudiced drug company propaganda.

"Lastly, the so-called millions spent on research could be reduced to thousands if there were not multiple reduplications of research projects conducted by many drug companies solely for the purpose of outmaneuvering their competitors with some medical advancement. These self-same companies give not one tinker's dam for the health and

welfare of the average citizen, but merely strive to fatten the pockets of their respective shareholders.

"I trust that you are not taken in by their fictitious arguments and will hold to your course in exposing the fictitiousness of their claims. Again, I commend you for your admirable vigilance in exposing and investigating the inequities contrived by these companies to further their gain at the expense of the average citizen whom we, as physicians, daily serve and treat in the course of our medical practice."

From a doctor in Missouri:

"I realize that Senate investigations are usually necessary and helpful. On the whole I believe they have done a great deal of good. I do believe, however, that the criticism rendered against the ethical pharmaceutical companies and their representatives, which appeared in the newspapers and television has been somewhat unfair. Doctors, including myself, have not been brainwashed or seduced by the intelligent detail man who calls our offices. For many years I have instructed my secretary to admit all representatives of the ethical pharmaceutical companies, including Pfizer. I know you are fair enough to read the defense bulletin put out by Merck & Co.. Nobel Prize winners do not make untruthful statements. I believe your final report will be fair to all concerned."

From a doctor in Texas:

"It came to mind after the recent publicity of your investigation of the drug industry that you might be interested in the enclosed reprint from the Dallas Morning News. Of course, the main news item as the result of your investigation was 7,000-percent profit in one drug, implying a huge profit on all drugs to the unperceptive reader. (Remember 90 percent of our population are not perceptive or thinking readers.)

"It would seem to me that a man of your stature as a public servant would be interested in policies and publicity upholding the American free enterprise system instead of allowing isolated releases which subtly tend to undermine this system. I am sure from your investigation that you and your committee must conclude that the American drug industry is doing a marvelous job. How about a statement from your committee commending the drug industry and circulated and publicized to the same extent that the isolated adverse item was."

Mr. KEFAUVER. Mr. President, the commentary in the Nation's press on the drug price investigation being conducted by the Antitrust and Monopoly Subcommittee has included a number of articles which deal in an exceptionally perceptive manner with the subject. One of them was written by Gene Graham, of the Nashville Tennessean staff, and was published in that newspaper on April 10. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Nashville Tennessean, Apr. 10, 1960]

DRUG COST PROBE RESUMES TUESDAY AMID NEW FIGHT—KEFAUVER-LED GROUP CHECKING INTO BROAD AREA OF MONOPOLIES, "PRICE ADMINISTERED" INDUSTRY

(By Gene Graham)

This week Senator ESTES KEFAUVER will call his Senate Antitrust and Monopoly Subcommittee back into session in Washington to continue its probe of high drug prices.

The investigation has already created a considerable furore across the Nation. It has also triggered a Republican effort to gag the subcommittee, an offshoot of the Senate Judiciary Committee.

The sessions scheduled to resume Tuesday are apt to kick up a similar fuss. In fact, so heated has been the drug price argument that sight has almost been lost of the larger nature of the Kefauver investigation—a probe of such breadth that drug prices occupy but a corner of the canvas, of such length that it has been going on, intermittently, for 7 years.

Insofar as the gangling senior Senator from Tennessee is personally concerned, the drug price row has given rise to charges that he is only stirring the issue to help himself at the polls this summer.

And this despite a record on the central theme—administered prices—which goes back almost to the beginning of his tenure in Congress.

Ten years ago, shortly after entering the Senate, KEFAUVER coauthored an amendment to the Clayton Act, an antitrust measure, intended to strengthen the enforcement program against big business mergers and acquisitions. His action was in line with the thinking of many of the Nation's reputable economists who view with alarm the growing number of mergers which have typified the postwar period.

CENTRALIZE WEALTH

Mergers of this sort, these economists argue, tend to centralize wealth, to concentrate production and marketing in the hands of a few to such a degree that they can rewrite the law of supply and demand. Or, as KEFAUVER puts it, "administer" whatever price they want.

The drug industry, he contends, is one of those in which this power is already consolidated to a dangerous degree.

That such a trend has been growing is indicated in many economic studies. For example:

At the end of 1952, a few corporations having more than $100 million of assets each owned 51.5 percent of all the assets of the manufacturing concerns in the United States. Three years later, this percentage had grown to 57.1 percent.

Federal Trade Commission reports in 1957 showed that about one-fifth of 1 percent of the manufacturing corporations in the United States had 60 percent of sales made by all manufacturing concerns.

Four steel companies today produce 58.7 percent of all this basic commodity made in the United States.

MEANS SQUEEZEOUT

The result of this concentration, KEFAUVER contends, is a fallout of higher consumer prices—on automobiles, on refrigerators and stoves, on mammoth electric generators which must be paid for through consumer light bills, and on drugs.

It also means the squeezeout of small business and manufacturing concerns, a situation that seems to be indicated by the growing number of business failures among the small and medium sized.

In the spring of 1957, when he became chairman of the subcommittee, the Tennessean set the tone of the investigation he promptly launched when he insisted in a Senate speech, "The high cost of living is due in no small part to the upward manipulation of prices by big companies in administered price industries."

He has not wavered from that theme in investigations which have since dug into pricing practices in steel, automobiles, bakery products, petroleum, heavy electrical equipment, and now drugs.

The drug hearings began last December 7. Perhaps no other has created more controversy, nor touched more directly the consumer wallet.

Critics of the subcommittee have centered their heaviest fire on an exhibit which showed that the Schering Corp. was marking up its products from 1,118 percent to 7,079 percent. This exhibit, argued Minority Leader EVERETT MCKINLEY DIRKSEN, "seemed calculated to make headlines and front-page stories, when the fact was that Schering was operating on a 12- to 16-percent profit after taxes."

ACTION LIMIT TRIED

DIRKSEN became so enraged that he subsequently tried to limit the action of the subcommittee by requiring a unanimous vote of the parent committee before the group could act. There are, of course, Republicans on the Judiciary Committee. This failing, DIRKSEN succeeded in delaying the drug hearings until the civil rights issue was settled.

KEFAUVER, countering in a Senate speech last month, insisted that the subcommittee staff studiously pointed out that the 7,000-percent markup figure did not represent profit, but markup on production costs. He said the exhibit noted that distribution and selling costs, along with promotion, advertising, and research expenses were not included.

It is considered likely that the committee will center much of its attention when the sessions resume on the amounts spent by drug companies in promotion, advertising, and research.

Where these costs are not so applicable—in Government sales—the committee has found drug prices "are sometimes one-fifth, one-sixth, or one-seventh of the price to retail druggists," the Senator says. Incidentally, the committee also found that supposedly competitive bids on Government sales are usually identical, to the fraction of a penny.

AMA TO BE QUIZZED

In connection with drug promotion costs, the subcommittee is also expected to ask the American Medical Association what it is doing, if anything, to encourage its physician members to prescribe drugs by generic rather than trade names.

KEFAUVER says a lot of his mail concerning the drug hearings has come from doctors who deplore the vast difference in price between drugs expressed in prescription by generic name and identical medicines sold under a trade name.

"Nonetheless," says KEFAUVER, "the large companies, by their advertisements and their representations to doctors, have convinced many physicians that there may be something superior in quality or efficacy in their product. This is a matter the committee is going to examine at greater length."

There is evidence that drug manufacturers have concentrated the major portion of their promotion program upon selling doctors. This is understandable since the public frequently is barred from purchasing drugs without prescription. And in many States a retail druggist would violate the law if he sold the customer a drug he knew to be identical to the one prescribed by the physician under a trade name, even though he knew the price of the drug would be less than half of the trade name brand.

UNUSUAL STATUS

"The drug industry," says KEFAUVER, "is unusual in that he who buys (the customer) does not order, and he who orders (the doctor) does not buy."

Just how heavily the pharmaceutical industry has concentrated on physician relations was indicated in an address by Dave Cox, president of Ross Laboratories, at a luncheon of the New York Pharmaceutical Advertising Club. The address, excerpted in the June 1958 number of M.D., medical news magazine, contained this statement:

"Physician and pharmaceutical house have a mutuality of interest. The independence of both from constricting bureaucratic control and political dictation is imperative for imaginative progress in the development of new drugs and new techniques of therapy."

In the same issue of the magazine, under the heading Public Relations, Musical Windfall, there appeared this announcement:

"Offered free to the practicing physicians throughout the United States this month by a pharmaceutic firm is a rare, high-fidelity, long-playing recording of these chamber music works by the late Viennese composer, Richard Strauss. Aim of this musical largess by Bristol Laboratories is to make available to physicians collectors' items of music seldom or never before recorded. The Strauss record was made privately for Bristol by Boston Records."

SIMILAR PROMOTION

Such promotional salesmanship is not rare in other fields, of course. But it is an indication of the type promotion the drug industry is conducting among members of the medical profession.

It would be ridiculous, KEFAUVER says, to suggest that competition does not exist in the drug industry. And, as the San Jose (Calif.) News said in an editorial critical of the subcommittee's work: "No one as yet in this capitalistic democracy has established what is a fair markup."

Too, it is true that the industry has contributed much in research. It is also probable that its mass-production methods have brought prices down in comparison with the overall cost of living rise. The industry, for example, claims that in 1939 the average prescription cost was $1.11—1 hour and 45 minutes of work for the average wage earner. Today, it says, it is $3.08—1 hour and 27 minutes of work.

The basic questions to be explored in the drug query resuming Tuesday, then, are identical to those explored in the other subcommittee probes:

Is competition in drugs confined to promotion and advertising? Is there no price competition, which many economists claim is basic to survival of the free enterprise system? Are the big drug firms, through prearrangement or otherwise, administering their prices to retail druggists, thence to the consumer? Are they squeezing out smaller competitors by promotional methods directed at physicians?

In steel, the Kefauver group found that net profits after taxes have advanced steadily since 1947, despite reduced production. Supply and demand does not dictate prices in this industry, it concluded, and the result has been an "upside down" situation.

LITTLE RELATIONSHIP

In automobiles, the subcommittee found little relationship between manufacturers' prices and supply and demand during a period which has seen independents driven to the wall.

The economic probes, however one views them, have produced some telling results:

Identical bids among large electric equipment suppliers stopped, and both Chattanooga and Nashville electric power boards took note of substantial savings not to mention the Tennessee Valley Authority.

One electric company president acknowledged that certain executives of his firm had been conferring with those of other companies in advance of bidding. He said the executive staff had been shuffled, and promised it would happen no more.

The Department of Justice has been stirred to antitrust action in two instances, both related to identical bids. One indictment was brought in the drug industry, the other in the electric industry. The Eisenhower administration denied KEFAUVER'S disclosures prompted the legal actions, but both came during the course of investigations.

Another result has been the Republican effort, led by DIRKSEN, to call a halt to KEFAUVER'S activities. This is an ironic circumstance since the threat of unhealthy wealth and manufacturing concentrations was originally recognized on a bipartisan basis.

The Republican controlled 83d Congress created the subcommittee in 1953. Placed at its helm was the late Senator William Langer, of North Dakota, a maverick noted for his willingness to cross party lines. But that Congress attempted to put a rein on Langer by refusing his committee funds.

PRESSED BY LANGER

Langer used his own office staff for clerical help and took money allocated to his senatorial office to employ Sidney Davis, a New York lawyer, to handle the subcommittee's first full-scale investigation—the Dixon-Yates scandal. KEFAUVER was named the ranking Democrat.

Tennesseans are familiar with the outcome. After the group disclosed the dual role of Adolph Wenzell—Dixon-Yates advisor to the Budget Bureau while his own investment firm was underwriting the Memphis private power project—the President canceled the deal, admitting that it was illegal.

When the Democrats regained control of the Senate in 1955, an appropriation was made for the first time and the late Senator Harvey Kilgore, West Virginia Democrat, became chairman of the full Judiciary Committee and of the subcommittee.

Following Kilgore's death in 1956, KEFAUVER became chairman. He completely reorganized the staff, employed some crack antitrust lawyers and investigators. Paul Rand Dixon, a Vanderbilt law graduate and former attorney with FTC, was named chief counsel.

Since that time, the group has been hammering away at the fixed price theme. And the drug probe is nothing but a part of the whole.

ADDRESS BY SENATOR JOHNSON OF TEXAS AT THE JEFFERSON-JACKSON DAY DINNER IN SALT LAKE CITY

Mr. MOSS. Mr. President, one of the greatest of the many talents of the majority leader, Senator LYNDON JOHNSON of Texas—and we here in the Senate know that he has talents in abundance—in his consummate knowledge of, and his concern for, the people and problems of every region of our country. He also has great ability to speak penetratingly and with authority about these problems.

Never has he demonstrated this talent to better advantage than he did on his recent visit to Salt Lake City, where he was the principal speaker at the Jefferson-Jackson Day dinner. He did so well, in fact, that he won from the Salt Lake Tribune, one of the Intermountain West's leading dailies, one of the most glowing editorials I have ever read in its columns.

Senator JOHNSON'S masterly analysis of the problems of the West, as well as of the problems of the Nation as a whole, brought into focus what is being denied to us by the policies of this administration. I ask unanimous consent to have the Tribune editorial printed in the RECORD at this point, and thereafter to have printed in the RECORD the entire text of the challenging speech the majority leader delivered to the largest Jefferson-Jackson Day dinner in Utah's history.

There being no objection, the editorial and the address were ordered to be printed in the RECORD, as follows:

[From the Salt Lake Tribune, Apr. 25, 1960]

A WESTERNER TALKS ABOUT NEEDS OF WEST

When LYNDON JOHNSON speaks "he really says something," a Salt Laker commented last weekend.

The majority leader of the U.S. Senate and a leading contender for the Democratic nomination for President—had a great deal to say to Utah Democratic Party delegates in Salt Lake City. The amiable Texan demonstrated again his dedication to progress, imagination and unity. He emphasized again his familiar theme of responsibility. His overriding mission has been to present his party as the instrument to preserve the security and prosperity of the country. During his Utah visit he also stressed the need for larger and more programs to make best use of the West's natural resources.

Senator JOHNSON said he would not make his announcement until Congress adjourns, but he gave every indication of being an active seeker of the Presidency. Though temperate for the most part, he hit hard at the opposing party.

LYNDON JOHNSON showed a refreshing personal knowledge and enthusiasm for water development and related projects needed by the fast-growing West and he pointed out his native State of Texas is allied in many ways with the other distant and arid States of the West.

He spoke with clear conviction and considerable knowledge of the need for accelerating the reclamation program.

He predicted that someday pipelines will transport fresh water from the sea to fertile but arid valleys of Utah and neighboring States. He called the shortage of water the greatest single problem of the 17 Western States, and he criticized the Nation's lag behind the State of Israel in research to remove salt from sea water. More effort needs to be made to find a desalting process which is economically feasible, he emphasized.

The Senate's Democratic leader for the last 7 years spoke disparagingly of delays in launching public works projects. "River after river, development after development are shackled because of lack of daring and imagination—yes, even because of the lack of the desire to make our resources work for us," he charged. And he quoted the report of Senator Moss' committee to the effect that the Soviet Union is making great strides in water and power developments while we stand pat.

The West is the playground of the Nation and our responsibility is clear to husband and make best use of the natural resources.

Senator JOHNSON said, "I am not afraid of America and I am not afraid for it. If crisis comes we'll meet it with full knowledge of our unlimited powers. When it comes to protecting this country there are those who are more appalled by the cost than the threat."

Indicating his interest in and knowledge about foreign affairs, Senator JOHNSON reported he had urged Chancellor Adenauer, of West Germany, and Prime Minister Macmillan, of Britain, to contribute more in cooperation with the United States, toward helping underdeveloped nations help themselves. He said he would invite the Russians to let their scientists join those of the free world in fighting disease, in opening up knowledge of outer space, in bringing fresh water to arid lands and in ending hunger and shortages wherever they occur.

Senator JOHNSON made an excellent impression in Utah, as he has on previous visits. He has a pleasing personality. And his charming wife and daughters added to the picture of the family man, warm and uncomplicated, with a sincere desire to serve his party, the American people and the free world, with the genius which has marked his leadership in Congress.

ADDRESS BY SENATOR LYNDON B. JOHNSON, JEFFERSON-JACKSON DAY DINNER, SALT LAKE CITY, UTAH, APRIL 23, 1960

VISION OF THE WEST

Talking to Democrats about the qualities of our party—and the shortcoming of the

opposition—is like the preacher telling the people who are already in their pews what a sin it is not to come to church.

You often hear it said that people do not know why they belong to the party they do. This may be true in some cases, but I do not believe for a moment that it is generally true.

I know why I am a Democrat, and I think most of you know why you have chosen to be members of the Democratic party.

For the benefit of any strays present who may be of the other political persuasion—or who belong to that great group, the "undecided," who give pollsters and politicians nightmares—may I tell you why I am a Democrat.

A PARTY OF SERVICE

I am a Democrat because I believe, and I have found it to be true over the years, that the Democratic Party has served my community, my State, my region, and this Nation better and more faithfully than has the opposition. I think it is closer to the ground, more attuned to the voice of distant people than the other party.

And I would like to call your attention to the fact that we in Texas, as well as you in Utah and in all your neighboring States, are distant people.

We have this in common: We live far from Washington, far from the centers of finance and population, and it is not difficult for us to be forgotten, or even occasionally neglected, in those distant centers.

I could not cast my lot with a party that forgets me, or forgets my region and yours because we are far away—except, of course, in election years. To tell you the truth, right now the great body of the people, North, South, and West, feel that they are distant people so far as the Republican party is concerned. And in their feeling of being neglected, they have turned to the party that we call our own.

The Democrats today constitute the big majority of the voters of this Nation, and this is a fact that worries the other party no end. If the Republicans do not know why the people have done this, then they have less sense than I am willing to believe they have. I hold with Jefferson, Jackson, and Woodrow Wilson that the people's judgment is very good indeed on the big issues, once they are understood.

THE AMERICAN WEST

There is another reason, besides distance, why the West needs in Washington a government that understands it and is in sympathy with the problems of the region. The American West, as any observant person knows, is a distinct region, so different from the American East as to be almost unbelievable. As you fly west you can see the change from a humid, heavily forested country with much rainfall and many running streams to a land with few trees, little rainfall, and few rivers.

When, near the middle of the 19th century, the westbound American pioneers left the humid eastern woodland and invaded the open plains of Texas, Kansas, Nebraska, and the Dakotas, and then the arid mountain States of Utah and its neighbors, they undertook the greatest and most difficult task of their pioneering experience.

Herbert Quick, in describing the movement of his family out of the woods and into the open arid country, said, "It was the end of book I of our history."

I need not dwell on the fact that the Mormons were the leaders in this migration, nor remind you that they made the move under difficulties which were not shared by others who invaded the same country at about the same time. Their story—that of the Mormon migration—has been told in all its heroism and suffering by the many books that have come from the descendants of those who experienced the ordeal.

THE PROBLEM OF WATER

The major domestic problems the Mormons met and still face in Utah are the same major domestic problems faced by the people in all the 17 Western States.

The primary domestic problem in all the Western States is water. That has always been the problem, and now that the great cities are growing up, it is increasing rather than decreasing in importance. It is my belief that that problem can in large measure be solved, and that it ought to be solved as soon as possible.

Through ordinary projects of reclamation much has been done, and more should be done with the floodwaters that escape down the rivers. The Democrats are already committed to such a program.

But this is still not enough. The only sources of water now available come from rain, and since rainfall is deficient in this arid and semiarid climate, all sources dependent on rainfall are too soon exhausted.

The only other source of water is the sea, and that is the source we should be tapping, as soon as possible. We already know how to take the salt out of water, but we still have to learn to do it cheaply enough so that it can be used for industrial and agricultural purposes.

FOOD AND FIBER

The time is coming when this Nation is going to need the food and fiber that can be produced in the great arid valleys in Utah and elsewhere in the West. These flatlands, now covered with sage and creosote, are lands of unbelievable fertility, which are not productive because of the lack of water.

The time is coming when there will arrive in these fertile valleys great pipelines bringing fresh water from the sea, bringing it in quantities unlimited to a thirsty land. We must speed that time. Then there will be water for cities, homes, farms, and industries.

Today this Nation is investing a pittance in the research needed to bring down the cost of desalting sea water. Even the tiny Republic of Israel is further advanced than we are in this scientific struggle to make more of the crowded earth habitable for mankind.

This is a program that requires imagination, a program to match the magnitude of the country, to match your mountains and your deserts.

NO FEAR OF THE FUTURE

You see, ladies and gentlemen, I am not afraid of America. I am not afraid for it. And I represent a party that has never been afraid of the future, afraid of an investment that will be returned manyfold.

This country was built by investing in the future, and it is an axiom of economic history that the future has always paid off. We Democrats believe that it will pay off for a long time to come.

Certainly, here in the West, which has a short historical past, where resources are so abundant, and as yet hardly touched, the future should pay off enormously—if we have the courage and the foresight to invest in it.

It is only common sense for a businessman to invest in new machines, new processes, new plants, if he is to remain prosperous and strong. It is only common sense for a Nation to invest in its people and in its resources, if it is to remain prosperous and strong. Be sure that our rivals for world influence know this. Ted Moss can tell you of the enormous strides they are making.

A FIRM FOUNDATION

The West today is the playground, the vacation land of the Nation, and I am in favor of keeping it that way. I want the great national parks preserved and protected from all who would destroy them. I want the soil protected and improved, and I want the increased wealth to lay a foundation for better schools and churches and hospitals and libraries, and such foundation can only be laid by prosperous people.

I can't give the people here credit for the marvelous natural wonders which make the West the playground of the Nation. God gave them to you, and He is not going to take them away—and don't you let the Republicans do it.

A moment ago I mentioned the fact that I am not afraid of America and I am not afraid for it. I have every confidence that we can take care of any crisis in foreign affairs that may arise, though we shall seek every reasonable way of avoiding the crisis. But if it comes in spite of us, we will meet it with the necessary courage and with all the confidence born of our sense of unlimted power. Again I am not afraid of America. I am not afraid for it.

This attitude is somewhat in contrast with that of the opposition party. When it comes to providing protection for this country, they are more appalled by the cost than by the menace. They seem to think that national survival can be discovered in a balance sheet, and they seem to be more afraid of a little red ink than they are of blood. I, and the Democrats in general, have no such fear. We know that this country is rich enough to pay for safety, and its people are courageous enough to demand it.

IMAGINATIVE STEPS

Beyond the great, constructive tasks which we can do at home—beyond new efforts for our country's safety and defense—we should be taking new and imaginative steps on the world scene. The work of the Mormons in their worldwide missionary endeavors and the dedication to this active effort which every Mormon shares hold a precious lesson for all Americans, if we value the friendship of the peoples of the world, if we seek to help them help themselves.

The time has come for us to invite the other nations of the world to join in mutual self-help projects through which the underdeveloped lands may lift themselves up, feed their hungry and clothe their naked, give hope and new meaning to the lives of their multitudes who now have none, help the new nations which have won their independence and now face the new challenges which freedom and self-government create, to achieve the human aspirations of their people.

And let us not shut out the world beyond the Iron Curtain in this joint effort.

RIVALRY TO COOPERATION

We should invite the Russians to let their medical scientists join with those of the free world in an attack by all mankind—regardless of ideology—on the diseases that ravage the bodies and the minds of the people of the whole earth.

We should invite the Russians, who have made such vast strides in rocketry and satellite techniques, to join the scientists of the free world in developing communications satellites that will open up our knowledge of outer space.

We should invite the Russians to join with the free world to find the way to bring fresh water to those arid regions of the earth where men fight for water—to pursue joint projects so that all men may expand their knowledge of that promising agriculture of the future, the farming of the seas.

As far ahead as man can see, the free world and the Communist world will be rivals. Let us turn some of that rivalry into cooperation to conquer disease and destroy hunger, the enemies of all mankind, and to expand man's knowledge of the universe.

A new approach to the fabulous decade we have entered, a new will, a new energy to grasp neglected opportunities and to make new opportunities—the same will and energy that took and built the West—these we need today.

The Democratic Party is the only party equipped to lead the Nation forward to fulfill our hopes for ourselves and the world. In thinking this I am with the majority—a majority that will increase in November and return a responsible Democratic Congress to Washington, and place a progressive Democratic President in the White House.

TRANSACTION OF ADDITIONAL ROUTINE BUSINESS

By unanimous consent, the following routine business was transacted:

RESOLUTION OF WESTERN NEW YORK ACCIDENT & HEALTH ASSOCIATION, INC.

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Western New York Accident & Health Association, Inc., of Buffalo, N.Y., relating to increased benefits for the aged, under the Social Security Act.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION OF THE WESTERN NEW YORK ACCIDENT & HEALTH ASSOCIATION, INC.

Whereas there is now pending before the Congress H.R. 4700 known as the Forand bill, to amend the Social Security Act to provide payments, and to finance this new program by increasing the social security tax by an additional one-fourth of 1 percent on each employee and a like increase on each employer, and an increase of three-eighths of 1 percent on each self-employed person; and

Whereas of the 16 million people over 65, more than 4 million are not covered or eligible for social security. In this group are those most in need of assistance; and

Whereas medical indigence is not a matter of age, and the Forand bill does not attempt to deal directly with the basic problem of how best to aid the medical indigent irrespective of their age, and this problem is one which can best be met at the local and State level and not through insurance, voluntary or compulsory; and

Whereas under present law social security taxes are scheduled by 1969 to rise to 4.5 percent of the first $4,800 of earnings, such rate to be paid by the employee and also by his employer, thus making a total of 9 percent, and to 6.75 percent of a self-employed person's first $4,800 of earning, and there is a practical limit beyond which the American taxpayer, faced with the problem of paying his Federal income tax and various State and local taxes, cannot go; and

Whereas experts estimate that the tax increase proposed in the Forand bill will be grossly inadequate to pay the cost of the new program so that passage of the Forand bill could well imperil the future financial stability of the entire social security system; and

Whereas free choice of physician and hospital would be denied with a resultant decline in the quality of medical care; and

Whereas since 1952 insurance companies and service organizations have doubled the number of older people covered; now insure more than 50 percent of this group; and will cover 90 percent by 1970 with adequate benefits at reasonable premiums:

Now, therefore, the Western New York Accident & Health Association, Inc., and its members hereby resolve that the public interest requires the Forand bill should be rejected; hospital service organizations and insurance carriers should continue their programs of expanded health coverages to senior citizens with all possible encouragement from Federal and State legislatures to develop a program for meeting the problem of medical indigence irrespective of age at the State level, with the aid of Federal funds, if necessary; and be it further

Resolved, That a copy of this resolution be sent to Senator JACOB JAVITS, Senator KENNETH KEATING, and to all Members of the House of Representatives from this State.

PENSIONS FOR WORLD WAR I VETERANS

Mr. MORSE. Mr. President, I have received a letter from William J. Radakovich, acting adjutant of the Willamette Heights Post No. 102, the American Legion, of Portland, Oreg., transmitting a resolution adopted by that post, relating to pensions for World War I veterans. I ask unanimous consent that the letter and resolution be printed in the RECORD.

There being no objection, the letter and resolution were ordered to be printed in the RECORD, as follows:

THE AMERICAN LEGION,
WILLAMETTE HEIGHTS POST NO. 102,
Portland, Oreg., April 15, 1960.

Hon. WAYNE MORSE,
Senate Office Building,
Washington, D.C.

DEAR SENATOR MORSE: World War I veterans are grateful for your interest in their welfare; therefore, I am sending you a copy of a resolution adopted by Willamette Heights Post No. 102, the American Legion. It was passed at our regular meeting March 21, 1960.

It was the consensus that World War I veterans should have a pension separate and apart from that granted veterans of later wars in which the United States has been involved. I have heard that other Legion posts have passed similar resolutions which would indicate that the grassroot members are not in accord with sentiments expressed by national leaders of the Legion.

Wonder if it would be possible to have this resolution published in the CONGRESSIONAL RECORD.

With kindest regards, I am,

WILLIAM J. RADAKOVICH,
Acting Adjutant.

Whereas veterans of the First World War did not participate in the generous post-war benefits afforded veterans of World War II and Korea, nor comparably in social security or retirement, health, and insurance plans which were not generally available prior to World War II; and

Whereas it does not seem fair to such veterans of World War I now of an average age level of 65 years, that they be lumped together with the younger veterans of later wars in a single pension program that does not take into consideration their particular needs as is the case with War Veterans Pension Act of 1959; and

Whereas the veterans of the First World War now number only a small segment of the total retired veterans of all wars, approximately 2 million out of 22 million, many of whom are already receiving small and inadequate pensions or compensation allowances: Therefore be it

Resolved, That Willamette Heights Post No. 102, the American Legion, hereby goes on record as supporting the principle that a Federal pension program should be provided for veterans of World War I, separate and apart from that provided for veterans of the United States later wars, and with such liberalization of pension benefits as may be justified in relation to the fiscal welfare of our Nation; and be it further

Resolved, That a copy of this resolution be sent to each member of the Oregon delegation in the Congress of the United States, and a copy to State headquarters, department of Oregon, the American Legion, for consideration at the 1960 State convention of said department.

ADDITIONAL BILL INTRODUCED

Mr. MORSE, by request, by unanimous consent, introduced a bill (S. 3467) to amend the District of Columbia Teachers' Salary Act of 1955, which was read twice by its title, and referred to the Committee on the District of Columbia.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

AMENDMENT OF DISTRICT OF COLUMBIA TEACHERS' SALARY ACT OF 1955

Mr. MORSE. Mr. President, by request I introduce a bill to increase the salaries of the officers and teachers of the District public schools. This draft of the bill with one minor change is the bill as approved by the Board of Education.

The one change to which I refer is the reference requiring teachers to maintain a satisfactory rating. All of us want standards maintained, but in the proposal approved by the Board were the words "satisfactory or better." I have stricken the words "or better" lest these words become the excuse or even the basis for reestablishing a rating system. Teachers and practically all truly professional school officers everywhere oppose a rating scale—other than satisfactory or nonsatisfactory for professional personnel. Our Congress, several years ago by unanimous vote wiped out the so-called "superior class" for Washington teachers, and I do not want to go back to it now.

I am introducing this bill, by request, even though earlier in the session I cosponsored a teacher's salary bill with my good friend, the Senator from Maryland [Mr. BEALL], because this bill represents a meeting of the minds of many groups. I shall do all I can to obtain early and, I hope, favorable consideration of a teacher's pay bill.

I ask unanimous consent that the bill be appropriately referred, and that the text of the bill be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3467) to amend the District of Columbia Teachers' Salary Act of 1955, introduced by Mr. MORSE, by request, was received, read twice by its title, referred to the Committee on the

District of Columbia, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to fix and regulate the salaries of teachers, school officers, and other employees of the Board of Education of the District of Columbia, and for other purposes", approved August 5, 1955 (69 Stat. 521, ch. 569), as amended, is amended as follows:

Section 1, as amended, is amended by striking everything after the first sentence and inserting in lieu thereof the following salary schedules:

Salary class and position	Service step 1 (minimum)	Service step 2	Service step 3	Service step 4	Service step 5	Service step 6	Service step 7	Service step 8	Service step 9	Service step 10	Service step 11	Service step X	Service step Y
Class 1: Superintendent of schools	$25,000												
Class 2: Deputy Superintendent; president, teachers college	15,200	$15,600	$16,000	$16,400	$16,800	$17,200	$17,600	$18,000	$18,400				
Class 3: Assistant Superintendent	13,200	13,600	14,000	14,400	14,800	15,200	15,600	16,000	16,400				
Class 4: Dean, teachers college	12,000	12,400	12,800	13,200	13,600	14,000	14,400	14,800	15,200				
Class 5:													
Group B, master's degree	10,400	10,800	11,200	11,600	12,000	12,400	12,800	13,200	13,600				
Group C, master's degree plus 30 credit hours. Chief examiner. Dean of students, teachers college. Executive assistant to Superintendent. Psychiatrist.	10,900	11,300	11,700	12,100	12,500	12,900	13,300	13,700	14,100				
Class 6:													
Group A, bachelor's degree	9,500	9,900	10,300	10,700	11,100	11,500	11,900	12,300	12,700				
Group B, master's degree	10,000	10,400	10,800	11,200	11,600	12,000	12,400	12,800	13,200				
Group C, master's degree plus 30 credit hours. Director, Department of Food Services.	10,500	10,900	11,300	11,700	12,100	12,500	12,900	13,300	13,700				
Class 7:													
Group B, master's degree	9,200	9,600	10,000	10,400	10,800	11,200	11,600	12,000	12,400				
Group C, master's degree plus 30 credit hours. Administrative assistant to Deputy Superintendent. Director. Principal, Americanization School. Principal, elementary school. Principal, junior high school. Principal, senior high school. Principal, vocational high school. Registrar, teachers college.	9,700	10,100	10,500	10,900	11,300	11,700	12,100	12,500	12,900				
Class 8:													
Group B, master's degree	8,800	9,200	9,600	10,000	10,400	10,800	11,200	11,600	12,000				
Group C, master's degree plus 30 credit hours. Professor, teachers college. Supervising director.	9,300	9,700	10,100	10,500	10,900	11,300	11,700	12,100	12,500				
Class 9:													
Group B, master's degree	8,400	8,800	9,200	9,600	10,000	10,400	10,800	11,200	11,600				
Group C, master's degree plus 30 credit hours. Assistant principal, Americanization School. Assistant principal, elementary school. Assistant principal, junior high school. Assistant principal, senior high school. Assistant principal, vocational high school. Director, Department of School Attendance and Work Permits. Principal, Capitol Page School. Statistician.	8,900	9,300	9,700	10,100	10,500	10,900	11,300	11,700	12,100				
Class 10:													
Group A, bachelor's degree	7,500	7,900	8,300	8,700	9,100	9,500	9,900	10,300	10,700				
Group B, master's degree	8,000	8,400	8,800	9,200	9,600	10,000	10,400	10,800	11,200				
Group C, master's degree plus 30 credit hours. Assistant director, Department of Food Services.	8,500	8,900	9,300	9,700	10,100	10,500	10,900	11,300	11,700				
Class 11:													
Group B, master's degree	7,600	8,000	8,400	8,800	9,200	9,600	10,000	10,400	10,800				
Group C, master's degree plus 30 credit hours. Associate professor, teachers college.	8,100	8,500	8,900	9,300	9,700	10,100	10,500	10,900	11,300				
Class 12:													
Group B, master's degree	7,200	7,600	8,000	8,400	8,800	9,200	9,600	10,000	10,400				
Group C, master's degree plus 30 credit hours. Assistant Director.	7,700	8,100	8,500	8,900	9,300	9,700	10,100	10,500	10,900				
Class 13:													
Group B, master's degree	6,400	6,800	7,200	7,600	8,000	8,400	8,800	9,200	9,600				
Group C, master's degree plus 30 credit hours. Assistant. Assistant professor, teachers college. Chief attendance officer. Chief librarian, teachers college. Clinical psychologist. Supervisor.	6,900	7,300	7,700	8,100	8,500	8,900	9,300	9,700	10,100				
Class 14:													
Group B, master's degree	6,000	6,400	6,800	7,200	7,600	8,000	8,400	8,800	9,200				
Group C, master's degree plus 30 credit hours. Psychiatric social worker.	6,500	6,900	7,300	7,700	8,100	8,500	8,900	9,300	9,700				
Class 15:													
Group A, bachelor's degree	4,500	4,800	5,100	5,400	5,700	6,000	6,300	6,600	6,900	$7,200	$7,500	$7,800	$8,100
Group B, master's degree	5,000	5,300	5,600	5,900	6,200	6,590	6,800	7,100	7,400	7,700	8,000	8,300	8,600
Group C, master's degree plus 30 credit hours. Attendance officer. Census supervisor. Child labor inspector. Counselor. Instructor, teachers college. Librarian. Research assistant. School psychologist. School social worker. Teacher, elementary and secondary schools.	5,500	5,800	6,100	6,400	6,700	7,000	7,300	7,600	7,900	8,200	8,500	8,800	9,100

Subsection (a) of section 2 is amended by striking from the third sentence "December 31, 1957" and inserting in lieu thereof "June 30, 1960"; by striking from the fourth sentence the words "counselor in the vocational high schools, counselor in the junior high schools," and the words "school social worker, research assistant," and by inserting immediately before the period at the end of the same sentence the following: ", and except that a person not possessing a master's degree who was appointed on probationary or permanent status before July 1, 1960, to a position as a nonshop teacher in the vocational education program, or counselor in the vocational high schools, or counselor in the junior high schools, or school social worker, or research assistant may continue to be employed in such a position, and except that a person not possessing a master's degree who was on the list of eligible candidates for any such position before July 1, 1960, may continue to be eligible for such position until the expiration of such eligible list"; and by striking from the fifth sentence "December 31, 1957" and inserting in lieu thereof "June 30, 1960".

Subsection (b) of section 2 is amended by striking the figure "18" wherever it appears and inserting in lieu thereof the figure "15".

Section 4 is amended to read as follows: "Each teacher, school officer, and other employee in the service of the Board on July 1, 1960, who occupies a position held by him on June 30, 1960, under the provisions of this Act shall be placed in a salary class covered by section 1 of this Act as indicated at the end of this section. Any employee in group A, B, or C of his salary class on June 30, 1960, shall be assigned to the same letter group of the class to which he is transferred on July 1, 1960."

Subsections (a) and (b) of section 6 are amended to read as follows:

"(a) On July 1, 1960, each permanent employee assigned to salary class 15 in accordance with sections 1 and 4 of this Act shall be assigned to the numerical service step on the schedule for his class and group under this Act next above the numerical service step occupied by him on June 30, 1960, except that employees assigned to salary class 15 on July 1, 1960, who on June 30, 1960, were on service step 11 or a higher step shall be assigned to service steps for their respective groups as follows: An employee who prior to July 1, 1960, has completed 11 years but less than 15 years of creditable service shall be assigned to service step 11; an employee who has completed 15 years but less than 20 years of creditable service shall be assigned to service step X; and an employee who has completed 20 years of creditable service shall be assigned to service step Y. In determining the eligibility of employees for assignment to service steps X and Y, credit shall be given for previous service in accordance with the provisions of Act governing the placement and advancement of employees who are newly appointed, reappointed, or reassigned to positions in salary class 15. Beginning on July 1, 1961, each permanent employee in salary class 15 who has not yet reached service step 11 for his class and group under this Act shall advance one such step each year until he reaches service step 11; each employee having reached service step 11 shall advance to service step X for his class and group on July 1 following the completion of 15 years of creditable service; and each employee having reached service step X shall advance to service step Y for his class and group on July 1 following the completion of 20 years of creditable service; except that the Board of Education may, on the written recommendation of the Superintendent of Schools, order such salary advancement to be discontinued for the year immediately following any year in which the employee fails to receive a performance rating of 'satisfactory' from his superior officer.

"(b) On July 1, 1960, each permanent employee assigned to salary classes 2 to 14 inclusive in accordance with sections 1 and 4 of this Act who on June 30, 1960, was not at the highest numerical service step for his class and group in the salary schedule then in effect shall be assigned to the numerical service step on the schedule for his class and group under this Act next above the service step occupied by him on June 30, 1960, except that no such employee shall be assigned to a lower numerical service step than he would have occupied on July 1, 1960, if this Act had been in effect throughout his period of service in the District of Columbia public schools. Beginning on July 1, 1961, each permanent employee in salary classes 2 to 14 inclusive who has not yet reached the highest service step for his class, or class and group, under this Act shall advance one such step each year until he reaches the highest step for his class, or class and group, except that the Board of Education may, on the written recommendation of the Superintendent of Schools, order such salary advancement to be discontinued for the year immediately following any year in which the employee fails to receive a performance rating of 'satisfactory' from his superior officer."

Subsection (a) of section 7 is amended by striking the figure "18" wherever it occurs and inserting in lieu thereof the figure "15", by striking the figure "16" and inserting in lieu thereof "13", by striking the figure "13" and inserting in lieu thereof "11", and by striking the figure "17" and inserting in lieu thereof "14".

Subsection (a) of section 8 is amended by striking the period at the end thereof and inserting the following: "; except that the Board of Education may, upon the written recommendation of the Superintendent of Schools, order such increase in salary not to be paid for the year immediately following any year in which the employee fails to receive a performance rating of 'satisfactory' from his superior officer."

Subsection (a) of section 13 is amended by striking everything after the second sentence and inserting in lieu thereof the following pay schedules:

Classification	Step 1	Step 2	Step 3
	Per diem		
Summer schools (regular):			
Teacher, elementary and secondary schools, and instructor, teachers college	$16.89	$19.34	$21.79
Assistant professor, teachers college	20.71	22.89	25.06
Associate professor, teachers college	23.97	26.15	28.33
Professor, teachers college	27.24	29.42	31.60
Assistant principal, elementary and secondary schools	26.15	28.33	30.51
Supervising director	26.15	28.33	30.51
Principal, elementary and secondary schools	28.33	30.51	32.69
Veterans summer high school centers: Teacher	25.34	29.01	32.69
	Per period		
Evening schools:			
Teacher	4.69	5.01	5.64
Assistant principal	6.77	7.34	7.90
Principal	7.34	7.90	8.46

Subsection (b) of section 13 is amended by striking the phrase "January 1, 1958" and inserting in lieu thereof "July 1, 1960".

Section 14 is amended by striking the figure "18" and inserting in lieu thereof "15", by striking the figure "16" and inserting in lieu thereof "13", and by striking the figure "13" and inserting in lieu thereof "11".

Section 15 is amended by striking the phrase "January 1, 1958" and inserting in lieu thereof "July 1, 1960", by striking the figure "17" and inserting in lieu thereof "14", by striking the words "Chief examiner," by striking the figure "11" and inserting in lieu thereof "10", by striking the figure "13" and inserting in lieu thereof "11", by striking the phrase "statistician, in class 15;" and inserting the words "and statistician" immediately after the phrase "Director, Department of School Attendance and Work Permits," and by striking the figure "16" and inserting in lieu thereof "13".

Section 16 is amended by striking the phrase "January 1, 1958" and inserting in lieu thereof "July 1, 1960", by striking the figure "18" and inserting in lieu thereof "15", and by striking the figure "14" and inserting in lieu thereof "13".

Section 2 of the amendatory Act entitled "An Act to amend the District of Columbia Teachers' Salary Act of 1955", approved August 28, 1958 (72 Stat. 1004) is hereby repealed.

Subsection (a) of section 4 of the amendatory Act entitled "An Act to amend the District of Columbia Teachers' Salary Act of 1955", approved August 28, 1958 (72 Stat. 1104) is hereby repealed.

The effective date of this Act shall be July 1, 1960.

AUTHORIZATION OF APPROPRIATIONS FOR NATIONAL AERONAUTICS AND SPACE ADMINISTRATION—AMENDMENT

Mr. LONG of Louisiana submitted an amendment, intended to be proposed by him, to the bill (H.R. 10809) to authorize appropriations to the National Aeronautics and Space Administration for salaries and expenses, research and development, construction and equipment, and for other purposes, which was ordered to lie on the table and to be printed.

ADJOURNMENT

Mr. MOSS. Mr. President, in accordance with the order previously entered, I move that the Senate now stand in adjournment.

The motion was agreed to; and (at 8 o'clock and 9 minutes p.m.) the Senate adjourned, under the previous order, until tomorrow, Tuesday, May 3, 1960, at 12 o'clock meridan.

TENNESSEE

John W. Simonton, Brighton, Tenn., in place of M. D. Phillips, retired.

James F. Miller, Brownsville, Tenn., in place of J. A. Hudson, deceased.

WASHINGTON

Samuel R. Campbell, Tieton, Wash., in place of A. R. Schooler, retired.

HOUSE OF REPRESENTATIVES

MONDAY, MAY 2, 1960

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

III John: 11: *Follow that which is good.*

O Thou who art the supreme ruler and guiding intelligence in the life of men and nations, grant that during this National Youth Fitness Week, we may all dedicate ourselves anew to the high vocation of building a finer social order and a nobler civilization.

We penitently confess that we of elder years have handed on to the youth of our day and generation many heavy burdens and difficult problems in the areas of human relationships and have allowed our pride, our prejudices, and our self-interests to keep us from drawing closer to our fellow men in amity and good will.

In our humble and heartfelt prayer for the youth of our land we earnestly beseech Thee that they may be better and wiser than we have been and be empowered by Thy divine spirit to open the gateways of a new era for all mankind.

Inspire them with the wisdom and the will to help hasten the dawning of that blessed day of prediction when the chasms which divide the members of the human family shall be bridged by friendship and fraternity and all their adventures and achievements shall be for the good of humanity and the glory of God.

Hear us in the name of the Prince of Peace. Amen.

THE JOURNAL

The Journal of the proceedings of Thursday, April 28, 1960, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Ratchford, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and a joint resolution of the House of the following titles:

On April 13, 1960:

H.R. 10743. An act making supplemental appropriations for the fiscal year ending June 30, 1960, and for other purposes.

On April 14, 1960:

H.R. 2310. An act for the relief of Hoo W. Yuey and his dependent children; and

H.J. Res. 621. Joint resolution making additional supplemental appropriations for the fiscal year ending June 30, 1960, and for other purposes.

On April 22, 1960:

H.R. 135. An act to amend the Internal Revenue Code of 1954 to exclude from gross income amounts paid by the United States to certain nonresident alien employees or their beneficiaries;

H.R. 529. An act to discharge more effectively obligations of the United States under certain conventions and protocols relating to the institution of controls over the manufacture of narcotic drugs, and for other purposes;

H.R. 725. An act to provide for the establishment of the Wilson Creek Battlefield National Park, in the State of Missouri;

H.R. 1805. An act to provide for the protection and preservation of the Antietam Battlefield in the State of Maryland;

H.R. 3472. An act to repeal section 1505 of the Social Security Act so that in determining eligibility of Federal employees for unemployment compensation their accrued annual leave shall be treated in accordance with State laws, and for other purposes;

H.R. 3676. An act to direct the Secretary of the Interior to convey certain lands to the city of Tillamook, Oreg.;

H.R. 6155. An act to amend the Internal Revenue Code of 1954 to exempt from taxation certain nonprofit corporations or associations organized after August 31, 1951;

H.R. 6785. An act to amend section 4071 of the Internal Revenue Code of 1954 so as to fix a tax of 1 cent per pound of certain laminated tires produced from used tires;

H.R. 7359. An act to direct the Secretary of the Interior to convey certain public lands in the State of Nevada to the Colorado River Commission of Nevada acting for the State of Nevada;

H.R. 7588. An act to amend the Internal Revenue Code of 1954 with respect to the treatment of copyright royalties of purposes of the personal holding company tax;

H.R. 8649. An act to continue for a temporary period the existing suspensions of the tax on the first domestic processing of coconut oil, palm oil, palm-kernel oil, and fatty acids, salts, combinations, or mixtures thereof;

H.R. 9307. An act to continue for 2 years the suspension of duty on certain alumina and bauxite, and to extend until July 16, 1960, the suspension of duty on imports of crude chicory and the reduction in duty on ground chicory;

H.R. 9451. An act to amend the act of July 19, 1954, to exempt from taxation certain additional property of the Veterans of Foreign Wars of the United States in the District of Columbia, and to provide that the tax exemption granted the property of the Veterans of Foreign Wars of the United States in the District of Columbia shall be effective with respect to taxable years beginning on and after July 1, 1959;

H.R. 9543. An act to revise the boundaries and change the name of the Stones River National Military Park, Tenn., and for other purposes;

H.R. 9737. An act to amend the act of March 3, 1901, to eliminate the requirement that certain District of Columbia corporations be managed by trustees the majority of whom are citizens of the District of Columbia;

H.R. 9820. An act to extend the period during which certain tanning extracts, and extracts of hemlock or eucalyptus suitable for use for tanning, may be imported free of duty; and

H.R. 10683. An act to provide for the regulation of finance charges for retail installment sales of motor vehicles in the District of Columbia, and for other purposes.

On April 29, 1960:

H.R. 9331. An act to extend and increase the authorized maximum expenditure for the special milk program for children.

DEPARTMENT OF INTERIOR APPROPRIATION BILL, 1961

Mr. KIRWAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill, H.R. 10401, making appropriations for the Department of the Interior and related agencies for the fiscal year ending June 30, 1961, and for other purposes, with Senate amendments thereto, disagree to the amendments of the Senate, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Ohio? [After a pause.] The Chair hears none, and appoints the following conferees: Mr. KIRWAN, Mr. NORRELL, Mr. CANNON, Mr. JENSEN, and Mr. TABER.

SPECIAL ORDER

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that the special order granted the gentleman from Ohio [Mr. SCHERER] for today be transferred to Thursday, May 5. The gentleman from Ohio is absent today because of illness.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMITTEE MEETING DURING SESSION OF HOUSE

Mr. SMITH of Mississippi. Mr. Speaker, I ask unanimous consent that the Special Subcommittee on Federal Aid to Highways of the Public Works Committee be allowed to sit during general debate today and the remainder of the week.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

SUBCOMMITTEE NO. 3 OF THE SELECT COMMITTEE ON SMALL BUSINESS

Mr. YATES. Mr. Speaker, I ask unanimous consent that Subcommittee No. 3 of the House Select Committee on Small Business may have permission to sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

SEVENTEENTH SEMIANNUAL REPORT ON THE OPERATION OF MUTUAL SECURITY PROGRAM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. No. 373)

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with the accompanying papers, referred to the Committee on Foreign Affairs and ordered to be printed with illustrations:

To the Congress of the United States:

Transmitted herewith is the Seventeenth Semiannual Report on the Operation of the Mutual Security Program, for the period ending December 31, 1959. The report was prepared under the direction of the coordinator for the mutual security program by the Department of State (including the International Co-

operation Administration), the Department of Defense, and the Development Loan Fund.

In the decade of the 1960's our country will face new and somewhat different problems in the mutual security area. For example, the divergence in living standards between the Western democracies and the underdeveloped countries poses a growing problem to our purpose of maintaining and extending free political and economic institutions. It also presents an increasingly acute need for development assistance.

Our friends and allies in Europe are also aware of this need, and as their ability to provide development assistance grows, we are increasingly consulting with them to determine how the burden can most efficiently be shared by all.

The growing need for development assistance demands of our mutual security program the utmost prudence and foresight in the management of its resources for such purposes. I am accordingly convinced that our program must be flexible, as well as strong, so that we may be able to deal with this and other problems that arise quickly, wisely, and successfully.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *May 2, 1960.*

SELECT COMMITTEE ON SMALL BUSINESS

Mr. YATES. Mr. Speaker, I ask unanimous consent that Subcommittee No. 3 of the House Select Committee on Small Business have permission to sit during general debate tomorrow, as well as today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

THE HONORABLE THOMAS J. O'BRIEN

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, one of the finest Members of this body is our distinguished friend and colleague, the gentleman from Illinois [Mr. O'BRIEN]. Everybody knows and loves TOM O'BRIEN because of those rich and deep qualities of mind and spirit that he possesses. He not only has a strong friendship for his friends, no matter to what party they belong or where they may be located, but he has a deep loyalty to our country and, if I might say so, knowing my Republican friends will not be offended, he has an abiding loyalty in the Democratic Party.

He and Mrs. O'Brien are sweethearts. They symbolize for all of us the finest things that a married couple can possess in their love and affection for each other.

While TOM O'BRIEN does not take the floor too frequently in debate, he wields a tremendous influence in this body because of the great respect and affection that all Members have for him.

On last Saturday TOM O'BRIEN celebrated a birthday anniversary and I know I speak the sentiments of all my colleagues on both sides of the aisle when I extend to TOM O'BRIEN our congratulations and our sincere wishes that God in his infinite wisdom will bless him with many, many future similar anniversaries.

GENERAL LEAVE TO EXTEND

Mr. Speaker, I ask unanimous consent that all Members who so desire may extend their remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LIBONATI. Mr. Speaker, I am privileged to join the distinguished Majority Leader JOHN McCORMACK in his masterful eulogy of our venerated dean of Illinois, THOMAS J. O'BRIEN.

His matchless statesmanship was rewarded last year by the naming of the O'Brien Locks at Calumet City in commemoration of his successful efforts in passing the legislation. It was the realization of the dreams of the years of the people of Chicago and the Central West as well as the States bordering the Mississippi River, in the perfection of the St. Lawrence Seaway program.

He has always been in the forefront for the improvement of projects which contribute to the local and national economy.

The citizens of Chicago and Cook County have returned him to public service by terrific majorities every time he has submitted his candidacy to the electorate. Their is no problem too insignificant to escape his experienced attention.

The Members of the Congress have the highest regard and warm feelings for his constant attention to their most suppressed needs. He helps everyone.

We of Illinois are especially proud of his unswerving loyalty and honest courage for his State and party.

His every desire is to benefit others. On this, his 82d birthday, we again salute this venerated servant of the people and his lovely sweet lady. Their personal charities and kindnesses to wage earners have endeared them to the masses.

The Nation, the State of Illinois, and the city of Chicago are proud of this great statesman who in his silence has guided with sagelike alacrity the molding of legislative acts to benefit the thousands of common people whom he loves.

May this great leader be with us for many years to come to carry on his great work. With God's blessing, we pray for his continued health and happiness.

Mr. EVINS. Mr. Speaker, the sentiments expressed by our distinguished majority leader, the gentleman from Massachusetts [Mr. McCORMACK] are, I am sure, shared by all of us; certainly they are my sentiments. Our esteemed colleague, the gentleman from Illinois, TOM O'BRIEN, is a gentleman whose character and whose outstanding work as a Member of the House and dean of the Illinois delegation I admire greatly. We of Tennessee especially remember him as a friend who came to our aid in support of an important bill vital to our area and the Nation. He is one of the grand gentleman of the House and I want to extend to him my best wishes on this occasion and to wish him many, many more happy birthday anniversaries.

Mr. PRICE. Mr. Speaker, I join the majority leader, the gentleman from Massachusetts [Mr. McCORMACK], my colleagues from the State of Illinois, and other colleagues in the House in offering birthday felicitations to the Honorable THOMAS J. O'BRIEN, the dean of the Illinois Democrats delegation in this Chamber.

It is not necessary to extoll the virtues of TOM O'BRIEN in this brief expression of good wishes to him, because every Member of the House of Representatives already holds the highest esteem for him. Few Members in the history of the House have been blessed with the warmth of feeling of friendship from his fellows as has TOM O'BRIEN. This is a genuine feeling that comes from the fact that everyone appreciates the sincerity of TOM O'BRIEN in everything he does and in his own feeling for each individual Member of the House.

TOM O'BRIEN'S word is his bond. No one need have more than TOM'S word for complete assurance of his position on any matter and for a guarantee that he will fulfill any agreement in which he may be a party.

His work in the Congress has been honorable and effective through 24 years. It has been of immeasurable value to his beloved home city of Chicago, to the State of Illinois, and to the Nation.

In addition to the high regard I have for TOM O'BRIEN as a colleague in the House, I have a strong admiration for him on a personal basis, as a friendly counselor and as a close and loyal friend upon whom I can lean for advice when the occasion arises. In this latter feeling I know I am not alone. Everyone who really knows TOM O'BRIEN must have the same feeling.

Happy birthday, TOM. Sincere good wishes to you and your lovely and most charming partner, Mrs. O'Brien.

Mr. RAYBURN. Mr. Speaker, I am happy to take this time to congratulate my longtime friend TOM O'BRIEN on the occasion of his birthday.

He is one of the grandest men I have ever known, either inside or outside this body. We need men that have his qualities of leadership and character. He has served with marked distinction and devotion to his duties on the great Committee on Ways and Means.

It is my wish that he and his lovely wife may live many, many years and have the same happy and beautiful life together as they have had in the past.

Mr. MILLS. Mr. Speaker, I am pleased to join the many colleagues and friends of our beloved THOMAS J. O'BRIEN in extending best wishes to him on the occasion of the commemoration of his 82d birthday.

Few individuals are blessed with the eminent qualities with which THOMAS J. O'BRIEN is so abundantly endowed.

It is indeed fortunate for his friends, his district, and his Nation that he has been blessed with this long life of useful and beneficial service. We all look forward with confidence that he will continue to counsel and guide us for many years to come.

It would indeed be redundant for me to repeat here the many outstanding virtues of THOMAS J. O'BRIEN. His loyalty, his integrity, his ability, his sincerity, his courage, and the strong bonds of the many friendships which he has made are all well known by everyone who has had the privilege of coming in contact with him.

On yesterday I had the privilege of attending the birthday party given in honor of TOM O'BRIEN. I have never seen a birthday party of this size. The several hundred people who attended were visible proof of the high esteem all have for TOM O'BRIEN.

I also want to extend to TOM O'BRIEN's lovely and gracious wife my best wishes. This is one of those happy and touching marriages that is an inspiration to all who know this charming couple.

Mr. BOLAND. Mr. Speaker, I rise today to pay a well-deserved tribute to a highly respected Member of this body, Congressman TOM O'BRIEN. His brilliant record in public life speaks for itself.

From sheriff of Cook County to the leader of the Illinois delegation, TOM has made many true friends. As he said himself, "I have many real good friends and the only enemies that I have are those that I wanted to have." Your friendship, TOM, is one that I have truly treasured.

To you, TOM, and to your wonderful wife, I wish all the possible success in this world. May you continue to be blessed with good health and real happiness in the years ahead.

Happy birthday, TOM.

Mr. IRWIN. Mr. Speaker, I would like to join with my colleagues at this time in wishing many years of health and happiness to the Honorable THOMAS J. O'BRIEN, who recently celebrated a birthday anniversary, and to Mrs. O'Brien, and to express appreciation on behalf of younger Members of the Congress such as myself for Mr. O'BRIEN's awareness of and interest in the problems confronting us and for his thoughtful helpfulness, particularly to those of us serving our first term in the Congress.

Mr. THORNBERRY. Mr. Speaker, I want to join in wishing to our distinguished colleague a happy birthday. I do not know of anyone who is more widely beloved, admired, and respected than our friend and colleague from Illinois. He is a wonderful gentleman and I am grateful for the privilege of knowing him as a friend and a colleague.

Mr. YATES. Mr. Speaker, I want to join with the distinguished majority leader in paying tribute to our good friend Congressman THOMAS J. O'BRIEN, of Chicago, upon the occasion of his 82d birthday.

One of the joys of my legislative career is the opportunity it has afforded to know TOM and to work with him. I have come to know him very well and to treasure the very close friendship that has grown between us. I know I express the sentiments of the people of Chicago when I extend congratulations to him for the wonderful job he is doing for our community and for the Nation. May he enjoy good health for many years to come so that he may continue to serve the people as ably in the future as he has in the past.

Mr. MURPHY. Mr. Speaker, it is a pleasure to join my colleagues today in paying tribute to the Honorable THOMAS J. O'BRIEN, dean of the Democratic delegation from the State of Illinois, on the occasion of his 82d birthday.

It has been my privilege to know Mr. O'BRIEN for the past 40 years. He was also a close personal friend and neighbor for many years of Mrs. Murphy's family, the McInerneys, where they lived on the West Side of Chicago.

Mr. O'BRIEN has been in public office for over 50 years, having served his city, county, State, and country in many different capacities.

He has the respect and friendship of his colleagues on both sides of the aisle. This was demonstrated when the House and Senate passed unanimous resolutions designating the lock and dam on the Calumet River, an integral part of the Sag Channel project, the Thomas J. O'Brien lock and dam. This honor had been bestowed upon only two men during their lives—President Hoover and Senator Norris.

I am very happy to have this opportunity to extend birthday greetings to our distinguished colleague, and to wish him many more years of continued good health and contentment.

Mr. O'HARA of Illinois. Mr. Speaker, in November of 1906, in the administration of President Theodore Roosevelt, a young man destined to place of highest stature in the history of Chicago, of Illinois, and of the Nation was elected to the State Legislature of Illinois.

That was the year of the San Francisco earthquake, the year that for the first time a delegate was elected to the Congress from the Territory of Alaska, the year of the opening of a cable between Japan and the United States, the year of the reaching of the North Pole by Admiral Peary, and the year that for the first time in the history of our Republic a President of the United States had departed from the territory of the United States to visit foreign soil.

It is especially interesting to note that 1906, when the young, popular and dynamic THOMAS J. O'BRIEN first was elected to the general assembly of his native State, was the year the Supreme Court of the United States handed down the historic finding in the case of Missouri against Illinois that Missouri had not proved that the discharge of Chicago sewage through the drainage canal deleteriously affected the water supply of St. Louis taken from the Mississippi River.

The lock and dam in the Cal-Sag development named in honor of THOMAS J. O'BRIEN is a monument to his half a century of leadership in the fight for the inland waterways and Lake Michigan water diversion so vital to the people of Chicago and the Middle West. It is indeed of significant interest that the Missouri-Illinois decision was handed down the year young TOM O'BRIEN first was elected to the legislature.

From 1906 to 1960 is not the full span of the remarkable and outstanding political career of the beloved dean of our delegation, a career that has had few equals in American history. At 20 he was a constable in the city of Chicago, and the tradition is that although he was the youngest he also was the most determined and dedicated in demanding compliance with and respect for the constable's authority.

As State bank examiner he made a record never before or since equaled, and if the full story were written of the 4 years he was sheriff of Cook County, of his nightly raids in person, unannounced and never mentioned in the newspapers, when reports reached him of vice spots that were open despite his orders, the book would be the best seller of the year. When large amounts were owed Cook County in taxes on personal property that the big taxpayers boldly ignored Sheriff TOM took matters in hand personally, himself served the attachments, and in 2 days collected millions of dollars in taxes that no one before TOM O'BRIEN could get paid.

Mr. Speaker, we of the Illinois Democratic delegation are richly blessed with having as our dean the beloved TOM O'BRIEN. There never again will be his like. His named is implanted in the hearts of the men, women and children of Chicago, the hearts alike of the lowly and of the mighty, as it is in the hearts of his colleagues in the Congress. And always Mrs. O'Brien and TOM are joined together in the thoughts and the hearts of the people of Chicago as they are among his colleagues here, who have daily evidence of their mutual devotion and perfect partnership in the living together of full and happy days and the doing of good deeds.

As a member of the Illinois delegation, and one who looks back on over half a century of precious friendship with our beloved dean, I join in expression of appreciation to our great majority leader for his warm and affectionate remarks on the birthday celebation of TOM O'BRIEN.

Mr. PUCINSKI. Mr. Speaker, it gives me great pleasure to join the distinguished majorty leader of the House, Mr. MCCORMACK, in paying tribute today to the Dean of the Illinois delegation, Congressman O'BRIEN, on his 82d birthday.

Illinois has sent great leaders to this House of Representatives going back to the very birth of our Nation. Among those we list with pride are Abraham Lincoln, Hamilton Lewis and Speaker of the House Joseph G. Cannon. History, I am sure, will record with the same degree of pride the contributions toward the development of our great State and our Nation written over the years by the distinguished member we are honoring today, the Honorable THOMAS J. O'BRIEN, dean of the Illinois delegation, who has served in this House for almost a quarter of a century.

It would be difficult indeed to fully appraise his great contribution to our Nation during the most hectic period of its development. We can only say with pride that every measure which has come before this House since those dark days of 1932—when America was on the verge of economic collapse—every measure which helped America regain its position of strength and progress—has had the support of Mr. O'BRIEN. Not once during his illustrious career of service in this national body has TOM O'BRIEN wavered in his determination to make ours the greatest Nation in the world.

We of Illinois—and those of us serving in this House from all over America—can find great inspiration in Mr. O'BRIEN's deep understanding of our legislative process. During the past quarter of a century, he has given living meaning to our democratic process. In his quiet, unassuming way, TOM O'BRIEN has made an indelible imprint on every piece of progressive legislation which was designed to help our Nation prosper within the framework of free enterprise.

I consider it a great privilege indeed to be able to serve in Congress under the guidance of my own dean, Mr. O'BRIEN. Like many of my colleagues, I have learned to admire and respect him because of his deep devotion to those principles which have made our Nation a symbol of freedom and justice throughout the world.

As we honor him today on his 82d birthday we can all take inspiration from his agility and dexterity. I never cease to be amazed how thoroughly he keeps track of every single action in Congress and how his many years of experience make it possible for Mr. O'BRIEN to evaluate difficult legislation with relative ease. We from Illinois are that much the wiser and effective in our duties as Members of Congress because of his sound and determined leadership.

Mr. Speaker, I consider it a great honor to be able to join in this tribute to Mr. O'BRIEN today. I pray he will be blessed with many more years of health so his profound influence on the affairs of our Nation can be shared by all of us. I am certain all of the people of his native Chicago—the city he loves so dearly and for which he works so tirelessly here in Congress—would want to join in this birthday tribute today. May he experience many more such birthdays here in Congress.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

AGRICULTURAL ATTACHÉ ROTATION

The Clerk called the bill (H.R. 8074) to amend section 602 of the Agricultural Act of 1954.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

FORD CITY, PA.

The Clerk called the bill (H.R. 5850) for the relief of the Borough of Ford City, Pa.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $412,250.

The payment of such claim shall be in full settlement of all the claims of the Borough of Ford City against the United States for damage to its sewage system resulting from the raising of the pool level of the Allegheny River at Ford City in consequence of the construction by the United States of lock and dam numbered 6 on the Allegheny River: *Provided,* That no part of the amount appropriated in this Act in excess of 5 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary not withstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Strike out all after the enacting clause and insert: "That notwithstanding laches or any statute of limitations, jurisdiction is hereby conferred on the United States District Court for the Western District of Pennsylvania, to hear, determine, and render judgment on the claim of the Borough of Ford City, Pennsylvania, for damage to its sewer system allegedly due to the construction by the Department of the Army of a lock and dam designated as 'Lock and Dam No. 6,' on the Allegheny River.

"SEC. 2. Proceedings shall be instituted any time within 90 days after the date of the enactment of this Act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HEADQUARTERS FOR MOUNT RAINIER NATIONAL PARK, WASH.

The Clerk called the bill (S. 1358) to authorize the Secretary of the Interior to provide a headquarters site for Mount Rainier National Park in the general vicinity of Ashford, Wash., and for other purposes.

Mr. MINSHALL. Mr. Speaker, since a rule has been granted, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

NATIONAL HISTORIC SITE AT BENT'S OLD FORT, COLO.

The Clerk called the bill (H.R. 6851) authorizing the establishment of a national historic site at Bent's Old Fort near La Junta, Colo.

Mr. GROSS. Mr. Speaker, inasmuch as this bill has been granted a rule, I ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

USE OF PESTICIDE CHEMICALS ON AGRICULTURAL COMMODITIES

The Clerk called the bill (H.R. 7480) to amend the Federal Food, Drug, and Cosmetic Act, with respect to label declaration of the use of pesticide chemicals on raw agricultural commodities which are the produce of the soil.

Mr. ASPINALL. Mr. Speaker, at the request of the gentlewoman from Missouri, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

AMEND VETERANS' PREFERENCE ACT OF 1944

The Clerk called the bill (H.R. 1907) to amend the Veterans' Preference Act of 1944 to define mothers for purposes of such act.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Veterans' Preference Act of 1944, as amended (5 U.S.C. 851), is amended by adding at the end of such section the following: "As used in this section, the terms 'mother' and 'mothers' include a mother, mother through adoption, and a female who stood in loco parentis to a deceased or service-connected permanently and totally disabled ex-serviceman or ex-servicewoman described in clause (5) of this section at any time for a period of not less than one year prior to the date on which such ex-serviceman or ex-servicewoman attained the age of twenty-one years and not less than one year prior to the entry of such ex-serviceman or ex-servicewoman into active service in the Armed Forces of the United States. Not more than one female shall be held to be a mother under this section. In the application of such definition in individual cases, priority shall be given to the female who last had the relationship of mother with the ex-serviceman or ex-servicewoman prior to the attainment of age twenty-one by such ex-serviceman or ex-servicewoman and prior to the entry of such ex-serviceman or ex-servicewoman into active service in the Armed Forces of the United States."

SEC. 2. (a) Notwithstanding the amendment made by the first section of this Act—

(1) any individual—

(A) who, prior to the effective date of this section, has been granted preference under the Veterans' Preference Act of 1944 by reason of being within the classes of individuals specified in clause (5) of section 2 of such Act, as in effect at any time prior to such effective date, as eligible for preference under such Act, and

(B) who, on such effective date, is in that type of employment with the Federal Government or the government of the District of Columbia, to which such preference is applicable,

shall retain such preference as long as she is in any such type of employment without any break in service of more than fourteen consecutive calendar days; and

(2) any individual—

(A) who, on such effective date, is not in that type of employment with the Federal Government or the government of the District of Columbia to which such preference is applicable, and

(B) who, prior to such effective date, has filed an application for appointment to such employment and, at the time of filing such application was within the classes of individuals specified in such clause (5), as in effect at such time of filing application, as eligible for preference under such Act,

shall (i) be granted, in connection with such application, the preference in appointment to which she would have been entitled under such Act as long as such application remains in effect and (ii) if appointed as a result of such application, be granted the preference in employment to which she would have been entitled under such Act as long as she is in any such type of employment without any break in service of more than fourteen consecutive calendar days.

(b) The granting or retention of preference with respect to any individual pursuant to subsection (a) of this section shall not affect the operation of clause (5) of section 2 of the Veterans' Preference Act of 1944, as amended by the first section of this Act, with respect to any other individual who, on or after such effective date, is eligible for preference under such clause.

SEC. 3. The first section and section 2 of this Act shall take effect on the sixtieth day following the date of enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONCERNING McALPINE LOCKS AND DAM AT LOUISVILLE, KY.

The Clerk called the bill (H.R. 10164) to change the name of the locks and dam numbered 41 on the Ohio River at Louisville, Ky.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the locks and dam numbered 41 at Louisville, Kentucky, on the Ohio River shall hereafter be known as McAlpine locks and dam, and any law, regulation, document, or record of the United States in which such locks and dam are designated or referred to shall be held to refer to such locks and dam under and by the name of McAlpine locks and dam.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LAND CONVEYANCE TO THE STATE OF FLORIDA

The Clerk called the bill (H.R. 9818) to provide for the conveyance of certain real property of the United States to the State of Florida.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture shall convey to the State of Florida all right, title, and interest of the United States in and to the north 500 acres of section 33, township 21 south, range 21 east, Tallahassee meridian, Sumter County, Florida, upon payment by the State of Florida to the United States (within the one-year period beginning on the date of enactment of this Act) of the sum of $27,000. Such conveyance shall be subject to the condition that such real property shall be used by the State of Florida for public purposes, and if such real property shall ever cease to be used for public purposes, the title thereto shall revert to the United States and the United States shall have the right of immediate entry thereon.

With the following committee amendment:

Page 1, line 9, strike out "sum of $27,000" and insert "market value of such land as determined by the Secretary."

The committee amendment was agreed to.

The bill was ordered to be engrossd and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LEASING OF U.S.-OWNED OIL AND GAS INTERESTS IN TEXAS

The Clerk called the bill (H.R. 8740) to provide for the leasing of oil and gas interests in certain lands owned by the United States in the State of Texas.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to act on behalf of the United States in providing for the exploration, development and leasing of the oil and gas deposits in any lands owned by the United States in the State of Texas to which articles 5367 and 5368 of the Revised Civil Statutes (1925) of said State are applicable and which are not excluded or excepted from the provisions of the Mineral Leasing Act for Acquired Lands (61 Stat. 913, 30 U.S.C. 351 and the following) by section 3 thereof. Sections 2–4 and 6–10, both inclusive, of the Mineral Leasing Act for Acquired Lands shall apply to leases entered into, or proposed to be entered into, under this Act. Neither the proviso to the fourth paragraph of section 17 of the Mineral Leasing Act (41 Stat. 443), as amended (30 U.S.C. 226) nor any other provision of law which would have the effect of depriving the State of Texas of the amounts to which it is entitled under section 5368 of its Revised Civil Statutes shall apply to any lease entered into, or proposed to be entered into, under this Act, and every lessee shall be required by the Secretary to pay to said State the amounts provided in said section 5368.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CERTAIN LANDS TO GOVERNMENT OF GUAM

The Clerk called the bill (H.R. 10997) to grant to the Government of Guam certain filled lands, submerged lands, and tidelands.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby granted to the Government of Guam, without reimbursement, all of the right, title, and interest of the United States in and to all of those lands, including filled lands, submerged lands, and tidelands, together with all structures and improvements thereon, located in Guam, and constituting a portion of the area known as the Paseo de Susana, more particularly described as follows:

Beginning at a point, the coordinates of which are east 50,368.842 meters, north 50,439.428 meters, Land and Claims Commission 1945 triangulation system, said point of beginning being also on the mean lower low water line—

thence due south a distance of 30.78 meters;

thence north 81 degrees 35 minutes west a distance of 17.48 meters;

thence north 81 degrees 44 minutes west a distance of 11.20 meters;

thence north 81 degrees 44 minutes west a distance of 11.20 meters;

thence north 78 degrees 15 minutes west a distance of 18.91 meters;

thence north 79 degrees 56 minutes west a distance of 14.65 meters;

thence north 73 degrees 20 minutes west a distance of 29.91 meters;

thence north 72 degrees 57 minutes west a distance of 18.35 meters;

thence north 60 degrees 57 minutes west a distance of 13.09 meters;

thence north 72 degrees 55 minutes west a distance of 22.27 meters;

thence north 60 degrees 03 minutes west a distance of 11.14 meters;

thence north 44 degrees 56 minutes west a distance of 10.93 meters;

thence north 80 degrees 07 minutes west a distance of 6.29 meters;

thence north 78 degrees 50 minutes west a distance of 12.03 meters;

thence north 72 degrees 29 minutes west a distance of 17.11 meters;

thence south 86 degrees 48 minutes west a distance of 13.25 meters;

thence south 73 degrees 58 minutes west a distance of 17.53 meters;

thence south 73 degrees 07 minutes west a distance of 11.19 meters;

thence south 64 degrees 44 minutes west a distance of 13.05 meters;

thence south 74 degrees 52 minutes west a distance of 19.69 meters;

thence south 70 degrees 16 minutes west a distance of 16.35 meters;

thence south 66 degrees 12 minutes west a distance of 14.15 meters;

thence south 58 degrees 43 minutes west a distance of 12.71 meters;

thence south 67 degrees 55 minuts west a distance of 12.02 meters;

thence south 69 degrees 46 minutes west a distance of 6.57 meters;

thence south 76 degrees 32 minutes west a distance of 6.44 meters;

thence south 69 degrees 49 minutes west a distance of 4.55 meters;

thence south 15 degrees 39 minutes west a distance of 14.61 meters;

thence south 03 degrees 13 minutes west a distance of 11.92 meters;

thence south 88 degrees 30 minutes west a distance of 24.95 meters;

thence south 32 degrees 24 minutes east a distance of 3.21 meters;

thence south 23 degrees 07 minutes east a distance of 2.83 meters;

thence south 02 degrees 26 minutes east a distance of 3.05 meters;

thence south 17 degrees 10 minutes west a distance of 4.88 meters;

thence north 89 degrees 19 minutes west a distance of 11.69 meters;

thence south 84 degrees 34 minutes west a distance of 30.74 meters;

thence south 84 degrees 40 minutes west a distance of 6.57 meters;

thence south 66 degrees 07 minutes west a distance of 12.32 meters to a point on the northerly right-of-way line of Marine Drive;

thence westerly along said line north 88 degrees 04 minutes west a distance of 10.05 meters;

thence leaving said right-of-way line, north 14 degrees 09 minutes west a distance of 5.17 meters to a point on the seaward side of the Agana Boat Basin wall, said point being also on the mean lower low water line;

thence northeasterly and southeasterly along said mean lower low water line to the point of beginning;

containing an area of 106,560 square meters or 26.33 acres, more or less.

SEC. 2. The property conveyed by section 1 of this Act shall be subject to the condition that the property shall be used solely for civic, park, and recreational purposes, and if it shall ever cease to be used for such purposes, or if the Government of Guam should ever propose to sell, lease, or otherwise dispose of such land or any part thereof, title thereto shall revert to the United States, which shall have the right of immediate entry thereon.

SEC. 3. There is hereby granted to the Government of Guam all of the right, title, and interest of the United States in and to all of those lands, including filled lands, submerged lands, and tidelands, together with all structures and improvements thereon, located in Guam, and known as the Agana Boat Basin, more particularly described as follows:

Beginning at a point, the coordinates of which are east 49,927.762 meters, north 50,379.618 meters, Land and Claims Commission 1945 triangulation system, said point being common to the boundary of Paseo de Susana and described as a point on the seaward side of the Agana Boat Basin wall, said point also being on the mean lower low water line—

thence along said wall, being also along said mean lower low water line, south 88 degrees 53 minutes west a distance of 4.09 meters;

thence north 04 degrees 13 minutes west a distance of 15.35 meters;

thence south 89 degrees 22 minutes west a distance of 17.38 meters;

thence leaving said wall and mean lower low water line south 12 degrees 17 minutes west a distance of 18.15 meters;

thence south 00 degrees 21 minutes east a distance of 1.39 meters to a point on the northerly right-of-way line of Marine Drive;

thence westerly along said right-of-way line north 88 degress 04 minutes west a distance of 207.11 meters;

thence leaving said northerly right-of-way line north 01 degrees 56 minutes east a distance of 126.95 meters;

thence south 88 degrees 04 minutes east a distance of 309.36 meters, more or less, to a point on the boundary of Paseo de Susana and being on the mean lower low water line;

thence southerly and westerly along said mean lower low water line and Agana Boat Basin wall to the point of beginning;

containing an area of 33,635.52 square meters, or 8.23 acres more or less.

SEC. 4. The property conveyed by section 3 of this Act shall be subject to the condition that the property shall be used solely for civic, park, and recreational purposes, and as a boat basin, and if it shall ever cease to be used for such purposes, or if the Government of Guam should ever propose to sell, lease, or otherwise dispose of such land or any part thereof, title thereto shall revert to the United States, which shall have the right of immediate entry thereon.

With the following committee amendments:

Page 3, line 23, strike out "minuts" and insert in lieu thereof "minutes".

Page 5, line 20, strike out the words "propose to sell, lease," and insert in lieu thereof the word "sell".

Page 7, line 20, strike out the words "propose to sell, lease," and insert in lieu thereof the word "sell".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROHIBIT SEVERANCE OF SERVICE CONNECTION AFTER 10 YEARS

The Clerk called the bill (H.R. 113) to prohibit the severance of a service-connected disability which has been in effect for 10 or more years, except when based on fraud.

The SPEAKER. Is there objection to the present consideration of the bill?

Mrs. MAY. Mr. Speaker, reserving the right to object, I wonder if I might ask a question of a member of the Committee on Veterans' Affairs on this particular legislation. There were some serious objections to the introduction of this bill on the part of the Veterans' Administration director. I have been asked to direct a question to elicit further information. With the amendment that the committee has made on this bill, is it now acceptable to the Veterans' Administration?

Mr. DORN of South Carolina. Mr. Speaker, if the gentlewoman will yield, I would like to read just a very short sentence:

In testimony before the subcommittee on this legislation, the Chief Benefits Director of the Veterans' Administration indicated that if legislation of this type is made effective January 1, 1962, it would be more acceptable to the Veterans' Administration, from an operating standpoint.

Mrs. MAY. I thank the gentleman. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a service connection which has been made for compensation, pension, or insurance purposes under laws administered by the Veterans' Administration, and which has been in force for ten or more years, shall not be severed thereafter unless on a showing that the rating originally granting service connection was based on fraud.

With the following committee amendment:

Strike out all after the enacting clause, and insert:

"That chapter 11 of title 38, United States Code, is amended by adding the following new section:

"'§ 359. Protection of service connection

"'Service connection for any disability or death granted under this title which has been in force for ten or more years shall not be severed on or after January 1, 1962, except upon a showing that the original grant of service connection was based on fraud or it is clearly shown from military records that the person concerned did not have the requisite service or character of discharge.'

"SEC. 2. The analysis of chapter 11 of title 38, United States Code, is amended by inserting immediately below

"'§ 358. Disappearance.'

the following:

"'359. Protection of service connection.'"

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to prohibit the severance of service connection which has been in effect for ten or more years, except under certain limited conditions."

A motion to reconsider was laid on the table.

DATE OF ADDITIONAL COMPENSATION FOR DEPENDENTS

The Clerk called the bill (H.R. 276) to amend section 3011 of title 38, United States Code, to establish a new effective date for payment of additional compensation for dependents.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3011 of title 38, United States Code, is amended by substituting a colon for the period at the end thereof and adding the following: *"Provided,* That additional compensation on account of dependents based on the establishment of a disability rating in the amount specified by law for the purpose shall be effective the date of such rating provided the evidence establishing entitlement is received in the Veterans' Administration within six months from the date of notification of such rating."

With the following committee amendments.

On page 1, line 4, strike out "colon" and insert "comma".

On page 1, beginning on line 5, strike out *"Provided,* That additional," and insert "except as hereinafter provided. Additional".

On page 1, line 8, strike out "amount" and insert "percentage evaluation".

On page 1, line 9, after the word "be" insert "payable from the".

On page 1, line 9, after the word "effective" strike out the word "the".

On page 1, line 10, strike out "evidence establishing entitlement".

On page 2, at the beginning of line 1, insert "basic proof of dependents".

On page 2, line 2, strike out "six months" and insert "sixty days".

On page 2, line 3, insert "action" after the word "rating".

The committee amendments were agreed to.

Mr. DORN of South Carolina. Mr. Speaker, veterans 50 percent or more disabled are presently entitled to receive additional compensation for their dependents. As an example, a veteran totally disabled with a wife receives an additional $23 monthly. If he is 50 percent disabled, he would receive 50 percent of that amount, or $11.50.

This bill as reported has been amended in accordance with the suggestions of the Veterans' Administration and provides that the effective date of an award for additional compensation because of

dependents shall be the effective date of the increased percentage evaluation, provided proof of dependents is received within 60 days of the notification of the rating action.

Hearings were held on this and related bills before the Subcommittee on Compensation and Pension on March 22 and 23, 1960.

The Veterans' Administration advises that it is unable to furnish an estimate of cost, but does not believe it to be substantial. The Veterans' Administration describes the bill as meritorious and favors its enactment.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RELATING TO MARRIAGE DATE FOR SERVICE-CONNECTED BENEFITS

The Clerk called the bill (H.R. 641) to amend Veterans Regulation No. 10 to provide that the widow of a peacetime veteran who married the veteran within 15 years after his last discharge or release from the service may be entitled to death compensation in case of the service-connected death of the veteran.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph V of Veterans Regulation Numbered 10 is amended by striking out "ten years" the first time it appears therein and inserting in lieu thereof "fifteen years".

With the following committee amendments:

On page 1, line 3, strike out "paragraph V of Veterans Regulation Numbered 10".

On page 1, line 4, insert "item (1) of subsection 302(a) of title 38, United States Code".

On page 1, beginning on line 5, strike out "the first time it appears therein".

The committee amendments were agreed to.

Mr. DORN of South Carolina. Mr. Speaker, under section 404, title 38, United States Code, dependency and indemnity compensation may be paid to a widow, otherwise qualified, who married the veteran before the expiration of 15 years after his last discharge.

Hearings were held on compensation matters by the Subcommittee on Compensation and Pension on March 22 and 23, 1960.

Compensation for service-connected death payable prior to the effective date of the above section, January 1, 1957, had a 10-year provision. The present bill would make these provisions uniform by making the 15-year provision apply to both types of compensation.

The Veterans' Administration is in favor of this proposal and believes that any cost involved would be small.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend title 38, United States Code, to make uniform the marriage date requirements for service-connected death benefits."

A motion to reconsider was laid on the table.

COMPUTING DEPENDENCY COMPENSATION PAYABLE BY VA

The Clerk called the bill (H.R. 7502) to amend the basis for certifications with respect to basic pay for dependency and indemnity compensation award purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 421 (a) of title 38, United States Code, is amended, effective January 1, 1959, by adding immediately after the first sentence the following sentence: "The basic pay shall be that of the highest rank or grade in which an individual's service was performed satisfactorily for not less than six months while on active duty, provided all subsequent service was honest and faithful."

With the following committee amendment:

Strike out all after enacting clause and insert the following: "That section 402 of title 38, United States Code, is amended by adding the following new subsection:

"'(*d*) If a veteran has satisfactorily served on active duty for a period of six months or more in a rank higher than that specified in subsection (a) or (b) and was so serving in such rank within one hundred and twenty days before death in the active military, naval, or air service or before last discharge or release from active duty under conditions other than dishonorable, his basic pay shall be determined by using the appropriate rank specified in those subsections or by substituting such higher rank for the rank specified in those subsections, whichever will result in a greater amount. The determination as to whether an individual has served satisfactorily for the required period in a higher rank shall be made by the Secretary of the Department in which such higher rank was held.' "

The committee amendment was agreed to.

Mr. DORN of South Carolina. Mr. Speaker, under chapter 13 of title 38, United States Code, which is based on Public Law 881 of the 84th Congress, the dependency and indemnity compensation is payable to survivors based on the formula of $112 per month plus 12 percent of the base pay of the person who served.

As amended by the committee this bill provides that the basic pay shall be that of the highest rank or grade in which the individual served for not less than 6 months while on active duty and was so serving within 120 days prior to his death.

The amendments made by the committee remove any objection on the part of the Veterans' Administration and that agency therefore recommends favorable consideration of the bill as amended.

Hearings were held on this bill and other compensation measures by the Subcommittee on Compensation and Pension on March 22 and 23, 1960.

No estimate of cost can be provided but it is believed to be small.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "To revise the determination of basic pay of certain deceased veterans in computing dependency and indemnity compensation payable by the Veterans' Administration."

A motion to reconsider was laid on the table.

COUNTING SERVICE TIME IN MORE THAN ONE PERIOD OF WAR

The Clerk called the bill (H.R. 8098) to specify certain creditable service for pension purposes.

There being no objection the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 521(b) of title 38, United States Code, is amended—

(1) by striking out the word "or" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof a semicolon followed by the word "or"; and

(3) by adding a new paragraph (4) to read as follows:

"(4) for an aggregate of ninety days in two or more separate periods of service during World War I and World War II or during World War II and the Korean conflict."

SEC. 2. No monetary benefits shall accrue by reason of this Act for any period prior to date on enactment.

With the following committee amendments:

On page 2, beginning on line 2 after the word "during", strike out the remainder of section 1 of the bill and insert in lieu thereof "more than one period of war."

On page 2, line 5, strike out all section 2 and insert in lieu thereof the following: "Pension shall not be paid for any period prior to the effective date of this Act to any person whose eligibility for pension is established solely by virtue of this Act."

The committee amendments were agreed to.

Mr. DORN of South Carolina. Mr. Speaker, this bill seeks to permit the counting or tacking of two or more separate periods of service during any period of war in order to qualify under the 90-day requirement for nonservice-connected pension.

The bill has been amended as suggested by the Veterans' Administration and covers all combinations of war service.

The Veterans' Administration advises the cost would be negligible and that it favors the enactment of this proposal.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

INSURANCE FOR CERTAIN WORLD WAR II AVIATION STUDENTS

The Clerk called the bill (H.R. 9785) to provide for equitable adjustment of the insurance status of certain members of the Armed Forces.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any en-

listed person who died as the result of an aviation accident incurred in line of duty while undergoing flight training in the active service of the Army or Navy after October 7, 1940, and before August 4, 1942, who would have been eligible for life insurance with premiums paid by the United States, had he been serving under an appointment as an aviation cadet, shall be deemed to have applied for and to have been granted national service life insurance in an amount which together with any other United States Government life insurance or national service life insurance in force at the time of death shall aggregate $10,000.

SEC. 2. Notwithstanding the repeal of the National Service Life Insurance Act of 1940, claims for insurance granted by virtue of the foregoing section shall be adjudicated under the provisions of that Act, subject to the following conditions:

(a) The insurance shall be payable effective from the date of enactment of this Act in equal monthly installments for one hundred and twenty months certain with such payments continuing during the remaining lifetime of the first beneficiary to the following beneficiaries and in the order named—

(1) to the widow or widower of the insured, if living, and while unremarried;

(2) if no widow or widower entitled thereto, to the child or children of the insured, if living, in equal shares;

(3) if no widow or widower entitled thereto, or child, to the dependent mother or father of the insured, if living, in equal shares.

(b) Any installment of such insurance not paid to a beneficiary during his lifetime shall be paid to the beneficiary or beneficiaries within the permitted class next entitled to priority and no payment of such insurance shall be made to the estate of any deceased person.

(c) No application for insurance payment under this Act shall be valid unless filed in the Veterans' Administration within two years from the effective date of this Act and the relationship and dependency of the applicant where required as a basis for such claim, shall be proved as of the date of death of the insured by evidence satisfactory to the Administrator of Veterans' Affairs. Persons shown by evidence satisfactory to the Administrator of Veterans' Affairs to have been mentally or legally incompetent at the time the right to apply for death benefits expires, may make such application at any time within one year after the removal of such disability.

(d) The cost of the life insurance benefits granted under this Act shall be borne by the United States and the benefit payments thereunder shall be made from the national service life insurance appropriation.

With the following committee amendments:

On page 1, line 3, strike out "enlisted person" and insert "seaman second class".

On page 1, line 5, strike out "while undergoing flight training".

On page 1, line 6, strike out "Army or".

On page 1, beginning on line 7, strike out "who would have been eligible for life insurance with premiums paid by the United States, had he been serving under an appointment as an aviation cadet," and insert "while undergoing flight training leading to appointment as an aviation cadet under the Act of April 15, 1935,".

The committee amendments were agreed to.

Mr. DORN of South Carolina. Mr. Speaker, this bill, as amended, seeks to cover cases of enlisted personnel who entered naval service as seamen and who underwent flight training, leading to the appointment of an aviation cadet after April 15, 1935. Such cases were not covered by free insurance until appointment as a cadet. Thereafter National Service Life Insurance in the amount of $10,000 was provided by the Government with Government paying the premiums therefor.

Hearings were held on this and other insurance bills by the Subcommittee on Insurance March 16 and 17, 1960.

In its report the Veterans' Administration stated:

> Apparently the lack of such protection was due solely to an administrative technicality. The Veterans' Administration would not object to general relief legislation on behalf of such personnel.

The bill has been amended in accordance with the suggestions received from the Veterans' Administration and as such it is believed that the cost would be very small because of the few cases affected at this late date.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BARRING DUPLICATE BENEFITS PAYMENTS TO CHILDREN OF VETERANS

The Clerk called the bill (H.R. 9788) to amend section 3104 of title 38, United States Code, to prohibit the furnishing of benefits under laws administered by the Veterans' Administration to any child on account of the death of more than one parent in the same parental line.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3104(b)(2) of title 38, United States Code, is amended to read as follows:

"(2) Benefits under laws administered by the Veterans' Administration may not be paid or furnished to or on account of any child by reason of the death of more than one parent in the same parental line; however, the child may elect one or more times to receive benefits by reason of the death of any one of such parents."

SEC. 2. The amendment made by this Act shall apply only to cases where the death of a parent occurs after the date of enactment of this Act.

With the following committee amendment:

On page 1, line 5, after the word "Benefits" insert "other than insurance".

The committee amendment was agreed to.

Mr. DORN of South Carolina. Mr. Speaker, this legislation which is favored by the Veterans' Administration, and which would save rather than incur any added cost, prohibits duplicate payments of benefits to a child on account of the death of more than one parent in the same parental line.

This situation was called to the attention of the committee by a conscientious attorney in one of the field offices of the Veterans' Administration, who indicated that a World War II widow, who had three children and who had married veterans and was three times widowed, was receiving benefits for her children by one veteran based on three "fathers." No such result was ever intended and this bill would correct this condition.

Hearings were held by the Subcommittee on Compensation and Pension on March 22 and 23, 1960.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ADDITIONAL PAY FOR MANAGERS OF VA INSTALLATIONS

The Clerk called the bill (H.R. 9792) to amend section 4111 of title 38, United States Code, with respect to the salary of managers of Veterans' Administration hospitals, domiciliaries, and centers.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, there is a pay bill pending before the House Committee on Post Office and Civil Service. This is a pay-increase bill. Until we can have some clear indication as to what is going to happen under the terms of the overall pay salary increase bill pending before the committee, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

REIMBURSEMENT FOR CERTAIN FARES AND TOLLS

The Clerk called the bill (H.R. 10108) to authorize reimbursement of certain Veterans' Administration beneficiaries and their attendants for ferry fares, and bridge, road, and tunnel tolls.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection 111(a) of title 38, United States Code, is amended by adding the following at the end thereof: "In addition to the mileage allowance authorized by this section, there may be allowed reimbursement for the actual cost of ferry fares, and bridge, road, and tunnel tolls."

Mr. DORN of South Carolina. Mr. Speaker, this bill seeks to authorize reimbursement for ferry fares, bridge, road, and tunnel tolls in addition to the mileage allowance of 5 cents now payable for the travel of Veterans' Administration beneficiaries and their attendants.

This is limited to those individuals who are traveling to a Veterans' Administration installation for medical examination, treatment, or care in connection with vocational rehabilitation. Because of the high tunnel, bridge, and ferry tolls applicable in some localities the present basic allowance does not cover additional expenses. This legislation is therefore necessary.

The Veterans' Administration favors its enactment but is unable to furnish any definite estimate of cost.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COMPENSATION FOR VETERANS WITH FOUR OR MORE CHILDREN

The Clerk called the bill (H.R. 10898) to amend section 315 of title 38, United States Code, to provide additional compensation for seriously disabled veterans having four or more children.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 315(a)(1) of title 38, United States Code, is amended by inserting "(plus $12 for each living child in excess of three)" immediately before the semicolon at the end of subparagraph (D) and (G).

SEC. 2. The amendments made by this Act shall take effect on the first day of the first calendar month which begins after the date of enactment of this Act.

With the following committee amendment:

On page 1, line 8, strike out "first" and insert "second."

The committee amendment was agreed to.

Mr. DORN of South Carolina. Mr. Speaker, veterans today with service-connected disabilities rated 50 percent or more receive additional compensation for their wives, children, and dependent parents; however, no additional payment is made for children in excess of three.

This bill would provide for monthly payments to children in excess of three of $12 for each child where the veteran is 100 percent disabled regardless of the number of children. For veterans rated between 50 percent and 100 percent disabled the rates would be proportionately less.

Hearings were held on this and other compensation bills by the Subcommittee on Compensation and Pension on March 22 and 23, 1960.

The Veterans' Administration advises that no cost estimate can be furnished but it is believed to be small.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WAIVER OF INSURANCE PREMIUMS FOR DISABLED VETERANS

The Clerk called the bill (H.R. 10703) to grant a waiver of national service life insurance premiums to certain veterans who became totally disabled in line of duty between the date of application and the effective date of their insurance.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 712 of title 38, United States Code, is amended by adding the following new subsection at the end thereof:

"(d) In any case in which an insured has been denied or would have been denied premium waiver under section 602(n) of the National Service Life Insurance Act of 1940 or this section solely because he became totally disabled between the date of valid application for insurance and the subsequent effective date thereof, and in which it is shown that (1) the total disability was incurred in line of duty between October 8, 1940, and July 31, 1946, inclusive, or June 27, 1950, and April 30, 1951, inclusive, and (2) the insured remained continuously so totally disabled to the date of death or the date of enactment of this subsection, whichever is earlier, the Administrator may grant waiver of premiums from the beginning of and during the continuous total disability of such insured. Application for waiver of premiums under this subsection must be filed by the insured or, in the event of his death, by the beneficiary within two years after the date of enactment of this subsection, except that if the insured or the beneficiary be insane or a minor within the two-year period, application for such waiver may be filed within two years after removal of such legal disability, or if an insane insured shall die before the removal of the disability, application may be filed by the beneficiary within two years after the insured's death. No insurance shall be placed in force under this subsection in any case in which there was an award of benefits under the Servicemen's Indemnity Act of 1951 or of gratuitous insurance under section 722(b) of this title. The amount of insurance placed in force hereunder together with any other United States Government life insurance or national service life insurance in force at the time of death, or at the time of the insured's application for waiver hereunder, may not exceed $10,000 and shall be reduced by the amount of any gratuitous insurance awarded under the National Service Life Insurance Act of 1940. Waiver of premiums under this subsection shall render the insurance nonparticipating during the period such premium waiver is in effect. The cost of waiver of premium and death benefits paid as a result of this subsection shall be borne by the United States."

Mr. DORN of South Carolina. Mr. Speaker, this legislation, which was introduced at the request of the Veterans' Administration, seeks to authorize a waiver of national service life insurance premiums for those veterans who became totally disabled in line of duty between the date of application and the effective date of their insurance. It would apply only to veterans of World War II and those in the early days of the Korean conflict.

Hearings were held on this and other proposals on March 16 and 17, 1960, by the Subcommittee on Insurance.

The Veterans' Administration has not been able to provide a definite estimate of cost but it is believed to be small and it is indicated that it is favored by the Veterans' Administration.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NEW MODIFIED LIFE PLAN FOR NSLI POLICYHOLDERS

The Clerk called the bill (H.R. 11045) to amend section 704 of title 38, United States Code, to permit the conversion or exchange of policies of national service life insurance to a new modified life plan.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That effective July 1, 1961, section 704 of title 38, United States Code, is amended (1) by inserting "(a)" immediately before "Insurance"; and (2) by adding at the end thereof the following:

"(b) Under such regulations as the Administrator may promulgate a policy of participating insurance may be converted or exhanged for insurance issued under this subsection on a modified life plan. Insurance issued under this subsection shall be on the same terms and conditions as the insurance which it replaces, except (1) the premium rates for such insurance shall be based on the 1958 Commissioners Standard Ordinary Table of Mortality and interest at the rate of 3 per centum per annum; (2) all cash, loan, paid-up, and extended values shall be based on the 1958 Commissioners Standard Ordinary Table of Mortality and interest at the rate of 3 per centum per annum; and (3) at the end of the day preceding the sixty-fifth birthday of the insured the face value of the modified life insurance or extended term insurance shall be automatically reduced by one-half thereof, without any reduction in premium.

"(c) Under such regulations as the Administrator may promulgate, a policy of nonparticipating insurance may be converted or exchanged to insurance issued under this subsection on a modified life plan. Insurance issued under this subsection shall be on the same terms and conditions as the insurance which it replaces, except that (1) term insurance issued under section 621 of the National Service Life Insurance Act of 1940 shall be deemed for the purposes of this subsection to have been issued under section 723(b) of this title; and (2) at the end of the day preceding the sixty-fifth birthday of the insured the face value of the modified life insurance or extended term insurance shall be automatically reduced by one-half thereof, without any reduction in premium.

"(d) Any insured who converts or exchanges his insurance to a modified life plan under subsection (b) or (c) of this section may upon written application and payment of premiums made before his sixty-fifth birthday be granted national service life insurance, on an ordinary life plan, without physical examination, in an amount of not less than $500, in multiples of $250, but not in excess of one-half of the face amount of the modified life insurance in force by payment or waiver of premiums on the day before the sixty-fifth birthday of the insured. Insurance issued under this subsection shall be effective on the sixty-fifth birthday of the insured. The premium rate, cash loan, paid-up, and extended values on the ordinary life insurance issued under this subsection shall be based on the same mortality tables and interest rates as the insurance issued under a modified life plan. Settlements on policies involving annuities, on insurance issued under this subsection shall be based on the same mortality or annuity tables and interest rates as such settlements on a modified life plan. If the insured is totally disabled on his sixty-fifth birthday and premiums on his modified life insurance are being waived under section 712 of this title or he is entitled on that date to waiver under such section he shall be automatically granted the maximum amount of insurance authorized under this subsection and premiums on such insurance shall be waived during the continuous total disability of the insured."

With the following committee amendments:

On page 3, line 1, after the word "premium." insert the following: "Any person eligible for insurance under section 722(a) of this title may be granted modified life insurance under this subsection which, subject to exception (2) above, shall be is-

sued on the same terms and conditions specified in section 722(a)."

On page 3, line 6, after the word "who" insert "is issued, or".

On page 3, line 7, after the word "to" insert a comma.

On page 3, line 25, after the word "on" insert "the day before".

The committee amendments were agreed to.

Mr. DORN of South Carolina. Mr. Speaker, this bill, to be effective July 1, 1961, proposes to provide a new plan national service life insurance designated as a modified life plan which would be offered to World War II policyholders as a substitute for their present term policies.

The committee has constantly called to its attention the plight of some 15,000 World War I policyholders who have maintained their insurance on a term basis and who today are paying exorbitant premiums. As an example, the committee recently learned of the case of a veteran, age 78, who pays $1,200 in annual premiums on his $10,000 policy. The premiums he has paid have already exceeded the face value of the policy but he needs the protection for his wife and has no alternative except to continue the payment of the premiums.

The committee has been unable to arrive at any solution for the correction of this situation insofar as World War I veterans are concerned due to the fact that insurance is a contract and provisions granting special privileges to term policyholders could not be enacted without similar treatment being afforded all policyholders. Proposals to pay up term policies of World War I insured at age 60 are estimated to cost $104 million. To do this for the World War II group would cost nearly $13 billion. The cost, of course, would go down as the age increases but in any event the cost would always be excessive. In fact, in the case of the World War II insured it would be described correctly as astronomical. It seems entirely unlikely that any such action would be taken by the Congress and therefore, in an effort to prevent such a situation arising in the case of approximately 3 million policyholders, the committee offers this possible solution.

Under the modified life plan the veteran would be offered a new type of insurance on which dividends would be paid at a greatly reduced rate but the premiums would remain constant. As an example, the premium for a $1,000 5-year-term policy is $10.06; under the modified life plan the rate would be $14.09. This latter premium rate will remain constant throughout the life of the veteran. The term plan will increase to $47 at age 65. Under the modified life plan the face value of the policy will be reduced by one-half at age 65. In other words if the veteran has a $10,000 policy at age 65 it would be reduced to $5,000; however, the policyholder has the option to continue the additional $5,000 protection by paying the premium for the attained age of 65 without medical examination.

The committee strongly believes that this is a worthwhile proposal and should be enacted into law to prevent a catastrophe occurring 20 to 25 years from now when the premium rates of term insurance will have reached very high levels.

Hearings were held on this proposal by the Subcommittee on Insurance on March 16 and 17, 1960.

The Veterans' Administration in its report states that the bill "will tend to alleviate the problem of the national service life insurance term policyholders at the older ages. The Veterans' Administration recommends its favorable consideration."

The first-year administrative cost would be $244,681 and the 5-year administrative cost would total $760,318.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CASTILLO DE SAN MARCOS NATIONAL MONUMENT, FLA.

The Clerk called the bill (H.R. 8226) to add certain lands to Castillo de San Marcos National Monument in the State of Florida.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, since a rule has been granted for the consideration of this bill, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

APPORTIONMENT OF WATERS OF BIG BLUE RIVER

The Clerk called the bill (H.R. 10513) granting the consent of Congress to the States of Kansas and Nebraska to negotiate and enter into a compact relating to the apportionment of the waters of the Big Blue River and its tributaries as they affect such States.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the States of Kansas and Nebraska to negotiate and enter into a compact relating to the interests of such States in the waters of the Big Blue River and all its tributaries, and providing for an equitable apportionment between said States of the waters of the Big Blue River and its tributaries and for matters incident thereto: *Provided,* That one qualified person appointed by the President of the United States shall participate in such negotiations as chairman, representing the United States, and who shall make a report to the President and to the Congress on the proceedings and on the compact. No compact, the negotiation of which is authorized by this Act, shall be binding upon the parties thereto until it has been ratified by the legislatures of each of the respective States, and approved by the Congress of the United States.

SEC. 2. (a) The Federal representative shall eport the President either directly or through such agency or official of the Government as the President may specify.

(b) The Federal representative shall receive compensation and shall be entitled to travel expenses, including per diem in lieu of subsistence, in the same manner as provided for experts and consultants under sections 5 and 15 of the Administrative Expenses Act of 1946 and the Travel Expense Act of 1949, as amended, except (1) that his term of service shall be governed by the terms of this Act and shall not be affected by the time limitations of said section 15, and (2) his per diem rate of compensation shall be in such amount, not in excess of $100, as the President shall specify, but the total amount of compensation payable in any one calendar year shall not exceed $15,000: *Provided,* That if the Federal representative be an employee of the United States he shall serve without additional compensation: *Provided further,* That a retired military officer, or a retired Federal civilian officer or employee, may be appointed as such representative without prejudice to his retired status, and he shall receive compensation as authorized herein in addition to his retired pay or annuity, but the sum of his retired pay or annuity and such additional compensation as may be payable hereunder shall not exceed $15,000 in any one calendar year.

(c) The Federal representative shall be provided with office space, consulting, engineering, and stenographic service, and other necessary administrative services.

(d) The compensation of the Federal representative shall be paid from the current appropriation for salaries in the White House Office or for staff assistance for the President in connection with special projects. Travel and other expenses provided for in subsections (b) and (c) of this section shall be paid from any current appropriation or appropriations selected by the head of such agency or agencies as may be designated by the President to provide for such expenses.

With the following committee amendments:

Page 2, line 3, strike out the word "who".

Page 2, after line 4, add the following new sentence: "The person so appointed shall be chosen from among persons who are regularly employed full time by a department or agency of the United States and shall receive no additional compensation by reason of appointment under this Act. His travel expenses, including per diem in lieu of subsistence, shall be borne by the department or agency from which he is appointed."

Page 2, line 9, strike out all of section 2 through page 3, line 20.

Mr. McCORMACK. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, I am glad to see this bill on the calendar and glad to see that it will pass by unanimous consent. I should like to call attention to a New England compact bill concerning which a number of departments and agencies have filed reports with the House Committee on Public Works, in opposition. I introduced a resolution for the Congress to approve the compact and that is now in committee.

I do not know what action the House committee will take, but I assume in all fairness that with a number of the departments and agencies entering opposition to a salient part of the compact entered into the committee might have some difficulty in getting the bill reported out favorably. I hope the committee will consider it in executive session to give dignity at least to the governments and the legislatures and the public officials of the six New England States, who for 3 years gave serious consideration to this compact, which relates to the water resources of New England, and that a vote will be taken by the Committee on Public Works.

I appeared before the Committee on Public Works in support of my resolution, and I expressed my amazement at the lack of vision on the part of the departments and agencies in their opposition to this compact. A compact with similar provisions in relation to the Potomac River waters in three States, contained in the New England compact, was approved within recent years. I simply want the record to show that in my opinion there is a lack of vision on the part of the departments and agencies for their reasons in their opposing the approval of this compact.

For 3 years the public officials and others in New England worked on this compact, which is a regional compact. In my opinion, many of the solutions of the problems of today and tomorrow, particularly in connection with observing States rights, are going to be brought about through the process, the medium, and the avenue of regional compacts.

This is a regional compact, very seriously considered and deliberated upon. Four of the legislatures of New England have already ratified the compact. Now we find the situation where this unexpected and nonvisionary attitude of the departments and agencies suddenly erupts and probably will be of sufficient strength to prevent legislation going through Congress this session approving this very important compact which means so much to the six States of New England and to all the people of New England.

In congratulating the committee in reporting out the compact presently under consideration and the House in approving it unanimously, I could not let this occasion go by without commenting on the New England compact and the unfortunate situation that exists where we of New England, who do not ask much in this direction, have received this unexpected and surprising opposition.

Mr. ASPINALL. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Colorado.

Mr. ASPINALL. I am sure the gentleman from Massachusetts, our distinguished majority leader, recognizes that the legislation presently under consideration comes out of the Committee on Interior and Insular Affairs, but the legislation to which he makes reference comes out of the Committee on Public Works.

Mr. McCORMACK. The gentleman is correct. As far as the legislation I have introduced is concerned, it is before the Committee on Public Works. I am glad my friend advises me the pending bill came out of his committee, because whatever committee it came out of my remarks would be just the same in congratulating the gentleman of that committee in reporting this bill to the House. My remarks are addressed to the fact that the compact we in New England arrived at has received unexpected, surprising, and lack-of-vision opposition on the part of several departments and agencies of the Government, who made a report on the New England compact.

Mr. Speaker, I ask unanimous consent to proceed for 2 additional minutes; probably my friend on the Republican side might give me a lift.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. AVERY. I appreciate the distinguished majority leader yielding to me. The gentleman from Colorado has already made the one observation which I wanted to make for the information of the gentleman from Massachusetts; namely, that this legislation is not from the Committee on Public Works but from the Committee on Interior and Insular Affairs. I would like also to express my extreme pleasure at finding the gentleman from Massachusetts on the floor today defending States rights since that is a rather unique role for the gentleman from Massachusetts to be in. We welcome his support in that philosophy and we will call upon him again from time to time for further support.

Mr. McCORMACK. Let us get the facts correctly. When anyone is right, I will support him whether he is big or small. Let me say to my friend that I am for bigness, but I am not in favor of bigness for monopolistic purposes. I am in favor of legitimate bigness in every form, but I believe in lifting the people up. I do not believe in the trickle down theory, hoping that some of it may trickle down below when we know that very little of it does. So the gentleman from Kansas is not making a statement which my record of 32 years in this body in any way supports. I am for bigness when they are right. And I am not in favor of bigness when they are wrong.

Mr. Speaker, the New England delegation is solidly behind the compact to which I made reference—Democrats and Republicans are behind it. I hope my Republican friends will try to persuade the agencies and departments of the Republican administration to change their position on this compact which is so important to the future of New England. Does my friend want me to yield further?

Mr. AVERY. I would appreciate it.

The SPEAKER. The time of the gentleman from Massachusetts has expired.

Mr. AVERY. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, I do not want to prolong this discussion but since my comment provoked a little philosophical debate, I merely want to get one more thing in the RECORD. The gentleman will agree with me that his remarks do not in any way signify any objection on his part to this bill, but that he merely finds this is a convenient time to take the floor.

Mr. McCORMACK. Exactly. I am enthusiastically in favor of this bill and I was congratulating the committee and congratulating the House for passing it unanimously, and I was using this time and this bill as an avenue to call attention to the blindness of some departments and agencies in relation to the New England compact.

Mr. AVERY. And I so understood the gentleman, but he got off on so many different subjects in this colloquy, and I wanted to bring the discussion finally back to the place where we started and that is with reference to this bill. The gentleman from Massachusetts has no objection and, certainly, does not want the RECORD to indicate in any way that he has any objection to it; is that correct?

Mr. McCORMACK. I said I had no objection to it and I enthusiastically support it.

The SPEAKER. The time of the gentleman has expired.

The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 1605) granting the consent of Congress to the States of Kansas and Nebraska to negotiate and enter into a compact relating to the apportionment of the waters of the Big Blue River and its tributaries as they affect such States, which bill is similar to the House bill just passed.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the States of Kansas and Nebraska to negotiate and enter into a compact relating to the interests of such States in the waters of the Big Blue River and all its tributaries, and providing for an equitable apportionment between said States of the waters of the Big Blue River and its tributaries and for matters incident thereto: *Provided,* That one qualified person appointed by the President of the United States shall participate in such negotiations as Chairman, representing the United States, and who shall make a report to the President and to the Congress on the proceedings and on the compact. No compact, the negotiation of which is authorized by this Act, shall be binding upon the parties thereto until it has been ratified by the legislatures of each of the respective States, and approved by the Congress of the United States.

SEC. 2. There is hereby authorized to be appropriated a sufficient sum to pay the salary and expenses of the representative of the United States appointed hereunder: *Provided,* That such representative, if otherwise employed by the United States, shall not receive additional salary for services performed in connection with the compact negotiations authorized herein.

Mr. ASPINALL. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASPINALL: Strike out all after the enacting clause of S. 1605 and insert in lieu thereof the language of the House bill, H.R. 10513, as passed.

The SPEAKER. The question is on the amendment.

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill, H.R. 10513, was laid on the table.

HELIUM ACT OF 1960

Mr. ASPINALL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 10548) to amend the Helium Act of September 1, 1937, as amended, for the defense, security, and the general welfare of the United States, as amended.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "Authorizing the conservation, production, exploitation, and sale of helium gas, a mineral resource pertaining to the national defense, and to the development of commercial aeronautics, authorizing the acquisition by purchase or otherwise, by the United States of properties for the production of helium gas, and for other purposes", approved September 1, 1937, as amended, is amended to read as follows:

"SECTION 1. That for the purpose of conserving, producing, buying, and selling helium, the Secretary of the Interior is authorized—

"(a) to acquire by purchase, lease, gift, exchange, or eminent domain, lands or interests therein or options thereon, including but not limited to sites, rights-of-way, and oil or gas leases containing obligations to pay rental in advance or damages arising out of the use and operation of such properties; but such lands or interests in lands may be acquired by eminent domain only when the Secretary of the Interior determines that such acquisition by eminent domain is necessary in the national interest;

"(b) to make just and reasonable contracts and agreements for the acquisition, processing, transportation, or conservation of helium, helium-bearing natural gas or helium-gas mixtures upon such terms and conditions, and for such periods, not exceeding twenty-five years, as may be necessary to accomplish the purposes of the Act: *Provided,* That the Secretary shall not make such contracts and agreements which shall require payments by the Government in any one fiscal year aggregating more than the amount which shall be established initially in an appropriation Act and which may be increased from time to time in appropriation Acts: *Provided further,* That if the Secretary of the Interior is unable to make agreements consistent with the directions in this Act and he determines in the national interests that certain helium is necessary for conservation, or that certain helium-bearing natural gas or certain helium-gas mixture is necessary for the production or conservation of helium, he is authorized to acquire by eminent domain such helium and so much of such helium-gas mixture or of such helium-bearing natural gas as is necessarily consumed in the extraction of such helium after removal from its place of deposit in nature and wherever found, or the temporary use of such helium-gas bearing natural gas or helium-gas mixture for the purpose of extracting helium, together with the appropriate interest in pipelines, equipment, installations, facilities, personal or real property, including reserves, easements or other rights necessary or incident to the acquisition of such helium, gas or mixture: *Provided further,* That the terms 'helium-bearing natural gas' and 'helium-gas mixture', respectively, shall mean natural gas and gas mixtures containing three-tenths of 1 per centum or more of helium by volume: *Provided further,* That in the temporary use of any helium-bearing natural gas or helium-gas mixture for the purpose of extracting helium the Secretary shall cause no unnecessary delay in the delivery of natural gas to the owner, purchaser, or purchasers thereof, except that required by the extractive processes: *Provided further,* That the condemnation of such helium, helium-gas mixture, or helium-bearing gas shall be effected in the same manner and following the procedures established in section 6(a) of this Act, the just compensation for such condemnation to be measured by terms and prices determined to be commensurate with the fair market price.

"(c) to construct or acquire by purchase, lease, exchange, gift, or eminent domain, plants, wells, pipelines, compressor stations, camp buildings, and other facilities, for the production, storage, purification, transportation, purchase, and sale of helium, helium-bearing natural gas, and helium-gas mixtures; and to acquire patents or rights therein and reports of experimentation and research used in connection with the properties acquired or useful in the Government's helium operations;

"(d) to dispose, by lease or sale, of property, including wells, lands, or interests therein, not valuable for helium production, oil, gas, and byproducts of helium operations not needed for Government use, except that property determined by the Secretary of the Interior to be excess within the meaning of section 3(e) of the Federal Property and Administrative Services Act of June 30, 1949 (60 Stat. 378; 40 U.S.C. 472(e)), as amended shall be disposed of in accordance with the provisions of that Act; and to issue leases to the surface of lands or structures thereon for grazing or other purposes when the same can be done without interfering with the production of helium;

"Any known helium-gas-bearing land on the public domain not covered at the time by leases or permits under the Mineral Lands Leasing Act of February 25, 1920, entitled 'An Act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain', as amended, may be reserved for the purposes of this Act, and the United States reserves the ownership of helium in its place of deposit in nature, and the right to extract or have extracted such helium, under such rules and regulations as may be prescribed by the Secretary of the Interior from all gas produced from lands so permitted, leased, or otherwise granted for development: *Provided,* That in the extraction of helium from gas produced from such lands, it shall be extracted so as to cause no unnecessary delay, except that required by the extraction process, in the delivery of gas produced from the well to the purchaser or purchasers thereof at the point of delivery specified in contracts for the purchase of such gas: *And provided further,* That, if the United States shall fail to exercise such right of ownership and extraction, the Secretary of the Interior is authorized to acquire such helium in accordance with section 1(b) of this Act.

"(e) to accept equipment, money, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private.

"SEC. 2. The Secretary of the Interior is authorized to maintain and operate helium production and purification plants together with facilities and accessories thereto; to acquire, store, transport, sell, and conserve helium, helium-bearing natural gas, and helium-gas mixtures, to conduct exploration for and production of helium on and from the lands acquired, leased, or reserved; and to conduct or contract with public or private parties for experimentation and research to discover helium supplies and to improve processes and methods of helium production, purification, transportation, liquefaction, storage, and utilization.

"SEC. 3. (a) Whenever the President determines that the defense, security, and general welfare of the United States requires such action, the Secretary shall issue such regulations as he deems necessary for the licensing of sales and transportation of helium after extraction from helium-bearing natural gas or helium-gas mixture in interstate commerce. Thereafter it shall be unlawful for any person to sell or transfer helium after extraction from helium-bearing natural gas or helium-gas mixture in interstate commerce except in accordance with such regulations or pursuant to the terms of a license issued by the Secretary of the Interior, or in accordance with the terms of a contract or agreement entered into pursuant to section 1(b) of this Act.

"(b) Each license shall be issued for a specified period to be determined by the Secretary, but not exceeding five years, and may be renewed by the Secretary upon the expiration of such period: *Provided, however,* That no license shall be issued to a person if in the opinion of the Secretary the issuance of a license to such person would be inimical to the defense and security of the United States: *Provided further,* That no license shall be assigned or otherwise transferred directly or indirectly except with the consent or approval of the Secretary in writing: *And provided further,* That any license may be revoked for any material false statement in the application for license, or for violation or a failure to comply with the terms and provisions of this Act, the regulations issued by the Secretary of the Interior pursuant thereto, or the terms of the license.

"(c) In issuing licenses, the Secretary shall impose such regulations and terms of licenses as will permit him effectively to promote the common defense and security as well as the general welfare of the United States.

"(d) Whenever Congress or the President declares that a war or national emergency exists, the Secretary is authorized to suspend any license granted under this Act if in his judgment such suspension is necessary to the defense and security of the United States, and he is further authorized to take such steps as may be necessary to recapture or reacquire supplies of helium.

"SEC. 4. (a) The Department of Defense, Atomic Energy Commission, and other agencies of the Federal Government, to the extent that supplies are readily available, shall purchase all major requirements for helium from the Department of the Interior.

"(b) The Department of the Interior is authorized to sell helium for Federal, medical, scientific, and commercial uses in quantities and under terms and conditions approved by the Secretary of the Interior.

"(c) Sales of helium by the Department of the Interior shall be at prices established by the Secretary of the Interior which shall be adequate to cover costs incurred in carrying out the provisions of this Act and to repay to the United States by deposit in the Treasury, together with interest as provided in subsection (d) of this section, the following:

"(1) Within twenty-five years from the date of enactment of this amendment, the net capital and retained earnings of the helium production fund, determined by the Secretary as of the date of enactment of the said amendment, plus any moneys expended thereafter by the Department of the Interior from funds provided in the Supplemental Appropriation Act, 1959, for construction of a helium plant at Keyes, Oklahoma;

"(2) Within twenty-five years from the date of borrowing, all funds borrowed, as provided in section 10 of this Act, to acquire and construct helium plants and facilities;

"(3) Within twenty-five years from the date of enactment of this amendment, unless the Secretary of the Interior determines that said period should be extended for not more than ten years, all funds borrowed, as provided in section 10 of this Act, for all purposes other than those specified in subparagraph (2) above.

"(d) Compound interest on the amounts specified in subparagraphs (1), (2), and (3) of subsection (c) which have not been paid to the Treasury shall be calculated annually at rates determined by the Secretary of the Treasury taking into consideration the current average market yields of outstanding marketable obligations of the United States having maturities comparable to the investments authorized by the Act: *Provided*, That the interest rate on the amounts specified under subparagraph (1) of subsection (c) shall be determined as of the date of enactment of this amendment, and the interest rate on the obligations as specified under subparagraphs (2) and (3) of subsection (c) as of the time of each borrowing.

"(e) Helium shall be sold for medical purposes at prices which will permit its general use therefor; and all sales of helium to non-Federal purchasers shall be upon condition that the Federal Government shall have a right to repurchase helium so sold that has not been lost or dissipated, when needed for Government use, under terms and at prices established by the regulations.

"(f) All moneys received under this Act, including moneys from sale of helium or other products resulting from helium operations and from the sale of excess property shall be credited to a helium production fund, which shall be available without fiscal year limitation, and the Secretary of the Interior may draw on said fund to carry out this Act. Amounts accumulating in said fund in excess of amounts the Secretary of the Interior deems necessary to carry out this Act and contracts negotiated hereunder shall be paid to the Treasury and credited against the amounts specified in subsection (c) of this section.

"SEC. 5. The Secretary of Defense and the Chairman of the Atomic Energy Commission may each designate representatives to cooperate with the Department of the Interior in carrying out the purposes of this Act, and shall have complete right of access to plants, data, and accounts.

"SEC. 6. (a) Proceedings for the condemnation of any property under section 1 of this Act shall be instituted and maintained pursuant to the provisions of the Act of August 1, 1888 (25 Stat. 357; 40 U.S.C. 257), as amended, and sections 1358 and 1403 of title 28 of the United States Code, or any other Federal statute applicable to the acquisition of real property by eminent domain. The Acts of February 26, 1931 (46 Stat. 1421; 40 U.S.C. 258a–258e), and October 21, 1942 (56 Stat. 797; 40 U.S.C. 258f), shall be applicable to any such proceedings. Wherever the words 'real property', 'realty', 'land', 'easement', 'right-of-way', or words of similar meaning, are used in the aforesaid code provisions, statutes, or Acts relating to procedure, jurisdiction, and venue, they shall be deemed, for the purposes of this Act, to include any personal property authorized to be acquired hereunder.

"(b) In the event disposal is contemplated under section 1(d) of this Act of any property acquired by the Government pursuant to this Act, the former owner of the rights therein shall have the preferential right to reacquire such property on terms as favorable as those terms whereby disposition may be made under section 1(d) hereof.

"SEC. 7. The Secretary of the Interior is hereby authorized to establish and promulgate such rules and regulations, as are consistent with the directions of this Act and are necessary to carry out the functions hereof.

"SEC. 8. (a) The provisions of the Administrative Procedure Act of June 11, 1946 (60 tSat. 637; 5 U.S.C. 1001–1011), as amended, shall apply to any agency proceeding and any agency action taken under this Act, including the issuance of rules and regulations, and the terms 'agency proceeding' and 'agency action' shall have the meaning specified in the Administrative Procedure Act.

"(b) In any proceeding under this Act for the granting, suspending, revoking, or amending of any license, or application to transfer control thereof, and in any proceeding for the issuance or modification of rules and regulations dealing with the activities of licensees, the Secretary shall grant a hearing upon the request of any person whose interest may be affected by the proceeding, and shall admit any such person as a party to such proceeding. Any final order entered in any such proceedings shall be subject to judicial review in the manner prescribed in the Act of December 29, 1950 (64 Stat. 1129; 5 U.S.C. 1031–1042), as amended, and to the provisions of section 10 of the Administrative Procedure Act.

"SEC. 9. The provisions of the Natural Gas Act of June 21, 1938 (52 Stat. 821; 15 U.S.C. 717–717w), as amended, shall not be applicable to the sale, extraction, processing, transportation, or storage of helium either prior to or subsequent to its separation from the natural gas with which it is commingled, whether or not the provisions of such Act apply to such natural gas, and, in the determination of rates under sections 4 and 5 of the Natural Gas Act, as amended, the income received from such helium shall not be considered and no exploration, production, gathering, extraction, processing, compression, transportation, storage, or other costs which were or would have been incurred in the absence of the extraction of the helium shall be allocated or assigned to the helium.

"SEC. 10. (a) The Secretary of the Interior is authorized to borrow from the Treasury and credit to the fund established under section 4(f) of this Act such amounts as may be authorized in the initial appropriation Act and which may be increased from time to time in appropriation Acts and as are necessary to carry out the provisions of this Act and contractual obligations hereunder.

"(b) For this purpose the Secretary of the Interior may issue to the Secretary of the Treasury notes, debentures, bonds, or other obligations to be redeemable at the option of the Secretary of the Interior before maturity in such manner as may be stipulated in such obligations. The Secretary of the Treasury is authorized and directed to purchase any obligations to be issued by the Secretary of the Interior under authority of this section and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under the Second Liberty Bond Act, as amended, are extended to include any purchases of obligations of the Secretary of the Interior hereunder.

"SEC. 11. The Secretary of the Interior is directed to report annually to the Congress on the matters contained in this Act.

"SEC. 12. Whoever willfully violates, attempts to violate, or conspires to violate, any provision of this Act or any regulation or order issued or any terms of a license granted thereunder shall, upon conviction thereof, be punished by a fine of not more than $5,000 or by imprisonment for not more than two years, or both, except that whoever commits such an offense with intent to injure the United States or with intent to secure an advantage to any foreign nation, shall upon conviction thereof, be punished by a fine of not more than $20,000 or by imprisonment for not more than twenty years, or both.

"SEC. 13. Whenever in the judgment of the Secretary any person has engaged or is about to engage in any act or practice which constitutes or will constitute a violation of any provision of this Act, or any regulation or order issued or any term of a license granted thereunder, any such act or practice may be enjoined by any district court having jurisdiction of such person, and proper proceedings to this end may be instituted under the direction of the Attorney General of the United States.

"SEC. 14. It is the sense of the Congress that it is in the national interest to foster and encourage individual enterprise in the development and distribution of supplies of helium, and at the same time provide, within economic limits, through the administration of this Act, a sustained supply of helium which, together with supplies available or expected to become available otherwise, will be sufficient to provide for essential Government activities.

"SEC. 15. (a) The term 'person' as used in this Act means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, or any State or political subdivision thereof.

"(b) The term 'Secretary' as used in this Act means the Secretary of the Interior.

"SEC. 16. If any provision of this Act, or the application of such provision to any person or circumstance, is held invalid, the remainder of this Act or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

"SEC. 17. This Act may be cited as the 'Helium Act of 1960'."

The SPEAKER. Is a second demanded?

Mr. SAYLOR. Mr. Speaker, I demand a second.

A second was ordered.

Mr. ASPINALL. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, this is a most important piece of legislation reported by the Committee on Interior and Insular Affairs, and, as far as I know, without any objection on the part of the members of the committee. There were some questions raised during the debate which had to do with some private holdings of helium gas areas. Our committee feels we have resolved these questions by inserting within the bill a provision which states the policy of the committee, and we hope and desire it to be the policy of the Congress, which would look with favor upon any development by private enterprise of this important resource.

Mr. Speaker, as my colleagues know, helium, the lightweight nonflammable gas, has peculiar properties that make it vital to national defense and certain industrial needs of this country and the free world. This legislation is designed to assure that essential Government needs will be met over a long period of time.

The primary objective of H.R. 10548 is to furnish authority to the Department of the Interior to carry out an effective long-range program for the production, distribution, and storage of helium. Provision is made for cooperation by the Department of Defense and the Atomic Energy Commission. The measure also clarifies and perfects certain of the existing provisions of the Helium Act of 1937.

Helium is a limited natural resource found in only a few natural gasfields. The helium-bearing gas in the principal deposits in Texas, Oklahoma, and Kansas is being produced and marketed for fuel without regard to the waste of he-

lium. The helium goes along with the combustible portion of the gas and passes through the gas burners into the atmosphere.

The volume of helium wasted daily in fuel gases is about 10 times as great as the present daily helium consumption in the United States. If this loss is allowed to continue unabated and if the demands for helium increase in the future as expected, the helium-bearing gas sources in the United States cannot be expected to be adequate for national needs past 1980–85.

The need for effective helium conservation was studied intensively during 1957–58 by the Department of the Interior in collaboration with the Department of Defense, the Atomic Energy Commission, the Department of Commerce and other agencies which unanimously have recommended a new helium conservation policy. The policy, approved by the President, has given rise to the present legislation.

The program calls for the construction of up to 12 new plants located on helium-bearing gas pipelines to extract the helium from the gas. The helium would be stored underground in the Government-owned Cliffside gasfield near Amarillo, Tex. Under the policy, industry would be invited to participate in the program by financing, building, and operating plants to produce helium for purchase and conservation by the Government. If, however, private industry should not indicate a willingness and capability to perform in a reasonable time, the Government would undertake the program as a Government operation.

The committee does not, in recommending enactment of H.R. 10548, necessarily recommend the specific dimensions of the conservation program presented by the Department, which assumes the continuance of centralized production by the Government of helium supplies both for use by it and by private industry. The authority given to the Secretary of the Interior by H.R. 10548 is therefore not limited to the implementation of this specific program developed in the executive branch. It is necessarily broad and general and may be applied in any part of the country.

I know of no method other than this legislation to assure a continuous supply of helium for the national defense and other essential Government activities. At the same time there should be encouragement to the growth of a privately operated helium industry and thus keep the costs of the Government program to the minimum.

The program indicates that administration of the act would not in the long run involve a subsidy from the Treasury, although outlays in the form of borrowings from the Treasury would be involved over a period up to 20 years up to about $255 million.

The bill before my colleagues at this time reflects essentially an improved version of the measure that was requested by the Department of the Interior. The committee amendments to the bill are generally minor and perfecting in nature.

A new section 14 containing a policy statement was added. It emphasizes the need to foster individual initiative and avoid Government monopoly in helium production and distribution as the volume of helium produced and consumed increases. It declares that Government operations under the act should, with other sources, be on a scale sufficient to assure a sustained supply of helium for essential Government activities.

Mr. Speaker, this is farsighted legislation. Its goal is conservation of a limited natural resource that is increasingly vital to our national security. I congratulate those in the Government and outside of Government who have aided in developing the legislation and the program, and I urge that the measure and the amendments be adopted.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I yield to the gentleman from Iowa.

Mr. GROSS. I notice on page 9 of the report that the Comptroller General, Mr. Campbell, takes serious exception to some of the provisions and suggests an amendment to provide that the money be supplied by the Appropriations Committee. I am sure the amendment as suggested by the Comptroller General was not included in the bill. Has this bill been corrected otherwise to meet the objections of the Comptroller General?

Mr. ASPINALL. I do not know as to that, but I may say that such objections were considered when we were making up the bill and we felt that the present form of the bill is the best way to take care of it.

Mr. GROSS. It still provides for back-door financing. Is that correct?

Mr. ASPINALL. If my colleague chooses to look at it that way, but it is simply lending the credit of the Federal Government to the construction of the facilities proposed in order to protect this natural resource. Otherwise we are not likely to have any financing of this necessary conservation program. We are losing 4 billion cubic feet of gas every year we postpone such a program.

Mr. GROSS. Does not the gentleman think it is wise in all cases to make it subject to the Appropriations Committee? In this way it provides for an annual review.

Mr. ASPINALL. There will be an annual review of this program.

Mr. GROSS. Not by the Appropriations Committee, apparently.

Mr. ASPINALL. The gentleman and I differ on this particular phase of the legislation.

Mr. RHODES of Arizona. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I yield to my friend from Arizona.

Mr. RHODES of Arizona. I asked the gentleman to yield for the purpose of clarifying the situation in my own mind. As I read this bill, and I might say as the staff of the Appropriations Committee reads the bill, it does provide for the appropriating process to operate very much the same as in other acts. I do note, however, that in section 4(f) a fund is set up out of moneys from the sale of helium or other products resulting from helium operations and from the sale of excess property.

This is set up in a fund. There is nothing in this section which indicates whether or not this fund may be spent without reference to appropriations or not. From the language it appears to me to be that this particular fund may be spent without reference to the appropriation processes. Is that correct?

Mr. ASPINALL. That is the part of the act to which I made reference. It is the provision in the bill under which we give the Secretary of the Interior certain authority to spend certain of these amounts of money which are received by the Department but in so doing a report will be requested.

Mr. RHODES of Arizona. In other words, the Secretary may spend the funds which are received back for the purpose of furthering the provisions of the act?

Mr. ASPINALL. That is right.

Mr. RHODES of Arizona. On pages 13 and 14 of the bill, section 10(a), there is an authorization to borrow from the Treasury. In line 2 of page 14 the words appear "as may be authorized" in the initial appropriation act which may be increased from time to time in the appropriation act.

I gather from that if the Secretary is required to spend funds in excess of the amount of money in the helium fund, he must then come to the Congress and get an appropriation for the expenditure over and above that; but when he does there can be this devious back-door spending policy which goes into effect for the excess.

I want to ask the gentleman from Colorado why it is necessary to have this back-door language which appears in subparagraph (b) of section 10?

Would it not be better to just let the Secretary go through the regular appropriation process for funds to meet any excess of the helium fund?

Mr. ROGERS of Texas. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I yield to the gentleman from Texas.

Mr. ROGERS of Texas. I think the purpose is to provide a means by which proper records can be kept, because the entire amount of money has to be paid back at the end of 25 years. That is the purpose of this. As a matter of fact, in my opinion this is as well protected insofar as the Appropriations Committee is concerned as it can be drawn. I may say to the gentleman from Arizona it was drawn for that purpose and I think the chairman of the full committee will agree with that.

Mr. ASPINALL. That is right.

Mr. RHODES of Arizona. The provision of this bill may be stricken by the other body. We have no way of knowing what the other body will do. I just would like to have the assurance of the gentleman from Colorado that he will stand firm in conference in preserving the appropriation processes we have outlined.

Mr. ASPINALL. May I say to the gentleman that I certainly shall, and I am

sure that the other members of the conference committee will also. The reason we are bringing this very hurriedly to the floor of the House is so that we may get to conference soon.

Mr. SAYLOR. Mr. Speaker, I yield myself such time as I might require.

Mr. Speaker, This bill does not come to you with the glamour of a new space agency, it does not come to you with the cloak and dagger staging of the Department of Defense.

But, unless this bill is passed, neither one of those agencies will continue to operate, because they cannot continue to operate without helium. Helium is becoming more and more important to the Department of Defense in its missile program, to the exploration of outer space, and to the maintenance of the free world. Only in our country the United States, in all the countries of the free world, has any supply of helium been discovered.

The purpose of this bill is to see to it that this great natural asset, which is irreplaceable and is now being wasted into the atmosphere, will be preserved and conserved for the use not only of the agencies of Government but for all of the people of the United States. The plants which are authorized in this bill will be built by the Government if private industry does not come along and offer to build them. There are provisions in the bill that if any of the plants are desired to be built by any private industry or private capital, the Secretary is authorized to enter into a contract and allow that construction, and to purchase and store the helium.

I would like to call the attention of my colleague, the gentleman from Iowa [Mr. GROSS] who has raised a question of back-door spending, that the provisions in this bill are specifically designed to prevent any back-door spending. The Helium Act of 1937 is a great deal looser in its financial arrangements than this bill. The Comptroller General of the United States called that to the attention of the committee in making his report and requested that certain changes be placed in this bill which have been made by the committee. This bill will permit the Secretary of the Interior to use money from the sale of helium, which will be sold not only to Government agencies but also to private industry, and hold him to a general accounting so that at the end of the 25-year period specified in this bill all the money used for the construction of the plants will be repaid to the United States with interest. There is every evidence that a profit to the Government will result from this project. I think that in this respect this is an unusual procedure, and some of the protections, I think, have been built into this bill, which will prevent the Government disposing of an asset at a future time at a tremendous loss.

Mr. RHODES of Arizona. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. I yield to my friend the gentleman from Arizona.

Mr. RHODES of Arizona. The gentleman from Pennsylvania is one of the most astute Members of the House of Representatives. He is particularly astute in determining the feasibility of projects. I have known the gentleman for many years and know his ability in figuring feasibility of reclamation projects. Now I ask the gentleman as to the feasibility of this particular expenditure. The gentleman has stated unequivocally and clearly that this money will be repaid to the Treasury. Now, is the gentleman satisfied from the testimony before the great Committee on Interior and Insular Affairs that this, in fact, can be done?

Mr. SAYLOR. Very frankly, I am happy to tell my colleague from Arizona that that was one of the particular points which we were very interested in having Mr. Bennett, the Under Secretary of Interior, testify concerning. He not only presented to our committee facts which lead me to believe that this bill is feasible from a financial standpoint; this may even be one of the few fields in which the Federal Government will make some money.

Mr. GRAY. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. I yield to the gentleman from Illinois.

Mr. GRAY. I want to first congratulate the gentleman for his forthright statement and read a portion of the testimony of Under Secretary Bennett and then ask the gentleman a question, if I may.

The Under Secretary had this to say before the committee:

> Many companies have already displayed genuine interest in the program, and I most certainly can assure you that the Department will be ready to sit down with them and work out fair and equitable contractual terms as soon as it has the legislative authority this bill will provide.

Is it the understanding of the gentleman that wherever private interests can supply helium the Government will use those facilities and those plants instead of building these 12 plants? Is that the understanding of the gentleman?

Mr. SAYLOR. The understanding of the committee is that we will ask any one of these private industries to build any of these plants. If there is any other place discovered where helium can be produced it will be necessary to come back and ask for authority to construct another plant.

Section 14 was added to the bill so that the Secretary would have the authority which Under Secretary Bennett testified to and which the gentleman has just referred to.

Mr. GRAY. The gentleman just answered the question I was going to ask, if that applied to section 14.

Mr. SAYLOR. I thank the gentleman from Illinois for giving me the opportunity to explain this section of the bill.

Mr. GRAY. I thank the gentleman.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. Mr. Speaker, I want to commend the gentleman from Pennsylvania for his very clear and convincing explanation of the purposes of this bill and for the emphasis which he placed upon the fact that this is a program in which there is very good reason to expect that the Government will come out ahead in terms of the finances involved.

Mr. SAYLOR. That is correct; and I thank the gentleman.

CALL OF THE HOUSE

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore (Mr. ALBERT). Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 61]

Adair	Forand	Monagan
Addonizio	Ford	Montoya
Alexander	Fountain	Moorhead
Anderson, Mont.	Frazier	Morris, N. Mex.
	Frelinghuysen	Multer
Andrews	Gallagher	Nelsen
Anfuso	Garmatz	Nix
Ashley	Gary	O'Brien, N.Y.
Ayres	Gavin	Osmers
Barden	Gilbert	Passman
Barr	Glenn	Pelly
Barrett	Goodell	Philbin
Bass, N.H.	Granahan	Powell
Belcher	Grant	Preston
Bentley	Haley	Prokop
Bolton	Halleck	Quie
Bonner	Halpern	Quigley
Bow	Hargis	Rains
Bowles	Harmon	Reece, Tenn.
Boykin	Harrison	Riehlman
Brademas	Hays	Riley
Bray	Healey	Rivers, Alaska
Brewster	Henderson	Rivers, S.C.
Brock	Herlong	Roberts
Brown, Mo.	Hoffman, Ill.	Rodino
Buckley	Holland	Rooney
Burleson	Holt	Roosevelt
Byrnes, Wis.	Hosmer	Rostenkowski
Cahill	Inouye	Roush
Canfield	Jackson	Santangelo
Cederberg	Jarman	Schenck
Celler	Jones, Ala.	Scherer
Chelf	Karth	Schwengel
Clark	Kasem	Selden
Coffin	Keith	Shelley
Cohelan	Kelly	Sheppard
Collier	Kilburn	Shipley
Cramer	King, Utah	Spence
Davis, Tenn.	Kluczynski	Staggers
Dawson	Lafore	Taylor
Delaney	Laird	Teague, Calif.
Dent	Lankford	Teague, Tex.
Denton	Lesinski	Teller
Devine	McCulloch	Thomson, Wyo.
Diggs	McDowell	Tollefson
Dooley	Macdonald	Udall
Dorn, N.Y.	Madden	Vanik
Dowdy	Mailliard	Walter
Dulski	Mason	Weaver
Durham	Metcalf	Weis
Dwyer	Michel	Westland
Elliott	Miller, Clem	Wilson
Farbstein	Miller, George P.	Young
Fino		Zelenko
Flynn	Miller, N.Y.	
Fogarty	Mitchell	

The SPEAKER pro tempore (Mr. ALBERT). On this rollcall 266 Members have answered to their names, quorum.

By unanimous consent, further proceedings under the call were dispensed with.

HELIUM ACT OF 1960

Mr. ASPINALL. Mr. Speaker, I yield 7 minutes to the gentleman from Texas [Mr. ROGERS].

Mr. ROGERS of Texas. Mr. Speaker, let me make this observation with relation to this bill in order to allay the fears of anyone who thinks there may be some danger built in. In the first place, I think we ought to consider that there is a very important element of natural resource being wasted daily. How important it is cannot yet be determined, because research and development are opening up new avenues each day for the use of helium gas. Certainly in the nuclear program, in the outer space program, and in the missile program it will be very important. It would be a very bad thing, I believe, for this country to permit this gas to continue to be wasted, because as our very able chairman, the gentleman from Colorado [Mr. ASPINALL], pointed out, the gas streams of this Nation carry a content of helium. Helium is not inflammable. It simply is wasted in the air and replaces the B.t.u.'s contained in gas. If it is extracted at its source it can be stored in a place now provided for it, and I think will prove to be one of the most important natural elements in our future. Whether or not the Iron Curtain countries have any I do not know, but the indications are that from now on we have an adequate supply of it if we will but conserve it.

Mr. Speaker, some question has been raised with relation to the financing of this program. First, this bill was designed to conserve helium, to provide for the conservation of this important element.

Secondly, it was considered wise that we make it possible for free enterprise to move into this area and to furnish the original capital outlay necessary to build these extraction plants. This has been done, and I am advised that private industry is most anxious to move into and develop the extraction of helium from natural gas.

There was a provision put in the bill that in the event the Secretary of the Interior did not contract with private enterprise, it would be possible for him to go into this program and to build the necessary extraction plants with public funds; but there must be one thing remembered, and that is we place in this bill a proviso that everything that is used has to come through the Appropriations Committee, so that actually there is no back-door financing as we have heard that term used in the past.

What we hope is that the helium fund created by the sale of this very valuable element will be sufficient to support this program, and we think it will be sufficient to support the program where there will not be any appropriation necessary to come out of the public Treasury. As a matter of fact, this bill can open an avenue that will produce revenue to go into the public Treasury rather than create a door through which funds in the public Treasury might escape.

When we weigh this whole measure in all of its component parts, there is not anyone in the world who can be hurt by this. As a matter of fact, everyone can be helped by it, not only the Department of Defense, not only the country as a whole, but, actually, the user of the gas of which helium is a component deposit. I think it is very vital that we pass the bill today, that we get the program on the road, because every day that is wasted, so much helium is wasted. We are going to need it in much larger quantities in the future than many anticipate at this time.

Mr. SAYLOR. Mr. Speaker, will the gentleman yield?

Mr. ROGERS of Texas. I yield to the gentleman from Pennsylvania.

Mr. SAYLOR. I would like to take this opportunity to congratulate the gentleman from Texas [Mr. ROGERS], the author of this bill, for the work which he performed as chairman of the Subcommittee of the House Interior and Insular Affairs in handling this bill and others on the same subject, particularly for his efforts in working out the differences between the original version sent to the House by the Department of the Interior, and the version requested by certain of the independent producers. It was only because of the work that you, Mr. ROGERS, did that we were able to come up with the type of bill we have before us today. The Department of the Interior and the independent producers owe the gentleman a debt of gratitude for his work. Both groups concur in support of this bill.

Mr. ROGERS of Texas. I thank the gentleman, and I compliment him and the gentleman from Colorado, chairman of the full committee, the members of the subcommittee and the other members of the Committee on Insular Affairs who have taken this very complex problem and worked a bill out. I believe we should move very fast with it.

Mr. Speaker, I will conclude by saying that I hope this bill can be passed so that the Secretary of the Interior can begin to move forward as quickly as possible on this problem and in working out the situation with free enterprise so we can move forward in the saving of this important element that is going to waste each day.

Mr. BREEDING. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. BREEDING. Mr. Speaker, the area I represent has 12 counties in the Hugoton gasfield which have a considerable portion of the reserves of helium of our country. On March 10 this year I introduced H.R. 11030 which is identical to H.R. 10548.

I appreciate very much the opportunity to appear before this committee today in support of enabling legislation for an effective helium conservation program.

Helium is vital to the country's most important defense, nuclear, and space programs. In the past 10 years, the consumption of helium in the United States has increased sixfold. Further increases are expected in the future, as new and expanded uses are found for this unique element.

Helium is a limited natural resource, occurring as a minor constituent in natural gas in only a few gasfields in Texas, Oklahoma, and Kansas. When our natural sources of helium-bearing gas are exhausted, we will have to turn to the atmosphere, which contains only about one part helium in 200,000 parts of air, to meet our helium needs.

And yet, in the face of the ever-increasing need for helium, and with the knowledge that our helium resources are limited, we as a Nation are casually wasting millions of cubic feet of helium to the air daily without it serving any useful purpose whatever. This wastage occurs when combustible natural gas containing helium is transported to fuel markets—where the combustible part of the gas is burned and the helium, which will not burn, is vented uselessly into the atmosphere.

There is a simple answer to this situation. The helium should be extracted from the gas before it is transported to fuel markets. Thus, the extracted helium could be saved until needed in the future, without depriving gas consumers of their fuel supply.

Although the answer is simple, a program to implement it is not. Helium extraction plants are costly. I recently attended the dedication of a new Bureau of Mines plant, which cost about 11 million dollars, at Keyes, Okla. The Keyes plant is producing helium for sale to meet current requirements. The helium extracted from fuel gas as a conservation measure would be intended to meet future requirements. Hence, a considerable period of time would elapse before money invested in such a plant would be recovered.

Moreover, the Federal Government is a dominant factor in the helium program for many reasons. The Bureau of Mines of the Department of the Interior is presently the only helium producer. The Department of Defense, Atomic Energy Commission, National Aeronautics and Space Administration, and other Federal agencies presently consume directly about 80 percent of the helium produced by the Bureau of Mines. Some of our most vital defense programs are involved.

The conservation program proposed by the Secretary of the Interior takes all of these and many other factors into account. It has been developed carefully over about a 2-year period, with the assistance and cooperation of many informed persons in Government, science, and industry. It calls for private industry to participate through financing, building, and operating helium plants, but it does not overlook the Government's dominant interest and responsibility for assuring the success of the program.

I do not believe there is time to consider whether or not there might be alternate approaches to the helium conservation problem. No doubt, further studies would lead to refinements and possibly improvements in details of implementation.

If this piece of legislation will not get the job done—and I think it will—then Congress should provide additional legislation needed to get the program under way.

In considering the bill before you, I earnestly recommend that you recognize the need for prompt action. About 10 million cubic feet of valuable helium is being wasted daily—about 4 billion cubic feet a year. Much of this wastage—perhaps half of it—is occurring from the Hugoton and Greenwood gasfields in western Kansas. As the congressional representative from the Fifth District of Kansas, I feel a deep personal responsibility for doing everything I can to expedite the prompt implementation of an effective helium conservation program. It is completely distressing to realize that our helium resources are being wasted uselessly into the atmosphere; it is imperative that we take advantage of the opportunity we now have to save this helium to meet the defense and technologic needs of future generations.

I urge you to support this bill so that we can get on with the task of conserving our valuable helium resources.

Mr. MORRIS of Oklahoma. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. MORRIS of Oklahoma. Mr. Speaker, I most assuredly believe that immediate action should be taken to conserve our apparently very limited supply of helium that is so vital to our national defense, as well as the ever-developing industrial uses, and general welfare. It is my understanding that the Federal Government uses more than 90 percent of the helium produced by the Bureau of Mines.

I had the pleasure of visiting one of the Bureau's five helium plants which is located near Keyes, Okla., within my congressional district, just this past fall. This field at the present time, so I am informed, is recognized as one of the best, if not the best, commercial helium-bearing natural gas sources discovered since 1943. I was delighted with the entire operation there and I am indebted to Mr. Carl H. Schlegel, the superintendent, and his assistant, Mr. Owens, who gave me such valuable information and a better understanding of the entire picture. I was astounded to learn that we waste about as much, if not more, helium a year than we use—and all for the lack of proper reconversion—and that unless remedial action is taken without delay we can expect to exhaust our entire helium supply within the next 25 years.

The Panhandle of Texas, so ably represented by the distinguished gentleman from Texas, Hon. WALTER ROGERS, and the Panhandle of Oklahoma, a part of my own congressional district, as well as a precious few other localities, including the district so well represented by my distinguished colleague, Hon. FLOYD BREEDING, of Kansas, and very probably others, are rich in this gas as they are in fine Americans who have responded in every way to the reconversion program at the Keyes plant, and elsewhere. Additional efforts to extract this gas that is so vital to our future would be equally welcomed.

From the study I have made of the pending bills before the Interior and Insular Affairs Committee on this subject matter, it is my judgment that H.R. 10548, the bill introduced by said Congressman ROGERS of Texas and the one we are now considering would best serve to give the Secretary of the Interior the needed legislative authority to enable the Department to implement and carry out an effective long-range helium conservation program. I am wholeheartedly in favor of this legislative proposal and I do sincerely hope the House will pass this bill, H.R. 10548.

Mr. SAYLOR. Mr. Speaker, I yield 5 minutes to the gentleman from Arizona [Mr. RHODES].

Mr. RHODES of Arizona. Mr. Speaker, I wish to congratulate my good friends and associates on the Committee on Interior and Insular Affairs for the fine work they have done in connection with a very important and difficult piece of legislation. I particularly wish to congratulate them on the inclusion of section 14 in the act. I submitted a statement to the committee during the hearings on this bill lamenting the fact that apparently private industry would have very little opportunity, if any, to operate in the field of helium production or sales. Section 14 states in part:

> It is the sense of the Congress that it is in the national interest to foster and encourage individual enterprise in the development and distribution of supplies of helium.

I particularly congratulate the committee on putting this particular item in the bill because, Mr. Speaker, it is true that there are private enterprises ready, willing, and able to help in the production and sale of helium.

In Arizona we have an area known as Pinta Dome in which there is located rather large deposits of helium. We have people who are interested in producing helium from that area. The Government has thus far shown no inclination to produce the helium which is in that area in such large quantities. I, for one, feel it would be unfortunate if any large deposit like this should remain undeveloped merely because the Federal Government does not desire to develop it at the present time.

Certainly I recognize the desirability of maintaining a reserve of helium which can be called upon. However, that reserve can be maintained and production can also be encouraged, and I think that the bill which we have before us now will endeavor to do that. I hope it will be successful in that particular result.

If I may have the attention of the gentleman from Texas for one or two questions, it is noted that in the bill there will be a price fixed by the Federal Government for the sale of helium. I presume if private industry desires to sell helium, first it must offer this production to the Federal Government at the price which is indicated or which is derived by the formula set forth in the bill; is that correct?

Mr. ROGERS of Texas. Let me say this to the gentleman from Arizona. There was much discussion about the price. The price to be fixed is going to be an arm's length price fixed at the negotiating table as between the Secretary of the Interior and the owners of the stream of gas. The reason for that is simply this, that each individual transaction may have a separate or a group of separate elements in it so far as the extraction of helium from the gas is concerned, because other components in the gas stream determine the difficulty or lack of difficulty of removing helium from it, and, of course, that determines the cost of your extraction process.

Mr. RHODES of Arizona. Is it the thought of the committee that a person who desires to produce helium might first make a contract with the department similar to the contracts made for the production of uranium and other materials under the Leasing Act?

Mr. ROGERS of Texas. Well, actually they have to make this contract with the Department of the Interior. This helium is actually being produced and it is being wasted because it is in the gas stream that is going in the line. Then, when it goes into the burner, the helium simply goes off because it is not inflammable.

Mr. RHODES of Arizona. I am talking about relatively pure deposits of helium, not the helium which is conserved as a byproduct of natural gas. To be specific, I am talking about the Pinta Dome area in Arizona. If a company desired to exploit that deposit, would it be necessary under the act to first make a contract with the Department of the Interior to allow it to produce?

Mr. ROGERS of Texas. No; so far as I know there is no law to prevent a man from entering into any business he wants to in regard to helium. The fact of the matter is this, that the cost of it is so great, and unless they do have some assurance of a customer, the cost will be prohibitive, and the U.S. Government as such has been the big customer because of its missile and nuclear production. It is therefore necessary that every bit of the helium be saved. But, this bill does this, I will say to the gentleman from Arizona, it provides the avenue where there will be an open door for anyone owning that helium to enter into a contract with the Department of the Interior.

There would be a most serious responsibility on the shoulders of the Secretary of the Interior to see that every bit of the helium is produced and saved.

Mr. RHODES of Arizona. Suppose the deposit occurred on the public domain; would an individual be allowed to file a claim under the mining laws, or would it be necessary for him to proceed under the Leasing Act?

Mr. ROGERS of Texas. I cannot conceive actually of a case where a man

would do that because of the fact that helium is usually mixed with other gaseous substances. But the Government actually retains the ownership of the helium itself in all of the leases that are executed, as I understand it. It would simply be a matter of their going into the situation and working out a deal to buy the helium from the Government. But the fact of the matter is that under this bill gas being produced on the public domain would be owned by the Government. If that gas went through a privately or a public owned extraction plant then it would be the property of the Federal Government and whoever wanted to buy the helium would buy pure helium. It would not be practical for them to do it otherwise.

Mr. RHODES of Arizona. As I understood the statement of the distinguished gentleman from Texas, the Government would welcome private participation in the construction of these extraction plants to take helium out of the natural gas?

Mr. ROGERS of Texas. Yes, because the capital outlay for the erection of these extraction plants is very large. The original capital outlay is something that, if private enterprise can move into this picture, it will simply make it possible for it to be done without calling upon the Treasury for tax dollars with which to do it. And it is such an important element in our present need that we cannot afford to continue to waste it. So it seems to me that the best possible thing to do would be to permit private enterprise to have the opportunity to do it and if they fail then the Government under this bill has the right to move in and build the plants itself.

Mr. RHODES of Arizona. Does the gentleman have any ideas how much Federal money might likely be put into this program before it begins to repay?

Mr. ROGERS of Texas. That would be very difficult for me to say because I think it is going to depend upon how fast the Department of the Interior moves. It would be a relatively moderate amount if private enterprise moved in and built these extraction plants, which I am almost certain they are going to do. They have all indicated to me that once they can get moving they will be happy to get into this field. I think the original capital outlay would be something of the order of upward of $100 million if the Government built the plants—it might be that, but I think it would be far less than that.

Mr. JENSEN. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Iowa.

Mr. JENSEN. I note there is no provision in this bill which prohibits the export of helium to foreign nations specifically.

Mr. ROGERS of Texas. If the gentleman from Iowa will permit me, the fact of the matter is that the Federal Government can control that because it owns all of the helium.

Mr. JENSEN. Yes, I know, but even our Federal Government could become overanxious, and make a costly mistake, you know.

Mr. ROGERS of Texas. There is a provision in this bill which provides for the licensing of the producers of helium in these extraction plants in the case of an emergency declared by the President, that would be under the continuous surveillance of the President and of the Federal Government, so far as what happens to the helium is concerned. Let me say this to the gentleman from Iowa that I think we have closed any doors to the export of this helium.

Mr. JENSEN. The gentleman knows that helium is a very important military commodity?

Mr. ROGERS of Texas. One of the most important.

Mr. JENSEN. I remember when in the early days of World War II, the White House asked Mr. Ickes for his permission to export helium to foreign countries. Mr. Ickes said, "You will never export a cubic inch of helium so long as I am Secretary of the Interior." Helium-powered lighter than air aircraft played a leading role in searching out enemy submarines and destroying them in World War II, to a greater degree than other aircraft was able to do. Other nations manufacture but little helium. Let us be certain that not 1 cubic inch of our helium falls in the hands of the Communists.

Let us not forget the age-old admonition that the seeming friend of today may be the enemy of tomorrow, and by no act of yours place it in his power to do you injury should he become your foe.

I hope the committee will see to it that helium is not exported to the detriment of our country.

Mr. ROGERS of Texas. Let me make this further observation. We were advised by the Department that the only method of exporting helium was under license issued by the Secretary of State. At the present time it is under the absolute control of the Federal Government. As I understand, the only helium that is exported is very closely watched and exported only to countries friendly to us, to be used in connection with programs with which we are associated. That is the administration that is handling that part of the program.

Mr. GRAY. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Illinois.

Mr. GRAY. I want to associate myself with the remarks made by the distinguished gentleman from Arizona [Mr. RHODES]. He knows very well I opposed this bill in committee because I felt that private interests would be foreclosed from extracting and selling helium. However, since section 14 has been added, I can agree that the bill is much more tolerable than before. I am sure he and I will watch very closely to see what is done by the Interior Secretary in connection with private interests in order that the taxpayers will not have to foot the bill for exploring for and extracting helium, but instead allow private interests to do the job in supplying this important gas from known and future deposits of helium, as well as the extraction from natural gas pipelines. I thank the gentleman.

The SPEAKER pro tempore. All time has expired.

The question is, Will the House suspend the rules and pass the bill H.R. 10548 as amended?

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

INCREASING FEDERAL PAYMENT TO STATE SOLDIERS' HOMES

Mr. DORN of South Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 10596) to change the method of payment of Federal aid to State or territorial homes for the support of disabled soldiers, sailors, airmen, and marines of the United States, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 641 of title 38, United States Code, is amended by striking out in the first paragraph (a) thereof "at the annual rate of $700.00 for each veteran" and inserting in lieu thereof "at the per diem rate of $2.50 per diem for each veteran".

The SPEAKER pro tempore (Mr. ALBERT). Is a second demanded?

Mrs. ROGERS of Massachusetts. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. DORN of South Carolina. Mr. Speaker, I yield myself 2 minutes.

This bill seeks to change the method of payment of Federal aid to State homes from the existing system of $700 a year to a per diem basis of $2.50. This would amount to a maximum annual payment of $912.50.

The history of such contributions is long, first having been authorized under the act of August 27, 1888, when an annual contribution of $100 was set. There have been periodic increases until Public Law 612 of the 83d Congress was passed which set the payment at $700 as the permanent rate of Federal aid.

There are 33 State homes located in 28 States for which the Veterans' Administration is currently making contributions. I offer for inclusion at the end of my remarks a summary of payments for the individual States.

Hearings were held on this legislation by the Subcommittee on Administration, chairman of which is the distinguished gentleman from Florida [Mr. HALEY], and that subcommittee unanimously reported the bill favorably to the full committee. The full committee reported the bill to the House on last Thursday, April 21.

The Veterans' Administration favors the enactment of this legislation and estimates that the cost would be approximately $1,250,000 for the first year.

Summary, payment of Federal aid, State veterans homes, fiscal year 1959

State	September (1)	December (2)	March (3)	June (4)	Total (5)	Average present (6)	Cost per capita (7)	Total cost (8)	Amount deducted by State from pensions (9)

Mr. DORN of South Carolina. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include some tables.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN of South Carolina. Mr. Speaker, I yield such time as he may require to the gentleman from Connecticut [Mr. DADDARIO].

Mr. DADDARIO. Mr. Speaker, I want to join in supporting the passage of this bill and commend the Veterans' Affairs Committee for an earnest and thorough job in going into the details of this bill. I am glad also to note the approval of the administration.

Connecticut has a veterans' home and hospital, at Rocky Hill, in my district. Last year, the population of that home ranged between 933 in September to 1,149 in February. Since 1888, Congress has recognized that the Federal Government should contribute to the support of disabled veterans who are assisted by the States. It is time to be practical and recognize that the present rates of such support are outmoded.

The last increase in the Federal grant, for instance, was made in 1954. Since that time, operating costs have increased on an average of 35.4 percent for all State veterans' homes throughout the country, according to information furnished me by Gov. Abraham A. Ribicoff of Connecticut, who has written me urging passage of the bill.

The Veterans' Affairs Committee, in recommending favorable action on the bill submitted by Congressman FLYNN, has chosen what appears to me to be the most reasonable and practical solution to the need. The States are fighting what we all face—the continuing rise in the cost of living. I urge that we approve this bill to help them meet the costs of a clear obligation to our veterans.

Mr. DORN of South Carolina. Mr. Speaker, I yield such time as he may require to the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Speaker, I did not intend to make any remarks on this bill because it is a fair bill and a proper bill. But, I do want to congratulate the members of the Committee on Veterans' Affairs and the acting chairman for their able leadership in reporting this bill to the House.

Mr. DORN of South Carolina. I thank the distinguished gentleman from Massachusetts.

Mr. Speaker, I yield such time as he may desire to the distinguished gentleman from Massachusetts [Mr. LANE].

Mr. LANE. Mr. Speaker, I also wish to join the distinguished majority leader in extending my congratulations to the members of the Committee on Veterans' Affairs for their prompt attention and consideraiton of this very, very important bill that affects our State homes for veterans.

Mr. Speaker, the 33 State homes maintained by 28 States to care for our veterans relieve the Veterans' Administration of considerable responsibility and expense. Without the protection and the service provided by these homes, a number of our veterans, and particularly those who are living alone, would have nowhere to turn to in an emergency.

I will take for example the two State homes operated by the Commonwealth of Massachusetts in the cities of Chelsea and Holyoke. Because Chelsea is located in the district that I represent, I am familiar with its problems and its accomplishments.

Chelsea ranks second only to the State home maintained by California, in the amount paid by the State for its support. As proof of the excellent standards of this home, I cite the fact that it ranks second only to the Holyoke home, among all the 33 homes in the Nation, in the percentage of cost assumed by the State to provide this humanitarian care for aging veterans.

Under the present formula, during the fiscal year 1959, we find the following percentage shares of the cost:

Chelsea, VA, 14.45 percent, Massachusetts, 85.55 percent.

Holyoke, VA, 10.44 percent, Massachusetts, 89.56 percent.

With Massachusetts assuming a disproportionate share of the cost, rather than curtail its standards, it is only right and proper that it should receive more substantial help from the VA.

The present annual ceiling of $700 is unrealistic and unfair. Changing the method of payment to a per diem maximum formula of $2.50 a day would increase the amount payable by the Federal Government from $700 to $912.50 a year.

This will be of substantial help to State homes like those located in Chelsea and Holyoke, Mass. We are grateful for the VA's recognition of this need, and its recommendation of favorable consideration for the present bill.

The estimated additional cost for the first year is approximately $1,250,000. This is a modest sum that will enable the Federal Government to fulfill its obligation to aid in the care of certain war veterans domiciled in State homes. It will encourage the States to expand their domiciliary care and thus help to relieve the pressures on Veterans' Administration hospital and domiciliary facilities.

H.R. 10596 will strengthen the Federal-State partnership which we have found to be the best way of sharing responsibilities and costs.

Mr. DORN of South Carolina. Mr. Speaker, I yield such time as he may desire to the gentleman from Georgia [Mr. DAVIS].

Mr. DAVIS of Georgia. Mr. Speaker, I rise in support of this legislation. I congratulate the chairman of the subcommittee and the full committee for bringing this legislation to the House.

We have one of these veterans' homes in the State of Georgia. I and the entire Georgia delegation worked long and earnestly to establish that home. We have had the cooperation of the State administration during the several years which the State of Georgia has operated this home. This contribution from the Federal Government has been of tremendous benefit to us in furnishing those things which our veterans who occupy those homes so sorely need. This increase is needed because of the increased cost of food, clothing, and so forth, to provide the necessities for those people.

Mr. DORN of South Carolina. Mr. Speaker, I yield such time as he may desire to the gentleman from Vermont [Mr. MEYER].

Mr. MEYER. Mr. Speaker, I would like to compliment the committee for their work on this bill. I would like to say in support of this legislation that the Vermont Soldiers' Home in my home county of Bennington has given me a report that their increased per capita cost represents a total of $1,000. Therefore, I think this is additional information in justification of making this increase today.

Mr. DORN of South Carolina. Mr. Speaker, I yield 5 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER pro tempore (Mr. ALBERT). Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, in the April 30 issue of the Detroit News there is an editorial captioned "BENTLEY's Civil Rights Maneuver, Misusing a Cause," which carries the following language:

> Politicians have no difficulty identifying a demagog when they see one and some thought they saw one Thursday in the person of Representative BENTLEY, a Republican from Owosso and a candidate for his party's nomination for U.S. Senator.
>
> The latest and most widespread form of demagogery surrounds the issue of civil rights, particularly as the issue affects the freedom and equality of opportunity of the Negro. For every individual who has a sincere desire to end segregation, discrimination, and kindred offenses there exists another, frequently engaged in politics, who seeks to turn the civil rights cause to his own advantage.

The charge of the Detroit News that Representative BENTLEY is a demagog is an unjust, false, and vicious charge.

The intimation that the amendment was offered by the Representative in an effort to promote his candidacy for the Republican nomination as Senator is an unfair blow below the belt—one for which the Representative has no adequate redress. Congressman BENTLEY has long been a champion of civil rights. By offering his amendment to the housing bill to which the editorial refers, Congressman BENTLEY merely reiterated his support of civil-rights legislation when he introduced H.R. 6554 on April 23, 1959, more than a year ago.

That bill carried the title "To amend title VI of the Housing Act of 1954 to make it clear that the facilitation of mortgage financing for minority groups is a primary objective of the voluntary home mortgage credit program."

Again, on February 3 of this year, Mr. BENTLEY introduced a bill, H.R. 10163, "To provide that the Federal Government shall not extend any financial or other assistance for housing with respect to which there is or may be discrimination on account of race, creed, or color, and for other purposes."

Could there be a clearer, more direct indication of adherence to a principle? Just why must an editor attribute an unworthy motive to so many legislators? Do publishers always have a pure, unselfish, patriotic motive when they accept advertising or write an editorial?

So the truth and the fact is, as the author of the editorial in the Detroit News either knew or, in the exercise of ordinary diligence, should have known, the offering of the amendment was but another sincere attempt on the part of Mr. BENTLEY to support civil rights legislation in which he had faith. The false charge, and I quote, "that BENTLEY was using the legitimate cause of civil rights to torpedo a housing bill to which his party is opposed" is not lent support by the fact that his amendment was rejected. Nor is it true that "the fact that the Negro Members voted against his amendment" any proof whatsoever that he was not sincere.

Nor is it proof, as stated in the editorial, that they "have a deeper concern for racial discrimination than BENTLEY" or that they "saw his maneuver as a piece of skulduggery."

It is very, very strange indeed that editors and columnists so often falsely assert that the motives of legislators are not sincere, are improper, are demagoguery. Why try to cast doubt upon the integrity of a man who has never shown the slightest trace of insincerity?

Mr. BENTLEY has long been a sincere and effective advocate of civil rights. He voted for the civil rights bill when it was before the House—CONGRESSIONAL RECORD, March 14, 1960, page 6512; he voted for it as amended by the Senate—CONGRESSIONAL RECORD, April 21, 1960, page 8507.

The fact that he opposed the housing bill, H.R. 10213, is no indication whatsoever that he was not sincere, as he stated he was, when he offered the amendment to that bill. As a matter of fact, it is almost universal practice for some Members to attempt to make better the provisions of a bill to which, as written, they are opposed. What about those who advocate civil rights when enacting a right-to-vote bill but deny civil rights when enacting a home-to-live-in bill? Which is more desirable? A home, a right to be treated as an individual, as a citizen, as a human being, or the right to vote? What advantage is the right to vote if denied participation in all other rights?

Our colleague from Michigan [Mr. BENTLEY] has long served as an able, sincere, patriotic Representative. His sincerity, his straightforwardness, his frankness, has never been questioned by any responsible Member of the House.

I yield back the remainder of my time, and I thank the gentleman from South Carolina [Mr. DORN] for yielding to me. He is not only a very able legislator but one who is kind, thoughtful, and considerate to his colleagues at all times, no matter what the issue.

Mr. DORN of South Carolina. It is always a pleasure to yield to the distinguished gentleman from Michigan.

I have no further requests for time, Mr. Speaker.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I shall only take a few minutes of the time, because I know this bill will pass the House unanimously, and the more quickly it goes to the Senate, the sooner it will go to the White House—and I am sure the President will sign it because the Bureau of the Budget and the Veterans' Administration have both endorsed it.

I am very much in favor of this bill which seeks to provide for a per diem payment of $2.50 a day for State soldiers' homes rather than the $700 annual payment in effect under existing law.

Since 1888 the Federal Government has contributed to the States to aid them in maintaining their homes for disabled soldiers, sailors, airmen, and marines of the United States. In the beginning, $100 a year was the maximum Federal Government contribution. The amount of the contribution has been increased from time to time as the cost of operation of State homes has increased, until in 1954 the amount was increased to $700 a year.

The present rate was set in the 83d Congress when I had the honor to be chairman of the Committee on Veterans' Affairs, and I am glad to see this recognition of the increasing costs which have occurred since that time.

There are 33 State homes located in 28 States to which the Federal Government is making annual contributions for maintenance of veterans who have been determined eligible for care in a Veterans' Administration facility.

The troubles of the States have been multiplying through the years because of rising costs. The need for a larger contribution from the Federal Government is urgent. This bill would afford a maximum increase of 30 percent. Even with this increase the Federal contribution will not reach 50 percent of the operating cost in over half of the State homes. The law fixes 50 percent as the maximum payment.

The additional cost of the bill, based on 1959 figures would be approximately $1,250,000. The Veterans' Administration has carefully considered the whole question of the contributions to State homes and, after clearance with the Bureau of the Budget, has recommended that the bill be favorably considered.

We are proud in Massachusetts of the service that John L. Quigley is rendering the State homes organization, and also the fine job he is doing as commandant of the home at Chelsea.

I hope that the bill will be speedily enacted into law.

GENERAL LEAVE TO EXTEND

Mr. DORN of South Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 3 legislative days in which to extend their remarks.

The SPEAKER pro tempore (Mr. ALBERT). Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. EVINS. Mr. Speaker, I am gratified that we are doing something to assist the States in taking care of our veterans in the State homes.

Often we hear the cry that the States ought to take action in this field or that field instead of asking for assistance from the Federal Government. In this bill we have an example where many States have risen to the need of helping their veterans, and in recent years the cost of operating these homes has increased to such an extent that the States have been forced to take on a disproportionate share of the burden. By taking this action today, we are recognizing the contributions which the States are making to the care of our veterans and are encouraging the States to continue and even to expand their programs in this field. Thus, we will relieve the pressure on VA hospitals and domiciliary facilities which, as we all know, are already overburdened and faced with large waiting lists. Therefore, I rise in support of this meritorious measure to aid the veterans of our Nation.

Mr. CARNAHAN. Mr. Speaker, I am happy indeed to support this bill, H.R. 10596. I joined the sponsor of the bill, the gentleman from Wisconsin, by introducing a companion bill and I appeared before the House Committee on Veterans' Affairs when hearings were being held. This is a good bill and I would like to take this opportunity to publicly thank my colleagues on the committee for reporting it to the House.

There is within my own Missouri district a Federal soldiers' home located in the city of St. James. It is located on approximately 60 acres of ground within the city limits of St. James and the beautifully landscaped grounds include a hospital, chapel, superintendent's home, a dormitory for women, men's and married couples' dormitories, sunshine cottage, dining and storerooms, administration building, home canteen, historic mansion building, laundry, and powerhouse. This home was originally established by the Women's Relief Corps and the Grand Army of the Republic organizations of the Department of Missouri. It was established for only one purpose: To provide a home for the indigent veterans of the Civil War, their wives, widows, and Army nurses.

Later, the entire facility was transferred to the control of the State of Missouri and admissions were extended to honorably discharged soldiers, sailors, and airmen who have served 90 days or more during some war, who are disabled and in indigent circumstances and unable to support themselves by manual labor, and who have resided in Missouri 2 years or more prior to the date of their application. Wives, widows, and mothers of such soldiers, sailors, or airmen are also eligible for admission under specified conditions.

The soldiers' home within my district is now receiving for operations cost from the Veterans' Administration a sum of $700 per annum per veteran cared for in

this State soldiers' home. This legislation would more clearly equalize the Federal contribution and increase it from its present $700 per annum to a per diem rate of $2.50 or $912.50 per annum. It has been 6 years since an adjustment in the Federal allotment to these homes has been made. During that time many sharp increases have taken place in the costs of maintaining and operating such an institution. The Veterans' Administration and the Bureau of the Budget approve of this bill. I feel it to be worthy legislation. It does nothing more than merely reaffirm our Nation's longstanding policy to care for its veterans and their dependents. This bill deserves unqualified support.

Mr. BOLAND. Mr. Speaker, I rise in favor of H.R. 10596, a bill which would increase Federal payments to State soldiers' homes.

The purpose of this legislation is to change the method of payment of Federal aid to State homes from an annual payment of $700 to a per diem basis. The $2.50 a day maximum included in the bill would increase the maximum amount payable from $700 to $912.50 a year.

Mr. Speaker, in the Commonwealth of Massachusetts we have two State soldiers' homes, located in Holyoke and Chelsea. This legislation will make it simpler for both the Veterans' Administration and the State homes in making computations, by using the per diem basis, and it will mean an increase in payments to the States, thus reflecting moderately higher Federal contributions in line with increased costs to maintain these State homes.

The SPEAKER pro tempore (Mr. ALBERT). The question is on suspending the rules and passing the bill H.R. 10596.

The question was taken and the Chair announced that the ayes appeared to have it.

Mr. GROSS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that further consideration of this bill be postponed until next Thursday.

Mr. GROSS. Mr. Speaker, reserving the right to object, why until next Thursday?

Mr. McCORMACK. Day after tomorrow is Calendar Wednesday, and, as I announced, I expect it will be utilized this week. Certainly it is only fair to those who are hopeful of getting the bill called up or acted upon that they have the day free, that is, that there be no encroachment on the time available.

Mr. GROSS. Mr. Speaker, I cannot agree to going over until Thursday. If the distinguished majority leader will amend his request to Wednesday I would be in agreement on that, but I must object if he insists on putting the vote over until Thursday.

Mr. McCORMACK. Under the circumstances I cannot agree to that.

If the gentleman will further reserve his right to object, I understand that there are other primaries tomorrow also.

Mr. GROSS. Do I understand the gentleman suggested Wednesday?

Mr. McCORMACK. Oh, no. First last week I suggested Wednesday but later in the colloquy I corrected the request.

Mr. GROSS. Yes; and if the gentleman will recall I objected on Thursday evening to votes going over until Thursday.

Mr. McCORMACK. Yes, the gentleman did; but the gentleman and I had a private talk in which, of course, the gentleman made no promise; but I was hopeful from that talk with him that on Monday, today, the gentleman would see the equity of the situation.

Mr. HOFFMAN of Michigan. Mr. Speaker, will somebody yield to me?

Mr. GROSS. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. I would like to ask the gentleman from Massachusetts—I sympathize with him in spite of the sound reasoning of my colleague from Iowa, but would this apply in any way to the State convention of the Republicans in Michigan on the 13th day—that is an unlucky day—the 13th of May, this month?

Mr. McCORMACK. That is also Black Friday, Friday the 13th, but I will cooperate with the gentleman in any way I possibly can, if the gentleman will give me a little notice.

Mr. HOFFMAN of Michigan. You will cooperate with me in any way you possibly can?

Mr. McCORMACK. That is a bad day, Black Friday, for anybody to have a convention. But I will cooperate to the fullest extent possible.

Mr. HOFFMAN of Michigan. Yes?

Mr. McCORMACK. Can you talk my friend from Iowa out of his objection?

Mr. HOFFMAN of Michigan. I would prefer to talk with you, inasmuch as you are majority leader.

Mr. McCORMACK. You got the maximum out of me. I wish you would help me with my friend from Iowa.

Mr. HOFFMAN of Michigan. That might be the harder task.

The SPEAKER pro tempore. Does the gentleman from Iowa object?

Mr. GROSS. Mr. Speaker, I object.

The SPEAKER pro tempore. The gentleman from Iowa objects to the vote on the ground that a quorum is not present. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken and there were—yeas 267, nays 0, not voting 163, as follows:

Mr. Rivers of South Carolina with Mr. Fino.
Mr. Bonner with Mr. Ford.
Mr. Harrison with Mr. Gavin.
Mr. Prokop with Mr. Dorn of New York.

The result of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

EXTENSION OF REMARKS

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to revise and extend my remarks made on the veterans' bill pertaining to State soldiers' homes.

Mr. Speaker, I also would like to state that certain members of our committee who were very anxious to be here for the vote on the veterans' bill thought that the vote would come on Wednesday or Thursday. Mr. HALPERN, of New York, was among them and talked to me about it.

The SPEAKER. Without objection, the gentlewoman from Massachusetts may extend her remarks on the bill just passed.

There was no objection.

FUNDAMENTAL FREEDOMS AND HUMAN RIGHTS OF PEOPLE OF CAPTIVE NATIONS

Mr. ZABLOCKI. Mr. Speaker, I move to suspend the rules and pass the resolution (H. Con. Res. 633) as amended, relating to the restoration of freedom for captive nations.

The Clerk read the concurrent resolution, as follows:

Whereas the rulers of the Soviet Union have repeatedly declared their determination to pursue relentlessly their political, economic, and ideological drive for a worldwide victory for communism; and

Whereas, in its efforts to attain that objective, the Soviet Union, through force of arms, subversion, infiltration and other methods, has imposed puppet Communist regimes upon the people of the captive nations of Eastern and Central Europe and exerted tireless effort to crush their spirit and to transform their countries into replicas—on political, economic, social, cultural, and administrative levels—of the Soviet Union; and

Whereas, in direct violation of the provisions of the Yalta agreement, the people of the captive nations are still being denied the opportunity to solve their problems by democratic means and to choose, through free and unfettered elections, national governments of their own free choice; and

Whereas, in contravention of duly ratified treaties of peace, of the Charter of the United Nations, and of expressions of the United Nations General Assembly, the people of the captive nations are being systematically deprived of the exercise of fundamental freedoms and basic human rights; and

Whereas the United States of America has consistently refused to sanction, either directly or by implication, the political status quo of the captive nations; and

Whereas the United States of America has stood firmly on the principle of self-determination, welcoming the enlargement of the area of freedom and self-government and insisting on the inalienable right of the people of the captive nations to live under governments of their own choice; and

Whereas the establishment of just and lasting peace is inconceivable without the restoration of freedom, independence, and national sovereignty to the captive people of Eastern and Central Europe, which objective the United States of America is determined to pursue by all feasible means: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That—

(1) the Congress of the United States calls for the respect of the fundamental freedoms and human rights of the people of the captive nations;

(2) the Congress of the United States reaffirms its belief in the inalienable right of the people of the captive nations to live under governments of their own choice; and

(3) the Congress of the United States expresses the hope that the President will pursue energetically at the forthcoming summit conference the restoration of the fundamental freedoms and basic human rights of the people of the captive nations.

The SPEAKER. Is a second demanded?

Mr. JUDD. Mr. Speaker, I demand a second.

A second was ordered.

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, the concurrent resolution before the House reaffirms the belief of this body in the inalienable right of the people of the captive nations to live under governments of their own choice, calls for respect of the fundamental freedoms and human rights of those people, and expresses the hope that our Chief Executive will pursue energetically at the forthcoming summit conference the restoration of the fundamental freedoms and basic human rights of the people of the captive nations.

Resolutions identical with House Concurrent Resolution 633 were introduced by the following members of the Committee on Foreign Affairs: Hon. BARRATT O'HARA, Hon. HARRIS B. MCDOWELL, JR., Hon. WALTER H. JUDD, Hon. MARGUERITE STITT CHURCH, and Hon. ALVIN M. BENTLEY.

Identical resolutions also were introduced by the following Members of the House of Representatives: Hon. ROMAN C. PUCINSKI, Hon. HUGH J. ADDONIZIO, Hon. VICTOR L. ANFUSO, Hon. EMANUEL CELLER, Hon. EMILIO Q. DADDARIO, Hon. STEVEN B. DEROUNIAN, Hon. DANIEL J. FLOOD, Hon. PETER W. RODINO, JR., Hon. DANIEL D. ROSTENKOWSKI, Hon. HERBERT ZELENKO, Hon. ALFRED E. SANTANGELO, Hon. GERALD T. FLYNN, Hon. EDWARD J. DERWINSKI, Hon. JOHN D. DINGELL, Hon. JOHN E. FOGARTY, Hon. PETER F. MACK, and Hon. SEYMOUR HALPERN.

Similar resolutions relating to the same subject were introduced by the Honorable LEONARD FARBSTEIN, Hon. MICHAEL A. FEIGHAN, and Hon. PHILIP J. PHILBIN and referred to the committee. Joint resolutions on this subject were also introduced by Hon. BARRATT O'HARA, Hon. JOHN H. DENT, and Hon. ROMAN C. PUCINSKI.

Included among sponsors who supported House Concurrent Resolution 633 were Hon. WAYNE N. ASPINALL, Hon. HAROLD D. DONOHUE, Hon. THADDEUS J. DULSKI, Hon. AIME J. FORAND, Hon. LESTER R. JOHNSON, Hon. EDNA F. KELLY, Hon. EUGENE J. KEOGH, Hon. JOHN C. KLUCZYNSKI, Hon. MELVIN R. LAIRD, Hon. THOMAS J. LANE, Hon. ALVIN E. O'KONSKI, Hon. MELVIN PRICE, Hon. HENRY S.

REUSS, Hon. JOHN LESINSKI, Hon. THADDEUS M. MACHROWICZ, Hon. ABRAHAM J. MULTER, and Hon. WILLIAM T. MURPHY.

This resolution was reported unanimously by the Committee on Foreign Affairs, and I earnestly hope that it will receive prompt and overwhelming approval from this House.

This is a very timely occasion for an expression from this House on this vital issue. Two weeks from today, on Monday, May 16, the heads of state of the great powers will hold a summit meeting in Paris. They will discuss the paramount issues which have a bearing on the maintenance of peace in the world. In the opinion of the Committee on Foreign Affairs, and in my own opinion, the tragic plight and the future status of the people of the captive nations is one of those issues. It is vital, therefore, that this issue be raised, and that the House express itself on it in advance.

I may add that House consideration of this resolution comes at a very propitious time for another reason: It comes on the eve of May 3, the day which will mark the 169th anniversary of the famous Polish Constitution of May 3, 1791. I know that the action of this House, in reaffirming our Nation's steadfast adherence to the principle of self-determination, and expressing our continuing concern with the plight of the people of the captive nations, will bring new encouragement and joy to the people of Poland on this momentous anniversary.

Mr. Speaker, I would like to briefly summarize the reasons which argue for the approval of House Concurrent Resolution 633.

We find the first reason in the history of our own Nation, and in the basic principles which we hold dear.

Throughout our history, the United States has adhered to the principle of self-determination, welcoming the enlargement of the area of freedom and self-government, and insisting on the inalienable right of the people to live under governments of their own choice.

We find this principle reflected in our own Declaration of Independence, in the Monroe Doctrine, in Woodrow Wilson's 14 Points, and in numerous other documents and policies of our Nation.

We have every reason, therefore, to reaffirm our adherence to this principle on the eve of the summit meeting which may alter the course of events of the world.

The second justification for the approval of House Concurrent Resolution 633 lies in the long list of important international declarations and treaties, to which our Nation has been a party, and in which the United States—as well as the Soviet Union—had pledged themselves to secure to all persons in the currently captive nations the enjoyment of human rights and of the fundamental freedoms.

In the Atlantic Charter proclamation of August 14, 1941, the United States, the United Kingdom, and subsequently the Soviet Union, agreed to "respect the rights of all peoples to choose the form of government under which they will live"; and the three powers further stated that "they wish to see sovereign rights and self-government restored to those who have been forcibly deprived of them."

On December 1, 1943, at Teheran, the chiefs of state of those same three powers signed another declaration stating:

> We look with confidence to the day when all peoples of the world may live free lives, untouched by tyranny, and according to their varying desires and their own conscience.

On February 11, 1945, at Yalta, the same three chiefs of state signed a still another declaration, pledging to "jointly assist the people in any European liberated state or former Axis satellite state in Europe (c) to form interim governmental authorities broadly representative of all democratic elements in the population and pledged to the earliest possible establishment through free elections of governments responsive to the will of the people; and (d) to facilitate where necessary the holding of such elections."

There were other declarations, relating to specific countries.

The Yalta agreement, for instance, had a separate provision regarding Poland, in which the three signatory powers promised "the holding of free and unfettered elections as soon as possible on the basis of universal suffrage and secret ballot. In these elections, all democratic and anti-Nazi parties shall have the right to take part and to put forward candidates."

Similarly, on February 10, 1947, in separate peace treaties with Rumania, Hungary, and Bulgaria, the three great powers inserted specific provisions to protect and safeguard human rights and fundamental freedoms, including freedom of expression, of press and publication, of religious worship, of political opinion and of public meeting.

The following year, on December 10, 1948, the United Nations General Assembly reaffirmed these principles in the universal declaration of human rights.

Now these and other documents speak for themselves. They show what the great powers pledged and promised the people of liberated Europe. The United States has done its utmost to see that those pledges may be fulfilled. The Soviet Union has violated every pledge, every declaration that I have mentioned, and every promise.

It is our duty to speak the truth and to remind the Soviet Union and the world of these facts. House Concurrent Resolution 633 does just that. It is our further obligation to continue in our efforts to see that the pledges which were made may be fulfilled. The resolution before the House again does just that.

I earnestly hope, therefore, that this resolution will receive overwhelming approval from this House today.

Justice demands this.

Mr. WOLF. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Iowa.

Mr. WOLF. Mr. Speaker, I wish to associate myself with the remarks of the gentleman from Wisconsin and urge the passage of this legislation.

Mr. Speaker, this is the kind of action which makes me proud to be a Member of this body. I wish to congratulate my colleague [Mr. ZABLOCKI] for his able statement and his perseverance in pushing this resolution.

I believe it is important to the captive peoples that the Congress of the United States indicate that we do not condone the governments who dominate these countries. I sincerely hope that our leaders at the summit will indicate this desire of the American people as here expressed through the Congress, which are the freely elected representatives, that we want all peoples to have a freely elected government. I am proud to support the resolution.

Mr. PUCINSKI. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield.

Mr. PUCINSKI. Mr. Speaker, I rise in support of this resolution. As a cosponsor of the resolution, I commend the gentleman from Wisconsin [Mr. ZABLOCKI] for the work and effort he has put into this resolution.

I should also like to express my own personal appreciation to the Chairman of the Foreign Affairs Committee, the gentleman from Pennsylvania [Mr. MORGAN] and the other members of the Foreign Affairs Committee who joined in voting out this resolution. I think the Foreign Affairs Committee has added a fine chapter to its otherwise illustrious record in approving this resolution.

I sincerely believe this resolution will strengthen the President's hand when he goes to the summit. I sincerely hope both the House and the other body will approve this resolution, because, then the President will be able to go to the summit meeting and express to the other parties at that meeting the full hope and determination of the American people that these captive nations be given an opportunity to participate in free elections and to select their own form of government and their own leaders.

I am delighted to know that Members on both sides have joined in this action because this manifests a deep desire of all of us here to help the President in making the summit conference a success.

Yesterday we held a great rally in Chicago, at which there were more than 100,000 people. This was a mass meeting in Humboldt Park to pay tribute to the 169th anniversary of the establishing of the May 3 constitution of Poland. At this rally yesterday this huge crowd unanimously adopted a resolution calling upon the President to bring up the captive-nations question at the summit conference. I will include this resolution as a part of my remarks.

Also, the Czechoslovak National Council of America adopted a memorandum in which they strongly urge that the question of the captive nations be brought up at the summit.

In summing this whole thing up, we can say that there really can be no lasting peace in this world so long as the people behind the Iron Curtain in these captive nations are denied the right to hold free elections. The people of Poland, Czechoslovakia, Lithuania, Estonia, Latvia, Bulgaria, Hungary, Rumania, and all the other captive nations made

a tremendous contribution, at undescribable personal sacrifice, in the great struggle for freedom in World War II. Their heroic acts have become legend. Yet today more than 100 million of these gallant people in Eastern Europe are being denied the freedom they fought for because they are being held in bondage by their Communist rulers, illegally imposed upon them. Only by reaffirming our uncompromising determination that these people of the captive nations must be given their right to free elections can we set the stage for lasting peace in the world. These people behind the Iron Curtain in these captive nations would be listed among our stanchest allies if they were free to choose their own government. No one knows this better than Khrushchev. He has been spreading his false propaganda too long. If he really wants peace, if he really wants disarmament, if he really wants to solve the Berlin problem, let him withdraw his Communist forces from all of these captive nations and permit the people of these nations freedom to conduct their own affairs. This resolution offers President Eisenhower an excellent opportunity to seize the initiative at the summit by first demanding freedom for our wartime allies from Communist oppression before we proceed to a discussion of other world problems. This is the only language that Khrushchev understands, and I hope the President will use this language when he reaches the summit in mid-May. I again commend the gentleman from Wisconsin and the committee for reporting out this resolution.

As a part of my remarks, I include the following:

EXCERPTS FROM SPEECH BY CHARLES ROZMAREK, PRESIDENT OF THE POLISH NATIONAL ALLIANCE AND CHAIRMAN OF THE POLISH CONSTITUTION DAY RALLY ON SUNDAY, MAY 1, 1960 AT HUMBOLDT PARK, CHICAGO

As we observe the 169th anniversary of the Polish Constitution of May 3, Red-subjugated Poland stands on the threshhold of her millenium and longs for deliverance from the Communist evil.

In these critical times of increasing Communist influences, we must strengthen the forces of freedom within the captive nations and lend them economic and technical assistance. We must strengthen their hope of eventual freedom and bolster their morale with messages of hope and inspiration, as the renowned statesman and our honored guest, RICHARD NIXON, the Vice President of the United States, did a year ago in Warsaw.

Berlin and disarmament will be the major subjects discussed at the forthcoming Paris summit meeting.

The status of Berlin, crucial as it is, cannot be isolated from the plight of captive nations. It is interwoven into the geographical fabric of East Central Europe. And it is our fervent hope that the Paris Conference will recognize the crucial importance of liberation of East Central European countries, without which neither the German problem can be solved, nor disarmament and durable peace can be achieved.

As for disarmament, it would only invite the war we are trying so desperately to avoid. World peace is our goal but it is certainly not Russia's. With the Reds progressively destroying freedom everywhere, it is unthinkable that America should even consider disarmament. The Soviets are clamoring for disarmament because they want to pursue world conquest without obstruction.

It is as obvious as the sky above that the nation that abolishes armaments, will be the first to be devoured by the Russian bear.

Before disarmament can be discussed, let the Reds remove the causes of war—aggression, infiltration and subversion. Let them withdraw their troops and puppet governments from Communist-ruled countries. Let them permit free elections in Poland and elsewhere. These conditions must be met first before any real disarmament can take place.

If we get peace, it won't be through disarmament but through a tough foreign policy, buttressed by American military supremacy.

In view of Russia's claims of missile superiority, we must abridge the missile gap, no matter what the price. Saving our lives is more important than saving money.

An invincible American retaliatory power that would deter Russia from attacking us and would curb Red aggression, would be the greatest contribution America could make toward a free and peaceful world.

RESOLUTION ADOPTED MAY 1, 1960, DURING THE OBSERVANCE OF THE 169TH ANNIVERSARY OF POLAND'S MAY 3 CONSTITUTION UNDER THE AUSPICES OF THE POLISH NATIONAL ALLIANCE EDUCATIONAL DEPARTMENT IN CHICAGO, ILL.

Asembled on this May 1, 1960, in Humboldt Park, Chicago, to solemnly commemorate the 169th anniversary of the adoption and proclamation of the May Third Constitution of the Republic of Poland, we unanimously resolve:

To assert full accord with the Polish American Congress memorandum of March 14, 1960, presented to Secretary of State, Christian A. Herter, and urging that the liberation of Poland and other subjugated nations of east-central Europe be placed on the May 1960 Four Power summit conference agenda in Paris;

To appeal that in discussions of Poland's future her western boundary along the Oder-Neisse Rivers be recognized by Western Powers as final and irrevocable, with recognition of Polish claims to eastern boundary as defined by the Peace Treaty of Riga;

To appeal to our Government and to the Americans of Polish descent for further extension of economic assistance to the Polish people;

To appeal to the U.S. Post Office Department to issue a stamp honoring Ignace Jan Paderewski, great artist, humanitarian, statesman, and a true champion of freedom for Poland and for all the people—everywhere; we deeply feel that Paderewski, whose 100th anniversary of birth will be commemorated throughout the world, justly belongs to the Champions of Liberty that are being honored in special stamp series by our Post Office;

To extend to the Polish American Congress best wishes for a successful Fifth National Convention to be held in September in Chicago.

We pledge our hearts, our minds and our lives together with all our material possessions unreservedly to the defense of the United States and the widening of the American way of life horizons.

MEMORANDUM OF THE CZECHOSLOVAK NATIONAL COUNCIL OF AMERICA CONCERNING THE SUMMIT MEETING

On the eve of the summit meeting, scheduled for May 16, 1960, we wish to declare that countless Americans of Czechoslovak descent shall give again—as they have always done in the past—their wholehearted support to any U.S. policy, designed to restore freedom and justice to the people now living under Communist rule.

We recall with satisfaction many earlier efforts of our Government and are hopefully confident that a persistently vigorous policy along the same lines might ultimately yield the desired results.

The U.S. policy, as we see it, is based on the following assumptions:

1. There is no freedom in the captive nations and the division of Europe (not only of Germany) is unnatural.

Captive Nations Week resolution of July 1959: "The enslavement of a substantial part of the world's population by Communist imperialism."

The Bermuda declaration of December 8, 1953: "We cannot accept as justified or permanent the present division of Europe."

2. The interest of peace and justice requires a discussion of the captive nations with the U.S.S.R.:

President Eisenhower replying to Premier Khrushchev in 1958: "Surely the Hungarian developments and the virtually unanimous action of the United Nations General Assembly in relation thereto show that conditions in Eastern Europe are regarded throughout the world as much more than a matter purely of domestic scope. I propose that we should now discuss this matter. There is an intrinsic need of this, in the interest of peace and justice, which seems to me compelling."

3. The U.S. Government has a moral duty and right to concern itself with the problems of the captive nations.

This right is based, among other things, on the following documents:

The Atlantic Charter, endorsed by the Soviet Union on January 1, 1942, containing the principle that the signatory powers shall "respect the right of all peoples to choose the form of government under which they will live; and they wish to see sovereign rights and self-government restored to those who have been forcibly deprived of them."

The Teheran Conference of December 1, 1943, stating that the "three governments will jointly assist the people in any European liberated state * * * (c) to form interim governmental authorities broadly representative of all democratic elements in the population and pledged to the earliest possible establishment through free elections of governments responsive to the will of the people; and (d) to facilitate where necessary the holding of such elections."

The treaties of peace concluded with Hungary, Bulgaria and Rumania on February 10, 1947: "Hungary (Bulgaria, Rumania) shall take all measures necessary to secure to all persons under Hungarian (Bulgarian, Rumanian) jurisdiction, without distinction as to race, sex, language, or religion, the enjoyment of human rights and of the fundamental freedoms, including freedom of expression, of press and publication, of religious worship, of political opinion, and of public meeting."

4. The U.S. Government wishes to see free elections to be held in the now captive nations.

This desire is based not only on the principles of our democratic traditions, but also on the spirit of the United Nations Charter and the Universal Declaration of Human Rights, adopted December 10, 1948: "The will of the people shall be the basis of the authority of government. This will shall be expressed in periodic and genuine elections which shall be by universal and equal suffrage and shall be held in secret vote or by equivalent free voting procedures."

5. Unless such elections are held and liberty and independence restored, the people of the United States are not prepared to accept the present status quo of the captive nations as just and permanent.

Captive Nations Week Resolution: "It is fitting that we clearly manifest to such peoples through an appropriate and official means the historic fact that the people of the

United States share with them their aspirations for the recovery of their freedom and independence."

The Potomac Declaration of June 29, 1954: "We will not be party to any agreement or treaty which would confirm or prolong the subordination of the formerly sovereign States of Central and Eastern Europe, now held in bondage by the U.S.S.R."

The logical sequence of the previous assumptions is found in the three following points, which thousands of American citizens of Czechoslovak descent wish to be our policy at the forthcoming summit meeting: (1) That the U.S. Government insist on a discussion of the fate of the captive nations; (2) that the U.S. Government refuse to recognize the present status quo in Central and Eastern Europe as just and permanent; (3) that the U.S. Government demand that free elections under international control be held throughout the captive nations.

CZECHOSLOVAK NATIONAL COUNCIL OF AMERICA
(For James Hovorka, President).
V. VRAZ,
Acting Vice President.
ANDREW VALUSEK,
First Vice President.
FRANCIS SCHWARZENBERG,
Chairman, Political Committee.

Mr. ZABLOCKI. I thank the gentleman for his remarks, and I want to call the attention of the Members of the House to the fact that the gentleman from Illinois has been a fervent and a sincere supporter of resolutions similar to this one and has played an important part in the preparation of the resolution now before the House.

Mr. CARNAHAN. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Missouri.

Mr. CARNAHAN. Mr. Speaker, I want to associate myself with the remarks of the gentleman from Wisconsin in support of the pending resolution, and I desire to commend the gentleman for the excellent work he has done in bringing this resolution before the Committee on Foreign Affairs and the reporting of the resolution to the House. I have been happy to join the gentleman in assisting with the resolution in committee and on the floor of the House.

Mr. ZABLOCKI. I want to thank the distinguished gentleman from Missouri, for his support in bringing the resolution before the House, and in the drafting of it.

Mr. MEYER. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Vermont.

Mr. MEYER. Mr. Speaker, I join with the distinguished chairman of the subcommittee who is now speaking out for liberty and freedom throughout the world. Those of us who are so much interested in the principles of democratic freedom and free elections and all that goes with these principles of liberty and freedom are deeply interested in the resolution.

May I ask one question: Does he intend that we endorse this principle throughout the world in all continents, and that that is one of our great objectives?

Mr. ZABLOCKI. There should be no question about it. I am certain there is no difference of opinion between us as to where freedom should be exercised. It should be enjoyed by people throughout the length and breadth of the entire world. I agree with the gentleman.

Mr. McDONOUGH. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from California.

Mr. McDONOUGH. I want to join with the lofty purpose of this resolution and with the chairman of the subcommittee. I would like to ask a question:

In the gentleman's opinion is there any more possibility of consideration of these matters before the summit meeting than there was in the previous meetings?

The gentleman read from the report a number of instances where the Soviet Union has pledged itself to do this. In this resolution we are asking the President of the United States to remind the Soviet Union at the summit meeting that it should follow out its previous pledges to guarantee free elections to these nations. Does the gentleman believe that at the summit meeting there is any possibility of breaking through the hard crust of stubbornness that has been evidenced by the Soviet Union to permit such things as this to happen?

Mr. ZABLOCKI. Certainly, I am not in a position to advise the gentleman what is in the hearts and minds of the Soviet leaders who will attend the summit meeting. I am sure the gentleman will agree with me, however, that we cannot reiterate our position too often in insisting on the right of the people of the captive nations to live under governments of their own free choice, thereby strengthening the hand of our President. I would like to call the attention of the gentleman to the letter from the State Department which appears at page 3 of our report and reads, in part, as follows:

> The Department believes that it is desirable to reaffirm our views on the situation in Eastern Europe to the Soviet leaders at every appropriate opportunity and, in consultation with their Western colleagues, U.S. officials will be given consideration to this question in connection with the summit conference.

Mr. McDONOUGH. I agree with the gentleman, and I think we should reaffirm our position, but in view of the fact that the Soviet Union has appealed to the world for peace among nations, disarmament, and stand for all of the things that go toward peace, should there not be more reiteration at this summit meeting than in previous meetings?

Mr. ZABLOCKI. I fully believe that there should be—and that the Soviets be called upon to demonstrate the sincerity of what they say. We can only hope that at the summit meeting they will take a more constructive attitude than they have shown in the past, and that the efforts of the free world representatives will prevail in developing the groundwork for peace in the future.

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. I would not attempt to improve upon the eloquence of my friend from Wisconsin in support of this resolution. Of course, he knows all the work we did on this type of resolution since its inception years ago when I served upon this distinguished committee. I would like to just say one thing, that I am pleased with the title you used, that these are captive nations and not satellite nations. I think the word is more pointed as you use "captive" as distinguished from "satellite." "Satellite" might conceivably infer some kind of acquiescence. We know, of course, that in these captive nations that does not exist. There is no acquiescence. These are really and truly, as your title says, captive nations of this atheistic, communistic, imperialistic, Soviet conspiracy. I think it is well worded. I compliment my friend.

Mr. ZABLOCKI. I congratulate the gentleman for his observation, and I want to publicly thank him for the assistance he has repeatedly given in the past in framing resolutions such as this. The distinguished gentleman from Pennsylvania has long been in the forefront of the effort to restore freedom and justice to the people of the captive nations.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I am delighted to yield to my good friend and majority leader, the gentleman from Massachusetts.

Mr. McCORMACK. We all remember the resolution that passed last year, which I had the honor to introduce and offer in the House, known as Captive Nations Week Resolution. We all know the tremendous anguish and pain that it caused in the Soviet Union among its officials, and particularly Mr. Khrushchev. It must have been that that resolution penetrated and hurt considerably. The gentleman from Wisconsin did me the honor of chatting with me before he offered the pending resolution, and at that time I told him that I thought it was an excellent idea. I congratulated the gentleman for thinking of it, and I congratulate him now, as well as the Committee on Foreign Affairs, for reporting the resolution out. It is a pleasure for me to cooperate with the gentleman from Wisconsin and to see this resolution before the House today.

Now, on page 3, paragraph (3) of the resolution says:

> The Congress of the United States expresses the hope that the President will pursue energetically at the forthcoming summit conference the restoration of the fundamental freedoms and basic human rights of the people of the captive nations.

I assume, from reading that, that one of the primary thoughts that the gentleman from Wisconsin had in mind, as well as the committee in reporting the resolution out, was that that can best be obtained by carrying out the agreements that the Soviet Union made many years ago that all of the captive nations; that the people would have the opportunity of expressing in a secret ballot, internationally supervised, their own thoughts as to the form of government that they wanted; is that correct?

Mr. ZABLOCKI. Exactly; and that is why I have enumerated the more important agreements signed by the Soviet Union, in which the Soviet Union pledged itself to the establishment, through free elections, of governments responsive to the will of the people in all of the presently captive nations. The Soviet Union has failed to keep its promises. The purpose of this resolution is to strengthen the hand of our President, in pressing for the fulfillment of those promises.

Mr. McCORMACK. I also draw the inference, while it is not expressly stated in the resolution, this expresses the sense of the committee and doubtless the sense of the House, that under no conditions do we want any agreement made that will freeze the present situation in Europe because, if that were done, it would mean to the many millions behind the Iron Curtain who despise communism that we have sold them down the river.

Mr. ZABLOCKI. Of course, we are firmly opposed to the status quo in Europe.

Mr. Speaker, I want to thank the majority leader for his assistance, guidance, and cooperation in this resolution.

GENERAL LEAVE TO EXTEND

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the pending resolution.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. MACHROWICZ. Mr. Speaker, the resolution which the gentleman from Wisconsin [Mr. ZABLOCKI], on behalf of himself and his associates, has submitted to the House on the eve of the summit conference truly expresses the overwhelming sentiments of the American Nation toward the captive peoples of eastern and central Europe. It gives further expression to America's determination to stand unflinchingly by the principle that a just and lasting peace can be built only by restoring freedom, independence, and national sovereignty to those hapless millions of Europe who have suffered subjugation by the Soviet Union during and after the Second World War.

It is not only important, but quite timely, to remind the world of these American sentiments and this American determination. It is now 17 months since Khrushchev shocked all humanity with his ultimatum placing mankind under the threat of a third world war. During this time many and varied have been the frantic moves. Conference upon conference was held by our Western statesmen, many a political figure embarked upon many a personal journey with diplomatic and propagandistic goals, and lengthy negotiations were conducted by foreign ministers at Geneva. All this flurry of activity took place within the last 17 months. Agendas of conferences were discussed and rediscussed, and various were the attempts to properly weigh the issues upon which depends the lessening of international tension. What were these issues? They were: Berlin, unification of Germany, European security, suspension of atomic tests, disarmament, problems of East-West relations. But to this date there has not yet been a clear and unequivocal pronouncement by the Western Powers that one of the chief sources of danger to world peace is the present state of affairs in central and eastern Europe.

Khrushchev is most desirous of eliminating this state of affairs in central and eastern Europe but only in his own fashion and on his own terms—for he knows more acutely than others how precarious is the situation in these countries and what powerful forces for freedom exist among these 100 million people, some of whom have had a tradition of a thousand years of cultural, national, and historic existence. Consequently, he had created an international crisis to trade some apparent concessions in return for preserving the status quo in Berlin, simultaneously and unobtrusively also gaining a tacit, if not express, Western consent to a free hand in accelerating the final communization and assimilation of the captive nations within the Soviet system. Was it not revealing that the resolution of the U.S. Congress a few months ago, calling for a week of prayer for the captive peoples of Europe was met by Khrushchev's violent wrath? Let us, however, not deceive ourselves. This was not an emotional outburst. This was a coldly premeditated wrath designed to forestall any tendencies to raise the problem of freedom for these captive people in the course of negotiations.

How important is it to Khrushchev to accelerate the final communization of these captive nations? The answer lies in the events of the past few months. Remnants of rights fought out by the Polish people in the years 1955 and 1956 are now in the process of withdrawal; new forms of blackmail against the Catholic Church are being imposed; new restrictions upon the rights of labor are now being instituted, collectivization in Eastern Germany and other satellite countries is being hurried; the draft has been recently published of the new Czechoslovak Constitution which proclaims entry into the stage of building an advanced socialist society and transition to communism in close fraternal conjunction with the Soviet Union. These are moves which can only provoke public opinion in the West—and yet, Khrushchev is not waiting until after having attained whatever successes are possible for him at the forthcoming international conferences. He is not waiting until after he might have played the advantageous role of a jovial and tame Russian bear at Paris. The reasons prompting these hurried moves in the satellite sphere at such an unpropitious time must be impelling indeed.

Within such an international context, this resolution of the U.S. Congress, which in its third paragraph urges the President to pursue energetically at the forthcoming summit conference the restoration of fundamental freedoms and basic human rights to the captive peoples, cannot but have a practical effect upon the course of negotiations of the great powers. We cannot permit the summit conference and all the psychological and propagandistic preparations therefor to serve solely the cause of Khrushchev by obscuring the basic issues upon which universal security and peace built upon freedom are dependent. Khrushchev cannot be permitted to further develop his gigantic brainwashing technique upon all mankind—he terrifies all humanity with the threat of a possible hydrogen war and then attempts to persuade it by various means that only the status of Berlin can be the cause of such possible threats.

Skeptics will say that the resolution of the U.S. Congress in respect to the captive nations of Europe, although correct in principle, will be of no effect since the Soviet Union will not agree to peacefully withdraw from Poland and other countries within the Soviet sphere. The major premise of such reasoning is untenable and, indeed, unacceptable. Is there anyone who, in this phase of international conferences, espouses the illusion that the Soviet Union will agree to the unification of Germany upon the principle of freedom and independence for that country, or to a disarmament accompanied by full and effective controls? And yet, we do not shrink from the necessity of formulating such demand of ours as a condition to lasting peace. The restoration of freedom to central and eastern Europe is one of the basic conditions of such a peace. Consistent and logical reasoning demands that this condition find equal expression in our international demands.

The demand by our Government, with full determination, for the restoration of freedom to these captive people will stand before the world as proof positive that the great American Nation will not buy a false peace at the cost of someone else's freedom. For the people of Asia and Africa, on the other hand, such an international posture will proclaim that the United States actively opposes colonialism wherever and in whatever form it appears anew.

Even in the Soviet Union, there is recent evidence that a yearning for greater personal liberties is awakening. There is need for help in convincing the Russian people that the American Nation is building world order upon freedom for all nations and all human beings. A demand by our Government for freedom for the captive peoples cannot be completely lost upon the average Russian in its individual import.

If the Soviet Union rejects our demands, our efforts still will not have been in vain. Responsibility for the existence of 20th century slavery in the heart of Europe will be pinpointed, and the Soviet Union will suffer a decided defeat in the idealogical war which it has decided to wage by obscuring the realities of conquest.

I am happy that we are considering the resolution of the gentleman from Wisconsin [Mr. ZABLOCKI], and others, at a time when we customarily express our sentiments toward the Polish nation on the occasion of the anniversary of the Polish Constitution of the 3d of May 1791. We customarily pay homage to

the great historical record of Poland, we remind ourselves of the selfless and important participation by her sons in our Revolutionary War, we express admiration for her heroism during the long years of the Second World War and for her adamant struggles during the bitter and endless postwar years against her Communist oppressors—and yet, each of us, in his heart, knows that this is not enough. We are convinced that America can fulfill her great moral obligation to the Polish nation only by unceasing efforts realistically aimed at restoring to that nation, which will shortly observe a thousand years of its history, a full, free, and independent status.

Moreover, we fully realize that in that nation of over 30 million people, we have a most faithful and valiant friend, priceless and indispensable in the present most disturbing international patterns into which our world has fallen. Therefore, it is fitting and well that we, through this resolution, take a practical means of expressing our concern for the future of this nation.

I should further like to point out that recognition of the Oder-Neisse boundaries on Poland's west stands as one of the most practical efforts that could be made at the present time by our Government. By doing so, we could relieve the Poles of Russian blackmail in respect to the inviolability of those boundaries while we ourselves, in all honesty, can find no obstacle to such recognition on our part. General de Gaulle has recognized this western boundary of the Poles and yet maintains the closest of relations with Western Germany. The opinion in Great Britain is also definitely in favor of such a solution. Our Government, at the summit conference, has a golden opportunity to step forth boldly on this issue, thereby making a positive contribution to a practical settlement of European problems.

Mr. BOSCH. Mr. Speaker, it is a great satisfaction to have the opportunity of voting in support of House Concurrent Resolution 633. This resolution once again reaffirms the sincere conviction of the Congress that a choice of governments, to wit, self-determination is an inalienable right of free people everywhere. We reiterate the wish of Congress that our esteemed President at the forthcoming summit conference take the lead in seeking actively restoration of these basic freedoms for those behind the Iron Curtain.

This is nothing more than living up to many declarations made from time to time by the leaders at the various conferences, namely, Teheran, Potsdam, and Yalta. Let us well remember that over 17 millions of peoples behind the Iron Curtain look to us for the moral, spiritual, and active leadership necessary to implement the promise of self-determination and remove for all time any belief that we have forgotten or that we, by silence, condone the injustice to these peoples of the captive nations.

Mr. MACK. Mr. Speaker, as the sponsor of a companion resolution to the one being considered today, I hope the Congress will take this means to reaffirm its belief in Woodrow Wilson's principle of self-determination for all nations.

Let this resolution be a warning to the President in his dealings at the summit with Premier Khrushchev. If the Soviet Union had lived up to commitments it made at past summit conferences, this resolution would not be necessary. At the Yalta Conference, Stalin pledged the Soviet Union to assist the liberated nations of Europe "to solve by democratic means their pressing political and economic problems and to create democratic institutions of their own choice."

Now, 15 years later, our President is preparing for another summit conference that would be unnecessary if the Soviet dictatorship had carried out the grand promises it made in 1945.

Mr. DONOHUE. Mr. Speaker, as a cosponsor of this resolution, designed to influence the restoration of the fundamental freedoms and God-given rights of the subjugated peoples now existing in Communist captive nations, I most earnestly hope this House will promptly and unanimously approve it.

As we all know, in numerous and repetitive documents and agreements, the great powers of the world, including Soviet Russia, have pledged and promised the persecuted peoples of these nations, the return of their national freedom and personal liberties. The United States has consistently attempted to have these promises carried out but Russia still denies these countries the right of free elections and independent sovereignty.

To my mind the adoption of this resolution will add substantial strength to the position of the President when he meets with the Soviet leaders at the approaching summit conference. The Communist rulers, by our action, will be emphatically reminded that it is the sense of this Congress that no firm and lasting agreements for peace can be made while the world remains practically half free and half slave. By our action the rest of the free world can be concretely convinced this Nation will not abandon her traditional principles of free government for all peoples and the captive nations themselves will be further inspired to remain adamant in their determination to reject any Communist entreaties for cooperative existence under the Soviet system.

The fact and the truth is that the Russian Kremlin is solely responsible for the inhuman slavery being imposed upon the brave peoples of Poland, Czechoslovakia, Lithuania, Estonia, Latvia, Bulgaria, Hungary, Rumania, and all the other captive countries. It is also unfortunately true that we have suffered many disastrous propaganda defeats at the hands of the Russians.

Not the least of the purposes of this resolution is an attempt to meet the Russians in their own most effective field. Unlike their multitudinous and skillful distortions for propaganda purposes, we are telling the truth. If the Kremlin leaders want to prove their sincerity in seeking peace in the world then let them simply declare freedom for the captive nations. That is the first and fundamental step that must be taken before there can be any reasonable hope for the achievement of a peaceful world.

Let us then promptly approve this resolution to encourage the Soviet rulers to take this first, just action and then proceed, at the summit, to the adoption of agreements for all of us to live, in good will and good faith, in a world at peace.

Mr. JUDD. Mr. Speaker, House Concurrent Resolution 633 has been reported out unanimously by the Committee on Foreign Affairs and I am sure there will not be a vote against it here in the House. Increasingly people here and around the world are recognizing that probably the best hope the world now has of getting through the terrible world struggle in which we have been involved against our will, without all-out nuclear war lies in the continued will to resist and the determined efforts to regain their freedom by the 900 million people in the world who are held in bondage today by Communist tyranny. If these people can keep up their hopes and spirit, their morale; if they know from repeated assurances like this resolution that they are not forgotten and will not be forsaken by the United States and other free peoples; if they can continue to make trouble for the tyrants by hundreds of millions of little pinpricks and keep the despots so busy at home dealing with their own people that they are not able to embark upon foreign adventures so easily, then there is a real chance that the world can escape the holocaust that will otherwise almost certainly occur.

Everybody knows that Mr. Khrushchev is trying his best to get acceptance into respectable society without first becoming respectable. He is trying his best to get other peoples of the world, through their fear of war and their desire for peace, to concede the subjugation he has already fastened on these millions of people. He has said many times that to get peace the free world must accept what he calls "the historic changes." That is, we must accept as permanent the subjugation of hundreds of millions of people, including 100 million in Eastern Europe who are not and never were Russian. That we cannot and will not do.

Naturally at this summit conference he will be trying to get the appearance of being fully accepted by reasonable and freedom-loving and peace-loving people around the world. He wants to discuss all the problems in Europe except the one that is causing the tensions—the holding of millions of people in Communist enslavement. As my friend from Wisconsin [Mr. ZABLOCKI] and the distinguished majority leader have just said, our President and our delegation and the delegations of other free peoples at this summit conference must not let the impression go out that in our effort to get peace we are willing to try to buy it at the expense of our own principles and the freedom of other human beings. If we were to do that we would not deserve to retain our own freedom.

Whenever Mr. Khrushchev talks about ending the abnormal situation in West Berlin I hope that our delegation will ask him if he considers it abnormal for

people to be free and to live under self-government? In fact, the abnormalities are in East Berlin where people are not free but under Soviet rule.

Whenever he says something about the abnormal situation of allied troops in West Berlin, as he so often does, we must remind him that there is a far more abnormal situation in Budapest and Warsaw and every one of the other Eastern European capitals where Soviet forces are in control against the will of the people.

And when he asks for Berlin to be a united and free city, we ought to reply, "Yes, of course, whenever you will allow the German people to become a free nation once more."

All will recall that last summer in Moscow, just after the Congress had passed the captive nations resolution which irritated Mr. Khrushchev so, because it struck him at his weakest spot—he said to our Vice President, "Look at these people, do they look to you like unhappy captives?"

Well, if Mr. Khrushchev wants us to believe they are happy and free, in Poland, for example, why does he not let them vote? If they are happy and free, surely they will vote for him and his rule. That is all this resolution calls for, fundamental freedoms and basic human rights for all human beings.

Mr. Khrushchev urges the right of self-determination for all in the world except those under Communist domination. He wants self-determination in Algeria, he advocates self-determination everywhere—except in the Soviet Empire, the one cruel empire that remains. If he wants to relax tensions, as he constantly proclaims, let him demonstrate that he believes in self-determination for all peoples, let him release the captive nations, and half the tensions will immediately disappear.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. JUDD. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. As evidence of the deep interest in this matter, I read in one of the Washington papers this morning or yesterday a full-page ad put in by the mayor of West Berlin and signed by a number of distinguished Germans in West Berlin. One of them was the bishop of the Lutheran Church, as I remember, of all Germany, who is one of the bravest men I have ever read about. He is a great churchman, in my mind. Certainly he knows this is an attack upon all religions, as evidenced by the courage he has shown in going into East Berlin and giving the courageous sermons he has given so repeatedly throughout the years.

Mr. JUDD. Yes, indeed. Surely it is becoming increasingly clear to people everywhere that this world struggle is not like the old-fashioned efforts of conquerors to seize somebody else's territory or cattle or loot. This is a struggle for control not of land but of man—the mind of man, the soul of man. It is a determined attempt to control what families can teach their children, what it is permitted for children to read or learn in the schools. It is a cold and calculated rejection of all that man has struggled for in his upward march toward civilization, since he began to develop cultures based on the right and the dignity of the individual human being.

Sometimes during this present year, the 100th anniversary of Abraham Lincoln's becoming our President, I have thought again of his statement in the Gettysburg Address, that our country was engaged in a great civil war, testing among other things whether government of the people, by the people, and for the people should perish from the earth. Mr. Speaker, what the whole world, the whole planet, is engaged in today is a civil war, the greatest civil war mankind has ever known. It is a civil war over exactly the same issue: Is government of the people and by the people and for the people, to perish from the earth, literally.

There have always been governments and I am sure there always will be, but what kind of government is to prevail on this planet, the kind run by a little power-drunk clique calling itself a party, describing itself cynically by such good words as democratic and peace-loving, a clique that decides what is good for people and executes those who have the audacity to disagree or who believe that as human beings they have the capacity to make moral judgment and should have the right to choose their own government and to make independent choices of their own? Or, is it to be a government that will genuinely be a government of the people, by the people, and for the people—and against tyranny from whatever source?

The least this Congress can do today, and do again every once in a while, is to get a message through to the people behind the Iron Curtain that we remember them, and we care about them and their desire to become free again. The need to reassure them that in our desire to work out civilized settlements of the disputes that divide the world, we are not going to change our basic character or betray our basic ideals; we are not going to abandon those captive peoples or accept as permanent their present terrible subjugation. They can count on the United States not to let them down.

Mr. Speaker, I hope—rather, I know that all Members of this House will join in sending this message of hope today to the millions of people in the world who are not permitted to meet and to speak their minds as we can and are doing here.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. JUDD. I am happy to yield to my colleague.

Mr. GROSS. This resolution would not be necessary if the United Nations was doing the job it was supposed to do; would it?

Mr. JUDD. Actually, the United Nations has done extraordinarily well, in my opinion, considering the number and difficulty of the problems that have been dumped on it in the last 15 years, and recognizing the fact that the United Nations organization was set up with some built-in monkey wrenches in it, which enable the Soviet Union to keep it to some extent crippled and ineffective when real issues are before it. The Soviet Union pretended 15 years ago to be democratic and peace loving. It was thought by many and hoped by all that its leaders were speaking and acting in good faith, and we trusted that they would act accordingly. Actually, our leaders leaned over backward to get the Soviet Union to come into the world organization in the hope and faith that they would do so for the same purposes as we had; namely, to use the organization to help resolve difficulties between countries. We were too naive to realize, too decent to suspect that the Soviet Union would join the United Nations for exactly the opposite purpose of that which motivated us. They did not come in to make it work; they came in to make sure that the United Nations did not work. The Soviet Union came into the United Nations in order to be in a position where, whenever it would be to the disadvantage of their world conspiracy to have real settlement of a problem, they could under the charter keep the organization from operating effectively. Why should they want to accomplish that? The answer is simple, I believe, if we stop to think about it. They have a world organization of their own—the Communist Party. It has organized, disciplined, and efficient units in every other country in the world. They intend to win for their world organization. What could be more advantageous to them than to have a seat in the Security Council of the rival world organization—the United Nations—where, perfectly legally under the charter, they can keep that organization crippled and ineffective, while their own organization drives ahead.

Now considering the fact that there is this built-in monkey wrench, and we cannot change it because they can veto such a change, the United Nations has been extraordinarily successful.

Mr. GROSS. At debating—as a debating society.

Mr. JUDD. Yes, at debating, and at exposing situations and problems to public view, and calling upon the moral sense of people all over the world to condemn aggressive actions by anyone. Actually, considering its difficulties and handicaps, I think the United Nations has done better than any of us had a right to expect.

Mr. GROSS. If the gentleman will yield further, the United Nations has not settled one crisis since it was organized—not a one.

Mr. JUDD. Yes; it has settled several.

Further, it has on repeated occasions prevented a crisis or quarrel or dispute from erupting into all-out war. The thing to do now is not to throw brickbats at the U.N., but to recognize frankly the handicaps and difficulties, and work to correct them, and to improve and strengthen the organization.

Mr. BENTLEY. Mr. Speaker, I am happy to join my colleague from Wisconsin in supporting House Resolution 633, since I was the author of similar legislation, House Resolution 623.

I am very happy that the House of Representatives has gone on record as

urging the President to bring up the question of the freedom and self-determination of the captive peoples at the forthcoming summit conference. Of course, I am well aware that on previous occasions the Russian leaders have refused to discuss this matter, alleging that it would constitute intervention in the internal affairs of those states. However, since it is my understanding that there is as yet no fixed agenda for the summit conference, and since there may very well be topics which Mr. Khrushchev is anxious to bring up for discussion, I feel that President Eisenhower should be fortified with this expression of intent on the part of the Congress, in the event it becomes feasible to place this item before the conference itself.

Unhappily, the free world has been unable to take little concrete or positive action on behalf of the captive peoples except to protest in the strongest terms against their continued enslavement. Even if the question of their captivity is broached by the President and even if it is again summarily rejected by Mr. Khrushchev, it would nevertheless serve two important purposes. In the first place, it would help to strengthen the hope of the captive peoples themselves and would further show them that we and indeed the entire free world still believe in freedom, justice, and self-determination for them as for all other peoples of the world. In the second place, its expected rejection by the Soviet leader would serve again to point with clarity to the fact that the chains that bind them are linked directly with the Kremlin in spite of any Communist propaganda that may be heard to the contrary.

I certainly hope that the Senate will take similar speedy action on this resolution so that it may be in the President's hands as he proceeds on his important mission to the summit meeting in Paris.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield me 2 minutes?

Mr. JUDD. I am glad to yield 2 minutes to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. Mr. Speaker, the very sincere and able statement made by my dear friend, the gentleman from Minnesota [Mr. JUDD] calls to mind—to my mind anyway—the gentleman speaking about countries being ruled by individuals, the situation in New York and the Nation. I wonder if the gentleman would not concede that that applies to political parties, for example, in New York in the Republican Party at the moment I have in mind—well, I can hardly express it—admiration, for the courage exhibited by Governor Rockefeller. Now the bosses said and say they want him to run for Vice President on the Republican ticket. If I may have the gentleman's attention; does not the gentleman think it is a wonderful thing for the Governor to show his independence and his courage when he refuses to take second place on the ticket? Why should he, the Governor of New York and a Rockefeller, be the tool of the New York bosses and Wall Street—be pushed aside by the bosses—as you said the Communists do in various countries where they will not let the folks vote. He is too independent to be used by the generals of the party after they pushed him out of first place. Do you not believe, honestly now, that the Governor is doing a remarkable, courageous, and patriotic thing when he refuses to let the politicians like Tom Dewey and others of those fellows who put Willkie in after Dewey himself twice took a licking—you remember that, the second time the people demonstrated that they did not want him as President—do you not think Governor Rockefeller is doing a most courageous and patriotic thing in refusing to take that second place?

Mr. JUDD. My colleague, the gentleman from Michigan, is the House's past master in diverting attention from the business at hand, and, of course, always for a good purpose.

Mr. HOFFMAN of Michigan. No, no. I just asked the gentleman a question. The same principle is involved. The gentleman finds fault—more properly warns us against the Communist leaders of Russia. I just point to the exceptional courage and honesty of Nelson Rockefeller in refusing to be the tool of politicians with their own interests to serve.

Mr. JUDD. I would say just two things in answer. First, my friend Governor Rockefeller is very able to take care of himself; and second, it is his good fortune to live in a country where he is free to stand on his own two feet and speak his piece without fear or favor.

Mr. HOFFMAN of Michigan. That is right. And let us be thankful he has the insight to see the purpose which seems to say he lacks the ability to be President, but would attract votes to the support of the party. Now may I continue and use the rest of the 2 minutes?

Mr. JUDD. And we thank God that we still have these basic human rights and fundamental freedoms here that permits every man to speak his mind and defend his position.

Mr. HOFFMAN of Michigan. What he is doing is telling the bosses to go peddle the job somewhere else. So I join the gentleman from Minnesota in thanking the Lord as well as those who wrote our Constitution and Bill of Rights and our first President, George Washington who advised us to avoid entanglements with other nations—a policy we have failed to follow—to our sorrow and a substantial loss of our independence and our present bankruptcy.

Mr. JUDD. Mr. Speaker, I yield back the remainder of my time.

The SPEAKER pro tempore (Mr. RABAUT). The question is, Will the House suspend the rules and pass House Concurrent Resolution 633?

Mr. FULTON. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently no quorum is present.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that further consideration of this bill be postponed until Thursday next.

The SPEAKER. Is there objection?

Mr. GROSS. Mr. Speaker, I object.

Mr. FULTON. Mr. Speaker, I withdraw the point of order.

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that a quorum is not present, and I object to the vote on the ground that a quorum is not present.

The SPEAKER. Evidently no quorum is present.

The Doorkeeper will close the doors. The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 277, nays 0, not voting 153, as follows:

[Roll No. 63]

Mr. Coffin with Mr. Hoffman of Illinois.
Mr. Frazier with Mr. Dorn of New York.
Mr. Kluczynski with Mr. Hiestand.
Mr. Lesinski with Mr. Holt.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

SECOND CONGRESS OF THE INTER-AMERICAN ASSOCIATION FOR DEMOCRACY AND FREEDOM, VENEZUELA

Mr. PORTER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. PORTER. Mr. Speaker, this is a report concerning the second congress of the Inter-American Association for Democracy and Freedom which was held in Caracas and Maracay, Venezuela, April 21–26, 1960.

I was present at the conference at the Hotel Maracay from Saturday, April 23, through Monday, April 25. Many outstanding democratic leaders were in attendance from all portions of the hemisphere except Canada. Former Ambassador and Assistant Secretary of State Adolf Berle participated, as did José Figueres, former President of Costa Rica, and many others whose names will be recognized on the following list of participants:

LIST OF DELEGATES

Luis José Abalo, Cuba.
José M. Abello, Panama.
Carlos Leónidas Acevedo, Guatemala.
Enrique Acevedo Berti, Venezuela.
Felix Adam, Venezuela.
Pedro Pablo Aguilar, Venezuela.
Ricardo Alarcón de Quesada, Cuba.
Robert Alexander, United States of America.
Simeon Alezander, Trinidad.
Agustín Alvarez, Venezuela.
José Antonio Allende, Argentina.
Salvador Allende, Chile.
Luis Aponte, Paraguay.
Manuel Aragón, United States of America.
Luis Archilla Laugier, Puerto Rico.
Diógenes Arosemena, Panama.
Eduardo Arroya Lameda, Venezuela.
Alejandro Avilés, Mexico.
Lucas Ayarragaray, Argentina.
Roger Baldwin, United States of America.
Gonzalo Barrios, Venezuela.
Adolph A. Berle, United States of America.
J. J. Betancourt, Venezuela.
Rómulo Betancourt, Venezuela.
Enrique Betancourt y Galindo, Venezuela.
Belisario Betancur, Colombia.
Ismael Bielich, Peru.
Patricia Bildner, United States of America.
Lilina de Blanco, Venezuela.
Antonio Borjas Romero, Venezuela.
Luis Bossay, Chile.
Oscar Briones Arias, Argentina.
Linden Burnham, British Guiana.
Rafael Caldera, Venezuela.
Aristides Calvani, Venezuela.
Mario Cama Miranda, Peru.
Alberto Cañas, Costa Rica.
José María Carabaño Tosta, Venezuela.
Hilarión Cardozo, Venezuela.
Alfonso Carro, Costa Rica.
Joaquin Castro Cañizales, El Salvador.
Antonio Colorado, Puerto Rico.
Gilberto Concepción de Gracia, Puerto Rico.
Alvaro Contreras Vélez, Guatemala.
Hector Cornejo Chávez, Peru.
Juan Antonio Correjer, Puerto Rico.
Luisa Crane, United States of America.
Humberto Cuenca, Venezuela.
Ranji Chandisingh, British Guiana.
Ñuflo Chavez, Bolivia.
Jorge Dager, Venezuela.
Carlos D'Ascoli, Venezuela.
Luis Delgado, Venezuela.
Robert Delson, United States of America.
Remo Di Natale, Bolivia.
Alfredo Di Pacce, Argentina.
Horacio Domingorena, Argentina.
Francine Dunlavy, United States of America.
Julio Durán, Chile.
Abdón Espinosa, Colombia.
Ramón Escovar Salom, Venezuela.
Roberto Etcheparebordа, Argentina.
Gonzalo Facio J., Costa Rica.
Mercedes Fermin Gomez, Venezuela.
Rafael Fernández, Venezuela.
Rafael Fernández Sarabia, El Salvador.
Antenor Fernández Soler, Peru.
José A. Figueiras, Uruguay.
José Figueres, Costa Rica.
Amalio Fiallo, Cuba.
Mario Florez Ortiz, Nicaragua.
Jorge Font Saldaña, Puerto Rico.
Eduardo Frei, Chile.
Gonzalo García Bustillos, Venezuela.
Américo Ghioldi, Argentina.
René Glower Valdivieso, El Salvador.
Alberto Gomes, Trinidad.
Dagoberto González, Venezuela.
Godofredo González, Venezuela.
Juan Manuel González, Venezuela.
Frances R. Grant, United States of America.
Guido Grooscors, Venezuela.
Walter Guevara Arze, Bolivia.
Juan F. Guichón, Uruguay.
Hernan Garrón, Costa Rica.
J. M. Gámez Arellama, Venezuela.
Febus Gikovate, Brasil.
José Goldsack Donoso, Chile.
Fedro Guillén, México.
Penatillo Grados (Amadeo).
Paul R. Hays, United States of America.
Cipriano A. Heredia, Venezuela.
José Abraham Hernández, Aruba.
Luis Herrera Campins, Venezuela.
José A. Herrera Oropeza, Venezuela.
Ronald Hilton, United States of America.
Virginia de Izaguirre, Peru.
Cheddi Jagan, Guayana Britanica.
Harry Kantor, United States of America.
Federico Klein, Chile.
Raul Leoni, Venezuela.
Samuel Levitas, United States of America.
Camile Lherisson, Haiti.
Alberto López Gallegos, Venezuela.
Dionisio López Orihuela, Venezuela.

Benito Raul Losada, Venezuela.
Bonaventura Lyderic, Haiti.
Hugo Larrea B., Ecuador.
Carlos Lleras Restrepo, Colombia.
Mario Llerena, Cuba.
Ana Luisa Llovera, Venezuela.
Luis A. Machado, Venezuela.
José Machín Acosta, Venezuela.
Humberto Maiztegui, Uruguay.
Augusto Malavé Villalba, Venezuela.
Hipólito Marcano, Puerto Rico.
Salvador Marcovecchio, Argentina.
Carlos Martínez, Chile.
Julio Cesar Martínez, Santo Domingo.
Roberto Martínez Ordóñez, Honduras.
Emilio Máspero, Argentina.
Owen Charles Mathurin, Trinidad.
Ernesto Mayz Vallenilla, Venezuela.
Francis E. McMahon, United States of America.
Luis Aquiles Mejía, Santo Domingo.
José Melich Orsini, Venezuela.
Vicente Mendoza, Bolivia.
Walterio Mercado, Paraguay.
Andrés Mercau, Argentina.
Julia Meza, Cuba.
Angel Miolan, Santo Domingo.
Gerardo Molina, Colombia.
José Luis Molina, Costa Rica.
Gerard Montano, Trinidad.
André Franco Montoro, Brazil.
Arturo Morales Carrión, Puerto Rico.
Cesar Mossi, Honduras.
Jai Narine Singh, Guayana Britanica.
Aryeh Neier, United States of America.
M. S. Novik, United States of America.
Aguilar Núñez, Honduras.
Edward J. Odom.
Daniel Oduber, Costa Rica.
Manuel Ordoñez, Argentina.
Arnaldo Orfila Reynal, Mexico.
Horacio Ornes, Santo Domingo.
Javier Ortiz de Ceballos, Peru.
Raul Osegueda, Guatemala.
Miguel Otero Silva, Venezuela.
Alejandro Oropeza Castillo, Venezuela.
Isaac Pardo, Venezuela.
Alfredo Pareja Diez Canseco, Ecuador.
Carlos Pastore, Paraguay.
Carlos Pellicer, Mexico.
Luis Manuel Peñalver, Venezuela.
Roberto Perdomo Pardes, Honduras.
Virginia Betancourt de Pérez, Venezuela.
Alejandro Pérez Arevalo, Nicaragua.
José Lorenzo Pérez, Venezuela.

Manuel A. Varona, Cuba.
Cristobal Vega Rosario, Venezuela.
Martín Vegas, Venezuela.
Hernan Videla Lira, Chile.
Nihilita Vientós Gastón, Puerto Rico.
Jovito Villalba, Venezuela.
Frank Walcotti, Honduras Britanica.
Eric Williams, Trinidad.
Miriam Yabrudi Rojas, Venezuela.
R. Adolfo Yllarramendy, Venezuela.
Hylda Zimmerman.

The board of directors appropriately was headed by Venezuelan President Rómulo Betancourt, whose country was our host, as honorary president. The three honorary vice presidents were the leaders of the Venezuelan coalition government, all outstanding fighters for democracy.

These men were members of the board of directors:

Honorary president: Presidente Rómulo Betancourt.

Honorary vice presidents: Dr. Raúl Leoni, Dr. Jóvito Villalba, Dr. Rafael Caldera.

President: Sr. Miguel Otero Silva.

Secretary general: Miss Frances Grant.

Executive secretaries: Licdo. César Rondón Lovera, Dr. Gonzalo Garcia Bustillos, Dr. Hens Silva Torres.

Members: Dr. Aureliano Sánches Arange, Sr. José Figueres, Dr. Carlos Lleras Restrepo, Sr. Vicente Saenz, Dr. Eduardo Frei, Dr. Febus Gikovate.

It was most appropriate to hold this second congress in Venezuela, a country just emerging from the bloody shadow of Dictator Perez-Jiminez. An attempt at a revolution was started by several exarmy officers, apparently with Trujillo help, just prior to the opening of the conference. It was quickly and overwhelmingly squelched.

The people of Venezuela have made it clear that they want neither military dictatorship nor Communist tyranny. President Betancourt's participation in our conference was warmly welcomed and his hospitality was deeply appreciated by all delegates.

The secretary general, Miss Frances Grant, of New York, was the key person in the planning and carrying out of the conference program. Miss Grant has been a tireless and undaunted worker for democracy and freedom in this hemisphere for many years.

Her dramatic role during the opening ceremonies was lauded in an editorial by Jules Waldman, himself an intrepid fighter for democracy, editor of the Caracus Daily Journal, the English language newspaper of the Venezuelan capital. It is entitled "A North American Wins Them Over":

The inaugural meeting of the Interamerican Congress here had several interesting aspects. One, on which we want to comment today, provided an interesting illustration of the subject of how to win friends at the university. We are referring to the performance of Miss Frances Grant, a North American, who was one of the speakers at the opening of the congress Thursday night.

The university is hardly a stronghold of pro-U.S. feeling. Frankly, when we heard that there would be one North American among the many Latins addressing the group at the inaugural, we wondered how the affair would turn out.

The atmosphere, when Miss Grant began her words (she followed the President and two others) was dubious. There had been certain claques yelling extremist slogans (while the President sat tense and grim), and one did not know what to expect.

But Miss Grant said, in a Spanish not devoid of errors, just the right things. She spoke without notes, and her accent was definitely Yankee. She saluted the Venezuelans on their recent defense of their democracy, reminisced about the exiles she had known, rapped dictatorships—and calmed the audience. In fact, they were soon very much with her, and at one time during her speech gave her a standing ovation. At the end they were completely with her and applauded wildly.

President Betancourt looked on approvingly during the performance.

So a lone North American went into the lion's den and emerged not only unscathed, but triumphant.

Her speech did the United States lots of good. And it did the students lots of good, too.

It was a real object lesson for North Americans on how to win friends and influence people in Latin America.

An appreciation of the organization and Miss Grant's work requires a brief consideration of the first portion of the summary report which Miss Grant wrote with respect to the 10 years following the first congress in Havana in 1950. The first portion of this report is as follows:

INTER-AMERICAN ASSOCIATION FOR DEMOCRACY AND FREEDOM, SUMMARY REPORT OF THE SECRETARY GENERAL, 1950–60

The Inter-American Association for Democracy and Freedom (hereinafter referred to as IADF) was organized by charter at the final session, on May 14, 1950, of the continuation body of that historic meeting, which for the first time brought together the democratic leaders of the three Americas. Under its mandate, the Second Inter-American Conference for Democracy and Freedom is now convoked, in the city of Caracas, April 21–26, 1960.

The charter, under which the IADF was created, remains a resilient and dynamic document, which continues to provide the direction for the development of our work.

At the twilight period for American freedom, in 1950, when the Inter-American Association of Democracy and Freedom was born, perhaps half the population of the southern half of this continent struggled under suppressive government. Argentina, Bolivia, Colombia, the Dominican Republic, Haiti, Honduras, Nicaragua, Paraguay, Peru, and Venezuela were under governments of force. The leaders from these unhappy countries who attended our conference did so in great part as political exiles. It is not unrealistic to say that the meeting at Havana rallied these patriots in their valorous fight for freedom and democracy, and also created, with leaders of truly democratic countries, the instrument by which the evolution of the struggle for liberation could be articulated and focused in the Americas in the Inter-American Association for Democracy and Freedom.

At the foundation of the Inter-American Association for Democracy and Freedom in

Havana, Montevideo was established as Latin American headquarters and the seat of the then presidency; plenipotentiary offices were established in the United States as the headquarters of the secretary general.

At the same session a hemispheric executive council was elected, as well as the officers of the association. These comprised Dr. Emilio Frugoni (Uruguay), Dr. Aureliano Sanchez Arango (Cuba), Roger N. Baldwin (United States of America), German Arciniegas (Colombia), Serafino Romualdi (United States of America), Dr. Ernst Schwarz (United States of America), Frances R. Grant (United States of America), Victor Raul Haya de la Torre (Peru), Senator Juan Guichon (Uruguay). Alternates: Walter White (United States of America), Dr. Ernesto Sammartino (Argentina), Dr. Manuel Galich (Guatemala), Dr. Gonzalo Facio (Costa Rica), Senator Eduardo Rodriguez Larreta (Uruguay).

At the first meeting of the executive committee immediately following the conference, the following officers of the executive council were elected: Dr. Emilo Frugoni, president; Dr. Aureliano Sanchez Arango, vice president; Frances R. Grant, secretary general.

In accordance with the decision of the plenary body, it was decided to enlist an advisory body of democratic leaders from all countries of the Americas with whom the executive council might confer and which would be responsible in the case of recommended actions to be taken. First of these councilors to be nominated were Dr. Jose Figueres, Dr. Romulo Betancourt, and Dr. Eduardo Santos.

ADMINISTRATIVE OFFICES

Returning to New York from Havana, your secretary general established plenipotentiary offices, according to the mandate of the charter. These have been maintained without interruption for the intervening 10 years. For reasons hereinafter explained, the secretary general's office also became the caretaker office for the presidential headquarters, which had to be moved from Montevideo to the United States, at the urgent request of the hemisphere executive council in 1951.

Board meeting in 1951: In accordance with the charter, which specified periodic meetings of the executive council, the secretary-general called such meeting in 1951, in Montevideo. Of the members of the council those present included: President Emilio Frugoni, Senator Juan Guichon, Dr. Eduardo Rodriguez Larreta, Dr. Ernesto Sammartino, Serafino Romualdi, and the secretary general. In addition, many colleagues from Argentina and Montevideo joined us, including the many Argentines then in exile in Montevideo.

At that meeting, on motion of President Frugoni, the headquarters were transferred to the United States. This move was necessitated by the serious situation arising in Montevideo, owing to the attempted reprisals by Peron, against the Argentine political exiles in Montevideo; in addition, the election pressures in Uruguay combined to make hemisphere activity from Montevideo exceedingly difficult. Hence from 1951 to the present, the office of the secretary-general in the United States has served also as caretaker for the Latin American headquarters.

Immediately following the return from the Havana Conference, we instituted a program of activities, attempting to frame our work in accordance with the aims foreseen in the Havana Conference: that of aiding in the struggle for the freedom of the people under dictatorship; the coordination of the democratic forces of the hemisphere; the education and awakening of the public opinion of the American peoples and governments, to the imperative need for an evolving democracy which would guarantee the political rights of all Americans, and lay the foundations for economic, social, cultural, and educational well-being.

To give wider knowledge of the Havana conference, we instituted a series of public meetings aimed to explain our work, the results of the conference, and to clarify information as to the situations of the peoples of Latin America.

THE IMMEDIATE TASK

In view of the urgency of the fight for liberation from dictatorships, we interpreted as one of the most urgent mandates of the charter in article A, paragraph 2, articles B through D, and E, paragraphs 1–9.

To implement these purposes we resumed, and continuously maintained, close contacts with all democratic groups working in the Americas, including those within the democratic governments, those working within and outside of political parties; in government and in the opposition. In the case of countries under dictatorships, we cemented our relations with the groups in exile, or those working internally for the liberation of their countries, where this was feasible. These contacts were maintained until the liberations of the successive countries; and continued after with the free groups.

In constant communication with these groups or individuals, the IADF became the clearinghouse for information regarding their movements and informations, and was able to charter its own activities and interventions accordingly; it was also able to stimulate and advise numerous other associations, writers, journalists, who came to it constantly as a source for authentic information.

Of necessity, during these years, outside of the various educational activities, bulletin, the maintenance of its office as a center for information and a focus for Latin American democratic leaders and exiles coming to the United States, our activities in regard to human rights have had to be based on the evolving events and had to follow the struggle of our Latin American colleagues, as swiftly and resourcefully as was possible. Hence these 10 years have found the IADF involved in numerous and constant interventions, concerning the thousands, literally, of violations of civil and political liberties which were perpetrated by the dictator governments.

At the same time, we have pressed for constructive defensive and protective measures for human rights, in the Organization of American States (OAS), with governments, and in the United Nations, where our affiliation with the International League for the Rights of Man, a consultative nongovernmental organization, has been of inestimable aid.

Our interventions in the decade from 1950–60 have been too numerous to mention in their totality in this summary report. However, even a brief review of the cases to which we gave aid, and on which we protested to the intergovernmental bodies, or made other interventions directly to the offending government or other organizations, indicate how constantly it devolved upon the IADF to become the spokesman for the inarticulate victims of suppression in the Americas. We thus became an inherent constituent in each of these groups of exiled, imprisoned or minority groups, violated by their governments.

In our capacity as steward of the IADF, we wish to list herewith some of the violations of civil and political liberties in which we intervened, in one or a multiple of ways. Of necessity, the list is by no means complete; and the cases cited—all of which were detailed, extended, and necessitating authentication before action—disclose the virtual history of human arrests, tortures, exiles, and political indignities to which our colleagues and the American peoples have been subject in the last decade.

The agenda for this second conference was considered in six different commissions. I was a member of the commission having to do with political questions. The agenda and the reporters were as follows:

INTER-AMERICAN ASSOCIATION FOR DEMOCRACY AND FREEDOM, SECOND INTER-AMERICAN CONFERENCE FOR DEMOCRACY AND FREEDOM—AGENDA AND RAPPORTEURS

I. POLITICAL QUESTIONS

(a) The struggle for democracy in Latin America since the first conference of the IADF held in the city of Havana in 1950. Analysis of resistance struggles in Argentina, Colombia, Cuba, Honduras, and Venezuela. The diverse experiences; their plans and work. One representative from each country.

(b) Fortification and defense of the democratic regimes. Gonzalo Barrios, Raul Osegueda.

(c) The problem of dictatorship. Its causes and effects. Factors which menace democratic stability. Luis Alberto Monge, Daniel Oduber.

(d) The struggle to irradicate the existing dictatorships. Luis Alberto Monge, Daniel Oduber.

(e) The contribution of organized labor to the defense of democracy and freedom. Serafino Romualdi, A. Malave Villalba, Arturo Jauregui.

(f) The student movement in the defense of democracy and freedom.

II. ECONOMIC SOCIAL QUESTIONS

(a) Economic-social problems; economic development; stabilizing processes; just distribution of the national income; economic well-being of the peoples as a guarantee of democratic stability. Carlos A. Dascoli.

(b) Economic relations between the United States and the countries producing raw materials. Their political implications. Jose Figueres, Adolf Berle.

(c) The agrarian reform and the transformation of national economic structures. The resultant economic and political emancipation of the rural populations. Ramon Quijado, Clarence Senior, Marco Antonio Duran.

III. EDUCATIONAL AND CULTURAL QUESTIONS

(a) The crisis in education in America. Its repercussions on the political, economic, and social problems. Luis Prieto.

(b) Educational reform. Preparations for the exercise of democracy. Aureliano Sanchez-Arango.

IV. ASPECTS OF INTERNATIONAL RELATIONS

(a) Convention of human rights. Creation of the international court with power to guarantee the protection of these rights. Individual petitions before the court. Roger Baldwin.

(b) Study of the right of asylum and modifications on asylum for the military. Steps in the granting of safe conduct. Gonzalo Barrios.

(c) Revision and strengthening of the Organization of American States. Exclusion from membership of dictatorial regimes. Eduardo Rodriguez-Larreta, Gonzalo Facio.

(d) Creation of a system of consultative status for nongovernmental organizations in the Organization of American States. Robert Delson.

(e) Action of the United Nations delegations from Latin America and the United States related to the fight for democracy and freedom, peaceful cooperation, and economic-social progress. Andres Townsend.

V. COLONIALISM IN THE WESTERN HEMISPHERE

(a) Origins and development of colonialism in the Western Hemisphere. Its economic aspects. Its political implications.

The present situation of the colonial territories and peoples. Robert Alexander, Vicente Saenz.

(b) The anticolonial struggle. Various formula adopted. Self-determination as a definitive principle. Plans for the installation of democracy. Organization of democratic institutions; labor organizations; student bodies; professional societies; political movement and parties. Alliance of the progressive classes. Robert Alexander, Vicente Saenz.

VI. FUTURE PROGRAM OF THE ASSOCIATION

(a) Inter-American Association for Democracy and Freedom as a coordinating instrument of the democratic forces. Assurance of the necessary means to consummate an effective work on behalf of the aims of the organization. Reconstruction and creation of regional centers of coordination and work. Closer relations with the democratic movements with student and labor organizations. Frances R. Grant.

The most valuable part of the conference was in the informal conversations the delegates had with each other.

The main topics of conversation were Castro and Trujillo. I found no one who was happy with Castro but many who were disheartened by the directions Castro was taking. Everyone, without exception, desired Trujillo's early downfall. Dictators Stroessner of Paraguay and Somoza of Nicaragua were also criticized.

Quite a few delegates were opposed to any public criticism of Castro. Some thought his supporters in their own countries were needed in elections to be held soon. All were disgusted by his failure to hold elections and by his intimidation of critics.

On April 19, 1960, before I left Washington, D.C., for the conference, I sent the following telegram to Castro:

DEAR FIDEL: Later this week in Venezuela I shall participate in the Second Inter-American Conference for Democracy and Freedom. Among other things we shall be discussing democracy and freedom in Cuba. When will you arrange for free elections? When will you establish freedom of the press and encourage criticism? When will you oppose communistic tyranny with the vehemence you displayed against Batista tyranny? When will you enforce the terms of your own agrarian reform laws? These and other questions trouble friends of Cuba who appreciate the real progress your government has made in many important respects. I hope you will ask the Organization of American States to supervise elections to insure that they are free. I hope you will call upon the Inter-American Press Association to help establish genuine freedom of the press in Cuba. I leave for Caracas Thursday evening. It would be wonderful if I could carry good news from you to this conference of hemispheric leaders.

Sincerely,

CHARLES O. PORTER.

This was along the same lines as what I had said to Castro and had written to him last year. In all cases I received no response. Copies of this telegram, in Spanish, were distributed throughout the conference. At least eight delegates, previously unknown to me, stopped me at one time or another to shake my hand and express their agreement.

Because I had to leave early I do not have all the resolutions passed by the conference, nor is there space here to set them forth. However, one of the most significant reports was prepared by Adolf Berle and José Figueres. It is entitled "The Economic Relations Between the United States and Countries Exporting Primary Products." Its recommendations deserve careful consideration. Its text is as follows:

The economic relations between the United States and countries exporting primary products are only a part of a general problem of our time. It would be more comprehensive for purposes of study to speak of the relations between advanced and retarded countries, roughly dividing the world in two camps.

Indeed, Western Europe should now share with the United States the central position in the world economy, and the responsibility for the development of the poorer nations, to everybody's benefit.

Furthermore, should the cold war end, industrialized Russia would be in the same camp with the United States, Western Europe, and other advanced countries, while all the less fortunate nations would be the proletarian section of mankind.

What is happening in the international economy today is an approximate repetition of the course followed by each of the present industrial countries, internally, during the last 200 years. Minorities accumulated the scant wealth produced by whole societies. Minorities cultivated the arts and the incipient technology. More than social injustice there was, perhaps, lack of knowledge, and the work of the nation had a low yield. As the means to produce abundance were developed, there came, by coincidence or by necessity, the social forces that imposed a wider distribution of national income. This benefited the majorities directly. And as a consequence internal markets were enlarged, bringing about the present inducement to an ever larger production.

The drama is now being reenacted, not in the relations between rich minorities and poor majorities within the advanced societies, but in the economic intercourse between the few enriched and the many proletarian peoples of today.

There are many similarities between the historic social movement, now nearly finished within the advanced countries, and the new international economic struggle, now beginning. It is hardly necessary to stress the parallel. Rather, to diminish errors, we should point at the differences between the two processes, born from changing circumstances and time.

For example, savings and capital accumulation were relatively easy in Europe and the United States at a time when social aspirations had not been awakened, and when the tendency to consume was held in check by the political power of the well-to-do minorities. Today, the retarded countries that are trying to adopt or maintain democracy, have to cope with modern social pressures, exerted by the growing power of the majorities. Consumers are also voters, and this makes the national sacrifices of capital formation difficult.

If the countries of the Soviet bloc are saving a high proportion of their output, it is because their present rulers have as much political power to enforce capitalization as the rich minorities of the Western World had a century ago.

To such internal difficulties of capital formation in the underdeveloped democracies, one has to add the new international facts of economic life. Most of the poor countries (certainly all of the Latin American Republics) depend to a great extent on their primary exports, and experience a growing tendency to consume industrial imports. In this relatively intense external trade, they pay prices that represent the higher standards of the advanced countries, and in exchange they receive prices that reflect their own modest living. Buying dear and selling cheap in the world market does not make savings and capitalization easy for the proletarian nations of today.

When outside capital is invested in these countries, the lack of knowledge of international economics (more than a deliberate imperialism) allows investments to work as suction pumps, siphoning off most of the new capital created, into the investing countries.

This situation is maintained both by the ignorance or neglect of the ruling classes of Latin America, and by the power of the ruling classes of the richer nations. Government people assume that foreign investments are, per se, a substitute for local patrimony and the magic cure for all ills. Exporters in the poor countries, guided by the profit motive, are only interested in establishing a margin between local wages and export prices. They compete with one another, underselling, unmindful of the fact that they are exploiting their own peoples, to the short-range benefit of the richer nations. On the other hand, the businessmen of the advanced countries, checked at home by political and social forces, and taxed to pay for public services, find their power less fettered when they deal with the weaker peoples abroad. Laissez faire has been bridled within advanced Western societies, but it is still rampant in international trade.

The prophecy of Karl Marx, whereby the proletariat of the industrial nations would become relatively poorer as time went on, has not been realized because of the countervailing power acquired by the majorities in our contemporary democracies. However, in the international field, the prophecy may yet hold true. The only way to avoid a relative worsening of conditions in the underdeveloped world is to establish political and ethical checks on the power of the ruling classes, and to regulate international commerce. This requires economic knowledge and enlightened policies.

Internally, the advanced societies have adopted minimum-wage legislation and social security, out of an ethical criterion and out of economic necessity. The same reasoning should be applied to the commercial relations between the richer and the poorer countries. It is desirable to reduce the accumulation of the wealth of the world in a few nations, and also to widen the international markets for the products of modern technology.

The following suggestions might help in devising economic policies based on international solidarity, with a view to a harmonious development of the world:

1. Establish buffer stocks of the important primary commodities, and stabilize the international market. This should be done by the O.A.S. in our hemisphere, or by the U.N. in the world. In the absence of such stabilization reserves, encourage quota systems to avoid severe fluctuations. A stable income is the first requisite for development.

2. Encourage a gradual transfer of property of foreign investments to local ownership. Permanent outside ownership, when carried on in a large proportion with respect to local wealth, is a new unintended version of colonialism, with all its economic and political consequences. The retarded countries cannot acquire technology and managerial skill without ownership.

3. In trying to inject capital from abroad, give preference to loans whenever possible. Amortizing well invested credit is probably the best means of capital formation today. "Invest now and save later" seems to express the degree of restraint that modern consumers accept.

4. Do not oppose, doctrinarily, the concept that economic activities are social functions,

or that businessmen are really public servants. This concept is the best reconciliation for modern conflicting ideas on enterprise and ownership.

5. Do not be dogmatic on the issue of private versus public ownership. Most countries want, and probably need, a higher proportion of public enterprise than the United States has. Institutions should be expected to vary in different societies. Autonomous entities or authorities are the Latin American counterpart of U.S. corporations.

Devices such as the Corporación de Fomento in Chile, the National Banking System in Costa Rica, or, where appropriate, mixed companies like Volta Redonda Steel Corp. in Brazil, should be encouraged.

Foreign investments should be channeled toward the debt securities of such corporations.

6. Modern enterprises should be considered, among its other functions, as an instrument for the accumulation of capital.

Whenever possible, the economy should be so organized that the capital accumulated by enterprises, coming from profits made within each country, shall be added to its national patrimony, and therefore, shall remain available for the continuous development of that nation.

Where foreign corporations operate, arrangements should be made so that their profits (over and above a reasonable rate of interest distributed as dividends) should be capitalized locally, for the further growth of the country.

Due distinction should be made with profits made by such corporations outside the country in question.

Holdings of equity interest in such foreign companies by local individuals or institutions like pension funds and social security should be encouraged.

Foreign companies should pay their taxes to the nation where they operate, rather than to the country where they are incorporated.

7. Planning for the greatest attainable growth of the hemisphere should be carried on, either by the OAS or by ECLA.

Priorities should be established for the use of available credit.

Investments in educational, health, and social facilities should be considered as highly reproductive.

8. In planning, the Latin American continent should be subdivided into regions, as a step to an eventual overall economic integration. Among such subregions might be Mexico and Cuba; Central America, including Panama; the Bolivarian group; Argentina, Chile, Uruguay, Paraguay; Brazil.

9. To accelerate economic integration, appropriate credit should be made available to industries that cannot compete with their neighbors, so that they will transform themselves into other activities.

Thought should be given to a joint Latin American Reserve Bank, leading to a common currency.

The foreign exchange reserves of Latin America, if properly handled by a single Reserve bank, could be an important source of development funds.

Some sacrifice should be demanded in nominal sovereignty, to obtain the greater advantages of economic integration for Latin America.

10. The industrial countries of today should reduce in their own territory the activities that can be easily carried on by the less developed peoples, import the corresponding products from them, and so make it possible for them to buy the products of advanced technology or heavy industry.

This would lead such nations as the United States to a higher concentration of industry, a further reduction of agriculture, and a continued diminution of the working hours.

The financial cost of displacing anachronic activities should be carried by society at large, on the principle of insurance, and not only by the individuals or firms affected.

There would be, of course, a series of implications in adopting such a policy of international division of labor.

11. In dealing with governments, show disapproval of corrupt, dictatorial, or dynastic regimes. Encourage honest, legitimate government by delegation. It is inconsistent and illusory to try to match supposed economic efficiency with recognized political vice.

12. Enunciate some moral aspirations for the economic affairs of the world. For example: "International economic relations should be ruled by knowledge, justice, and solidarity. They should follow the principle of equal compensation for equal effort. They should be a means to world development. They should help all nations to attain high levels of living, education, health, and social well-being. They should foster civilization and peace."

Economic problems continue to beset Cuba. Free elections and individual rights could do much to speed and to secure the social and economic improvement so long overdue in Cuba and elsewhere in the hemisphere.

Castro is fatuous when he asks, as he did in his May Day speech, "Why is it considered that the only democratic governments are those elected by votes?" Mass demonstrations do not prove support any more than lynchings prove justice. Hitler had huge crowds screaming approval for him.

Is it too late for Castro to rescue the revolution? The government is still honest, there is no torture, nor have men convicted of treason been killed. Part of the agrarian reform seems to be working. Is it too late? I do not know. I hope not.

When I heard that Capt. Jesus Yanez, Castro's personal aide, had been arrested last week, I was saddened—as I had been previously when so many others like him had been fired, transferred, or forced into exile. Captain Yanez liked the United States, I am told. He wanted a number of Cuban officers sent to the United States for military training, as had been the custom in the past.

An extremely perceptive and balanced article by Karl E. Meyer, member of the Washington Post editorial staff, appears in the May 1960 Progressive. It is entitled, "Castro's Cuba." I agree with him that most Americans do have a "grossly distorted impression of what is happening in Cuba."

I also agree with him that Castro's alliance with Communists and fellow travelers "could lead to the betrayal of his cause."

The text of Mr. Meyer's article is as follows:

CASTRO'S CUBA

(By Karl E. Meyer)

(Karl E. Meyer, a member of the staff of the Washington Post, has been writing about Latin America for more than 3 years. In the fall of 1958, he spent 3 weeks in rebel Cuba and interviewed Castro in the Sierra Maestra. He recently revisited Cuba as part of an 11-county tour of Latin America. The series of articles he wrote during his hemisphere swing received a citation for excellence from the Overseas Press Club of New York.)

Perhaps not since the days of the late Senator Joseph McCarthy has a wild-swinging politician so stirred the public prints as has Fidel Castro. He may be the State Department's nightmare, but he is the newsman's godsend. Scarcely a day goes by without a new sensation, a fresh impudence, a bizarre event—all somehow connected with Castro and all grievously discomfitting to an Eisenhower administration seeking to live out its final months in some semblance of dignity.

The kind of anarchistic tumult on which Castro thrives is utterly foreign to the solemnities of state as conducted elsewhere. Only in Cuba, it is safe to say, would a Spanish ambassador—and a nobleman, at that—become so enraged by a speech that he would burst into the television studio, snatch the microphone from a head of government, and shout an angry rebuttal on the spot.

Little wonder, then, that there is such widespread perplexity about a revolution whose leaders are themselves confused in purpose and action. Small wonder, too, that many Americans are irritated by the intemperate attacks from Havana and that Members of Congress are urging everything from a punitive cut in the Cuban sugar quota to direct military intervention.

Such suggestions are not wholly frivolous. There is no doubt a danger exists that a country only 90 miles from Florida may become a captive of the Communist bloc. It is equally unarguable that Fidel Castro has proved a bitter disappointment to many of those who hoped he would foster democratic methods as well as bring economic reform.

Yet the feeling is widespread among those who have followed Cuban events that it would be a disastrous mistake for the United States to intervene, by either military or economic means, against the vexatious leader of a turbulent revolution. The reasons have less to do with Fidel Castro than with the Cuban revolution which, by a trick of fate, he is leading.

Few Americans are aware of the realities of Cuban life. They remember the *Maine*, but little else about an island that owes its independence to the assistance of the United States a half century ago. But the Cuban people know all too well that the island's independence has been more apparent than real, and that until Castro's seizure of power, the Republic was for the most part an economic vassal of the United States. "The Republic of Cuba," goes an old saying, "is as independent of the United States as Long Island."

A few figures tell the story. Between 1920 and 1940, more than two-thirds of Cuba's sugar production was in foreign hands, and sugar is the island's prime source of wealth. On the eve of Castro's takeover, as much as forty percent of the sugar production was controlled by Americans. Almost all the island's key industries—telephones, power, railroads, mines—were likewise controlled from abroad. Even the gambling casinos in the Batista period were dominated by the American underworld.

All this might have been bearable if the policies of the island's overseers had been generous and just. But too much of Cuba's wealth vanished abroad, or into the pockets of politicians, or wound up in endless projects to beautify Havana while the rest of the island festered in neglect.

Add to this the thuggery of the Batista regime—and of the Machado regime before that—and it is apparent why the old order wears such an ugly look. A visitor to Cuba must brace himself for tales of horror—of humans roasted alive, of eyes gouged out, of midnight shootings, of scarlet cells—and the most terrible part is to find that so many of the stories are demonstrably true. Lieutenant Colonel Esteban Ventura, the "Himmler" of Batista's police, now in comfortable exile, was an apt pupil in an ancient art.

And by a wry caprice, the economic foundation of the old order was sugar, the most toothsome article on the dinner tables of the world. From the swanky homes in Havana, to the impoverished shacks of the guajiros on the plantations, Cuban society

has been governed by a single, consuming purpose; the production of about six million tons of sugar every year. Every aspect of Cuban life has been shaped in some degree by the dictates of sugar: the roads and trains routed to the convenience of the mills, the land tenure laws tailored to the needs of the sugar plantations, the politicians governed by the interests of the sugar barons.

In a real sense, the Cuban revolution has been a revolt against sugar as much as against Fulgencio Batista.

The slender cane from which sugar is produced can be grown cheaply and plentifully in vast stretches of the tropical and semitropical world. Sugar-producing beets can be cultivated on a slightly less economic basis in temperate climates. The problem is not to encourage sugar production, but to restrict it, lest all the producers be ruined by disastrously low prices.

Over the years, sugar growers have learned to control the fecundity of their crop by a combination of special subsidies, crop restrictions, and import quotas—devices which have made the sugar industry the model of a private cartel backed by the sanctions of government. One lone statistic provides a measure of the cartel's success: only 10 percent or less of the world's sugar production is sold on the free markets of the world.

In the United States the sugar market is divided between the domestic cane and beet producers and Cuba, Hawaii, Puerto Rico, and the Philippines, each with its carefully apportioned share. Cuba enjoys a preferred position for special reasons. First, the 3 million tons sold by Cuba in this country are vital to the eastern seaboard of the United States. Second, there has been a historic friendship between the countries which was strengthened during World War II when Cuba increased its production to aid a sugar-starved United States.

Thus, Cuba has gained a guaranteed share of the American market, certain tariff preferences, and a premium price of about 5 cents a pound rather than the going world rate of about 3 cents. The reason the domestic price is higher is because of various subsidies awarded to American sugar growers as a means of limiting production. All this is carefully worked out in legislation so complex that on one memorable occasion Chairman HAROLD COOLEY of the House Agriculture Committee told his colleagues that his sugar bill could not be simply explained and that they would have to take on faith his estimate of its merits.

The prime beneficiaries of the system are about 25,000 sugar-beet growers, most of them in our Western States. These are the farmers already in the magic "producers' circle" who are allowed to grow a given quota of sugar beets because of a past history in cultivating the crop—and the sugar beet is a plant that can be grown on idle land as part of crop-rotation cycles. On the whole, the members of the circle are content with the present system, years in the making. Merely the suggestion of a change, reports the Wall Street Journal, "fills most American sugar men with horror." Their fear is that a cut in Cuba's quota would dislocate the system, spur temporary overproduction, start a tug-of-war with foreign producers such as Brazil (now without any share of the U.S. market), and—unavoidably—attract attention to a cozy arrangement which has more political than economic justification.

Doubtless the sugar laws have been kind to the domestic beet producers. What about Cuba? Here the system's virtues are more ambiguous. It is, of course, true that Cuba has enjoyed an enormous advantage in having an assured annual market for half its major crop at premium prices. But, paradoxically, the very profitableness of the system has served as a barrier against economic change and has contributed in a perverse way to keeping the island yoked to a single-crop economy.

Given an assured income at inviting profits, why should the island's sugar owners want a change? To be sure, a little social vision might have taught Cuba's rulers that change was desirable—but social vision was precisely what was most lacking among the masters of the old order.

Moreover, one price that Cuba paid for its quota was the maintenance of a protected market for U.S. goods, thus inhibiting the development of local industries. The tariff which Cuba levies against incoming goods is subject to bilateral negotiations under the Reciprocal Trade Act—but Cuba's sugar quota can be altered unilaterally by the United States. And in this country, Members of Congress have learned to heed the nudges of the sugar beet lobby. This explains why the Cuban share of the American market is actually smaller today than in the 1920's, despite a 40-percent increase in total consumption. It also helps to explain the chronic adverse trade balances in Cuba, totaling about $1 billion in the past decade.

Sugar, in short, has been as relentless a despot as Dictator Batista, an economic master that has benefited a few while most of the people have remained in comparative squalor. Some of Castro's chieftains have gone so far as to charge that the sugar quota is a deliberate device to enslave the Cuban people. This is an outrageous distortion. Nonetheless, in all fairness, Americans ought to make an effort to understand why the present system—outwardly so favorable to Cuba—has had regressive effects on its economy.

Concentration on sugar lies at the core of Cuba's ailments. Except during the brief harvest seasons, total unemployment on the island runs as high as 20 percent of the labor force. Despite its rich land resources, Cuba remains an importer of even such staple items as rice. And in an era when mass media conveys a new vision of affluence, the chasm has widened between the very rich and very poor.

Here, in sum, is the tinder of social revolution—rising expectations coupled with debasing poverty, colonial servility at a time of awakening nationalism, corrupt and despotic government in the age of the Four Freedoms. An explosion was building up, and it came on January 1, 1959, when Fidel Castro rode to power on the crest of a mass revolt against a shabby status quo.

"Be Brief. We Are 50 Years Behind." So reads a sign over the desk of a busy functionary in the Castro regime. Its impatient message suggests both the virtues and failings of what is surely the most unusual government in the world.

Tales are legend of the confusion, or, more accurately, exuberant disorder, that animates Castro's reign. A believer in on-the-spot decisions, the "maximum leader" journeys up and down the island on an unpredictable schedule, tossing out commands on the march. Once, when he was busy with the promotion of tourism, he surveyed a hill outside of Havana and noted with satisfaction: "An excellent place for a tourist motel." The observation was duly noted and construction began forthwith. When the motel was complete—gleaming swimming pool and all—it was found that not a drop of water was available.

A correspondent tells of a visit to the National Institute of Agrarian Reform (INRA), the chief instrument of revolutionary reconstruction. He was interviewing INRA's director when a messenger came from the National Bank to pick up a check for $100,000. Confusion and dismay; a cluttered desk was quarried until the check turned up. At this point a schoolteacher walked in carrying a paper bag full of coins contributed by his pupils for agrarian reform. All work stopped and, with appropriate ceremony, the bag full of coins was emptied on the director's desk and all present began laboriously toting up the students' mites.

"You can be amused by things like that," the correspondent said, "but you really can't work up a good hate and write them all off as a bunch of Reds."

This is the appealing side of the revolution, the mixture of youth and enthusiasm and undoubted honesty and a sense of mission. These qualities help explain why after nearly 18 months in power Castro still commands the support of about 80 percent of the Cuban people. To an American, the techniques of government may seem grotesque, even repugnant—the endless TV monologues, the cult of the beard, the beatnik aura, the crack of the firing squads. But to many Cubans they signify a clean break with an unlamented past, and it is perhaps on this ground that some of the unorthodox means can be justified.

More than that, Castro has produced results, even if his methods can be dismayingly arbitrary, and for once the underdog Cuban is convinced that he has a government that is not only honest, but cares.

The heart of the program has been agrarian reform aimed at freeing Cuba from its unhealthy dependence on sugar. With a rush of activity, INRA has fostered the production of rice, corn, peanuts, cotton, beans, and potatoes. Some 700 cooperatives and 1,400 people's stores have been created, and INRA now administers 109 business establishments worth about $235 million. According to the usually reliable Wall Street Journal, from which these statistics are taken, INRA has intervened (i.e, seized control on a supposedly temporary basis), expropriated, or confiscated about 13.4 million acres of land—an area almost half the size of Cuba.

Doubtless many of the INRA projects are of dubious efficiency, the tactics of intervention are frequently arbitrary, and the compensation offered for expropriated lands (20-year government bonds payable for the amount the property is assessed for tax purposes) is inadequate; yet a substantial beginning is being made in overhauling a sick, one-crop economy. Whatever happens to Castro, it is unthinkable that Cuba will revert to its somnolent old order. For good or ill, Castro has released energies on the island which will influence the direction of Cuban politics for years to come.

Schools have sprung up throughout the island; hospitals and roads have lifted some of the darkness from the rural back country; with a single Draconian decree, Havana's notoriously high rentals have been reduced 30 to 50 percent; a national lottery has financed the construction of new homes; in a burst of energy, Havana's drab airport was overhauled in about 2 weeks and has become a striking gateway to the island; agrarian reform has been relentlessly pushed. Perhaps most significant is the change in the popular attitude from fatalistic cynicism to collective enthusiasm for a massive reconstruction of Cuban life.

Fidelismo may seem the quintessence of zaniness to a puzzled Norteamericano, but to a Cuban who sees all about him tangible evidence of change it makes a good deal of sense indeed.

Affirmative achievements, however, do not make exciting news copy—a people's morale, after all, does not fit into the orthodox who-what-where-when wire service lead. Dr. Castro's personal excesses and demagogic attacks lend themselves more readily to headline treatment, with the result that most Americans receive a grossly distorted impression of what is happening in Cuba.

Cubans are bitterly and understandably critical of the American press for its negative approach and alleged bias. Certainly there have been damaging, even vicious,

distortions of fact in the press and on radio and television. But the disquieting fact is that, even if press accounts of Cuban events tell only part of the truth, it is nonetheless just that—partly true.

A visitor in Havana does not have to travel around the city for long without feeling the tension and near-hysteria in the air. Children playing baseball on the streets chant "Paredon! Paredon!" ("Against the wall.") when the shortstop commits an error. Rumors seem to travel at supersonic speed. Mere accusation of counter-revolutionary heresies can be sufficient to condemn.

If the fevered state of opinion can be excused as the natural consequence of social revolution, the means by which passions have been aroused can find no such justification. Last October, Castro first began using what could be called the medium-size lie to inflame his followers. The occasion was a leaflet raid on Havana by a Florida-based plane. This was clearly a serious affront, but Castro's oratorical alchemy soon transformed the incident into a "bombing attack" and it was implied that Cuba had suffered an infamy comparable with Pearl Harbor. No responsible Cuban to whom I talked really believed that bombs were in fact dropped. Instead, the prevailing theory was that Castro needed a sensation to divert attention from the purge of a well-known anti-Communist within his own ranks.

Since then, the whoppers have multiplied. A ship blows up, scores of persons are killed, and the response is almost Pavlovian: the United States is to blame.

This progressive disregard for truth has been coupled with an increasing impatience with dissent. Few principles were more frequently invoked by Castro's rebels in the mountains than that of freedom of the press. In theory, such freedom is said to exist in Havana. But in practice, it is a brave editor who dares to tweak Dr. Castro's beard and risk the denunciation over television which is likely to follow. Any editor, furthermore, who has the audacity to publish a dispatch which members of his staff may feel is insufficiently flattering of Castro can be forced to append a footnote labeling his own paper as a purveyor of lies.

Invariably, the sad legacy of dictatorship is disorder and confusion. But in Cuba's case, it is especially troubling that so many of the institutions which can shelter dissent and cushion the state's impact are now weakened and discredited. Cuba's press was never a model of honesty and has scant moral authority to criticize the revolution. The island's universities were shuttered for so long during the revolution that precious continuity has been lost. The Catholic Church, which elsewhere in Latin America as been in the vanguard of of revolution, played a much more timid role in Cuba. The old political parties come to court with soiled hands. The armed forces and civil service have been shattered by the revolution.

As a result, there have been few obstacles to the spread of state authority. Cattle lands, yacht clubs, foreign firms, and newspapers have all been seized by Castro's ubiquitous agents. However, high-minded the announced goal, the methods smack of the very dictatorship that Castro has deplored.

This, too, could perhaps be excused on the grounds of excessive revolutionary fervor except for the final and potentially most dangerous item in the brief against Castro: his government's worrisome tolerance for Communists.

To anyone who has followed Cuban events, it seems incredible that Castro should have yielded so much to the men at the farthest left. Until the closing days of the revolution, the Cuban Communists remained aloof from the rebels. The party's past collaboration with the Batista tyranny was an open scandal. Yet Castro has badly compromised his revolution by an alliance that could lead to a betrayal of his cause.

One reason for the Communist ascendance has been the powerful influence of Castro's brother Raul, head of the armed forces, and of Ernesto (Che) Guevera, the Argentine physician who now directs the National Bank. Both men are zealots with an impassioned hatred of the United States that can perhaps be understood only in clinical terms. But they have their hands on the levers of power and have been dismayingly successful in pruning out the moderates who once were part of the Castro circle. Each purge means that Castro's personal clique becomes more extreme, more removed from the realities of Cuban politics, and more committed to a course that can mean catastrophe for Cuban-American relations.

Few believe that Castro himself is a Communist. But Castro could well find himself surrounded and outflanked by a group he originally felt he could control. The Communists, unlike Castro, have a clear sense of purpose and know exactly what they want: control of the government or a policy sufficiently extreme to force direct U.S. intervention. A leading Cuban Communist puts it candidly: "We will give them back Hungary three times over."

Thanks to the enterprise of the American press, the dark side of the Cuban revolution is well known. But the press has been notably less enterprising about describing with equal vividness the reasons why Castro's revolution has overwhelming popular support. To a casual reader, the headlines about Cuba convey the impression of a country ruled by madmen and crypto-Communists who are perversely ungrateful to their rich uncle next door.

What the newspapers fail to add is that shin kicking and brazen behavior were and are part of every important revolution—including our own. If the Cubans have been insufficiently sensitive to property rights, the same charge could be made against the American patriots who took over the lands of outraged Loyalists. If the Cubans are cockily nationalistic, it is worth recalling that "Don't Tread On Me" was the provocative slogan of our young Republic. If the Cubans are flirting with a totalitarian foreign power, so did some American patriots who looked benignly on the Jacobins and the Terror in France.

By their very nature, revolutionaries are a difficult lot to deal with—whether in Egypt, Iraq, Mexico, or Algeria. The task of statesmanship is to look beyond the irritations of the present to a calmer future when tempers have subsided. This is what Franklin D. Roosevelt did in the 1930's when the Mexicans were busy seizing oil properties, parceling out land, and harassing the Catholic Church. Because of the restraint shown then, relations between Mexico and the United States are today a model of amicability.

To his great credit, President Eisenhower has sensed this need and has maintained an admirable calm about Cuba while others are calling for an end to "appeasement." In the Cuban context, "appeasement" is a highly misleading word since it implies a craven surrender of principle in the face of a bully with a stick. It is evident to all the world that this country could squash the Cuban revolution by a few rudimentary military and economic measures. But to retaliate against Castro now would be merely to confirm the stereotype of Marxists everywhere (but especially in Latin America) of an imperialistic giant bent on imposing its will on a small and helpless nation.

Rather, Mr. Eisenhower's approach seems to be to wait until Castro's own recklessness proves his undoing. Despite a much-publicized trade agreement with Russia, the Cuban economy is in difficult straits. Shortages are already causing restive complaints as import controls cut the inflow of consumer goods. Given time, the wooliness of some of Castro's economic theories should become readily apparent to the Cuban people themselves.

When—and if—this occurs, the United States might be in a position to help out on those programs in Cuba which deserve support. Whatever the differences with Castro, this country would be foolish to appear to oppose a revolution still rich in promise, no matter how erratically it sometimes wanders off its course. To do otherwise would be to place the United States in the position of opposing schools, hospitals, land reform, and industrialization, as well as the hotheads who reign in Havana.

The problem confronting the United States is not an easy one. But Gov. Luis Muñoz-Marín of Puerto Rico (who has no reason to love Castro) has stated the approach that may yet bring both countries to safe harbor. "The United States ought to display to Cuba," Marín urges, "the forbearance that greatness shows to immaturity."

Bertram B. Johansson, Latin American correspondent of the Christian Science Monitor, was present at the conference. His article in the Monitor, April 29, 1960, provides a good summary of the second conference. As for the resignation of Professor Hays, I hope he will reconsider. We need men like him in a forum like this.

I saw no "apparently conscious reluctance" by any delegate with respect to the discussion of "Communist issues." But even if this reluctance eluded my non-Spanish understanding obversations, there is all the more reason to participate with proven hemispheric leaders in sharpening and elucidating all issues having to do with freedom and democracy.

It was a good conference. I hope that the Third Inter-American Congress on Democracy and Freedom will meet again to grapple with the great problems of representative government in a world of change.

Mr. Johansson's article is as follows:

LATIN AMERICAN LIBERALS STIR

(By Bertram B. Johansson)

CARACAS, VENEZUELA.—Hemisphere liberals meeting here for 4 days at the second Inter-American Congress on Democracy and Freedom to discuss Latin American problems have provided a vivid demonstration of the acuteness and complexity of the area's ideological and economic tensions.

The conference has shown the Latin Americans' deep preoccupation with dictatorships—to the exclusion of communism as an issue—need for economic and land reforms, disinclination to render judgment on Premier Fidel Castro's Cuban revolution, remoteness and almost complete isolation of the area from East-West cold war struggles.

Some 200 delegates consisting of liberals, Socialists, and Christian Democrats mainly from Latin America, with only a handful of North American delegates, have a majority vote for the numerous resolutions.

For the first time with such hemispheric solidarity men from all Latin-American nations and the United States have condemned the older remaining dictatorships of the Dominican Republic, Haiti, Nicaragua and Paraguay. It was the fierceness of their determination that dictatorships should be expelled that impressed observers.

Nearly every one of these men either as Latin Americans or North Americans who sheltered the Latin Americans in their days

of exile had been touched by a dictator's brutality in Venezuela, Peru, Argentina, Colombia, Brazil, Cuba.

SANCTIONS BACKED

As the delegates concluded the conference in this combined industrial center and vacation resort, President Betancourt of Venezuela urged in a letter to President Lleras Camargo of Colombia to form a solid front in requesting the Organization of American States to take up the question of the Dominican Republic's part in Gen. Castro León's abortive rebellion against the Venezuelan Government at San Cristóbal last week. It appeared here that Venezuela would have ample evidence to prove the Dominican Republic's involvement.

The conference also approved resolutions favoring:

Diplomatic and economic sanctions against remaining dictatorships.

Strengthening of OAS to deal with dictators.

Recognition as a just desire the aspiration of less-developed countries to acquire gradually and by legimate means property of such foreign firms as they may wish to own locally.

Stockpile stabilization of the international market of raw materials.

Support for Panama's desire for sovereignty over the Canal Zone.

Condemnation of colonialism in the remaining British Dutch, French, Carribbean countries.

A convention to allow suing of dictators outside their country.

The conference was remarkable also for what it was disinclined to state formally either on the issues of Cuba or communism.

CONDEMNATION WITHHELD

Ironically, while the government of President Betancourt, an honorary president of the Inter-American Congress, sought to maintain order in nearby Caracas as leftists and Communists rioted sporadically over several days in the streets, the majority of Latin Americans at the conference consciously refrained from condemning the Communists. This reluctance to allow even use of the term communism in any conference resolution—which reluctance President Betancourt does not share since as he has charged publicly the Communists are trying to undermine his government—harks back to the days when now overthrown dictators used communism as an issue against anyone they wished to dispose of.

Such use of communism as an issue seems like international McCarthyism to many Latin Americans even though they often realize Communists are in their midst.

CUBA STAND AVOIDED

The conference ended without any declaration of a stand on the Cuban issue, partly out of deference to the host country of Venezuela where President Betancourt has an internal political problem.

The President is believed to have something less than warm sympathy for the drastic methods of the Castro government, though the left wing of his Acción Democrática party is pressing him hard to show more public ardor for the Cuban revolution.

Even as the conference was in session, the Cuban radio ranted with violent criticism of President Betancourt who, in an opening conference speech, urged condemnation of dictators and questioned countries not allowing free elections.

When liberal scholar President Lleras Camargo of Colombia in the United States recently said the same, the Cuban radio vilified Senor Lleras for 3 hours, raising the question as to whether he is a real champion of the Americas as President Eisenhower had suggested.

Another serious conference issue was precipitated when Paul Hays, an American delegate, resigned from the U.S. Committee of the Inter-American Association for Democracy and Freedom. Mr. Hays is Nash professor of law at Columbia University and lecturer on labor law.

He had been warned by AFL–CIO labor leaders in the States not to attend this conference because it was their impression—whether correct or not—that the invitation to the conference implied that one would not bring up Communist issues.

After noting the apparently conscious reluctance of Latin American delegates to discuss the issue, Mr. Hays issued his resignation to bring attention to this reluctance.

THE DEPRESSED AREAS BILL

Mr. WIDNALL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include extraneous material and a table.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. WIDNALL. Mr. Speaker, recently at the request of some of the Republican members of the Banking and Currency Committee, the Department of Labor prepared an up-to-date tabulation of industrial areas which presently would be eligible for Federal assistance under the criteria of the depressed areas bill as reported by the committee. This is the tabulation which shows that now New York City and Philadelphia would be classed as depressed areas. Under the terms of the bill it would be mandatory that the administrator so designate them. Mr. Speaker, in order that all Members may have the benefit of the information contained in this latest tabulation from the Labor Department, I include it at this point in the RECORD:

Tentative list of areas that may qualify for Federal assistance as areas with substantial and persistent unemployment under various legislative proposals, March 1960 [1]

[1] This listing is preliminary and tentative, and is based largely on bimonthly or semiannual data compiled from area labor market reports prepared in connection with the Bureau of Employment Security's program for the classification of areas according to relative adequacy of labor supply. Data used cover a 2-to-5 year period, generally extending through January 1960. Later data, now becoming available for some areas, could result in several changes in the above listing. A more comprehensive review of area data on a monthly—rather than bimonthly or semiannual—basis, and in the light of whatever criteria may be included in the bill finally enacted, would be required to determine which areas are eligible for assistance as areas with substantial and persistent unemployment.

[2] Major areas are areas included in the Bureau of Employment Security's regular area labor market reporting and classification program. This program covers 149 of the country's leading employment centers. Unemployment and labor force data for these areas are generally available on bimonthly basis.

ATTACHMENT TO MARCH 1960 TENTATIVE LIST OF ELIGIBLE AREAS UNDER PROPOSED AREA ASSISTANCE LEGISLATION

SUMMARY OF ELIGIBILITY CRITERIA USED

The administration (Kilburn) bill (H.R. 4278):

1. Unemployment is now 6 percent or more of the labor force, discounting seasonal or temporary factors.

2. The annual average unemployment rate in the area has been—

(a) At least 50 percent above the national average for 4 of the preceding 5 calendar years.

(b) At least 75 percent above the national average for 3 of the preceding 4 calendar years.

(c) At least 100 percent above the national average for 2 of the preceding 3 calendar years.

The Douglas bill (S. 722) as passed by the Senate:

1. Unemployment is now 6 percent or more of the labor force, discounting seasonal or temporary factors.

2. The annual average unemployment rate in the area has been—

(a) At least 50 percent above the national average for 3 of the preceding 4 calendar years.

(b) At least 75 percent above the national average for 2 of the preceding 3 calendar years.

(c) At least 100 percent above the national average for 1 of the preceding 2 calendar years.

Spence bill (S. 722) as reported by House Banking and Currency Committee:

1. Unemployment in the area has been—

(a) At least 6 percent during 18 of the preceding 24 months.

(b) At least 9 percent during 15 of the preceding 18 months.

(c) At least 12 percent during the preceding 12 months.

PAY RAISES FOR POSTAL AND CLASSIFIED FEDERAL EMPLOYEES

Mr. TRIMBLE. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. DINGELL] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. DINGELL. Mr. Speaker, a major "must" item of legislation before the 86th Congress is the enactment of a much needed wage increase for postal and classified Federal employees.

I have introduced an appropriate bill—H.R. 11591—which would accomplish this end.

We read daily in the newspapers about the gains made through collective bargaining by American workers. According to the best available information, the average collective bargaining agreement signed thus far in 1960 calls for more than an 8 cent an hour wage boost. Last year the increases were about the same and in 1957 they were larger. Even in the recession year of 1958, unions succeeded in getting increases for their members. It is commonly agreed by responsible observers that these wage increases helped to shorten the recession and prevented an even deeper setback than the economy suffered in this worst of postwar recessions.

But postal and classified Federal employees do not have the power to bargain collectively. We have denied them this right and consequently they have received only one wage increase in almost 5 years. They must petition Congress to give them equitable and fair treatment. I am sorry to say that we have not done right by them and the other Government employees. This is regrettable, not only because we have been less than fair with the devoted public servants, but the whole economy may suffer by this action.

An efficient postal service is essential for the operations of the economy. Similarly, the welfare of the economy and millions of people depend upon the contributions made by the other Federal employees. Our commerce and farming, for example, are highly dependent upon the services of the weatherman. The lawyers and economists in the Justice Department prevent monopoly from running rampant. And it is ironic that the clerk and statistician who compute the rising cost of living in the Department of Labor make it possible for millions of other workers to have their wages adjusted, while the salaries of the Government employees who prepare these data remain stagnant.

Common fairness and the needs of the economy require that we treat the postal worker and the other classified Federal employees squarely. It should be axiomatic that the Federal employee is entitled to share in the general rising productivity of American industry to which he contributes so significantly. But in past years we have allowed the wages of postal and classified Federal employees to deteriorate. The record will also indicate that we are not treating all Federal employees alike. Blue-collar workers whose wages are adjusted at least every year on the basis of increases paid to employees in private industry have received about twice the increases paid other Federal employees during the past decade. In the last 6 years the President has vetoed three wage increases voted for postal employees, and two wage increases for classified Federal employees.

The latest statistics on unemployment are disturbing. The coming of spring has not arrested creeping unemployment. Soft spots are developing in the economy. The accumulated inventory of cars is the highest in history. The best way by which we can strengthen the economy and gain real prosperity is by bolstering the purchasing power of the American consumers. An increase to postal and classified Federal employees would, therefore, serve not only the interests of justice but is also essential for a prosperous and growing economy.

I cannot urge too strongly the enactment of this legislation.

COLLECTIVE BARGAINING

Mr. WOLF. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. WOLF. Mr. Speaker, there are few subjects which have received more thoughtful attention in recent years than the cost of health care for average families, and the future of collective bargaining between our great corporations and our big labor unions. Both these subjects, as we all realize, have been given thoughtful and sometimes heated attention by Members of this House as well as by the American people as a whole. That attention has been directed so steadily at these subjects, because

they go so directly to the heart of America's well-being. At a time when we are being challenged by totalitarian forces throughout the world, we have been concerned as a nation with the well-being of our own domestic institutions. I suppose that at various times, we have all asked ourselves: Is the collective bargaining process efficient and fast-moving enough to meet the complex problems of our modern economic society? Can we, without resorting to some undesirable form of socialized medicine, find the way to provide proper medical care for our people?

It is because so many thoughtful people have been asking this sort of question that I was particularly pleased to read in the newspapers only a few days ago about the new contract negotiated by the Communication Workers of America, an affiliate of the AFL–CIO, with the Northwestern Bell Telephone Co., a subsidiary of American Telephone & Telegraph Co.

This new collective bargaining agreement, reached without any threat of work stoppage or lockout, demonstrates to me the great vitality and flexibility of the collective bargaining process in America. We hear so much about the occasional breakdowns of collective bargaining—we hear so much about the threat to strike, or to close down operations—we hear so much about the advantages and disadvantages of government intervention in industrial disputes—that I for one find it particularly encouraging when responsible leaders of labor and management find it possible, without undue fuss or feathers, to write a new collective bargaining agreement covering many thousands of workers and their families.

So, Mr. Speaker, I want to call attention to this contract as a symbol of the way that democratic collective bargaining is supposed to work in this country, and to remind my listeners that this CWA–Bell Telephone agreement is far closer to the ordinary pattern than the more widely publicized strike or lockout. If CWA and the telephone company had not reached agreement before the old contract expired, we would today be reading about it in the press, and hearing it on radio, and seeing it on television. Millions of Americans and millions of people in other lands would be much more acquainted with the facts, if there were no agreement and a strike had resulted. Let us, I suggest, pay proper attention to the beneficial ways in which our economic and social system works; for then we can get a more understanding impression of our real strengths.

Mr. Joseph Beirne, the president of the Communications Workers, was quite correct when, in a press statement, he interpreted the new agreement between the union and Bell as a form of answer to the Communists, who leave no stone unturned, and no radio way unmolested, in their efforts to blacken the reputation of democratic America before the rest of the world. This telephone contract, reached on April 30, at Omaha, is indeed a signal answer to this Communist propaganda, for it demonstrates with clarity that free management and free labor can indeed work together for the common welfare. That is what Lenin, the father of the Russian Revolution, used to call a "stubborn fact," and the Russian Communist propagandists would be ill-advised to overlook this stubborn fact. It is one of the measures of our basic strength. Indeed, I suspect that when Premier Khrushchev goes around making his Baron Munchausen type of prediction that our grandchildren will be living in a Communist system here in America, he is overlooking or ignoring the type of stubborn fact about constructive labor-management relations symbolized by this CWA contract with Bell.

There is another aspect of this collective bargaining agreement which I believe deserves thoughtful attention. I refer to the provisions providing for substantial major medical insurance not only for active employees of the Bell System and their families, but also for retired employees and their families.

First, I should like to point out to those enemies of collective bargaining who interpret it as merely a collusive arrangement between power blocs, that this agreement provides tremendous benefits for retired workers. Now remember, first of all, that there was no compulsion to care for this group of people; they are no longer active in the union; they do not pay dues to the union; they have little or no influence on the day-to-day activities and policies of the union. Nevertheless the union and the company recognized their mutual responsibility to this important group of senior citizens now enjoying the reward for their years of service.

At every age, the American wage earner today is haunted by the threat of costly, indeed staggeringly costly, expense of medical care in cases of long, drawn out, or catastrophic types of illness or disability. When illness lasting months or years strikes the average family, financial reserves—even in the thriftiest family—can be quickly exhausted. Among pensioners, where income is apt to be reduced and the danger of illness or disability greater than average, that burden can be a ghastly thing.

So, when a union and a company employing thousands of Americans, make provision in their collective bargaining agreement for protection against this type of family catastrophe, I say they deserve the support and the plaudits of every responsible group in the national community. This is collective bargaining at its best. This is collective bargaining designed to protect the individual, designed to provide him with self-reliance and self-help, designed to spare the community extra burdens which many cannot afford.

Obviously, collective bargaining arrangements of this sort do not take the place of legislative action. No enterprise is as large as our Government, no community as all encompassing at the Nation itself. The sort of health insurance provided in the CWA contract with Bell shows how much can be done through individual initiative coupled with group responsibility and imagination. Mr. Speaker, we need legislation to provide Americans, and particularly senior-age Americans, with decent health care under financial conditions which preserve family life and individual dignity. I say that the contract between the communication workers and the American Telephone & Telegraph Co. should spur us, in this great legislative body, to move more quickly, more determinedly to find the proper, realistic solutions to this great problem that concerns so many of our citizens.

As we seek solutions that will be workable and beneficial, let us thank the two parties in these precedent-making collective bargaining conversations for meeting their responsibilities as good citizens, concerned not only with the welfare of partisan groups but with the greater interest of the entire community.

PROTESTANTS AND OTHER AMERICANS UNITED FOR SEPARATION OF CHURCH AND STATE

Mr. PRICE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include extraneous material.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. PRICE. Mr. Speaker, my attention has been called to an unfortunate reference in an article which I inserted in the RECORD on April 26, 1960, and to which, in my opinion, justifiable exception has been taken by representatives of Protestants and Other Americans United for Separation of Church and State.

I today have requested unanimous consent for the deletion of this objectionable reference; and at this time I ask further unanimous consent that a letter which I received from Mr. Glenn L. Archer, executive director, of the above-named organization, be printed in the RECORD.

The letter follows:

PROTESTANTS AND OTHER AMERICANS
UNITED FOR SEPARATION OF
CHURCH AND STATE,
Washington, D.C., April 29, 1960.

Representative MELVIN PRICE,
House of Representatives,
Washington, D.C.

DEAR MR. PRICE: My attention has been called to an article by Glen Soellner, taken from the St. Louis Review of March 25, 1960, which you inserted in the CONGRESSIONAL RECORD of April 26.

I was quite astonished to see the following paragraph in this article taken from the St. Louis Catholic Journal.

"The Klan, the Hitlerites, the Communists, and the johnny-come-lately POAU (Protestants and Other Americans United for the Separation of Church and State) are all dangerous, Colonel Griffin observed. But he is opposed to suppressing such organizations."

POAU is a national organization with about 100,000 supporters from Protestant, Jewish, Catholic, and independent religious groups in the community, all banded together to preserve the separation of church and state. Its three top officers have been presidents, respectively, of America's largest Protestant denominations, Baptist, Methodist, and Presbyterian.

If you will read the current, May 10, issue of Look magazine you will see the organization defended against abuse by two of America's leading Protestants, Dr. Eugene Carson Blake of the Presbyterian Church and

Bishop G. Bromley Oxnam of the Methodist Church. You will see also that our organization has specifically repudiated the Ku Klux Klan, the Know Nothing Movement, and all similarly bigoted movements based on prejudice.

Under the circumstances, we ask you to print in the CONGRESSIONAL RECORD the appropriate portions of this letter setting forth the true facts about our organization. We are sure that you did not intend to libel a large and representative, predominantly Protestant national organization.

Looking forward to hearing from you, immediately, I am,

Sincerely yours,

GLENN L. ARCHER,
Executive Director.

CRITICAL DEFICIENCIES IN OUR DEFENSE POSTURE

Mr. OLIVER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Maine?

There was no objection.

Mr. OLIVER. Mr. Speaker, on pages 2398–2399 of the CONGRESSIONAL RECORD for February 10 and page 5923 for March 17 may be found statements of my viewpoint regarding critical deficiencies in our defense posture. It will be noted that these observations have been supported in large part by Secretary of the Army Brucker.

The United States is not adequately prepared for so-called limited wars, especially in view of the worldwide commitments which we have made.

Current news indicates unusual activity of the Red forces of North Korea. What action will we take when, as, and if these modernized military forces start another march to the south? What action, Mr. Speaker, will be taken if Khrushchev's latest threat to enter into a separate treaty with East Germany is executed?

In the event of such emergencies, nonnuclear war is obviously indicated unless we are prepared to live on our knees, forever subservient to these expansionist oriented dictators.

Too little attention has been applied to this grave threat of limited warfare while our people have been preoccupied with the glamorous missile and rocket debate.

In this connection, Mr. Speaker, as we know, much has been spoken and written in recent months regarding the military posture of our Nation in this age of missiles and thermonuclear weapons. Proponents of the intercontinental missiles maintain that our preparedness must involve the development of such a strength in these weapons that no nation will dare attack us for fear of the devastation that they will receive in retaliation for such an attack. Proponents of the mobile based type of missile maintain that our best assurance for deterrence of war lies in a system that is free to move anywhere around the periphery of our potential enemies without fear of destruction. Others maintain that our Nation must so design our defense forces that we will be capable of reacting to the full scope of all possible types of warfare to include the small wars where atomic weapons are not used.

All of this discussion could be possible only in a truly democratic nation where we are free to express ourselves even if our thoughts are contrary to the desires of our Government. This discussion may, as some say, give our enemies a great deal of satisfaction, and may even lead them to believe that we lack military strength, but no one, however well prepared themselves, should underestimate our present capabilities. We do have a Military Establishment that is capable of inflicting the most terrible destruction that this earth has ever imagined. We will maintain this strength even while discussing and debating ways of improving our military posture.

Our potential enemies have maintained at great cost a powerful military type of government ever since the end of World War II. The citizens of Russia and Communist China know nothing of the human comforts and liberties that we consider to be our rights and privileges. Their leaders have arbitrarily made their nations into armed camps, but, in so doing, they have developed a military posture that we should examine in comparison to our own Armed Forces. Knowing what they have should better guide us in redesigning our own forces to insure that we are really prepared for the most likely threat to our continued freedom.

Without discounting the Communist Chinese military strength, which at present is primarily a large land army supported by an improving air force, let us look at the obvious strengths of Russia, then compare our own forces to see where we should make any indicated improvements.

Despite the public announcements of the Soviet leaders that they are reducing the size of their armed forces and the wishful thinking of many people in the free world, the present Soviet regime has not deemphasized military preparations. The long range goal of the Kremlin is to achieve a Communist world that will be dominated by Moscow. With this goal ever in mind, the leaders of the Soviet Union have developed a military posture that must be recognized as a modern, balanced, extremely capable force.

The Soviet Army Air Force has good light, medium, and heavy jet bombers and jet interceptor and attack fighters. They have large numbers of transport type aircraft for the movement of ground troops and cargo. Their Air Force is designed to fulfill three types of missions, tactical air support of ground operations, long-range bombardment of their enemies' homeland and operational bases, and support of large-scale airborne operations.

The Soviet Navy has apparently been concentrating on the building of modern submarines and on surface craft suitable for operation in the waters adjacent to their homeland. Their navy does not possess the flexibility or punch in aircraft carriers that we enjoy.

Russia's growing capabilities in the missile field needs little discussion. The recently publicized tests of long-range missiles in the Pacific area and the availability of shorter range missiles and rockets in their army forces give us a clear indication of their progress in this field.

No one can deny that Russia also has a nuclear capability since we have detected their tests of atomic and thermonuclear weapons. We must accept the fact that they are capable of delivering these weapons by aircraft or missile at long range or in support of ground operation.

And finally, the Soviet Army has been maintained at a strength of roughly 2.5 million men who are equipped with new and modern weapons.

The question in the minds of the American people centers around how well prepared we are in comparison with the formidable forces of Soviet Russia.

Very rapidly we can summarize a rough comparison of our forces. Our splendid Air Force is second to none in the world and is superior to Russia's Air Forces in both equipment and training. Our Navy with its nuclear powered submarines and aircraft carriers is superior to the Russian Navy in size, experience, and capabilities. Our atomic and thermonuclear weapons are the equal in destructive capacity and availability to anything Russia could possibly have. Our Army is smaller and not as well equipped as the Russian Army.

With this comparison in mind, it appears obvious where we must make improvements in our military posture, if we are to be prepared for any type of aggression selected by the Russians. Our Army must be improved both from a manpower and equipment standpoint.

First, in regard to manpower. At present, our Army strength has been reduced over the years to 870,000 men. This figure affords a minimum capability to perform the various missions assigned. Of the 14 divisions now in our Army, 8 are stationed overseas and 6 are in the continental United States. We should increase our Army strength by roughly 50,000 men which would provide for one more division and the necessary supporting troops which could be stationed in the United States, thereby increasing the size of our strategic Army Corps from a three division force to a four division force. The addition of this division would mean greater flexibility and responsiveness to possible requirements for reinforcing our divisions in Europe or the Pacific-Far East and would improve our capability to combat limited wars.

Secondly, in regard to equipment. The start made this year toward modernization of our Army equipment must be continued. The Army should be provided sufficient funds to expedite their reequipping with new weapons, vehicles, aircraft, and other critical items. The funds required for the continuation of this vital program amount to approximately $2.5 billion a year for the next several years. Only by assuring the complete modernization of our Army can we expect them to effectively combat a numerically superior force.

Finally, our capability for the transport of strategic reserves must be improved. The Military Air Transport Service, which is the prime mover of strategic forces and supplies, should be provided with new modern aircraft capable of transporting troops or cargo over ocean distances in a reasonable period of time. The number of aircraft involved or the type of aircraft selected is not as important right now as the assurance that enough modern lift is made available to be responsive to the requirements of all services that need it. Without this increase in airlift, our forces overseas may well be required to hold any attacker for an extended period of time before reinforcements can be brought in. Time in this instance would not be measured in dollars and cents, it would be measured in American lives.

It is my sincere hope, Mr. Speaker, that the Appropriations subcommittee for our armed services, under the able leadership of the gentleman from Texas, Mr. MAHON, is reporting to this House a bill providing for, first, adequate and desperately needed modernization of our Army; second, adequate and desperately needed airlift for the vital strategic mobility to meet our commitments and to protect our national interests; and, third, an increase in the Army to 925,000 men. One has only to note, Mr. Speaker, the current posture of our military forces in Korea to feel that we are really in a military posture of potential disaster.

We, Mr. Speaker, the Congress, should increase our Army forces and, especially, remedy current deficiencies of American manpower in our military forces in Korea. Otherwise, we perpetuate the grave error on the part of the administration of diluting the American divisions in Korea with thousands of Korean soldiers to fill the shortages created by persistent, rigid adherence to preconceived concepts which, today, have lost their validity. One needs only to read the headlines of today concerning the unrest in Korea to realize the fallacy of these concepts.

Our destiny, Mr. Speaker, is not going to wait for us forever. It is crowding in upon us now. Unless we act here and today to make America secure against any and all eventualities that very destiny of ours through lack of decisive action can and probably will force us to our knees.

FORMER PRESIDENT TRUMAN MAKES A POLITICAL SPEECH IN THE BEST MEANING OF THE TERM "POLITICAL"; CONDEMNS THE REPUBLICAN HIGH-INTEREST POLICY; CREDITS THE DEMOCRATS IN CONGRESS WITH HAVING STOPPED THE INTEREST-RATE SPIRAL BY REFUSING TO LIFT THE 4¼-PERCENT CEILING ON GOVERNMENT BONDS

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, former President Truman made a wonderful speech last Saturday evening, as he always does. On this occasion his immediate audience was made up of some 5,500 Democrats attending a Democratic congressional committee dinner in the National Guard Armory here in Washington.

Mr. Truman's speech dealt with many issues that are extremely important to all the people of our country and of the free world. But most of his time, and most of his space, was devoted to the administration's tight-money and high-interest policies. This was true of the prepared text of his speech, and even more so of his remarks as he actually made them. It was while he was speaking on this subject of high interest that Mr. Truman said, extemporaneously, that the record of this administration gets him "steamed up."

Mr. Truman needed no notes and no prepared text to remind him of the facts that get him steamed up. He needed no notes to remind him that during his administration the public debt was financed at an interest cost of $5.2 billion a year. He needed no notes to be reminded that this interest cost is now more than $9 billion a year.

Furthermore, I believe that no one who knows, as Mr. Truman knows, how interest rates are made could disagree with his statement that by now interest rates on Government bonds would be 6 percent or 7 percent a year, except for the fact this Democratic Congress stopped the administration's program of raising interest rates, by steadfastly refusing to lift the interest-rate ceiling on Government bonds.

Mr. Truman points out that Republicans in this administration kept right on raising rates until they finally ran up against the legal ceiling, and the only reason they have been trying to get this ceiling lifted is so that they can keep on raising interest rates up and up.

President Truman says, and I quote:

> Thank goodness, Congress stopped it. Congress called a halt to the spiraling interest rates by refusing to lift the ceiling on interest on long-term Government bonds.

I was following the proposed text of President Truman's remarks as he spoke, and I became so much interested in his extemporaneous remarks about interest rates and monetary policies, that I obtained a copy of the tape recording of his remarks. And because this matter is of such deep importance to every person in the country, I believe that President Truman's words should be available to the widest possible audience, not just to the 5,400 people who attended the Democratic congressional committee dinner last Saturday evening. President Truman's remarks on high interest and tight money, as transcribed from the tape recording, are as follows:

MR. TRUMAN'S ORAL REMARKS ON HIGH INTEREST AND THE ADMINISTRATION'S REQUEST THAT CONGRESS REPEAL THE INTEREST-RATE CEILING

Now, let's take the question of tight money and high interest rates. Unfortunately, it lies within the power of the administration to run interest rates up and make money scarce without the concurrence of Congress. And that is just what this Republican administration did. You know the unhappy consequences, don't you? The cost of interest charges on the public debt has soared by billions of dollars. John Snyder and I serviced that public debt for $5,200 million. It is something over $9 billion now, and if the Republicans stay in there, they will have it to 15 by that time. And you know something else? They've raised the cost to the borrowers who need to borrow—the little people. They've raised the cost of money that's now lent out more than $20 billion a year. And what has that done for schools, for housing, for aid to the underdeveloped countries? Every man who buys a house—or a car—or a refrigerator—on credit is paying more for it, and paying through the nose for the benefit of the money lenders.

Now, this tight money policy brought on a few "rolling readjustments"—they called it—in the economy and a couple of pretty bad recessions. But that didn't frighten the Republican money managers. Oh, no. They faced right up to the problem and raised interest rates some more. And all the time they kept telling the people how prosperous everyone was. But do you know something? There are a lot of people in this country who are not so prosperous—and the Republicans are going to hear from them on election day—don't you disbelieve it.

The Republicans kept right on raising interest rates until finally they ran up against a ceiling which is written in the law—that is, the ceiling on interest on long-term Government bonds. They decided they had to get this ceiling lifted so they could keep interest rates going up and up. So, they went to Congress to get it raised.

Thank goodness, Congress stopped it. Congress called a halt to the spiraling interest rates by refusing to lift the ceiling on interest on long-term Government bonds. Interest rates seem now to be showing a tendency to level off, and I hope they will do just that. I hope they will hold steady until next year when we get an administration with a fiscal and monetary policy that serves all the people instead of just a few. Then we can begin to reduce interest rates, and I look forward to that and I know you do, too.

But in the meantime we can be thankful that the Congress called a halt when it did. Otherwise, we might by this time be saddled with an interest rate of 6 or 7 percent on Government bonds for years to come.

The more I think about the Republican record of this administration, the more I get steamed up.

During my administration, Government bonds never sold below par; no borrower was ever gouged with high interest rates and commissions.

That is what the Democratic administration had been doing ever since 1933.

PRESIDENT TRUMAN KEPT INTEREST YIELDS ON GOVERNMENT BONDS AT NOT MORE THAN 2.5 PERCENT—AND THUS KEPT ALL INTEREST RATES LOW—AS LONG AS HE WAS ABLE TO CONTROL HIS SUBORDINATES

Some of the historians have been saying they believe that the acid test of time will prove Mr. Truman one of our greatest and most courageous Presidents. Certainly we can say this much without contradiction: Mr. Truman was always on the side of what he called the little man. He fought for the welfare of all the people, just as he fought to keep us strongest among the nations of the world, but whenever the welfare of the great majority of people of ordinary financial means was being opposed by the selfish interests of the powerful few—which was the usual state of affairs—he invariably took the side of the common man, without hesitation or double-

talk. His circle of friends was not limited just to millionaires; and his advice, counsel, and guidance did not come just from the inner cliques of the multibillion-dollar financial and industrial corporations.

And this also can be said to his everlasting credit: As long as he was able to control his subordinates in the Government, he never permitted interest rates to rise to a level above 2½ percent on long term Government bonds. It was after the outbreak of Korean hostilities, when President Truman was involved in countless problems threatening our national security, that the Federal Reserve officials staged a revolt—seceded from the rest of the Government—and declared that they were independent to raise interest rates as they saw fit.

It was in March of 1951 that certain officials of the Federal Reserve and the Treasury entered into a so-called accord by which, it has since become understood, the Federal Reserve was to follow its own economic policies independently of the rest of the Government, whenever it was not in agreement with the economic policies of the rest of the Government. Mr. Truman was never in agreement with that accord. In fact, the accord was never made into anything of significance until President Eisenhower took office. Between 1951 and President Eisenhower's inauguration in January of 1953, the Federal Reserve people used their new, self-declared independence to raise interest rates only very slightly. It was when President Eisenhower came in and proclaimed the Federal Reserve's independence from the rest of the Government, and, at the same time, began campaigning for the monetary policies which Federal Reserve was about to embark upon, that interest rates began to soar.

For those who may be interested—and I believe everyone will be interested—I will insert the full copy of the prepared text of Mr. Truman's speech of last Saturday evening. This is, of course, a political speech, made to a political gathering of Democrats. However, I believe that our Republican colleagues can draw profit from the speech, rather than take offense at it. It is political in the best sense of the term. It does not engage in character assassination. It does not assert that Secretary of State Herter is soft on communism, or that the late John Foster Dulles connived with the Communists to have them take over the areas of Asia they did take over while he was Secretary of State. It does not proclaim that the Russians launched the first sputnik and then surpassed us in the missile field because the Government is overrun with spies who are giving the Russians the secrets of making missiles. It does not say or suggest that President Eisenhower is a traitor to his country.

On the other hand, it deals with issues and policies that are important to us all. Our Republican colleagues can profit from Mr. Truman's wise words on the issues and policies, as can our fellow Democrats.

Mr. Truman's prepared remarks are as follows:

ADDRESS BY FORMER PRESIDENT HARRY S. TRUMAN AT THE DEMOCRATIC CONGRESSIONAL CAMPAIGN DINNER, WASHINGTON, D.C., APRIL 30, 1960

I can't tell you how happy I am to be here. This is a wonderful crowd for me, all Democrats.

To be here in this armory with this wonderful crowd raises big hopes for the changes that are to come not only all through the Nation but right here in Washington. This dinner shows that you have no doubt we will get that change.

I remember that we had some Democratic dinners here in 1949 and 1950 and later years. And I can tell you this: It was a lot easier to sell tickets to a Democratic dinner in Washington after the 1948 election than it was before that election.

As I look into the thousands of happy faces here tonight, I see that Democracy is on the march. I sense the enthusiasm of this great crowd, and I see the handwriting on the wall for the Republicans. I witness the spirit of dedication which guides these Democrats, and I see the Government of the United States being returned to the people where it belongs.

For all this, I am more than happy.

This dinner is dedicated particularly to the election of Democrats to the Congress of the United States. It could be dedicated to no better cause.

I say to my Democratic friends of the Senate and House of Representatives who are running for reelection: good luck, God bless you, and may all of you win.

I say to the campaign committees of both Houses: set your sights high, bring these good people back here, and go forth to get more good Democrats to join them and strengthen their hands.

I know that the Democrats did extremely well in the congressional elections of 1958, and I'm happy for that.

I know that the Democrats have a substantial majority in both Houses of Congress, and I'm happy for that.

I know that some people are saying the Democratic majorities are so big they are bound to be reduced in the 1960 election, but I don't believe it. I believe we are going to have more Democrats in the next Congress than we do in this one.

I hope every good Democrat will come back, and we are going to gain more seats in the new Congress. There are States in the East and States in the West where we are going to take Senate seats away from the Republicans. That little band of reactionary Republicans in the Senate is going to get littler still, and I'm all for it.

And what about the House of Representatives? Let me ask you a question. Why do you suppose so many Republican Members of the House are voluntarily retiring this year? What do you think? And let me ask you another question. How would you feel if you had to run for Congress as a Republican on a ticket headed by this Vice President? All I can say is, there are some things much worse than retirement.

You have some very able and efficient House and Senate Democratic campaign committees. MIKE KIRWAN and GEORGE SMATHERS and their colleagues have shown time and again that they can work wonders when they have the material.

They are going to have some fine candidates and they are going to have a good record. The record becomes clearer day by day that the Democratic Party is the party of the people, and the Republican Party is the party of privilege. And all the slogan writers and all the soap salesmen on Madison Avenue cannot bury that truth.

I would be the last to claim that the Democratic record is perfect, and everyone knows there are some Democrats I disagree with most of the time. But the Democratic record as a whole is so much better than the Republican record that it's not even close. Look at the votes in Congress. And look at what passes for leadership at the other end of Pennsylvania Avenue these days. Compare that with the Democratic leadership of Congress and you can see why the Democratic Party is the majority party in this country today more than ever before.

Just think for a minute about what has happened on some of the great issues.

Take the farm problem.

The Republicans took over in 1953 and started lowering farm prices. Things got worse for the farmer, so Secretary Benson blamed it all on his predecessor and lowered farm prices some more. Surpluses piled up bigger and bigger, and the administration blamed it on the Democrats and asked Congress to lower farm prices even more. Surpluses kept piling up, the administration spent more and more money, but still farm income kept going down. Actually, it's fantastic. You wouldn't believe anyone—no matter how hard he tried—could make as big a mess out of anything as Secretary Benson has made of the farm program.

He is spending four or five times as much money on it as Charlie Brannan did, but farm income still keeps going down, down, down. You would think that, in spite of Benson, farm income would have to go up sometime just from natural causes, but, no, sir. Year after year he has managed to keep it going down.

Then, finally, he began going to Congress and saying to Congress: "Why don't you do something?" So the Congress did do something. It passed a bill to help the tobacco growers, and what happened? Believe it or not, Benson got the President to veto it.

Then Benson went back to Congress and said again: "Why don't you do something?" So, the Congress passed another bill to help the wheat farmers, and also the taxpayers; and what happened? Benson got the President to veto this bill, too.

Now this might look ridiculous to you. It sure looks ridiculous to me. But the last report I heard was that Benson was still saying to Congress—Why don't you do something? to Congress—"Why don't you do something?" But no matter what we do, we can be sure of another Presidential veto.

Now, is it any wonder, my friends, that the great farm States of the Midwest are outraged and disillusioned with the Republicans? No, indeed. And it's also no wonder that they are going to send Democrats to Congress from areas that have heretofore been Republican for many a year.

Now, let's take the question of tight money and high interest rates. Unfortunately, it lies within the power of the administration to run interest rates up and make money scarce without the concurrence of Congress. And that is just what this Republican administration did. You know the unhappy consequences, don't you? The cost of interest charges on the public debt has soared by billions of dollars.

Every man who buys a house, or a car, or a refrigerator on credit is paying more for it, paying through the nose for the benefit of the money lenders.

Now, this tight-money policy brought on a few rolling readjustments in the economy and a couple of pretty bad recessions. But that didn't frighten the Republican money managers. Oh, no. They faced right up to the problem and raised interest rates even more. And all the time they kept telling the people how prosperous everyone was. But do you know something? There are a lot of people in this country who are not prosperous, and the Republicans are going to hear from them on election day.

The Republicans kept right on raising interest rates until finally they ran up against

a ceiling which is written in the law—that is the ceiling on interest on long-term Government bonds. They decided they had to get this ceiling lifted so they could keep interest rates going on up and up. So, they went to Congress to get it raised.

Thank goodness, Congress stopped it. Congress called a halt to the spiraling interest rates by refusing to lift the ceiling on interest on long-term Government bonds. Interest rates currently seem to be showing a tendency to level off, and I hope they will stay that way. I hope they will hold steady until next year when we get an administration with a fiscal and monetary policy that serves all the people instead of just a few. Then we can begin to reduce interest rates. I look forward to that and I know you do.

But in the meantime we can be thankful that Congress called a halt when it did. Otherwise, we might by this time be saddled with an interest rate of 6 or 7 or 8 percent on Government bonds for years to come.

The more I think about the record of this Republican administration, the more I get steamed up.

Just take a look at some of the vetoes and threats of vetoes. Take the area redevelopment bill, a rather modest program to help create new jobs in chronically depressed areas. How could anyone be against that? But this Republican administration was against it and vetoed it.

Or take the veto of the bill to fight water pollution. That really passes all comprehension. If there is any natural resource that is an absolute necessity of life, it is a supply of pure water. But as our population grows, more and more sewage is discharged into our streams and much of our water supply is becoming dangerously polluted, unfit for human consumption. And this problem is growing worse and worse. So Congress wisely passed a bill to attack the problem. Can you imagine anything more necessary or more appealing than that, being in favor of pure drinking water? But not the Republicans, Oh, no; they vetoed it. And the people would like to know why.

And this, my friends, is the kind of record they have got to run on. There is more of it, much more of it, and most of it's bad just like this. They cannot escape the record. We shall read the record on them time and time again, from Maine to Hawaii and from Florida to Alaska. Now, don't you feel sorry for the poor Republican candidate for President? Just think how, in addition to all his natural handicaps, he has to suffer under the burden of carrying on his back an administration like this.

Getting back to the Congress, let's take a look at where the Congressional Republicans have been in all this. I can tell you where most of them have been—they have been on the wrong side, consistently and vociferously.

Whenever the Democrats tried to pass a good bill, the Republicans usually fought it and stalled it and delayed it. And when—as was sometimes the case—the Democrats managed to pass the bill anyway, only to have it vetoed, the Republicans in Congress almost to a man voted to sustain the veto.

For some strange reason, they are very proud of this. When they sustain the veto of a bill that would help the common man, they consider it a great victory and gloat about it. But they ought to realize that these are costly victories for them. If they keep on winning victories like this, the number of Republicans in Congress will keep on getting smaller and smaller.

I want to see the number of Republicans in Congress get smaller and smaller. And the way to achieve this is to keep reading the record to the people. Just tell the people how the Republicans voted in Congress. That may seem like cruel punishment, but the people are entitled to know what the record is.

And I hope that before the Congress adjourns the record will be made even clearer. I hope the Republicans will have to stand up and be counted on some of the vital issues before the country.

I hope they will have to stand up and be counted on aid to education.

I hope they will have to stand up and be counted on housing legislation.

I hope they will have to stand up and be counted on aid to depressed areas.

I hope they will have to stand up and be counted on raising the minimum wage.

I hope they will have to stand up and be counted on providing health care for the aged.

Now if anyone thinks I want to see the Republicans put on the spot, that is exactly what I have in mind. That is good politics, it's honest politics, it's fair politics, and I'm for it.

We have been talking mostly tonight about how important it is to have a Democratic Congress, a Congress even more Democratic than the present one. But we must remember that it is just as important—it is absolutely necessary—to elect a Democratic President as well. Congress cannot do the whole job alone. We must have strong, able, and honest leadership from the President—leadership in behalf of all the people.

These last years of drift and neglect and indecision must be reversed. We have to do a lot of catching up with history. Problems that have been swept under the rug have to be brought out and tackled squarely. This is not going to be an easy job. The next President is going to inherit many messy problems that have been allowed to build up by this administration. We have to have a President who will tackle these problems with courage and decision, and we all know it will have to be a Democrat.

We have men in our party who are well-qualified for this job—we have more than one of them. This is neither the time nor the place for me to say which of them I think would be the best. But there are some things I can tell you about the kind of man we should nominate.

In the first place, the Democratic candidate for President should be an honorable man. He should not be an opportunist. He should not adjust his principles to the newspaper polls. He should not be a man who scatters insinuations of treason because he thinks that is a good way to get votes.

In the second place, the Democratic candidate should not be the pet of any little group of special interests.

Our candidate should be a man who will put principles above campaign tactics; who will put the good of the Nation above his personal advantage; and, above all, a man who will tell the people the truth, the truth about himself and the truth about the situation which the country faces.

That is the kind of man I think our candidate should be; and, thinking of the various Democrats who are most often mentioned for the nomination, I know that is the kind of a man that our candidate will be.

And so I say to you tonight, my friends, be of stout hearts. We are on the right track. We are headed in the right direction.

And surely, if we all work hard, we shall achieve a great victory next November for the Democratic Party and for the American people.

GENERAL LEAVE TO EXTEND ON ANNIVERSARY OF FOUNDING OF ISRAEL

Mr. WOLF. Mr. Speaker, I ask unanimous consent that all Members who care to do so may extend their remarks in the body of the RECORD on the occasion of this the 12th anniversary of the founding of the country of Israel.

The SPEAKER pro tempore (Mr. RABAUT). Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. WALLHAUSER. Mr. Speaker, it is with great respect and admiration that I, today, salute the doughty little State of Israel on the occasion of its 12th anniversary.

In little more than a decade of existence, Israel has demonstrated to the world that a people dedicated to freedom and human dignity can achieve great miracles of accomplishment through the democratic processes of cooperation, of free men working together for the common good.

Just as in our great country we have grown and prospered because wave after wave of immigration has brought to our shores the best skills and talents of many cultures, so Israel, in her first 12 years, has welcomed more than a million immigrants from at least 70 countries throughout the world. When we realize that all of Israel is no larger than my own State of New Jersey, and that the arrival of these newcomers has more than doubled the population of Israel, we are filled with wonder. When we further realize that most of these immigrants were actually refugees from terror, oppression, and humiliation in the lands from which they fled; that they arrived, for the most part, without funds or skills, often ill and demoralized, we are most profoundly impressed with the transformation which Israel has wrought in only a short time, not only in a land, but in a people.

Those who were denied aid or education in north Africa, eastern Europe and in many other lands from which they were forced to flee, have learned skills and professions in Israel. It is they who run the factories and industrial plants, who make the once barren soil flourish and yield rich harvests. It is they who are the doctors and scientists, bus drivers and builders, administrators, and teachers. But most of all, Israel has restored to them the self-respect and dignity which only a free people can enjoy.

In this bustling state a quarter of a million new housing units have already been constructed. Nearly 500 farm villages have been established and 14 new development towns have risen like an oasis in a desert. Schools, factories, and institutions have sprung up to serve the needs of this growing population.

We as Americans can easily identify their struggles and aspirations with our own early years. They, too, have fought a bloody war for independence. They, too, have opened their doors to "homeless masses yearning to be free." They, too, are pioneers fighting disease and other enemies of man. We share with them the common heritage of our Bible, the belief in the fatherhood of God and the brotherhood of man, the respect for human dignity and freedom.

We recognize Israel as a friend and ally and since its inception the American Government and people have continuously expressed that friendship in unmistakable terms.

Today, as Israel begins its 13th year, still beset by hostile neighbors threaten-

ing war, and enforcing blockades and boycotts against her, we must continue to extend our hand, not only in salute for what she has already achieved, but in help for the future.

Our Government must continue to press for freedom of passage of all ships through the Suez Canal in keeping with international law, and this, of course, includes Israeli ships and ships dealing with Israel. We must continue as we have in the past to make mutual aid funds and loans available to Israel for its greater development. We must do this, not only in respect for her courage, creativity, and humanity, but also because it is in the best interest of America to strengthen so dedicated a democracy and so faithful a friend.

Mr. ROONEY. Mr. Speaker, I am pleased once again to join my distinguished colleagues in paying tribute to the State of Israel on the occasion of the 12th anniversary of her establishment as an independent nation. For many, many years the Jewish people of the world prayed and toiled for the establishment of a free Israel. It was just 12 years ago, despite cruel and insurmountable obstacles which would have disheartened people with less fortitude and courage, that the achievement of this dream was finally realized.

Many residents of my congressional district have contributed years of effort and substantial expenditures of funds, often at great sacrifice, on behalf of a free homeland for Jewish people in Israel.

During the past 12 years Israel has tremendously improved her status as a freedom-loving nation and has greatly advanced her prestige throughout the world. Since her birth she has become the most industrialized and the most advanced country in the entire Middle East. Her basic industrial and agricultural economy is productive and, despite her rapidly growing population and expanding economy she manages to constantly raise the living standard of her citizens.

I have had the opportunity of visiting in Israel several times. My last visit there was in December 1959. As previously, I was profoundly impressed with the spirit of the people and their dedicated industrious habits which have rapidly enhanced the development of their nation. In many respects Israel today is not only ahead of its neighbors but also stands clearly above many other more populated and powerful states. I am convinced that the devotion of the Israeli people to freedom and justice will help them to survive any future challenge to their independence.

While in Israel last December, I had the privilege of visiting Bar Ilan University at Ramat Gan, a fine modern institution of culture and higher learning. As an American-attended university, founded annd maintained by Americans, I found every reason to be proud of it. I feel that this university will become a source of intellectual leadership and service for Israel and Jewish people everywhere.

The brave history of the State of Israel is already filled with pages of gallantry and tremendous self-sacrifice, and on this 12th anniversary of Israel's independence I wish Israeli citizens peace, prosperity, and progress in their homeland.

Mr. CURTIS of Massachusetts. Mr. Speaker, the 100th anniversary of Theodor Herzl's birth coincides this year with the 12th anniversary of Israel's independence. America joins in tribute to Israel and to the man whose vision made its founding possible.

In ancient days, men of great vision were called prophets. Theodor Herzl richly deserves that honor. He had a vision of the founding of a new state in Palestine to be the homeland of the Jews. His pamphlet on this subject, published in 1896, drew world attention. In 1898 he was instrumental in convening at Basle, Switzerland, the first Zionist convention in support of this objective. Thus were sown the seeds which led to the modern state of Israel.

In the history of the world, no state has ever made such rapid progress in so short a period, or under greater difficulties. Immediately after statehood in 1948, Israel faced a war for survival which ended only by an armistice and an uneasy truce, and Israel's frontiers have since been blockaded by hostile neighbors who constantly threaten her very survival.

Despite these fearful odds, a Western oriented, democratic, free society has been established. Deserts and rocky hillsides have been cultivated. Cities and villages have grown up and flourished in what were formerly open fields. Industry has expanded; the population has trebled; refuge has been given to the oppressed; and the frontiers of democracy have been extended.

The special study mission of the Foreign Affairs Committee which visited Israel last fall, of which I was a member, gave impressive testimony of Israel's remarkable progress. Its report stated:

> Although still primarily concerned with the attitude and acts of the Arab world around her, Israel's economic efforts and improvement are nothing short of amazing. The Government has demonstrated its capability of assisting newly independent nations in the development of their economies by providing technical assistance. The study mission was impressed with the progress Israel is making.

I can best give personal testimony in support of this tribute to Israel's anniversary by quoting from my report on Israel written during my third visit there last fall:

> After nearly 4 weeks of hard travel in the Far East surrounded much of the time by backward conditions of life, Tel Aviv certainly looked good. I was back in a progressive country with a modern Western democratic civilization, amid people who show great friendliness toward the United States.
>
> The streets are broad and well paved, and the automobile traffic compares with that in an American city. The automobile age has certainly hit Israel. In the evening, cars on the side streets are parked bumper to bumper.
>
> The progress and development here is remarkable. Israel has an area only about half of that of Massachusetts, of which less than 20 percent can now be cultivated. The population has grown from some 800,000 in 1948 to about 2 million today, much of this through immigration. Tel Aviv is a thriving modern city with a population of about 400,000. Annual per capita income in Israel is over $900, far ahead of the less developed countries and on a par with that of older advanced countries.
>
> Evidences of development since my visit of 4 years ago were impressive. Housing developments spread out further and further, intruding on the fields and orchards surrounding Tel Aviv and other cities. New apartment blocks, many built with Government aid, appear attractive, well spaced, and well constructed.
>
> The increased growth and number of trees since my visit of 4 years ago was striking. Intense efforts have been placed on the tree planting programs, and many of the hills of Judea on the way to Jerusalem which formerly looked bare now look green. Trees have also been planted along most of the main highways.
>
> Israel furnishes an example of rapid progress under democratic government and a free way of life. A fundamental tenet of American foreign policy is to support Israel's survival and progress as a free and independent nation.

Mr. WOLF. Mr. Speaker, I take great pleasure in extending my congratulations and good wishes to the people in the State of Israel on the occasion of the 12th anniversary of her independence.

We Americans take great pride in the fact that the people of Israel have created one of the few democracies in the Middle East, and that we have contributed materially to help establish this new democracy. The American people have contributed personally to the Israeli people more than double the amount which has been extended on an official basis by the American Government to the Government of Israel. This, I believe, is indicative of the mutual friendship and respect between our two peoples.

The people of Israel have literally made the desert bloom, and have built a modern nation where there was previously almost nothing but desert, poverty, and disease.

In the years that lie ahead, it is imperative that our two countries work together, as we have in the past, for peace in the Middle East.

At a time when Soviet Russia is extending aid to other countries of the Middle East—hundreds of millions of dollars—I think the United States should consider seriously whether it is adequately meeting its challenge with the minimal proportions of its economic assistance to Israel.

Let us in the United States breathe a prayer of hope that the coming year will see a truly lasting Arab-Israel peace, and that there will evolve a mutual understanding between the peoples of the Middle East that each nation there is entitled to live its own life—in freedom—and to attain its maximum development, economically, socially, and culturally.

Mr. BOLAND. Mr. Speaker, in the now one dozen years since the declaration of its independence, Israel has developed from a tenuous foothold on the shores of the Mediterranean into a prospering nation.

Israel was established as a refuge and homeland for the Jews of the world after the time of terror of the Nazi in Europe.

Thousands of Jews have streamed into Israel from all over the world and in these 12 years her population has more than tripled. Jews from the Middle East, from Asia, from Africa, and from Europe have been building a new community in Israel in a tradition not unlike the melting pot of all peoples in the United States.

In the midst of this Israel has been able to forge forward with economic improvement. Israel's standard of living now approximates that of many European countries and is considerably higher than that of her neighbors. Much of Israel's success has been in agriculture, in making the desert bloom. But Israel has also built the first industrialized state in the Middle East and is achieving a balanced economy. Indeed, Israel has become a source of technical assistance in industrialization and in agricultural improvement for many of the underdeveloped nations of the world, particularly in Africa. Many of these nations are turning to Israel as the country which faced problems similar to their own and found workable solutions for them.

With this background of achievement, at the end of her first 12 years, I salute the independence of Israel.

Mr. GALLAGHER. Mr. Speaker, on May 14, 1948, the State of Israel was proclaimed. Today, according to the Hebrew calendar, is the 12th anniversary of that declaration of independence. On this day I wish to extend my congratulations to the Israeli people and their government on their marvelous achievements in the past 12 years.

The United States has done much for the State of Israel during its brief existence. After the terrible calamity that befell the Jewish people in World War II America played a vital role in the struggle for the right of the Jews to a homeland of their own in Palestine. It vigorously supported the United Nations Partition Resolution. When war broke out between the Arabs and the Jews the United States worked within the framework of the Security Council to bring about a negotiated settlement and peace. Two Americans, Ralph Bunche, United Nations Mediator, and Lt. Gen. William Riley, Chief of Staff of the U.N. Truce Supervision Organization, were the individuals chiefly responsible for bringing the Arab-Israeli war to a close and concluding the armistice agreements between Israel and its four immediate neighbors—Egypt, Jordan, Syria, and Lebanon. Since the State of Israel was declared the United States has granted it more than $300 million in aid. Private donations and loans by American citizens have greatly exceeded that figure. We have consistently maintained that Israel has a right to exist and that it should be allowed to do so in peace. There have also been times in Israel's brief history when our Government has disagreed with theirs. When such cases arose America spoke frankly and forthrightly to Israel—as is proper between friends—and the disagreements were usually settled amicably. In general we have maintained warm and close relations with the Israelis. We have supported their hope for peace and have helped them build their state.

While it is quite true that Israel owes much to the United States it is even more true that we in America owe much to Israel. The Jewish people have been called the conscience of the world because it is they who have borne the brunt of most of the world's tyranny. The yardstick of a country's love for freedom has often been its treatment of the Jewish people. Here in America we have always welcomed the Jews and we have gained enormously for this attitude. The mention of just a few famous American Jews will suffice to remind us of their great contribution to this country. Benjamin Cardoza, Louis Brandeis, Albert Einstein, Jonas Salk, Irving Berlin, Eddie Cantor, George Gershwin, Joseph Pulitzer, Samuel Gompers, and Jacob Schiff are just some of those to whom we owe so much.

Nazi Germany was perhaps the most ruthless of all nations in persecuting the Jews. Hitler's maniacal attitude toward the Jewish people was symbolic of his attitude toward the whole free world. Much the same situation exists today in the Soviet Union. While the Russians are perhaps not as loud or outspoken as the Nazis in their anti-Semitism, they are, nevertheless, following Hitler's policy of suppressing the Jews. When, however, late last year, a rash of anti-Semitic acts swept through the countries of the world the reaction of the free nations was typical of their attitude. Without infringing upon anyone's basic civil rights the United States, Great Britain, Canada, Germany, and the other countries took immediate steps to punish the culprits and insure the freedom of a minority people.

The world can be thankful for Israel's role in the Middle East and Africa. The Middle East is an area dominated by totalitarian rule, both monarchical and dictatorial. In this area Israel is a beacon of democracy. It is an example of freedom for its neighbors and it is a Western enclave unalterably opposed to communism.

In Africa, Israel is more than just a living example of democratic progress. It is a constant reminder to the newly emerging nations of the African Continent that economic growth, industrial and technological advancement, and a high standard of living can be achieved without resorting to communism or even aid from the Soviet East. But Israel has not confined herself to just being an example to Africa. It has given technical and economic aid to such nations as Ghana, Nigeria, Guinea and Chad. It has trade agreements with these nations and others, such as Burma. Israeli teachers and health experts are at work in Ethiopia and Israeli soil and water experts are in half a dozen African countries as well as Burma. African and Asian government officials, scientists, technicians and trade union delegations come to Israel regularly. Students from these states mingle with Israelis at the Hebrew Institute in Jerusalem and at the Haifa Technion. All of this strengthens the hand of the free world and offers the West the hope of winning Africa to its side in the struggle between communism and democracy.

America, a country which was forced to fight for its independence and later grew strong as the melting pot of nations and nationalities, has much in common with Israel, which also had to fight for freedom and which, in the past 12 years, has tripled the population by admitting and absorbing nearly 1 million immigrants. These bonds of friendship and affection must never be forgotten. Finally, we Americans must redouble our efforts for peace in the troubled Middle East. It is only in this way that we can repay our debt to Israel and the Jewish people.

Mr. SANTANGELO. Mr. Speaker, today marks the 12th anniversary of the State of Israel. Just 12 years ago, in May 1948, Israel was restored to statehood after a lapse of nearly 2,000 years during which the Jewish people have never given up their age-old dream of a return to Zion. The fulfillment of that dream was widely supported by the people of America and we were the first to extend recognition to the new state just a few minutes after it was born.

Now 12 years have passed since that historic day in 1948 when President Truman, acting on behalf of the American people, welcomed the infant State of Israel into its rightful place among the nations of the world. During all this time Israel proceeded doggedly in its superhuman efforts to build a land and a nation, despite the many roadblocks and hostile acts on the part of its Arab neighbors.

As we look over the perspective of these 12 years, we find that Israel has not disappointed us. She has emerged as a strong little state, dynamic in its approach to world problems, democratic in its way of life, cooperative with all nations who have offered her a hand of friendship and cordial relationship.

Israel has absorbed nearly a million Jewish immigrants from the far corners of the earth who have sought its sanctuary as their home, or who were in need of a haven of refuge. She has given these people not only a home, but also citizenship, employment, and the opportunity to live a life of dignity.

Israel has made great progress in developing democratic institutions, as well as in building up its economy. It is looking forward with great eagerness to the day when it will attain economic self-sufficiency and peace with its neighbors. In the meantime, Israel is playing a very important role in establishing good relations with some of the new nations in Africa and Asia in aiding them with technical and economic guidance in a way which should prove beneficial to the free world.

Unfortunately, its Arab neighbors are still continuing their boycott of Israel and are refusing to permit its shipping to pass through the Suez Canal. This is a shortsighted policy which is only causing tension in the area and is hurting the cause of the United States and its allies. Last December I was one of 65 Members of Congress who sent a telegram to the Secretary of State and to the President of the World Bank opposing a loan of $56 million to the United Arab Republic unless President

Nasser guarantees the freedom of transit for the shipping of all nations, including Israel's ships. I regret that those assurances were never obtained. We could have avoided many headaches in the Middle East.

Right-thinking and peace-loving Americans are praying for peace in the Middle East. Israel has given every indication that she is interested in establishing and maintaining peaceful relations with her neighbors. I hope the Arab countries, too, will understand the importance of peace in that area and will soon take steps to bring about a situation of peace from which all nations and peoples stand to gain.

I want to congratulate the people of Israel on their anniversary and to wish them many more successful achievements in the years to come. May they know the joys of genuine peace.

Mr. BROOMFIELD. Mr. Speaker, today we in the House of Representatives are joining a new nation in celebrating its 12th anniversary. That nation is Israel, which has set an enviable record of development, of progress, and of aid to its less fortunate neighbors in a few short years.

Not many realize the fact that Israel, for instance, has its own foreign aid program and that it is lending technical assistance and advice to Ghana, Nigeria, Guinea, Chad, Ethiopia, and Burma.

The Afro-Asian nations and Burma are anxious to receive help from this tiny nation because they know that there are no strings attached to such aid, and that these countries will not become economic pawns in the greater game of the cold war.

In a manner of speaking, Israel has started its own foreign aid program as a means of saying "thank you" to the help that nation received from the United States in its earliest years.

Israel has cut the gap between imports and exports from 9 to 1 in 1948 to 3 to 1 at the present time.

Its per capita income has better than doubled.

More than a million refugees have been resettled in that small nation.

Industrial production, almost a nonentity at the time of Israel's founding, now totals better than $952 million.

This record of accomplishment is phenomenal for a nation twice its size and population.

Israel has accomplished much in a dozen years. Let us hope that its lesson of democracy, energy and dedication will exist for dozens and hundreds of years to come, and that our Nation will always have such stanch and loyal friends.

Mrs. GRIFFITHS. Mr. Speaker, 12 years ago the United States acquired a new ally and friend when the Republic of Israel was established. The people of Israel won their freedom by overcoming almost insurmountable obstacles. As Americans we can be proud that our sympathy, encouragement, and support contributed to the fulfillment of her destiny. However, Israel is still an infant in the family of nations; she will continue to need our encouragement and support until such things as boycotts and blockades are past history. The following editorial by Mr. Philip Slomovitz, editor of the Detroit Jewish News, points out clearly that the freedom Israel has won can be lost. This we cannot allow to happen to a government that is one after our own hearts; a government pledged to freedom, to equality of opportunity for all, and to respect for the dignity of the individual:

ISRAEL'S ANNIVERSARY: OBSTACLES DUE TO DECEPTIONS

Israel's anniversary is always a great day. It is a day to accept literally the words of the Psalmist that "this is the day created by the Lord, let us rejoice in it."

Yet it also is a day for stocktaking. Nothing could be more detrimental to Israel than overconfidence. It would be sheer folly to assume that all is glorious, that Israel is secure, that the world accepts the reality of the State's re-emergence.

The fact is that there still are elements who begrudge Israel its existence, that there are many who would gladly destroy the small state.

Perhaps the worst enemy facing Israel is the ignorance about it in many ranks and the misinformation and lies that are being spread by her enemies.

An interview with Nasser that was broadcast widely last Sunday on a TV program was the best indication of the deceptions that are being perpetrated. Men who purportedly are acquainted with the situation in the Middle East permitted themselves to ask questions that enabled the Egyptian dictator to propagate hatred of Israel unchallenged. His lies were so apparent that it was appalling to witness American correspondents serving as tools in a scheme of hate spreading.

While we often are deceivd into believing that all is honey, there are poisons in many spheres. The press is misled too frequently. Deceptions are the order of the day. Israel is constantly compelled to be on guard. Even the amazing gestures of sympathy to Israel by the maritime unions may peter out into a vacuum.

And so, as we rejoice on Israel's 12th anniversary, we also are forced to admonish the celebrants: Remain on guard, do not become too complacent and never weaken in the defense of Israel. The dangers have not yet passed. Be vigilant, lest a great and sacred idea that emerged with Israel's independence—the end to Jewish homelessness—should again be endangered.

Mr. MULTER. Mr. Speaker, today, May 2, 1960, the State of Israel celebrates the 12th anniversary of its independence.

In May 1948 less than 700,000 Palestinian Jews defied the threats of the six surrounding Arab States and implemented the United Nations resolution by proclaiming the State of Israel. In the 12 years that have passed since that day the population of Israel has almost tripled. Nearly 1 million immigrants entered the country. Fleeing from the displaced persons' camps of Europe, the Russian and Communist rule of the satellite nations, and from the poverty and squalor of north Africa and the Middle East, these immigrants were welcomed by the Israelis and absorbed into the new country. The Government of Israel housed and trained them; it gave them immediate employment and provided them with steady jobs; it built new villages and towns and expanded public, social, and educational facilities; it made them productive citizens of the new state.

During its brief period of independence, Israel has also greatly increased its already high standard of living. It has expanded both the industrial and agricultural production of the country. Since 1948 nearly 700,000 new acres have been cultivated, and the acreage under irrigation has increased from 62,000 to 306,000. Towns and cities throughout the state are growing. This is especially true of the Negev, Israel's southern desert area. One of the main goals of the Government has been to make the desert bloom and become able to support large numbers of people. As a result, Beersheba, the "capital" of the Negev, has grown from a city of 3,000 before the state was declared to a present population of 44,000. Eilat, the "frontier" of Israel, is at the southern tip of the country on the Red Sea. It is fast becoming the country's second largest port.

Israel is not, however, narrowly restricting its progress to within the country itself. It has embarked on an ambitious trade and aid program with the new states of Asia and Africa. The Israelis are sharing with the new nations of the world the knowledge they have gained since their independence. They are offering the benefit of their experience to smooth the road of the new African countries toward economic stability. At the same time Israel offers the example of a nation which has built itself up without resorting to dictatorship, communism, or even guided democracy. It is a living example of the democratic type of government that we Americans hold so dear. As such, it offers a hope to the free world of winning over the new emerging Africa to the side of liberty.

The State of Israel has accomplished all this, not only in a rather short span of 12 years, but also in the face of persisting hostility and enmity on the part of its neighbors. Since Israel's armies defeated the Arab forces that sought to prevent its establishment, a constant barrage of propaganda has been turned on it. President Nasser, King Hussein, and Prime Minister Kassem vie with each other in their sharp verbal attacks against Israel and call for its destruction. The country's ships are denied passage through the Suez Canal. It is boycotted by all the Arab States, a boycott which also affects American ships, for example, which touch at Israeli ports. Egypt has for years encouraged "fedayeen," or guerrilla, attacks on the peaceful villages of Israel.

It is to the problem of continuing strife in the Middle East that we Americans must rededicate ourselves on Israel's 12th Independence Day. The Middle East is an area to which peace could offer much. It is to a large degree the duty of the United States to see that it is accomplished.

I fervently hope that by May 1961 we will have seen great strides in that direction so that both Israel and its Arab neighbors can live and grow in peace and harmony.

Mr. RODINO. Mr. Speaker, in May of 1948, subsequent to the memorable November resolution of the United Nations,

David Ben-Gurion declared Israel an independent state. On the same day President Truman extended U.S. recognition to the new nation.

Today we celebrate the 13th aniversary of Israeli independence. In those 13 years the state has had to face many difficulties and hardships. From May of 1948 to January of 1949 Israeli was embroiled in a war with her Arab neighbors, and since that time has lived in an uneasy armistice, surrounded on all sides by unfriendly powers. Despite the need to maintain a defense system, and despite the obligation to absorb thousands of refugees from Europe and Asia, this tiny nation has, nevertheless, often by sheer determination and effort, harnessed her meager resources into a rapidly expanding economy.

Most important, Israel stands as an outstanding example of democracy in the Middle East. Freedom-loving peoples everywhere have come to respect and admire this new nation, whose own respect for democratic ideals and for the dignity of man is so much like our own.

The greatest problem in the Middle East is the continuing feud between Israel and the Arab nations. Over 12 years after the armistice, no peace treaty has yet been signed. Border disputes break out with unfortunate regularity; boycotts and blockades continue; and regional agreements for economic development are still far from possible.

The security of the free world depends on security and stability in the Middle East. The United States must make every effort to see that the parties are brought together, that intransigent policies are eliminated, and that a just and amicable settlement of differences is arrived at.

Mr. WIDNALL. Mr. Speaker, May 2 marks the 12th anniversary of the independence of Israel. Congratulations to that courageous nation on this important day.

To better appreciate the difficulties that confront Israel in its infant years, it may be useful to remember the ordeals endured and the hardships surmounted by our own hardy forebears during the early decades following the signing of the Declaration of Independence of the United States of America. Our budding Nation was not without monumental challenges to its very existence. And Israel today knows the hazards of growing into full stature.

Over the years the United States and Israel have seen the ties that bind closely Americans and Israelis continue to grow stronger. Our people of whatever lineage are freedom-loving and are in sympathetic support of Israel as a country where democracy has sprung up on the once-barren sands of the desert.

Israel and the United States stand together—and firmly—on their most vital interests in the Middle East. Israel's security depends ultimately upon mutual understanding and agreement with the Arab countries, so that the young nation can devote all of its resources to peaceful economic development in cooperation with its neighbors and with the rest of the free world.

Today Israel lives in uneasy peace. As we in America send to our Israeli friends our congratulations on their Independence Day, we include hopes that genuine peace soon will come to them and to all peoples everywhere.

Mrs. DWYER. Mr. Speaker, one of the brightest and most hopeful developments in international life since the end of World War II has been the birth and growth of the State of Israel.

Against immense odds, and surrounded on all sides by hostile neighbors, the people of Israel have founded and developed a working democracy, a self-governing haven for many of the victims of some of the most terrible persecutions in world history.

Under the skilled and devoted hands of its people, this tiny and largely barren land has flowered into a productive and vigorous nation—a nation which, despite its youth, is already making a major contribution toward the development of other newly independent countries. The growth of Israel's cultural, technical, agricultural, industrial, and intellectual resources in a brief dozen years has been impressive testimony to the vision and indomitable courage of its founders, its leaders, and its people.

Today, Israel is an outpost of freedom and democracy in a corner of the world which historically has been the target of dictators and the victim of oppression and exploitation. It is distinctly in the best interests of our own country that Israel thrive and be made secure.

In the current dispute over the use of the Suez Canal, Israel deserves the understanding and support of all people—and nations—who believe in the rule of law, who subscribe to the goal of settling disputes by peaceful means.

The aggressive and arbitrary seizure of the cargoes of ships bound to or from Israeli ports and using the international waterway of the Suez Canal is a violation of the basic tenets of international law. The highhanded behavior of the Government of the United Arab Republic and its President, General Nasser, is an affront to world opinion and a threat to world peace.

As a Member of Congress and a member of the House Banking and Currency Committee, it has been my privilege to join with many of my colleagues to urge our Government and the international agencies with which it is associated to use its influence to halt the depredations on Israeli shipping and to require that the Suez Canal be so administered as to assure the rights of all nations.

Mr. Speaker, we can celebrate Israel's 12th anniversary in no better or more practical way than by resolving to continue our efforts to obtain international fair play.

Mr. TOLL. Mr. Speaker, today is the 12th anniversary of the institution of Israel as a nation. Israel's anniversary coincides with the hundredth anniversary of the birth of Theodor Herzl, the Viennese journalist and dramatist who founded political zionism, whose chief aim was the establishment of a Jewish homeland in Palestine.

It was Dr. Herzl's pamphlet "The Jewish State" that resulted in the convening of the first World Zionist Congress in Basle, Switzerland, in 1897.

The strong democratic character of Israel is well known, and its relationship and favorable attitude toward the United States is equally well known.

The National Zionist Executive Council issued a resolution hailing Israel's anniversary and called on the U.S. Government to "take vigorous action through all channels at its disposal to induce the leaders of all Arab countries to accept the permanent existence of Israel." It would be well for the U.S. Government to follow the recommendation in the resolution.

Mrs. KELLY. Mr. Speaker, I am delighted to be afforded the opportunity to pay tribute to Israel on the occasion of its 12th anniversary of statehood.

Looking back we can all remember the hurdles which stood in the path of Israel's independence. We all remember the joy of the day on which the United Nations debate was completed and the final vote guaranteed statehood. Israel's problems did not, however, cease with the granting of statehood. This was only the formal act of creating an independent nation—the job of building the nation remained.

In those early days, Israel, with enemies on all sides, found itself in a most precarious position. But as the numbers and strength of her people increased, Israel's strength also grew. What was lacking in numbers and the material things was more than made up by the sheer determination of the people to carve out and defend a modern and progressive nation.

In but 12 short years, the entire world has witnessed, often with amazement, strides which were never before thought possible. This again, can only be attributed to the unremitting toil and determination of the people of Israel.

We must not lose sight of the conditions which prevailed in Israel 12 years ago. Israel was, from the standpoint of economic and industrial development, little different from the other nations of the Middle East. For the most part, it was little more than a sandy, arid wasteland. There was no housing and little industry. Educational facilities were at a minimum, adequate sanitation facilities were almost nonexistent, and agricultural methods dated back to the Middle Ages. The battle for survival and advancement was not an easy one.

But these matters belong to history and, while we must never forget them, I would rather speak of the present and, if I may for a moment attempt to be a prophet, look to the future.

Israel today is a strong and vibrant nation whose people have proven themselves, not only by their visible accomplishments but also by the successful defense of their homeland. While danger still exists from without and the saber rattling continues, we are all hopeful that the border clashes will soon stop and that Israel's Arab neighbors will accept her statehood as a fact of life.

Even in face of the military problem, Israel continues to grow. Its Mediterranean coast is to me a thing of beauty. Its cities are as modern as those any-

where else in the world and, most important, the bare white desert is being turned to green.

I choose to look upon Israel as the picture window of the Middle East. Unfortunately it is a reflective window but I hope the achievements will be adopted by the other nations in that region. When the other nations of the Middle East are developed, when modernization and a higher standard of living become universal to the area, then will the world realize the tremendous contribution made by the people of Israel. Those who devoted and gave their lives toward the creation and building of the State of Israel will thus be richly rewarded.

Mr. ROOSEVELT. Mr. Speaker, 100 years ago, in the city of Budapest in Hungary, Theodore Herzl was born. Twelve years ago, in the city of Tel-Aviv in Palestine, the State of Israel was reborn. It was Herzl's birth which made possible the rebirth of Israel.

In 1894 Theodore Herzl was the Paris correspondent for Die Neue Freie Presse, the leading Vienna paper of the time. As such he covered the Dreyfus affair and was deeply affected by the cries of "Death to the Jews" of the Paris mobs. He came to the conclusion that the only solution to the Jewish problem, the only way to safeguard the future of European Jewry, was the establishment of a Jewish state. In 1896 he published a pamphlet called "The Jewish State," in which he set forth his ideas, and, 1 year later, he began putting them into effect by forming the Zionist Organization. For the next 7 years Herzl devoted himself to obtaining the approval of the great powers for the establishment of a Jewish national home in Palestine, but he was unsuccessful, and when he died in 1904, at the age of 44, his dream remained unfulfilled.

Herzl did not invent the idea of a Jewish state. The idea, in fact, was almost as old as the Jewish people. What Herzl did accomplish was to convert the Jews into a political force. In the words of David Ben-Gurion, Israel's Prime Minister:

> Herzl created "Jewish statesmanship," and forged the tools and implements the people needed in its fight for liberation and revival: a world platform, the framework of national organization, political representation, the instruments of state finance.

Herzl gave his followers a political purpose and the means to fulfill it. Like another great Jewish leader, Moses, he did not live to reach the Promised Land. However, 2 years after the State of Israel was proclaimed his remains were brought to that country and buried on one of the hills of Jerusalem where the people of Israel paid homage to the founder of modern zionism and the father of the State of Israel.

Theodore Herzl had a favorite saying: "If you will it, it is no dream." The Zionists adopted this slogan as their own. Despite the opposition of many groups they colonized Palestine. In a country which was mainly desert and swamp they reclaimed the land and made it productive. Notwithstanding the slaughter of millions of Jews by the Nazis they readied themselves for independence. Finally, on May 14, 1948, they proclaimed the State of Israel.

The struggle, however, was not over. Immediately after the state was proclaimed it was attacked by five Arab nations. Although Israel defeated the attackers and signed armistice agreements with them the Arabs refused to allow the new state to live in peace. Egypt encouraged "fedayeen," or guerrilla, attacks on Israeli villages. Israeli ships are barred from the Suez Canal. An economic boycott by all the Arab States has been in progress for many years.

Nevertheless, the Israelis have remained true to their slogan. In the brief dozen years of the state's existence it has accepted and absorbed nearly 1 million refugees from Europe, the satellite nations of communism, and from north Africa, and the Middle East. It has increased its industrial production from almost zero to over $950 million. The cultivated area of the country has been more than doubled, and the area under irrigation increased fivefold. The desert has been made to bloom, cities built where originally mud huts stood. Schools have sprung up to meet the needs of the population.

Israel is attempting also to pay back the United States and the free world for their financial aid and support by giving aid in turn to the newly emerging states of Africa and Asia. Trade agreements between Ghana, Nigeria, Guinea and Burma and Israel are proving beneficial to all parties. Israeli technicians and trade specialists are of invaluable assistance to the Africans. Israel is thus acting as a bridge between East and West and drawing Africa closer to the free world.

On this 12th anniversary of Israeli independence I salute the magnificent accomplishments of the Israeli people. And with them I pay homage to the memory of Theodore Herzl who dreamed a dream which has become reality.

Mr. GILBERT. Mr. Speaker, Israel is celebrating the 12th anniversary of its independence, and the people of Israel have our sincere congratulations and felicitations, and the good wishes of all free nations.

The people of Israel, because of their indomitable courage, unfailing industry, and strength of purpose, have accomplished magnificent results and reached incredible goals in the short period of 12 years. The new nation, surrounded by enemies who have sworn her destruction, has been attacked and has emerged victorious; it has successfully absorbed nearly a million immigrants; it has made the desert bloom and the reclaimed land now supports great numbers of people; it has made tremendous advances in its industrial and agricultural production; its ambitious building program has produced many new villages and towns; its program of aid and support to the new states of Asia and Africa is proving beneficial not only to them, but also to the cause of democracy.

The life of the State of Israel is one of constant struggle; Israeli villages are victims of the "fedayeen" or guerrilla attacks encouraged by Egypt; Israeli ships are barred from the Suez Canal; she suffers from the economic boycott imposed by all the Arab States; to maintain her defenses, a large portion of her resources must be channeled to defense, thereby retarding her advancement in productive and constructive fields of endeavor. Despite these almost insurmountable obstacles, her progress has been miraculous.

The Israelis are to be commended for their willingness to make the tremendous personal sacrifices necessary to Israel's progress and growth, as well as her freedom. They have not neglected their cultural and educational pursuits, and their already high standard of living is being steadily increased.

The encouragement and support given to Israel by the United States were well deserved and the faith Americans showed in the new democracy was well founded.

Although this is a time for rejoicing in the freedom and progress of the new State of Israel, it is also a time of stocktaking and rededication. Israel's enemies still begrudge her existence and threaten her downfall; the obstacles of the blockade and boycotts still remain. Vigilance is necessary and the personal sacrifices must continue until peace among Israel and the Arab Nations is a reality.

Israel has earned, and deserves, all the continued aid, encouragement, and support which our country can give her. She is our friend and ally; it is our duty to help Israel in all ways possible, so that she may continue to enjoy her freedom and statehood, and achieve the security and peace for which she strives.

AID TO DEPRESSED AREAS

The SPEAKER. Under previous order of the House, the gentleman from West Virginia [Mr. BAILEY] is recognized for 60 minutes.

Mr. BAILEY. Mr. Speaker, the "snows of March" cannot wash out the mounting unemployment rolls in areas throughout the Nation.

I have asked for this time for the purpose of myself taking the opportunity as well as to give the opportunity to a number of my colleagues to bring this proposed legislation before the House. The legislation will come up on Wednesday of this week under Calendar Wednesday proceedings.

Mr. Speaker, while the American economy as a whole is enjoying high activity, the festering sore of chronic unemployment continues to blight hundreds of communities in all parts of the Nation. The distress suffered by millions of people, bypassed by the general rise in income, can no longer be ignored. The specter of poverty in the midst of plenty should not be allowed to tarnish the record of America's growth. We cannot permit complacency to blind us to the serious problems faced by the people in areas which are in urgent need of economic redevelopment. Tolerance and indifference to the continuance of chronic unemployment in the depressed

urban and rural communities of the United States is not the American way of life.

We have helped foreign countries to redevelop their entire economy and have assisted to develop the sections to initiate new growth under the point 4 program. We have recognized that unemployment and underemployment are wasteful and lead to unhealthy discontents.

There are more than 177 distressed labor markets in this country representing some 15 percent of the Nation's total work force, with 26 percent of the Nation jobless. Among them we can count many textile communities, we can count ghost towns that were formerly thriving mining towns, we can count areas in industrial sections that are presently meeting too much competition from abroad. We can point to too many agricultural and rural areas that need to be rehabilitated.

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. I thank the gentleman.

Mr. Speaker, at this time I am not going to discuss the merits of this legislation. That I shall do as the occasion arises on Wednesday when this bill will be before the House under what is known as the Calendar Wednesday procedure.

The gentleman from West Virginia has been with me through the years on this bill. I see my friend, the gentleman from Pennsylvania [Mr. VAN ZANDT], and my friend the gentleman from Pennsylvania [Mr. FENTON], and my friend the gentleman from Pennsylvania [Mr. SAYLOR], who all through these years with us have fought for this kind of law.

What I want to say today is this, and I take this time yielded so graciously by the gentleman from West Virginia to point out to the Members of the House what the parliamentary situation will be. This is the first time in over 10 years that access is being made to that rule of the House providing for the Calendar Wednesday operation. The reason for that is that the Rules Committee by a 6-to-6 vote denied a rule on this bill.

Mr. McCORMACK. If the gentleman will yield, will he state what the 6-to-6 vote was on the breakdown?

Mr. FLOOD. The majority leader has asked me to state it. However, I think because of his exalted position, it would have much greater merit and much greater value if he would state it, and I will yield to him to state what he understands the situation was.

Mr. HOFFMAN of Michigan. Mr. Speaker, I call for the regular order. I make the point of order that the gentleman from Pennsylvania cannot yield.

Mr. McCORMACK. Mr. Speaker, will the gentlemen from West Virginia [Mr. BAILEY] yield to me?

Mr. BAILEY. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. I think, upon reflection, my friend's observation is the best guidepost to follow.

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. Mr. Speaker, I think we have emphasized what the situation was in the Committee on Rules. You have what my philosophical friends describe as a distinction without a difference—and I think you all know quite well what the situation in the Committee on Rules was as between the votes cast by the members of the two different political parties that comprise the Committee on Rules and so on and so on and so on. Now when the procedure under the Calendar Wednesday rule is followed on Wednesday, the committees will be called alphabetically. Any Member from either side of the aisle can call up any bill from a committee that has been so called in its alphabetical order. So if that is the practice, a committee that is called before the Committee on Banking and Currency may take any such bill that has been reported by their committee. I have been advised, and I hope, Mr. Speaker, I am wrong—I just cannot conceive that a great committee like the Committee on Agriculture or a great committee like the Committee on Armed Services—I know that the Committee on Appropriations, to which I have the honor to belong, will not—but I cannot conceive that a great committee of the great stature of the Committee on Armed Services, for example, would become the handmaiden, and lend itself, prostitute itself to be the minion to frustrate the Committee on Banking and Currency, also a committee of great distinction.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. McCORMACK. I want to refresh the memory of the gentleman from Pennsylvania. My understanding of the Calendar Wednesday rule is that the chairman of a committee can call a bill up and no other Member can do that unless such Member is authorized by the committee to do so. I merely wish to refresh the memory of the gentleman on the rule in this respect.

Mr. FLOOD. If the gentleman from West Virginia will yield for a moment—my memory is now refreshed.

Mr. Speaker, it is important—absolutely important, Mr. Speaker, for all Members interested in the success of this legislation to be present here on the floor at noon on Wednesday because you will undoubtedly be confronted by a sudden death rollcall. The administration is against this bill in spades. They are going to murder it in any way they can. That is an order. Now there are a number of distinguished Republican Members of this House who are just as much in favor of this legislation as the gentleman from West Virginia or as I am, but they are no more than a corporal's guard.

They will fight with us in support of this bill as well as any Democrat in the House. Do not forget it. But the Republican leadership has passed the word, and when that leadership passes the word, ah, ha, they will be here. They will be here, champing at the bit to destroy the depressed areas bill, even though the Republican national platform spoke and urged this kind of legislation, and even though today in my district, and last week in Dr. FENTON's district, a committee representing the Department of Commerce toured my county and the county of the gentleman from Pennsylvania [Mr. PROKOP] and I have newspaper stories, or I will have them Wednesday, in which unofficially this committee will urge another $100 million in addition to the bill introduced by my friend from Pennsylvania, Dr. FENTON, and the bill introduced by the gentlemen from Pennsylvania [Mr. SAYLOR and Mr. VAN ZANDT].

So I speak now to urge those on both sides who want this very necessary and vital law, I want all of you "bad Socialists" to be here; all of you "bad Americans" who are here to destroy America, all of you "bad men" to be here with me and let us see. There will be sudden death votes. Somebody may move to adjourn, and there will be a rollcall. If that is licked, somebody may move to consider the bill, and there will be a rollcall. There will be all kinds of dillies flying around here. The Air Force will never see the many gremlins that they will dust off to try to defeat the main one.

On Wednesday we will discuss this with you, but we ask you to be here on time to prevent this business from operating, and let us give to the people what this Congress gave 2 years ago when it died by a pocket veto. I do not want any political issue. Make no mistake about that. There is no man from a distressed area who does. Anybody who says that any one of the men I have mentioned on either side wants a political issue, is a liar in his teeth, if that charge is made that infringes the integrity and the honor of all men from those areas. Do not forget that. Do not bring that one up.

I am grateful to the gentleman from West Virginia.

Mr. Speaker, I include as a part of my remarks the majority report of the House Committee on Banking and Currency, House Report No. 360, 1st session, 86th Congress, on S. 722, the Area Redevelopment Act, which was passed last year by the U.S. Senate and is now pending before the House of Representatives. I have found this majority report to be an excellent one and points up the urgency of passing such badly needed and vital legislation by the House during the current session. This legislation is scheduled to be considered under Calendar Wednesday action this week:

AREA REDEVELOPMENT ACT

The Committee on Banking and Currency, to whom was referred the bill (S. 722) having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment is as follows:

Strike all after the enacting clause and insert the matter which appears in italic in the bill herewith reported to the House.

WHAT THE BILL WOULD DO

S. 722 contains seven major provisions.

First, the bill would create an Area Redevelopment Administration within the

executive branch of the Government. It would be headed by an Administrator whose compensation would be $20,000 per annum. His appointment would be subject to Senate confirmation.

Second, the bill would authorize the Administrator to designate two types of redevelopment areas—industrial and rural—in the United States. The Administrator would designate as industrial redevelopment areas those areas suffering from substantial and persistent unemployment, and as rural redevelopment areas those areas with a large percentage of low-income families and substantial unemployment or underemployment. An overall program for the economic development of each area would then be prepared by the leaders of the area with advice and assistance of local authorities and the Area Redevelopment Administration. This would be subject to the approval of the Administrator.

Third, the Administrator could make loans for industrial projects in industrial redevelopment areas out of a revolving fund of $75 million. He could also make loans for industrial projects in rural redevelopment areas out of another $75 million revolving fund. These funds would be established by appropriations.

Fourth, the bill would authorize the Administrator to make loans and grants for constructing or improving public facilities, or for purchasing or developing land for public facility usage in redevelopment areas. Such a loan or grant could be made only upon application by a State or local governmental unit. The bill would authorize an appropriation of $50 million for loans and one of $35 million for grants.

Fifth, the bill would authorize the Administrator to provide technical assistance to redevelopment areas. It might be provided by use of the staff of the Administrator or by contract with individuals or institutions.

Sixth, the bill contains two sections which would vest additional authority in the Housing and Home Finance Administrator in order to assist industrial redevelopment areas. Grants and loans for slum clearance could be made in these cases under title I of the Housing Act of 1949 without regard to certain existing requirements of that act. Planning advances authorized by the Housing Act of 1954 would be made available to all communities in industrial redevelopment areas without regard to the population limitation otherwise applicable.

Seventh, the Secretary of Health, Education, and Welfare could provide information and financial assistance in connection with vocational training programs and the Secretary of Labor would be authorized to pay subsistence payments up to 13 weeks for persons receiving such vocational training but not then receiving unemployment compensation.

BACKGROUND OF THE BILL

The problems which S. 722 is designed to meet are not new. The provisions in S. 722 have been considered in one form or another by four separate committees of Congress in the past 5 years.

The Joint Economic Committee was the first congressional group in the 84th Congress to call for Federal action to help chronically distressed communities. In its 1955 report, the Joint Economic Committee urged that the public works program should be speeded up, and that loans and technical assistance should be extended to help these distressed communities to improve their economic conditions.

Later, in the same year, the Joint Economic Committee made a careful study of low-income families in the United States and in its report the committee called attention not only to the problems of depressed industrial areas but also to the persistence of low income in various rural areas in the country, particularly in the South. The committee favored a comprehensive Federal program which would combat the basic causes of economic distress both in depressed industrial areas and in regions where low incomes prevailed.

In 1956, the House Banking and Currency Committee reported favorably to the House H.R. 11811, a bill to aid chronically depressed areas. Although the House failed to act on this measure, a similar bill, S. 2663, was reported by the Senate Committee on Labor and Public Welfare and passed the Senate on July 26, 1956.

Both major parties in their respective 1956 platforms called for Federal legislation to aid economically depressed areas.

An almost identical bill, S. 3683, 85th Congress, passed both Houses of the Congress in 1958, but was pocket-vetoed by the President on September 6, 1958.

S. 722, as reported, is a product of careful study and deliberation. Public hearings were held by Subcommittee No. 3, headed by the Honorable WRIGHT PATMAN, on the companion bill to S. 722, H.R. 3505, introduced by the Honorable BRENT SPENCE. They lasted from March 9 to March 20. Over 70 witnesses were heard, including representatives of the Department of Commerce, the Housing and Home Finance Agency, and the Small Business Administration. Helpful testimony was also offered by Members of Congress who appeared before the subcommittee. Witnesses representing labor organizations, agriculture, industry, and civic groups gave the subcommittee the benefit of their knowledge and judgment. The subcommittee went into executive session on April 14. Several amendments were adopted to the Senate-passed bill, reducing the total dollar authorizations from $390 to $251 million. The bill was then reported to the full Banking and Currency Committee which in turn acted favorably on it on May 5, 1959.

CHRONIC LOCALIZED DEPRESSION—WHY AND WHERE

(1) Technological change

The key to the increasing prosperity of the American economy has been productivity, which in turn stems from technological progress. The economy as a whole benefits from such technological change, but some of the workers displaced by innovations or technological shifts are not readily reabsorbed into the ranks of the employed.

One community thus affected is Altoona, Pa. Until recently, Altoona was the largest steam locomotive repair center in the United States. The rapid dieselization of railways since the end of World War II has changed the pattern of skills required by locomotive repairmen. A large number of fairly specialized mechanics were formerly employed in Altoona in the repair shops. But as railroads switched from steam to diesel locomotives, their skills were no longer required. Diesel locomotives are not repaired by the same type of mechanic, nor in the same place, as the older steam locomotives.

Technological change has also contributed to the displacement of coal miners. Many communities in the coal mining centers of Kentucky, Pennsylvania, southern Illinois, and West Virginia have witnessed rising local unemployment which has been partly due to the replacement of miners by mechanical cutters.

(2) Migration of industry

The cotton textile industry of New England began its mass migration to the South during the short but sharp depression which followed World War I. This migration continued for the next two decades. It was halted by World War II when the cotton mills of both the North and the South were operating at or close to capacity. Since the end of the war, there has been a further substantial shrinkage of the industry in New England.

Prior to World War II, the woolen and worsted industry remained highly localized in New England. But following the war, this industry, too, began to move south. Mill after mill in New England was liquidated, while new and modern textile mills, in both the cotton-synthetic and woolen-worsted industries, were built in the South. Thousands of textile workers were left stranded in New England, New York, and Pennsylvania. The full-fashioned and seamless hosiery industries likewise migrated southward displacing many hosiery workers in the North. And there has been some migration of the glove and apparel industries to low labor-cost areas.

A number of communities have been adversely affected by the outmigration of industry. Among those have been the Massachusetts textile cities of Lawrence, Lowell, Fall River, and New Bedford; Manchester, N.H.; the Utica-Rome area in New York; Philadelphia and Reading in Pennsylvania; Providence, R.I.; and to a lesser extent Paterson, N.J. Other communities, such as Brockton, Mass., have experienced a high level of localized unemployment due to the migration of shoe factories.

A community does not recover easily from the sudden impact of the liquidation of a large mill or factory. The textile industry is labor intensive; that is, a large number of workers are employed per dollar of capital invested. Many of the New England textile mills which have been liquidated in recent years employed 5,000 or more workers. These mills were not closed down overnight, but when their managements decided to liquidate, thousands of workers were laid off over a period of several months, and the displaced workers were not readily reabsorbed into new jobs.

The migration of industry is not new in the United States; indeed, it has been going on virtually since the beginning of industrialization in this country. Although the statistical evidence on this score is scanty, there is a strong presumption that there has been more sudden movement of industry during the postwar period than during comparable periods in the past. The number of communities which have become chronic surplus labor areas due to this cause has been large. And the communities which have become depressed areas due to the migration of industry have often experienced the greatest difficulty in adapting to change.

(3) Shifts in demand

Although technological change has contributed to the decline of employment in coal mining by reducing employment per ton of output, an even more important cause has been a shift in demand from coal to oil on the railroads, in industry, and in homes. The declining consumption of coal has had secondary effects on such communities as Cumberland, Md., for example, where railroad manpower requirements have been severely curtailed due to the reduced shipments of coal.

(4) Protracted seasonal unemployment

Some resort communities, such as Atlantic City, N.J., and Asheville, N.C., have high levels of employment during the summer months, but experience so much unemployment during the remainder of the year that they are classified as surplus labor areas.

Other areas such as Durham, and the Winston-Salem area of North Carolina,

which are important tobacco manufacturing centers, may have a balanced labor supply for about 4 months out of the year while tobacco manufacturing is at its seasonal peak. But for the remainder of the year, these communities are surplus labor areas. These and other communities in the upper South have also felt the impact of declining job opportunities in the domestic textile industries.

(5) Depletion of resources

Although this has not been a major cause of localized depression, a few communities have become surplus labor areas because the basic resource which formerly supported employment in these areas has been depleted. Tacoma, Wash., has suffered from unemployment due to the diminishing supply of saw and peeler logs.

The depletion or exhaustion of high-grade and easily accessible seams of coal have contributed to chronic unemployment in the 14 coal-mining areas which have been classified as surplus labor areas for a good part of the time in recent years. Similarly, the exhaustion of accessible and high-grade deposits of zinc, lead, and iron ore have produced substantial unemployment in a few areas.

In other areas, the depletion of resources has not been the primary, direct cause of unemployment, but has been a contributing factor. Iron Mountain, Mich., for example, became a surplus labor area when the largest firm in the community, a manufacturer of wooden station wagon bodies, closed when adequate supplies of steel supplanted wood in this use in 1953. Conditions in this community were further aggravated by the decline in lumbering and iron mining due to the gradual depletion of resources.

THE NEED FOR ACTION

Your committee is convinced that Federal legislation establishing a comprehensive unified program to help depressed areas is long overdue. Many localities have long been suffering from chronic unemployment. This unemployment presents a double threat to our way of life. It threatens our internal development, and it threatens our external security.

It threatens our internal development because that development has been based on a continually growing domestic market. If many people, through unemployment, are removed from the market as full-scale consumers, our economy will not continue to grow as it might. Moreover, a powerful motive force in our economic growth has been our acceptance of equality of opportunity as a social goal. If opportunity is severely limited in many communities through no fault of the communities themselves, faith in our objectives will be impaired and the motive force which that faith supplies will be correspondingly weakened.

Chronic unemployment threatens our external security both because it supplies our enemies with propaganda material and because it prevents us from realizing our full strength. The leaders of many hundreds of millions of the world's people are hostile to us; one of their central doctrines is that unemployment is inherent in our system, hence any unemployment we experience is a propaganda success for those leaders. But of more tangible importance to our security is the loss of production and income and the dissipation of human effort resulting from our failure to utilize our full economic potential. It increases the costs of Government and the cold war borne by the employed groups. Unemployed people and unused capacity discourage our friends and encourage our foes.

Your committee is fully convinced, then, that chronic unemployment anywhere in our economy is a matter of national concern.

Depressed industrial areas have many common characteristics; first, they are areas which have lost certain historic locational advantages, as discussed above in this report.

Second, they are areas where local enterprise and initiative have usually been smothered and repressed by the existence of persistent and chronic unemployment. Areas suffering from prolonged unemployment are like individuals who have been physically ill or unemployed. They lose heart and courage. They become resigned and discouraged. Their physical energies have been drained. They are like unemployed individuals who need the outside help of a professional agency dedicated to providing them with specific guidance and courage and assistance. Outside assistance, your committee believes, must come from the Federal Government.

Third, they are areas which have low financial resources and are, therefore, least capable of raising the capital required for long-term bold programs for rehabilitation. The very fact that unemployment has persisted and become chronic has meant that the communities' tax rolls have suffered and their financial resources have been drained. They are not as capable of financing their own programs as are the more prosperous communities.

Your committee believes that, in general terms, programs designed to aid depressed areas—those characterized by underemployment and misallocation of resources—have much in common, regardless of whether they relate to agricultural or industrial areas. Both types of areas require additional capital resources, new industrial development to absorb labor surpluses, increased availability of credit and technical assistance to the community; expansion of vocational education available to the local population; and enlarged and improved community facilities and services. It was emphasized during your committee's hearings that expansion of economic activity provides the only longrun solution to the problems of industrial areas with a chronic labor surplus. To achieve this goal, local producers should be enabled to take advantage of additional opportunities to expand and increase their level of output; surveys are needed to appraise and evaluate existing and potential local resources in order to assess the area's capacity for future economic growth; new industries and expanding industries which can put local resources to economic use must be encouraged to establish plants in depressed areas; workers must be afforded opportunity for training which will fit them for news jobs; and assistance must be given to needy workers while they are undergoing such training. Your committee is firmly convinced on the basis of the testimony it received that all of these programs should be administered by a single agency in the Federal Government.

We cannot rely on local efforts alone. We have relied upon such efforts in the past in most communities now considered distressed and they proved to be inadequate. The failure of such local efforts is the reason that the distressed areas problem has become a national problem. The greater national interest dictates that continued economic distress anywhere is destructive of the national well-being and at variance with the Employment Act of 1946, which states:

"It is the continuing policy and responsibility of the Federal Government * * * to coordinate and utilize all of its plans, functions, and resources for the purpose of creating and maintaining * * * maximum employment."

THE COST OF THE PROGRAM

(1) Comparison of bills

The following table compares new authorizations in the Senate-passed bill, the bill as reported to the House, and the administration bill.

[In millions]

	S. 722 (as passed Senate)	S. 722 (as reported to House) (in millions)	H.R. 4278 (administration bill)
Plant loans (industrial areas)	$100.0	$75.0	$50
Plant loans (rural areas)	100.0	75.0	None
Public facility loans	100.0	50.0	[1] None
Public facility grants	75.0	35.0	None
Retraining subsistence payments	10.0	10.0	None
Vocational training grants	[2]	[3] 1.5	[2]
Technical assistance	[3] 4.5	[3] 4.5	[3] 3
Total	[4] 389.5	251	[5] 53

[1] H.R. 4278 authorizes extending existing public facility loan program (now limited to $100 million) to cover distressed areas.
[2] No limit specified.
[3] Per year.
[4] Exclusive of unspecified amounts for vocational training grants.
[5] Exclusive of unspecified amounts for public facility loans and vocational training grants.

It will be seen that the bill your committee reported represents a cut of about one-third in the amounts authorized by the Senate-passed bill. Although a strong case was made during the hearings to support the amounts in the Senate-passed bill, your committee decided upon the lesser amounts in the hope that this compromise would result in getting this legislation on the statute books without further delay.

Your committee most sincerely hopes that the spirit of reasonableness and true compromise, which has been its guide, will be met in the same spirit by the administration in acting on this bill.

Further cuts cannot be made without serious danger of killing this new program before it can get started. Half way measures in this area could easily be worse than none. If an inadequate bill is adopted it could discredit all Federal efforts to bring effective assistance to these hard-hit communities.

(2) Primarily a loan program

As shown in the table above, four-fifths of the funds authorized by your committee's bill would be for loans. Most of these loans would be plant loans, made at an interest rate that would more than cover the cost to the Federal Government of borrowing money, plus another one-half of 1 percent to cover administrative expenses and build up a reserve for losses. Public facility loans would be made at an interest rate covering the average rate the Government pays on its outstanding obligations, plus another one-fourth of 1 percent to cover administrative expenses and costs. The same interest rate formula is now in effect in connection with the college housing loan program and experience with that program has shown that one-fourth of 1 percent is ample to cover administrative expenses and losses; it is reasonable to expect it will also cover expenses and losses on these public facility loans, because remarkably low-loss rates now prevail on municipal borrowings for this purpose. It is, therefore, reasonable to expect that the bulk of the expenditures under the bill will be investments, returning to the Government enough in interest payments to cover all costs to the Government.

(3) Cost of doing nothing

Depressed areas are expensive. If we do nothing about them, we pay for them directly through increased unemployment compensation benefits, and indirectly through loss of production. A representative of the Department of Labor told your committee in 1956 that if the ratio of unemployment in labor-surplus areas could be reduced to the national average, we would save about $100 million a year on unemployment insurance. This estimate was based on unemployment

compensation benefits of $1,350 million in 1955; since the corresponding figure for 1958 is $4,100 million it will be seen that substantially larger savings from this program can be expected today. This represents a direct saving; there will, of course, be even larger indirect benefits through increased production in depressed areas, including larger tax collections at all levels of Government.

(4) Cost of bill compared with similar Government investments abroad

The President's budget message this year included the following statement:

"The United States is directing its diplomacy and devoting a substantial share of its economic resources to maintaining world peace and the security of free nations. In a world which still contains much want and suffering, it is a goal of our foreign policy to promote the economic stability and growth of less developed countries. This is as vital to us as it is to the countries concerned in the present world situation."

In order to carry out this policy, the President has recommended expenditures of billions of dollars. The following figures, also taken from the President's budget message, give some indication of the size of our current effort in the field of economic and technical development abroad:

[Fiscal years; in millions]

Program or agency	Budget expenditures			Recommended new obligational authority for 1960
	1958 actual	1959 estimate	1960 estimate	
International Monetary Fund subscription (proposed legislation)		$1,375		
Export-Import Bank	$340	243	−$6	
Mutual security, economic:				
Development Loan Fund:				
Present program	2	125	180	
Proposed legislation			20	$700
Defense support:				
Present program	874	815	515	
Proposed legislation			265	835
Technical cooperation:				
Program program	140	159	85	
Proposed legislation			85	211
Contingencies and other assistance:				
Present program	408	470	272	
Proposed legislation			226	584
Other (primarily Department of Agriculture emergency famine relief abroad)	146	135	126	115
Total	1,910	3,322	1,774	2,445

This reference is not intended to be critical of these expenditures. Your committee has been instrumental in writing the laws under which the International Monetary Fund, International Bank for Reconstruction and Development, International Finance Corporation, and Export-Import Bank operate, and has supported these institutions in their investment programs, which have been to the mutual benefit of the United States and our allies in the free world.

At the same time, it should be emphasized that the amounts that this bill would authorize to assist our own distressed communities are small compared with the amounts we are putting into economic and technical development abroad. If we can afford $7 billion in 3 years for economic and technical development abroad, we can afford $250 million for the same purpose here at home.

RURAL DEVELOPMENT AREAS

The bill recognizes that chronic economic distress is by no means confined to urban areas. Despite our overall level of national prosperity, far too many rural counties still suffer from a high rate of unemployment or underemployment, and a disproportionately low standard of living. Too often we forget that within the ranks of agriculture there are approximately 1 million families with an annual income of less than $1,000. These families frequently have inadequate farming resources to provide full-time productive use of their labor under modern conditions. Many small farmers are hampered by inadequate capital and a scale of operations too small to give them a decent family living. According to the most recent data available from the census of agriculture, the gross sales of approximately one out of three commercial farms are less than $2,500. This bill would provide off-the-farm jobs to supplement the income of these farm families.

This solution was recommended to your committee by Mr. Herschel D. Newsom, master of the National Grange, who stated that from the long-range standpoint this bill "could be one of the most important pieces of agricultural legislation during the 86th Congress." The National Grange has expressed its support of this legislation in the following policy statement:

"The fundamental remedy, we believe, is to expand employment opportunities in areas of chronic rural underemployment. We hold that where human dignity and a decent American standard of living are at stake, we cannot be satisfied with half measures. We believe these very low income rural families deserve a positive and realistic effort that will help them obtain respectable, useful employment— either part-time work to supplement farming operations, opportunity to move to areas needing additional farmers, or full-time off-the-farm employment for one or more members of the family.

"Accordingly, we favor expansion of existing rural development activities to include more attention by Government agencies to this problem; a central administration to give leadership to local, State, and National efforts in dealing with rural underemployment; and limited financial aid, primarily in the form of loans, to help in the location or expansion of industrial activities in areas of rural underemployment."

Testimony before your committee indicated that off-the-farm employment is an increasingly important aspect in the economic life of America's farm families. In some instances, such off-the-farm employment provides a relatively small but extremely necessary supplement to farm income, and the farm itself continues to be the principal source of income. In other and steadily increasing instances, off-the-farm employment is supplanting the farm as the chief source of income for the farm family.

For over 3 years, the Department of Agriculture has been trying to help these areas through the rural development program. The program has shown some promise in opening up new job opportunities, but it has been hampered seriously by lack of funds, and has relied primarily upon exhortation and educational efforts. The committee agrees with the conclusion expressed in a recent report of the agricultural committee of the National Planning Association:

"The low-income rural problem is far too vast and deep seated to be solved by the rural development program as presently conceived. While the cautious grassroots approach of this program may have been largely justifiable up to date, it will have to become much more sharply focused, better integrated and coordinated, much bolder in its objectives, and far better financed if it is to make significant inroads in reducing the South's widespread rural poverty."

Your committee believes that the bill would represent a great forward step in coping with the low-income rural-area problem. Under the bill essentially the same economic tools available to industrial depressed areas would be made available to step up economic activity in the low-income rural areas.

The bill would require the Administrator to designate as a rural redevelopment area any county (1) which is among the 500 counties in the United States ranked lowest in level of living of farm-operator families, or (2) which is among the 500 counties in the United States having the highest percentage of commercial farms producing less than $2,500 worth of products for sale annually. (For a list of those counties which would automatically be designated as rural redevelopment areas, see appendix B, p. 23.)

This would mean that upon enactment, these areas would automatically be eligible for the loan and grant and other redevelopment features of the bill. They would become eligible for loans for industrial and commercial development, as provided in section 6 of the bill. They would become eligible for assistance in providing local public facilities, both in the form of loans and grants, as provided in sections 7 and 8 of the bill. They would become eligible for technical assistance. They would become eligible for the worker retraining aids provided in sections 15 and 16 of the bill.

Your committee believes that these aids taken in combination will provide the means for these low income rural areas to expand their economic base, provide additional job opportunities, and raise their general income level and standard of living. In helping achieve these most desirable objectives, your committee believes that the bill will make a solid contribution to the economic well-being of America's rural sections.

MAJOR PROVISIONS OF THE BILL AS REPORTED

Area Redevelopment Administration

Section 3 would create an Area Redevelopment Administration within the executive branch of the Government. It would be headed by an Administrator whose compensation would be $20,000 per annum. His appointment would be subject to Senate confirmation. While your committee is fully cognizant of the arguments for minimizing the number of agencies reporting to the President, there seems to be no alternative in this instance without seriously prejudicing the chances of the program's success. If this program is to succeed, we must have the wholehearted cooperation of both labor and business. Placing the program under the Department of Commerce, as was provided in the administration's bill, would be just as unacceptable to the labor community as placing it in the Department of Labor would be unacceptable to the business community.

The primary function of the Commerce Department is the promotion of business and commerce. This is not the orientation of this Area Redevelopment Act or of the proposed Area Redevelopment Administration. The purpose of this act is to help correct area unemployment by helping the people in these areas broaden their respective communities' economic base. Business will, of course, prosper from the operation of

this bill, as will all other segments of the community. But business' welfare is incidental to the main function of the bill, which is to help correct area unemployment in areas of chronic industrial unemployment and areas of chronic rural underemployment.

Since one of the two main purposes of the bill is to help solve the pressing problems faced by these rural areas, and the Department of Commerce is not acquainted with problems of this nature, the committee feels that this is an additional reason for placing this new program under an independent agency.

The administration should be centered in one independent agency with a clear mandate such as this bill provides rather than in a coordinating committee approach under 1 of the 11 interested departments, each of which has other primary functions and responsibilities. It is important that we do not force our communities seeking assistance to shuttle around Washington among the 11, all of whom have parts of this program to administer. Often, we as Congressmen are called upon by our constituents to help out in bringing their problems to the attention of the Government departments concerned. We do not like, any more than they do, being shunted around from one agency to another to obtain attention to their needs. This way lies frustration. In the interest of simplifying administration and giving the communities, regions, and States concerned one place to which they can come with their problems, we felt it essential that the administration be centered in a single, independent agency.

Centering responsibility for the success of this program in a separate agency will not only be a great convenience to the communities to be served, it will also provide one agency and one individual whom the President and the Congress can look to for leadership in helping solve the problem of area unemployment and underemployment in the United States, and one agency and one individual whom they can hold responsible for the administration of this act. One of the bills we had under consideration provided for this great responsibility to be centered in an administrator with a rank equivalent to an Assistant Secretary of the Commerce Department. To head this entire program at the Assistant Secretary level would seriously handicap its chances of success. An Administrator appointed by the President and confirmed by the Senate, as is provided in S. 722, will, assuming that the President appoints an individual of the highest caliber to this position, provide the kind of prestige and leadership which is called for if this program is to succeed.

Taking all these factors into consideration—the need for an agency which can gain the confidence of labor, management, and agriculture; the need for a unified administration that can help stricken communities and regions make a comprehensive attack on their unemployment or underemployment problem; the needs for a single, central point to which interested community leaders and their Congressmen can go for attention; the importance of a single Administrator and agency who can be held by the President and Congress responsible for the success of this program; and finally, the prestige that an Administrator appointed by the President and confirmed by the Senate would carry in the executive branch of the Government, as opposed to a mere Assistant Secretary in a department primarily devoted to other objectives—your committee feels that the Congress should establish an independent agency with an Administrator appointed by the President and confirmed by the Senate, rather than placing this great responsibility in any one of the 11 interested departments.

Redevelopment areas

Section 5 of the bill contains the proposed definitions of redevelopment areas.

The industrial redevelopment areas would be those where "there has existed substantial and persistent unemployment for an extended period of time." The Administrator would be required to designate as industrial redevelopment areas those which have suffered 12-percent unemployment during the entire year preceding the application, or 9-percent unemployment during 15 out of the preceding 18 months, or 6-percent unemployment during 18 out of the preceding 24 months. Apart from these mandatory designation requirements, the Administrator may designate any area which in his judgment suffers from serious unemployment of other than a temporary nature.

The definition is intended to direct the benefits of the bill to those industrial areas which are suffering from chronic unemployment, rather than areas which are suffering from nationwide temporary unemployment resulting from a general temporary recession. The provision would give the discretion and flexibility which was recommended by a number of the witnesses at the hearing, and at the same time give reasonably clear guidelines.

The Administrator would define the boundaries of the industrial redevelopment area which he designated. These areas might or might not be the same as the labor market areas used by the Government for other purposes. An industrial redevelopment area might include one or more towns or cities, or it might include a part of a county or municipality.

The Administrator is to designate rural redevelopment areas where "there exists the largest number and percentage of low-income families and a condition of substantial and persistent unemployment and underemployment."

The Administrator would be required to designate as a rural redevelopment area any county (1) which is among the 500 counties in the United States ranked lowest in level of living of farm-operator families, or (2) which is among the 500 counties in the United States having the highest percentage of commercial farms producing less than $2,500 worth of prducts for sale annually. (For a list of those counties which must be designated as rural redevelopment areas, see app. B, p. 23.)

Loans for industrial projects

Section 6 of the bill provides for two $75 million revolving funds, one for industrial projects in industrial redevelopment areas, the other for industrial projects in rural redevelopment areas. These revolving funds for loans were provided because witness after witness testified that in these urban and rural areas where unemployment and underemployment have been substantial and persistent, the communities' own resources are not sufficient to make it possible for industrial development to proceed.

This need for capital is related closely to the general need for small-business credit, which has occupied the attention of the Congress for many years. The Small Business Administration is now providing a limited amount of assistance. State business development credit corporations and authorities, and local organizations are seeking to provide equity capital or long-term credit for small businesses. The problems which small business finds in raising capital throughout the country are intensified in areas which have long been suffering from unemployment and underemployment. The local capital frequently has been consumed in previous efforts to start the new business, or in relief measures. Outside capital is doubly reluctant to venture into an area where other industries have suffered and failed; a safer investment elsewhere seems preferable.

Under the bill the Federal loan cannot exceed 65 percent of the project cost. At least 10 percent of the total cost would have to be supplied by the State or local government or by community or area organization, and not less than 5 percent of the total cost would have to be supplied by a nongovernmental source.

It is impossible to predict the kind or number of projects or the number of jobs which will be created by these loans. However, the two $75 million revolving funds will be sufficient to finance a substantial program which will demonstrate its feasibility and effectiveness. The total capital investment in the projects for which loans are made will be substantially greater than the amount of the Federal loans, by at least 50 percent. Accordingly, the loans authorized in section 6 should generate an initial total public and private expenditure of $225 million or more. This should have a very substantial effect in providing permanent jobs in areas of chronic unemployment or underemployment. And as these loans are repaid, additional funds will become available for new loans.

Section 6 expressly provides that loans made under it for industrial projects must not be granted to assist establishments relocating from one area to another, when such assistance will result in substantial detriment to the area of original location by increasing unemployment. This provision reflects the declaration of purpose of the act, to create new employment opportunities by developing and expanding facilities and resources without substantially reducing employment in other areas of the United States.

If the proposed transfer of a plant from one area to another will create as much unemployment in the area it leaves as it absorbs in the area it moves into, nothing has been gained from the point of view of the overall economy of the United States. The use of Federal funds for a transfer of this sort would not be justified. Expansion of existing firms in business elsewhere, without at the same time substantially reducing existing employment opportunities, is the aim of this Federal assistance. In an expanding economy ample opportunities can be found to develop the depressed areas without injury to other areas of the country.

Assistance for local public facilities

One of the most common problems facing communities which have experienced chronic economic distress is a lack of public facilities. The loss of revenue and the effect on the community's credit rating often make it impossible to build or maintain adequate public services and facilities without outside financial assistance. Perhaps the most frequent and most serious deficiency exists in water and sewer facilities.

An adequate supply of water is indispensable to modern industry, and its use is increasing rapidly. The President's special adviser on public works has reported that between 1955 and 1975, the Nation will need to increase its consumption of water by 191 billion gallons a day. It will soon be necessary to use every source of water available, and essential to protect our water supply from pollution. Many communities which now have few economic advantages will become increasingly attractive to industry as the search for water continues.

Because pure water is so important to both personal health and to economic expansion, a community must be prepared to provide an adequate supply if it is to survive and grow. Here, however, it is often faced with a dilemma: How to finance the facilities needed for growth on the basis of the present limited resources. In areas plagued by persistent unemployment, current economic conditions frequently make it impractical to go to the private market for funds because the interest rates which private lenders would demand are too high. Private lenders cannot undertake economic studies of each area which seeks to borrow, and hence they are guided largely by

the past. On the other hand, it may well be that such economic studies would give strong reason to believe that if an adequate water supply and other public facilities were available, along with other measures such as are provided for in this bill, business activity would expand, justifying the present investment through the direct taxes that such businesses would pay and the employment that would be generated.

The economic program contemplated in section 6(b)(10) of this bill would provide the basis on which a determination could be made of the future prospects of an area, and the actions which need to be taken.

Economic planning cannot be done in a vacuum. It must take into account available resources and aids as well as the problems to be overcome. It is obvious from the testimony presented to your committee over the past 2 years that obsolete or inadequate public facilities constitute one of the most widespread problems facing depressed areas. Hence, it is necessary that we provide at the outset for assistance to meet this problem, so that those who prepare programs for economic recovery will know the tools they have to work with. Such assistance is an integral part of any meaningful effort to redevelop depressed areas.

The financial assistance needed to overcome this problem is provided for in this bill by authorizing the Area Redevelopment Administration to make loans and grants for public facilities which will contribute to the economic improvement of the area.

Loans for Public Facilities

Section 7 of the committee substitute establishes a revolving fund from which the ARA Administrator would make loans for the construction, expansion, or improvement of public facilities, or for the purchase or development of land to be used for such facilities. Any State or political subdivision of a State, or any Indian tribe, is eligible to apply under the provisions of the bill. Restrictions are imposed on the use of the funds to insure that these projects are in line with the purposes of this bill, that the loans are sound, and that these facilities will not encroach on existing private utilities.

The amount of $50 million is authorized for appropriation as a revolving fund from which these loans would be made. The maximum maturity on such loans would be 40 years, and the interest rate would be limited to the average annual rate on all interest-bearing obligations of the United States at the end of the preceding fiscal year, plus one-fourth of 1 percent.

Before making a loan, the Administrator must find that the funds requested are not available to the local authority on equally favorable terms. Moreover, he must determine that the financial resources available, including the loan, are adequate to complete the project (but not in excess of the aggregate cost), and that there is reasonable expectation of repayment. These provisions will prevent the dissipation of the loan funds on projects which should be financed through other means, and also protect the Government from loss.

Any project covered by a loan under this section must be one which will tend to improve the opportunities in the area for the successful establishment or expansion of industrial or commercial plants or facilities. Moreover, the project must be consistent with a program for economic development which the Administrator has approved.

No project could receive assistance if it would compete with an existing privately owned public facility whose rates or charges are subject to State regulation, unless the State regulatory body determined that there is a present or foreseeable need for an increase in the service which the existing utility is unable or unwilling to provide.

Grants for Public Facilities

The Administrator would be authorized to make grants to assist in the financing of public facilities in redevelopment areas, and the bill authorizes $35 million to be appropriated for this purpose. As in the case of loans, a project for which a grant is made must be such as to tend to improve the opportunity for industrial or commercial expansion, and must be consistent with the economic program for the area provided for in section 6(b)(10). Also, no facility could be aided by a grant if it competed with a private utility unless the State regulatory body having jurisdiction determined that the project was needed. It is further provided that, to be eligible for a grant, the project must fill a pressing need in the area, and that there is little probability that it could be undertaken without the assistance of the grant.

The committee substitute also provides that the Administrator may undertake studies to determine the need and probable cost of public facilities in redevelopment areas, and any State or political subdivision, or any Indian tribe, may present a proposal for a needed project. The applicant is required to contribute to the cost of the project in proportion to its ability to do so, and the amount of the grant is limited to the difference between such funds as can be practically obtained for other sources (including loans under the bill), and the amount necessary to insure completion of the project. The Administrator is directed to provide for supervision of the execution of any project for which a grant is made to insure that the funds are not wasted or dissipated.

Taken together, the loans and grants provided for in this bill are a key element in any overall program to revive the economic well-being of areas which are now, for one reason or another, subject to chronic unemployment.

Technical assistance

The Administrator would be authorized to provide technical assistance to the redevelopment areas, including studies evaluating the needs of and developing potentials for economic growth for such areas. Such assistance could be provided by the personnel of the new administration or by private groups under contract. Appropriations up to $4.5 million annually are authorized for this program.

The sound redevelopment of a depressed area should be based on careful planning. Early in the program, a technological audit should be made to determine the types of economic activity which would contribute to sound and lasting growth.

A well-planned and carefully executed technological audit should show how the resources of an area could be put to their optimum use. The audit would not be limited to natural resources, although the best use of these should be carefully explored. Recent experiments in the use of coal as a raw material for the chemical industry and in the development of synthetic fuels hold much promise for a revival of the coal industry in some areas currently depressed. Instead of mining coal to be shipped to industrial centers as fuel, however, various types of chemical plants could be attracted to the coalfields since there would be substantial weight loss in the extraction of synthetic gases and chemicals from coal. Experimental work along these lines is now in progress. It could be hastened, however, by financial and technical assistance to labor surplus coal areas.

Some depressed areas are poorly endowed with natural resources, however, and in others basic resources have been largely depleted. How would a technological audit benefit these areas? Here the problem would be to discover the locational advantages of these communities for various types of processing, fabricating, and research activities. Specialists in industrial location could help determine the advantages which such locations have to offer to expanding industries. Their analysis would be based on long-term fundamental advantages, and not short-term inducements, often artificially created.

Business now operating in depressed areas could be encouraged to expand. Many types of specialists could assist in this. Industrial engineers, cost accountants, marketing specialists and others could assist small firms to increase their efficiency and to develop new products and services.

Urban renewal and planning aid

Sections 13 and 14 of the bill would make available certain Federal aids under existing programs administered by the Housing and Home Finance Administrator in order to facilitate the industrial development of communities in areas of substantial and persistent unemployment.

Section 13 would amend title I of the Housing Act of 1949, as amended, by adding a new section 112 which would make available urban renewal benefits under that act to a community when the Area Redevelopment Administrator designates the area in which the community is located as an industrial redevelopment area, and certifies that there is a reasonable probability that with the assistance provided under the bill and other aids, the area will be able to achieve more than temporary improvement in its economic development.

The addition of this new section 112 is necessary to eliminate certain restrictive provisions in the urban renewal program which would otherwise impede efforts to improve the economic development of the locality. For example, under section 110(c) of the Housing Act of 1949, as amended, it is required that project areas be predominantly residential in character or be redeveloped for predominantly residential uses. This limitation would be removed under the new proposed section 112 by making financial assistance available under the act for industrial development or redevelopment in project areas notwithstanding residential limitations in section 110(c) of the act. The amendment would also authorize financial assistance to industrial redevelopment areas by making eligible for rehabilitation a project area involving primarily industrial or commercial structures suitable for rehabilitation under the urban renewal plan for the area. As thus amended, title I of the Housing Act of 1949 would authorize financial assistance, in appropriate cases, to make available suitable cleared sites for industrial and commercial development and to permit industrial and commercial rehabilitation. The availability of good building sites at reasonable prices is a prime consideration in business decisions to locate or expand in an area. Under this amendment private enterprise would have an opportunity to acquire building sites for industrial development at their fair value. Coupled with the other benefits provided in this bill, the financial assistance made possible by the amendment to title I of the Housing Act of 1949, should materially assist in the establishment of stable and diversified local economies and help to create new employment in industrial redevelopment areas.

This section of the bill would also provide for two other amendments to the existing provisions of title I of the Housing Act of 1949 to adapt the benefits of that act more effectively to the broad purposes of this bill. At present, land acquired for a project area must be disposed of for immediate development. Under the provisions of section 13 of the bill this requirement for disposition for immediate development would be changed so that land designated for industrial use could be conveyed to any public agency or nonprofit corporation at fair value and the

public agency or nonprofit corporation could hold the land for subsequent disposition as promptly as possible in accordance with the urban renewal plan. The purchaser or lessee from the public agency or nonprofit corporation would however be required to use the land solely for the uses approved in the urban renewal plan in conformity with the requirements of section 105(b) of the act. This amendment should provide greater flexibility to the locality to obtain the type of industries which would best serve its purposes.

Once a contract is executed under the new section 112 the contract would remain in force until completion of the project even if it is later determined that the area may no longer be an industrial redevelopment area. This amendment would insure continuity of the development of the project area without fear that a later change in circumstances would make Federal financial assistance unavailable.

Up to 10 percent of the funds authorized for capital grants under title I of the Housing Act of 1949 after January 1, 1959, could be made available for projects in industrial redevelopment areas as defined in this bill.

Section 14 of the bill would make the planning advances provided by section 701 of the Housing Act of 1954 available to all counties, cities, or other municipalities in industrial redevelopment areas without regard to the population limitation otherwise applicable. That section of the 1954 act now generally excludes the larger communities, i.e., those over 25,000 population.

Worker retraining

In areas where the principal industry has left or is obsolete, or where the area never reached an advanced state of development, it will be important to provide vocational training and retraining for the people of the area. Developing new industries in the area will accomplish little, and will, in fact, be impossible, unless the available labor can meet the needs of the industry. Accordingly, the Secretary of Labor is authorized to make studies of the skills and other characteristics of the labor force in any redevelopment area. He is also authorized to provide assistance in developing a program to improve the utilization of such a labor force. Finally, S. 722 authorizes the Secretary of Labor, if he finds a need for vocational education in a redevelopment area, to assist in determining the vocational training needs of unemployed individuals residing in the area and to notify the Secretary of Health, Education, and Welfare of such needs. The Secretary of Health, Education, and Welfare may then provide assistance, including financial assistance where necessary, to the State boards for vocational education in the provision of such services in the area. The sum of $1.5 million annually is authorized to be appropriated for this purpose.

In order to enable unemployed persons to get the benefits of this training the bill also provides that the Secretary of Labor may make weekly retraining payments, through State agencies, to unemployed persons in the redevelopment areas, or 13 weeks at the average weekly unemployment compensation rate in that State, but limited to those not receiving unemployment compensation. An appropriation of $10 million is authorized for retraining subsistence payments.

Your committee believes that the cost of retraining payments should be borne by the Federal Government because the local communities in depressed areas are financially unable to shoulder this burden.

PROPOSAL FOR DEVELOPMENT OF UNDERDEVELOPED REGIONS

During the hearings, your committee received testimony from the Eastern Kentucky Regional Planning Commission favoring the designation of underdeveloped regions for assistance as well as depressed areas. It was pointed out that in some instances, basic developmental needs are regional and multistate in character, including such regional facilities as highways, water transportation, flood control and water supply.

While your committee feels that the principles embodied in the proposed amendments are too broad and far reaching to permit inclusion in the bill, it is also felt that the suggestions deserve careful consideration and study in relation to future treatment of the national economy.

Mr. BAILEY. I thank the gentleman. I now yield to the gentleman from Pennsylvania [Mr. VAN ZANDT].

Mr. VAN ZANDT. Mr. Speaker, the gentleman referred to about 177 labor surplus ares in the United States. Is it not true that in that number of 177 surplus areas there are 875,000 unemployed?

Mr. BAILEY. That is right.

Mr. VAN ZANDT. And those people have been unemployed for years. They are chronically unemployed, and we want to help them. It seems that the Congress is anxious to help everybody else, the farmers, the areas that suffer from disaster, and everybody else. But when we come to ask for relief for the 875,000 we have to resort to Calendar Wednesday to get the bill on the floor for debate.

Mr. BAILEY. I thank the gentleman from Pennsylvania [Mr. VAN ZANDT].

These areas are suffering from inadequate employment as a result of structural changes and industrial changes. I mention a few in particular. For instance, the textile industry in the South. The coal-mining industry is another. Our chemicals are going under from competition from abroad. Glass and pottery. I could name 100 or 125 articles that contribute to the situation.

May I say to you that the fact that West Virginia heads all the rest of the States in the number of its laboring force unemployed is due to the fact that we have five or six of our major products meeting too much competition. That applies not only to our coal but also to other articles that we manufacture.

I now yield to the gentleman from Oklahoma [Mr. EDMONDSON].

Mr. EDMONDSON. Mr. Speaker, I want to thank the gentleman from West Virginia for the opportunity to say a word about the agriculture section of this bill, also to thank him for the great leadership he has given this legislation for a long period of time now. The important thing from the standpoint of rural areas is that more than 690 counties in the United States stand to benefit directly from what can accurately be called a point 4 program for farm areas. A list of those counties appears in the committee report on the bill.

Mr. Speaker, I ask unanimous consent to make that list a part of the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

(The list referred to follows:)

LIST OF COUNTIES WHICH MUST BE DESIGNATED AS RURAL REDEVELOPMENT AREAS

Alabama: Autauga, Barbour, Bibb, Blount, Bullock, Butler, Chambers, Chilton, Choctaw, Clarke, Clay, Coffee, Conecuh, Coosa, Covington, Crenshaw, Cullman, Dallas, De Kalb, Elmore, Escambia, Etowah, Fayette, Franklin, Geneva, Greene, Hale, Henry, Houston, Jackson, Lamar, Lawrence, Lee, Limestone, Lowndes, Macon, Marengo, Marion, Marshall, Monroe, Montgomery, Morgan, Perry, Pickens, Pike, Randolph, Russell, Sumter, St. Clair, Tallapoosa, Tuscaloosa, Walker, Washington, Wilcox, and Winston.

Arkansas: Ashley, Baxter, Boone, Bradley, Calhoun, Chicot, Clark, Clay, Cleburne, Cleveland, Columbia, Conway, Crittenden, Dallas, Desha, Drew, Faulkner, Fulton, Grant, Green, Hempstead, Howard, Independence, Izard, Jefferson, Johnson, Lafayette, Lawrence, Lee, Lincoln, Little River, Logan, Lonoke, Madison, Marion, Miller, Monroe, Montgomery, Nevada, Newton, Ouachita, Perry, Phillips, Pike, Polk, Pope, Randolph, St. Francis, Scott, Searcy, Sebastian, Sevier, Sharp, Stone, Union, Van Buren, White, Woodruff, and Yell.

Florida: Baker, Calhoun, Gilchrist, Hamilton, Holmes, Jackson, Jefferson, Lafayette, Leon, Madison, Okaloosa, Suwannee, Union, Walton, and Washington.

Georgia: Appling, Atkinson, Bacon, Baker, Baldwin, Brantley, Brooks, Bryan, Burke, Butts, Carroll, Charlton, Chattooga, Clay, Clayton, Clinch, Coffee, Coweta, Crawford, Date, Decatur, Dodge, Douglas, Early, Echols, Elbert, Evans, Fannin, Fayette, Glascock, Gilmer, Greene, Hancock, Haralson, Hart, Harris, Heard, Henry, Jasper, Jeff Davis, Johnson, Lamar, Lanier, Liberty, Lincoln, Long, Marion, Meriwether, Montgomery, Murray, Newton, Oglethorpe, Pierce, Quitman, Raburn, Randolph, Rockdale, Screven, Stewart, Taliaferro, Tattnall, Taylor, Telfair, Towns, Treutlen, Twiggs, Union, Walker, Warren, Washington, Wayne, Wheeler, White, Wilcox, Wilkes, and Wilkinson.

Illinois: Hardin, Johnson, and Pope.

Kentucky: Adair, Allen, Breathitt, Breckinridge, Butler, Carter, Casey, Clay, Clinton, Cumberland, Crittenden, Edmondson, Elliott, Estill, Floyd, Grayson, Graves, Green, Greenup, Hopkins, Jackson, Johnson, Knox, Laurel, Lawrence, Lee, Lewis, Magoffin, Marshall, Menifee, McCracken, Metcalfe, Monroe, Morgan, Ohio, Owsley, Pike, Powell, Pulaski, Rockcastle, Rowan, Russell, Wayne, Whitley, and Wolfe.

Louisiana: Avoyelles, Beauregard, Bienville, Caldwell, Catahoula, Claiborne, Concordia, De Soto, East Feliciana, Evangeline, Franklin, Grant, La Salle, Lincoln, Livingston, Morehouse, Natchitoches, Red River, Richland, Sabine, St. Helena, St. Landry, Union, Vernon, Webster, West Carroll, West Feliciana, and Winn.

Michigan: Iron, Wexford, Alcona, Clare, and Iosco.

Minnesota: Itasca and Aitkin.

Mississippi: Adams, Alcorn, Amite, Attala, Benton, Bolivar, Calhoun, Carroll, Chickasaw, Choctaw, Claiborne, Clarke, Clay, Coahoma, Copiah, Covington, De Soto, Franklin, George, Greene, Grenada, Hinds, Holmes, Humphreys, Issaquena, Itawamba, Jasper, Jefferson, Jefferson Davis, Jones, Kemper, Lafayette, Lamar, Lauderdale, Lawrence, Leake, Lee, Leflore, Lincoln, Lowndes, Madison, Marion, Marshall, Monroe, Montgomery, Neshoba, Newton, Noxubee, Oktibbeha, Panola, Perry, Pike, Pontotoc, Prentis, Quitman, Rankin, Scott, Sharkey, Simpson, Smith, Sunflower, Tallahatchie, Tate, Tippah, Tishomingo, Tunica, Union, Washington, Walthall, Warren, Wayne, Webster, Wilkinson, Winston, Yalobusha, and Yazoo.

Missouri: Bollinger, Butler, Carter, Dent, Douglas, Howell, Iron, Madison, Oregon, Ozark, Reynolds, Ripley, Shannon, Stone, Taney, Vernon, Washington, Wayne, and Wright.

New Mexico: Mora, Rio Arriba, San Miguel, Sierra, and Socorro.

North Carolina: Alexander, Alleghany, Anson, Ashe, Avery, Bladen, Buncombe,

Brunswick, Burke, Caswell, Catawba, Cherokee, Clay, Cleveland, Columbus, Davidson, Duplin, Graham, Halifax, Haywood, Hyde, Jackson, Lincoln, McDowell, Macon, Madison, Mitchell, Montgomery, New Hanover, Onslow, Pender, Person, Polk, Rutherford, Scotland, Stanly, Swain, Transylvania, Tyrrell, Washington, Warren, Watauga, Wilkes, and Yancey.

Ohio: Gallia, Guernsey, and Noble.

Oklahoma: Adair, Atoka, Cherokee, Choctaw, Coal, Creek, Delaware, Haskell, Hughes, Latimer, LeFlore, Lincoln, McCurtain, McIntosh, Okfuskee, Okmulgee, Pittsburg, Pushmataha, Seminole, and Sequoyah.

South Carolina: Abbeville, Allendale, Anderson, Barnwell, Beaufort, Berkeley, Charleston, Cherokee, Chester, Chesterfield, Clarendon, Colleton, Dorchester, Edgefield, Fairfield, Greenwood, Georgetown, Greenville, Hampton, Horry, Jasper, Kershaw, Lancaster, Laurens, Lee, Lexington, McCormick, Newberry, Oconee, Orangeburg, Pickens, Saluda, Spartanburg, Union, Williamsburg, and York.

Tennessee: Anderson, Benton, Bledsoe, Blount, Campbell, Cannon, Carroll, Carter, Claiborne, Clay, Cocke, Cumberland, Decatur, De Kalb, Dickson, Fayette, Fentress, Giles, Grainger, Greene, Grundy, Hamblen, Hancock, Hardeman, Hardin, Hawkins, Haywood, Hickman, Houston, Humphreys, Jackson, Jefferson, Johnson, Lauderdale, Lawrence, Lewis, Lincoln, Loudon McMinn, McNairy, Macon, Madison, Marion, Meigs, Monroe, Moore, Morgan, Overton, Perry, Pickett, Polk, Putnam, Rhea, Roane, Rutherford, Scott, Sevier, Sequatchie, Smith, Stewart, Sullivan, Sumner, Unicoi, Union, Van Buren, Washington, Warren, Wayne, White, and Wilson.

Texas: Angeline, Anderson, Bastrop, Bowie, Burleson, Camp, Cass, Cherokee, Duval, Franklin, Freestone, Harrison, Henderson, Houston, Lavaca, Leon, McMullen, Madison, Marion, Morris, Newton, Panola, Polk, Rains, Red River, Robertson, Rusk, Sabine, San Augustine, San Jacinto, Somervell, Titus, Upshur, Trinity, Walker, and Wood.

Virginia: Alleghany, Appomattox, Bath, Bedford, Buchanan, Buckingham, Carroll, Charlotte, Craig, Dickenson, Floyd, Fluvanna, Grayson, Greene, Greensville, Halifax, Henry, Highland, Lee, Lunenburg, Mecklenburg, Patrick, Prince Edward, Russell, Scott, Tazewell, Washington, Wise, and York.

West Virginia: Brooke, Barbour, Braxton, Cabell, Calhoun, Clay, Doddridge, Fayette, Gilmer, Harrison, Jackson, Kanawha, Lewis, Lincoln, Mason, Marion, Mercer, Monongalia, Monroe, Nicholas, Pleasants, Pocahontas, Preston, Putnam, Raleigh, Randolph, Ritchie, Roane, Summers, Taylor, Tucker, Tyler, Upshur, Wayne, Wetzel, Wirt, and Wood.

Mr. EDMONDSON. I summarize the list as follows: It includes 56 counties in Alabama; 59 in Arkansas; 15 in Florida; 75 in Georgia; 3 in Illinois; 45 in Kentucky; 37 in Louisiana; 5 in Michigan; 2 in Minnesota; 76 in Mississippi; 19 in Missouri; 5 in New Mexico; 44 in North Carolina; 3 in Ohio; 20 in Oklahoma; 36 in South Carolina; 70 in Tennessee; 36 in Texas; 29 in Virginia; and 37 in West Virginia.

Those are not areas of industrial depression; those are areas of farm depression as defined in this bill. Most of them are counties where the commercial farms in those areas produce less than $2,500 worth of products for sale annually. They make up the dismal side of an otherwise bright picture in the United States which is reflected by the cold statistics, showing that 1 million American farm families have incomes of less than $1,000 a year. It is in counties where that kind of an acute depression exists where families would benefit, families who exist on less than $1,000 a year. We are trying to do something for them.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. McCORMACK. In addition to the farm families whose income is less than $1,000 a year, there are at least 5 million American families whose total family income is under $1,000 a year.

Mr. EDMONDSON. I am sure the gentleman is accurate, and I thoroughly support and thoroughly approve of those sections of the bill aimed at correcting conditions in industrial areas also.

Mr. McCORMACK. My only thought was to strengthen the gentleman's statement that there were a million farm families living on a total income of under $1,000 a year.

Mr. EDMONDSON. I appreciate the statement of the majority leader.

I think this is a balanced bill in terms of its contribution to the economic welfare of our country. I hope those Members who represent rural areas, farm sections in this country, will appreciate the need for this legislation and will come in and give it their enthusiastic support when this bill is ordered up on the floor on Wednesday.

Mr. BAILEY. I thank the gentleman from Oklahoma.

Mr. MORRIS of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I am committed to yield to the gentleman from Pennsylvania [Mr. FENTON]; then I will yield to the gentleman from Oklahoma.

Mr. FENTON. I thank the gentleman.

Mr. Speaker, I wanted to remind the gentleman from West Virginia as well as the gentleman from Pennsylvania [Mr. FLOOD] who spoke a few moments ago, that I am certainly in favor of a bill that can become law; in fact, I am in favor of a bill. I want to remind this House that we could have had area redevelopment 4 years ago, but this House refused to listen when I offered the administration bill.

I am not saying that it should or should not have been, but I do say that had we passed that bill we would have had area development for 4 years. Are we now going to face the same situation this year? I fear we may. I certainly want to state right here and now that I am in favor of a bill, and I hope that it is a bill that can be signed into law.

Mr. BAILEY. I thank the gentleman from Pennsylvania for his frank and open statement.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Mr. Speaker, when the bill comes up for consideration on Wednesday there will undoubtedly be efforts made collaterally to prevent the bill from being considered. If that is so, it means in all probability that the legislation is dead for this session because every effort has been made to get a rule out of the Rules Committee. I can assure you that the leadership on the Democratic side has gone as far as humanly possible in that direction. I am satisfied if we do not pass this bill on Wednesday next the chances are very remote of any legislation coming up during the present session.

The collateral methods that will probably be employed may be one of two. First, there may be the question of consideration raised under the Rules of the House. Of course, some Members might vote for that thinking they were avoiding from the record angle being placed on the record as opposed to the bill. When the bill comes up on Wednesday, anyone who votes against consideration is voting against the bill.

If that motion should fail and they cannot deny consideration of the bill, then someone might offer a motion to adjourn. As majority leader I would feel very much concerned about that because I think that is a question of procedure and should rest with the majority leadership. I may say that when the Republicans were in control of the House if any Democrat offered a motion to adjourn the House and the Republican leadership did not want it, I supported the Republican leadership on the question of procedure.

I can appreciate the raising of the question of consideration. The other is within the prerogative of any Member. But to me that would violate a time-honored custom that has existed between both parties no matter who was in control, that is, that the question of adjournment should rest with the leadership of those on the majority side.

It may be that both may come up. I expect the first question will come on the matter of consideration.

If we who support this legislation maintain our position I am hopeful that no motion to adjourn will be made, but, if so, I am hopeful that my Republican friends who respect the leadership and procedures of leadership will vote against such motion because I certainly would if the situation were reversed. I have done that in the past.

Mr. Speaker, what does this bill do? It authorizes $251 million in loans and grants to depressed economic areas in the United States. I am strong for mutual security because it is necessary for the national interest of my country. Certainly anyone who voted to help depressed countries abroad ought to vote to help depressed areas in the United States, areas with chronic unemployment. Certainly anyone who voted against the mutual security bill ought to vote for this legislation to assist to resuscitate, rebuild, and rehabilitate American depressed areas in order to bring back to the people of those areas an opportunity to have business attracted there, the doing of those things that will bring happiness to the people of those areas. We must remember that this is a Union, and whether we come from the North, East, South, or West, we have to consider the problem of other sections of the country as the problems of the entire Nation.

This $251 million is appropriated funds, a straight appropriation. As I understand it, of that amount $200 million will be in the nature of loans at

advantageous rates of interest, as it should be under the circumstances. But those loans will be paid back. So we are helping our depressed communities, our economically depressed communities, to help themselves. What finer constructive policy could we have than that?

Now, there are a number of distressed areas in Pennsylvania. I could name such places as Pittsburgh, Altoona, Scranton, Wilkes-Barre, and others. We know the plight of West Virginia, distress being so prevalent there. We know the condition in Massachusetts: New Bedford, represented by the distinguished gentleman from Massachusetts [Mr. KEITH]; Fall River, represented by the distinguished gentleman from Massachusetts [Mr. MARTIN]; Lowell, represented by the distinguished gentlewoman from Massachusetts [Mrs. ROGERS]; Lawrence; and maybe one or two others. Down through the Southern States there are many textile areas that are in distress, with cities and communities that will benefit from this law and are entitled to it. This covers the whole east coast, out west to Minnesota and Wisconsin, and even some places out further west than that. Certainly this legislation is of a constructive nature. It is an effort to try to make America stronger, to enable those communities to come back and attract new business, to bring hope to their people for employment for the hundreds of thousands who have been unemployed for many years. I think on the facts that there is no justification for voting against this legislation.

Mr. BAILEY. I thank the gentleman from Massachusetts.

Mr. MORRIS of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Oklahoma.

Mr. MORRIS of Oklahoma. First, I want to compliment the gentleman for taking the time to discuss this very important matter. I also want to compliment the distinguished gentleman from West Virginia for the fine statement he has made and for his liberality in yielding to the rest of us who are interested, and for the fine statement I know that will follow after those who have been yielded to have concluded.

First, I would like to read rather hurriedly a statement I picked up last year that expresses this matter in a nutshell better than I can, and then I would like to make just a very brief comment:

> The entire Nation has a stake in helping hundreds of thousands of our fellow citizens restore their depressed communities to a state of economic health. Federal aid is needed not for humanitarian reasons alone; the creation of suitable employment for displaced workers can add billions of dollars to our national output while eliminating the vast social costs of sustaining thousands in idleness.
>
> There are over a hundred American communities today which have been officially declared to be economically sick. Sometimes the word "depressed" is used, sometimes "distressed," sometimes "area of substantial surplus." Whatever language is used, these are the areas that have not known in recent years anything of prosperity. They are the victims of raw material exhaustions, technological changes, shifting product demands, changes in Government programs.
>
> Whatever the specific cause may be, it can't be solved by a local effort alone; nor can hundreds of thousands of people simply be told to pack and move on. Each of these areas has been affected by trends in the national economy, and it is the responsibility of the whole Nation to help such areas.

Now I would like to make this very brief comment.

Mr. Speaker, I am serving my 10th year in Congress now. I am one Member of the House who has always, ever since I have been here, voted against so-called foreign aid. I am not fussing with anyone who does vote for it; God bless those who do. I know they are acting in good faith and believe they are doing the wise thing. And, I believe I am doing the wise thing in voting against it. I know it has done a lot of good, but there is a lot of bad in it also. And I believe the bad outweighs the good.

But I ask all of you this question, What in the world is foreign aid but foreign relief?

What is it but relief to distressed areas? That is the purpose of it, to relieve distressed areas in the world. And now we come to the distressed areas in our own country. And yet so many good people cannot see their way to go along with it. I cannot conceive, in my own mind, why anybody would vote these billions and billions and billions of dollars for distressed areas over the face of the earth and then not be willing to vote some reasonable amount for distressed areas in this country.

Mr. Speaker, this final word and I shall have concluded. I know that it costs a lot of money to run this Government. I know taxes are high. Nobody is more opposed to unnecessary, high taxes than I am. But let me call your attention briefly to the budget that the President presented to us. This document I hold is entitled "Federal Budget in Brief" and it is put out by the Bureau of the Budget. I know that when the Committees on Appropriations work their will on it and when Congress finally works its will on it there will be some changes. I do not know how much of a change there will be, but the final amount will no doubt be substantially the same.

The total of the budget presented to us for the fiscal year 1961 is $79.8 billion. For major national security of our country the amount is $45.6 billion. For veterans $5.5 billion. For interest on the public debt which was created largely by past wars, $9.6 billion. When you add them all up—and I think my figures are not incorrect—to pay for our defense—and God knows I am for that, I would not pinch 1 penny against our national defense—but to pay for our national defense it is costing us this tremendous amount of money. Including what it costs us for past wars, it adds up to a total of $60.7 billion. When you subtract that from $79.8 billion, that leaves only $19.1 billion to do everything in this country; to take care of the agricultural program, to run other parts of the Government, to do everything else.

So I say it is high time that we spend a little money under this kind of legislation. I am strongly in favor of it.

I thank the gentleman for his liberality in yielding to me and others.

Mr. BAILEY. Mr. Speaker, I thank the gentleman. At this time I yield to the gentleman from Pennsylvania [Mr. SAYLOR].

Mr. SAYLOR. Mr. Speaker, I would like to take this opportunity to join my colleagues in commending our distinguished colleague the gentleman from West Virginia [Mr. BAILEY] for taking the leadership in the discussion of this very important piece of legislation which will be called up on the floor on Wednesday of this week under a rather unusual procedure, unusual in the sense that while it is provided for in the rules of the House and could be used every Wednesday, it is used only very occasionally.

I certainly hope that all the Members of the House will pay particular attention to the remarks of the majority leader [Mr. MCCORMACK] as to what devices might be used to frustrate the use of this unusual procedure on Wednesday, and to see to it, when they cast their votes on any matter coming up on Calendar Wednesday, that the Committee on Banking and Currency will have the opportunity to get this distressed area legislation discussed fully on the floor.

I believe that if the members of the committee and the men and women who come from areas of the country which will be benefited by this bill are given a reasonable opportunity to express their views, the House overwhelmingly will vote on Wednesday to pass this legislation.

Mr. BAILEY. Mr. Speaker, I thank the gentleman from Pennsylvania; and at this time I yield to the gentleman from Missouri [Mr. CARNAHAN].

Mr. CARNAHAN. Mr. Speaker, all of us here in Congress are heartened when we learn of the decline in unemployment across the Nation. However, the problem of unemployment is still with us and the latest released figure of the Department of Labor's Bureau of Labor Statistics gives us a national total of 4,206,000 unemployed. This is entirely too many people out of work in a nation of our strength, economic potential, and democratic concern for the welfare and prosperity of all its citizens. The Nation cannot truly be considered to be economically healthy as long as there are over 4 million out of work and thus unable to adequately support themselves or their families and dependents.

There is along with this problem of people out of work and unable to find work, an equally compelling problem. It is just as devestating to the economic well-being of this Nation. I refer to the problem of underemployment.

The Ways and Means Committee has been holding extensive sessions on various proposals to amend the Social Security Act. I am sure that many of you join me in the hope that legislation might result from these actions by this committee which would strengthen and improve our unemployment insurance system. In spite of the general eco-

nomic conditions that may exist in the Nation at any particular time, I have long felt that we need Federal standards for unemployment insurance equally applicable across the country. Adjusted nationwide standards for unemployment insurance payments will help to reduce the tragic impact of any future large-scale declines in our total economic activity that might occur and will help provide for persons willing to work and who lose their jobs through no fault of their own.

Along with this problem of unemployment is something else to give us concern: unemployment tends to be concentrated in a number of areas throughout the Nation. These same areas resisted the upward trend following World War II and in good times and bad times they have persisted in remaining chronic blights on our national economic picture.

Mr. Speaker, it is my firm conviction that we cannot ignore the obvious need to assist these communities in lifting themselves out of this economic quagmire. These people must be helped to broaden and expand their economic base so that they can provide adequate support for their families and actively participate in the general economic growth of the country. This is dictated not only by the needs of the Nation but by a compassionate and humanitarian conviction that every American should have full opportunity to support himself, his family and dependents and enjoy some of the obvious luxuries made possible by this marvelous new age of technological expansion. There are areas within this Nation where this is denied otherwise healthy and willing workers. This situation has existed long enough to be taken out of the classification of temporary dislocation and viewed as genuine distressed areas. To be sure we have licked some of the problems of inflation, recession, and continued economic growth and expansion and we can take credit for it but we cannot refuse to face these stubborn areas where people still must eat, pay rent, send their children to school and meet the thousand and other necessities required by daily living.

The key to this problem is in my mind not found in the field of excessive grants, hand-outs, subsidies, or relief in the form of surplus foods. The key is summed up in these very simple words, "to help these people to help themselves." This Government here in Washington cannot solve the problem as such in totality but it also cannot refuse to provide a helping hand to lend necessary impetus to put these areas once again on the credit side of the national ledger. While these communities across the Nation have their current distress as one element in common, there is no one program adequate to meet all the need. The implementation of this proposed legislation must indeed provide for the individual needs of individual localities.

Indeed, the Congress has not been idle in this matter and it is a matter of rather deep disappointment to me to have to retrace our steps this year. Congress has been dealing with this proposed legislation for a number of years, beginning with 1949, when S. 2881 was introduced to implement the Employment Act of 1946 and provide specific aids to areas of serious unemployment. A similar measure was introduced here in the House in 1950—H.R. 7444. Various other proposals have been in either one or both of these legislative bodies since that time. Toward the end of the 85th Congress, the Congress passed an area redevelopment bill which was subjected to a Presidential veto. This program would be well on its way today, making this action unnecessary, had it not been for this veto by the Executive.

Early in this Congress the Senate took the initiative and reenacted a bill similar to the one vetoed. This bill, S. 722, is before us again, and, allowing further delay, would merely tolerate postponing a job which America needs and needs now.

S. 722 is, in my mind, a very carefully thought out bill and is certainly diverse enough to help meet the diverse needs of these peoples residing in these distressed areas.

This bill, Mr. Speaker, would provide for the following:

First. Provide $200 million for low-interest Federal redevelopment loans to help construction of new plants.

Second. Set up another $175 million for Federal grants and loans that would be used to help improve water and sewerage systems which are needed to attract and hold industry.

Third. Establish under the Health, Education, and Welfare Department, a vocational training program—with limited subsistence payments—for unemployed workers.

Fourth. Deny aid to runaway employers who might try to relocate in a depressed area at the expense of creating unemployment elsewhere.

Or, to put it another way, S. 722 provides for technical assistance to plan the redevelopment of a community, loans to business firms locating or expanding in these areas, the development of needed public facilities, training and retraining of the labor force in depressed areas, and urban renewal.

The very first thing needed in such a proposed program as this outlined in S. 722 is to inventory the human and physical resources of the community. Only after the people of a given community have had an opportunity to properly appraise their economic potential can they plan exactly what type of industry can best prosper in that community. We do have an Office of Area Development in the Department of Commerce and the Bureau of Employment Security in the Labor Department which seeks to assist in this area. But their resources are entirely too inadequate to perform a job the size of the one which gives us concern here now. The proposals in S. 722 would appropriate money to expand technical facilities to help depressed areas develop a positive program geared to the peculiar and particular needs of their own locality.

As is the case in many of these areas where the problem of chronic and persistent unemployment goes back several years, many of these chronically depressed communities have either depleted or do not otherwise have the needed financial base to attract new industries. This program provides for the establishment of a revolving fund from which the depressed communities could borrow money at a reasonable rate of interest to improve their public facilities. Grants are given only in those cases where deterioration has become so severe that the economic base has dropped to the level where taxes cannot be further levied to pay the interest for this program. Only in these cases does this bill involve grants.

Credit ratings suffer when an area is long distressed with serious unemployment. New capital is not so venturesome and not as willing to take such risks. The problem of obtaining credit becomes acute. It is for this reason that the bill provides for a revolving fund from which businesses locating in or expanding in these areas would be able to obtain loans. Two separate revolving funds are involved in this bill: One for industrial communities and the other for rural areas where income is commonly low and underemployment prevails.

There is yet an equally important phase of this proposal—the training and retraining, where necessary, of the people to man these jobs and run these machines and staff these industries. This holds particularly true in rural areas desiring new industry, that there is frequently a lack of trained personnel available for new plants. In industrial areas which are suffering from persistent unemployment and its consequent hardships we find that many people formerly excellently trained in their fields have reached a point where their skills and training and experience have become obsolete because of changes in consumer habits or new technological developments or because of depletion of resources or changes of industrial location. S. 722 would provide for the establishment of training facilities in these areas to equip the labor force to accept new jobs. This means that where people have been unemployed for substantial periods of time that there is oftentimes no money available to undergo a period of retraining. This proposal provides that individuals going through a period of retraining transition would be considered eligible for subsistence payments during such a period but not for longer than 13 weeks. This could become a very expensive program but certain safeguards have been written into the bill. The program would be limited to the expenditures of $10 million a year. This is good, because since it is a new program it would allow for an evaluation of the program to determine the effectiveness of subsistence payments and at the same time meet any objections to budgetary requirements by holding down outlays to a bare minimum.

Finally, this program would also deal with the question of blighted commercial areas. This is presently limited primarily to residential slum areas.

It is to be noted that the appropriations to be asked for in carrying out this bill is not an annual amount but represents the total extent to which it is felt we must go to put these depressed areas

back on their feet and able to participate in full employment and the nationwide prosperity which generally prevails throughout the country. Let it be emphasized that most of the funds called for in this proposal are not really an expenditure and thus a burden on the taxpayer. This is basically a program of low-cost loans and it has been the experience of the RFC and the Small Business Administration that similar loans have been repaid in full and the interest the borrowers of these funds pay will be in excess of the interest the Government pays for borrowing its own money. This major provision of the bill will not constitute any burden on the taxpayer. Of course, good bookkeeping would require that these funds appear as an additional budgetary outlay but any overzealousness to balance the budget leads me to stress this point, lest we be treated to a repetition of the veto of the last Congress.

There is within my own district, Mr. Speaker, such distressed areas. The Flat River area within what is known as the Lead Belt needs this bill. The Bureau of Labor Statistics informs me that as of December 1959 there were 2,700 people out of work in this area. This constitutes 9.5 percent of the labor force.

Another factor of equal importance, not only in my district but in hundreds of others across the Nation, is the decline in the parity ratio figure for farmers. I checked just this week with the Department of Agriculture about this. The parity ratio is still declining. This parity ratio is the relation of the prices the farmer receives to the prices he has to pay. In 1958 this figure was set at 85 percent. In May 1959 it had dropped to 82 percent. As of April 15, 1960, a further decline to 80 percent was recorded. Millions of farmers continue, in the face of such pressure, to leave the farms. Forced off the farms, they must have other opportunities to make a living, and this bill is urgently needed to help provide such opportunities. In fact, Mr. Speaker, much of the Eighth Congressional District of Missouri, which I have the honor to represent, would qualify as rural redevelopment areas, or areas in which there exists a large number and percentage of low-income farm families which has resulted in a condition of substantial and persistent unemployment or underemployment over a period of years.

Finally, Mr. Speaker, the country needs this legislation. We must help stamp out this national blight. We must plan ahead and make every effort to prevent a reoccurrence of recessions and economic decline. This measure is a basic tool which the Congress has to offer the people of this Nation as we seek to bring the blessings of peace, well-being, economic prosperity, and happiness to each American willing to work and earn a living by the sweat of his brow. This is a bill of substantial value, and I hope that this body will follow the shining example of the other body and give it the support it deserves.

Mr. SISK. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from California.

Mr. SISK. I appreciate the gentleman's yielding to me.

As I examined the report I noticed that my own State is at the present time not included in the areas where a depressed condition exists. However, I have a very strong feeling that we do have a responsibility in this legislation and in matters of this kind. I think that anything that tends to help and improve Americans in any part of our country tends to help to improve the lot of all Americans. We in the West have been much concerned for many, many years over the development of arid areas, the development of our deserts, the putting of water on our lands in order to produce the food and fiber which our Nation needs. We deeply appreciate that the Nation as a whole has supported the great program of reclamation in the West. We believe that as our people are able to purchase steel, automobiles, and other materials from the East we help all America. Certainly it is my opinion that this bill should be passed, that these areas should be helped, and that taking care of the situation and improving the economic well-being of these people will help my State of California as it will help every other State of the Union. Even though our State may not be a direct beneficiary, what is good for America is good for every State. Certainly I am happy to support my colleague in support of this bill. I hope that on Wednesday we will be able to move forward with this legislation.

Mr. BAILEY. I thank the gentleman.

Mr. HECHLER. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from West Virginia.

Mr. HECHLER. I thank the gentleman from California for his statement on this situation because this is not a sectional problem, this is an investment in the security of the entire Nation. I join my other colleagues on both sides of the aisle in urging that this important and vital piece of legislation be favorably acted on next Wednesday.

Mr. MOELLER. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Ohio.

Mr. MOELLER. I am sure if I were to poll the people of my district in Ohio relative to the urgency of legislation that would affect my people, this one piece of legislation would be unanimously listed as one of top priority. We are not in a depressed area, we are in a distressed area. We have people in my district who have been out of work for many, many years. The coal mines are closed. The small industries we have have been closed down. People are looking for work and have looked for it for years. We are not interested in just adding a bit to our wealth, we are interested in finding means for some of these people to make an honest living.

I sincerely hope this legislation will get favorable action next Wednesday. I earnestly hope this will not become a political issue. I happen to represent a district that since the Civil War has not until my election elected a Democrat to office. I am sure there would be nothing that would so guarantee my reelection as the administration's strong opposition to this kind of legislation that is helping people who are in dire need.

In the county seat of one of the counties in my district last year only three new houses were built. Not a soul could think about building a new house. Those who are in business there today say that if they can find a buyer they want to move out. They cannot make a go of it. Primarily, this is going to be assistance by way of loans. Surely, many of us feel that foreign aid assistance is a good thing—and I feel it is—but until the people in my district get some consideration, I cannot support it. Certainly, we ought to be interested in not just giveaways but to make loans to the people in our districts, in these distressed areas, I emphasize, to give them an opportunity to make a decent living.

Mr. BAILEY. I thank my colleague.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. SMITH of Iowa. I commend the gentleman for the hard work he has done on this bill. One of the first things I heard when I came here a year and a half ago was a speech by the gentleman from West Virginia on this very problem and he has spoken about this problem many times ever since. As long as we have a free enterprise economy, which I hope is forever, we will always have a few depressed areas or pockets within the prosperous economy even. Certainly, the gentleman is to be commended for working for this kind of legislation.

Mr. O'HARA of Michigan. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. O'HARA of Michigan. Mr. Speaker, I commend the gentleman from West Virginia for taking this time today to bring this matter to the attention of the Members of the House. It is my belief, in the long run no legislation which will be brought before the House during this session of the Congress will be more important than area redevelopment legislation. That is because it calls for an investment in America and for full utilization of our natural resources, both human and plant resources. I am certain, if the House favorably considers this legislation, we will have gone a long way toward helping our country to be a better place in which to live.

Mr. BAILEY. I thank the gentleman from Michigan.

Mr. METCALF. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. METCALF. Mr. Speaker, I, too, compliment the gentleman from West Virginia for his leadership in bringing this to our attention. We have seen in the course of this discussion that this bill is important to every region in America because it not only provides for urban renewal and redevelopment, but it provides for rural redevelopment.

It has not been pointed out yet, however, that not only may municipalities and States and public bodies borrow for the facilities covered in this bill, but Indian tribes may participate. I come from a State where there are several Indian tribes. Those Indian reservations

are among the most depressed and underdeveloped areas in America. This bill will provide that those people, too, may borrow money to help themselves to develop their resources and, thus, take a burden off the taxpayers of America. It would be very unfortunate if all of these matters were not thoroughly discussed and debated next Wednesday, and if a motion for consideration would fail and the House should turn down an opportunity to discuss and explain and debate this bill. I hope we will be able to consider it and bring out all of the wonderful things that can be done by the people for themselves under this legislation when we have this bill on the floor next Wednesday.

Mr. BAILEY. I thank my colleague.

Mr. McGOVERN. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from South Dakota.

Mr. McGOVERN. Mr. Speaker, I, too, commend the gentleman on his leadership in this field.

Mr. BAILEY. Mr. Speaker, I yield to the gentleman from Maine [Mr. OLIVER].

Mr. OLIVER. Mr. Speaker, it seems to me that this problem which is being discussed this afternoon goes far beyond the interest of any district or any State. It is national in its scope. It seems to me that persistent unemployment is like pernicious anemia in its poisonous result. It costs increased taxes. It costs far more to tolerate it than to correct it.

I ask unanimous consent, Mr. Speaker, to insert in the RECORD a statement I made before the Committee on Rules when I tried to get a rule from that committee to consider this under the usual procedure. That attempt did not have much effect on the Committee on Rules as is evidenced by the fact that we have to be here for Calendar Wednesday. It may be worthy of consideration by some of the other Members. I hope it will have more effect on some of the other Members than it had on the Rules Committee who refused to give us a rule for consideration of this measure.

The SPEAKER. Is there objection to the request of the gentleman from Maine?

There was no objection.

(The statement follows:)

Mr. Chairman, on behalf of the citizens of the First Maine Congressional District, I appreciate this opportunity to comment briefly on S. 722, as reported by the House Banking and Currency Committee.

Not only in the interests of my district and the State do I urge a rule for consideration of this bill as soon as possible, but I also urge action in the best interests and general welfare of the Nation.

To pinpoint the need for this legislation so far as Maine is concerned, I quote from the March 1960 newsletter of the Maine Employment Security Commission. In that report, we find the rate of insured unemployment was 8.2 percent which placed my State among the eight highest in the country. The other States with this high rate of unemployment include Alaska, Arkansas, Idaho, Montana, North Dakota, Washington, and West Virginia. In January the rate reached 8.9 percent. This compares with 5.8 percent as the nationwide rate of unemployment in March. By prerecession standards, current unemployment is comparatively high—about 45 percent above the average of 1956–57 midwinter levels.

Nationally, persistent unemployment is like pernicious anemia in its poisonous results. It is corrosive and it is infectious. It prevents full employment. It causes increased taxes. It has a snowballing effect. It costs far more to tolerate it than it would to correct it.

S. 722 primarily provides a revolving loan fund for the extension of credit to help communities help themselves. In effect, it is an investment in economic health to save the cost of unvoluntary idleness and underemployment.

I do not look upon this bill as an antirecession or depression measure, but as a full employment bill to put into production our human and natural resources, so that America can move ahead toward the growth and expansion to which our people are entitled. If we consider the bill and its purpose in this light, it then is not a burden but a stimulus. It removes the drag on our economy and we all benefit. It is, in fact, a point 4 program for the communities of this Nation and will raise the economic levels on the constructive, productive basis to which every area of this country is entitled.

No section of the country is immune to changes in technology. Tomorrow, a change in a defense weaponry system could mean that the economy of an entire State could be undermined. Any extensive decrease in defense expenditures would have the same effect.

In fact, the initiation of this redevelopment program could serve to prevent economic collapse in many defense contracts or military dependent areas when, as and if, contraction of defense efforts develop.

Sanford-Biddeford-Saco and Portland, communities in my district, have known the adversity caused by industrial operations folding up. Sanford, especially, hit in 1954 through the cannibalistic liquidation of its one prosperous industry by a hungry textile giant, has been struggling ever since to lift itself by its own bootstraps. Through the courage of its leaders and their persistent and unselfish efforts, the town has been successful in replacing 50 percent of the jobs lost through industrial greed. Sanford was highly publicized as "the town that refused to die." If S. 722 had been on the books at that time, I feel confident that the complete job of rehabilitation would have been accomplished in much less time.

This legislation has received rough treatment, primarily, in my opinion, because of the improper and unfounded interpretations which have been placed upon it. Simply stated, the purpose of the bill is nothing more or less than the establishing of Federal mechanism to work along with State, area and local industrial development groups to create productive jobs based upon natural and human resources of the various communities of America which today are idle and substandard in every respect through no fault of their own. Unless action of this kind is made possible through the enactment of this legislation, the problem will grow increasingly worse. I urge this committee, Mr. Chairman, to grant a liberal rule so that the House may work its will on this issue.

Mr. BAILEY. I thank the gentleman from Maine.

I now yield to the gentleman from New York [Mr. STRATTON].

Mr. STRATTON. Mr. Speaker, I join with my colleagues in commending the gentleman from West Virginia in his struggle to get this legislation before the House for favorable consideration

I do not know of a piece of legislation that is before us in this session which is more important or more vital than the distressed areas bill, which we are hopeful will be brought before the House for consideration, as the gentleman has pointed out, on Wednesday next.

Shortly after coming to this body I was happy to join with the gentleman as cosponsor of that legislation, and I have been happy to work with the bipartisan group in this House to get it enacted.

I represent three of the most critical unemployment areas in the State of New York. The cities of Amsterdam and Gloversville, in the heart of the glovemaking industry, and one of the three major areas, Schenectady, the home of General Electric Co.

This issue was a major issue in the campaign 2 years ago. The people are still crying for action by this body.

I was home in my district over the weekend. I spoke in Amsterdam over the weekend, and I told them I thought I would have some good news to report. I hoped we would be able to bring this legislation to the floor on Wednesday. The people I talked to shook my hand with tears in their eyes, and said, "SAM, I hope you can go down and get that bill out, because we need it in the city of Amsterdam." In spite of all they have done to help themselves, it is not enough.

I hope and pray we will get this legislation approved. I join with the great majority leader here in the belief that this legislation is for the good of the whole Government. You cannot have pockets of unemployment without destroying the country as a whole. This is an economic cancer. This is the only kind of legislation that will deal with that cancer.

I might say that it does not make sense to give away billions of dollars to foreign countries while we continue to neglect our own citizens in this country. In spite of the fact that I am strongly in favor of the basic principle of foreign aid, I joined with the gentleman from Ohio and other Members of this House in voting against the legislation this year in protest of the fact that we could not get a rule from the Rules Committee for consideration of this legislation. I hope we will get this bill out and get it passed on Wednesday.

Mr. BAILEY. I thank the gentleman from New York.

I yield to the gentleman from Pennsylvania [Mr. VAN ZANDT].

Mr. VAN ZANDT. Mr. Speaker, a moment ago the gentleman made mention of the fact that the Committee on Agriculture and the Committee on Armed Services might accept the call on Calendar Wednesday. I hope, as he does, that the Committee on Agriculture will not accept the call. And I just want to say this to the Armed Services Committee, that tomorrow we meet at 10 o'clock, and I understand that a bill will be considered at that time for the purpose of being brought up on Calendar Wednesday by the chairman of the Armed Services Committee. Let me assure the gentleman from West Virginia and likewise by colleague from Pennsylvania that tomorrow morning we will

fight this issue out in the Armed Services Committee, because we do not want the Armed Services Committee to be employed as a tool for the purpose of forcing off of this floor a bill that will bring relief to 875,000 unemployed in 177 chronic areas in this country.

Mr. BAILEY. Mr. Speaker, I yield to the gentleman from Iowa [Mr. JENSEN].

Mr. JENSEN. Mr. Speaker, I have enjoyed very much the colloquy between the gentleman from West Virginia and our other colleagues relative to this important and pressing matter. I could not help but think, however, as I sat here listening to these remarks that the gentleman from West Virginia [Mr. BAILEY] has often taken the floor and opposed the imports which are coming into this country. The gentleman has explained why there were depressed areas in his district, which was because of the imports which were coming in over a very low tariff wall, and I have agreed with him perfectly.

Is it not a fact, I ask the gentleman from West Virginia, that we will have this situation of depressed areas with us until kingdom come unless we raise our tariff walls on many of these commodities that are flooding this country and causing these depressed areas?

We have the problem of imports depressing our prices not only in the industrial field but also there has been a flood of agricultural commodities coming into this country that has created to a very great degree the farm problem that is with us today.

Mr. BAILEY. I am advised that the imports of agricultural products into this country exceeded our exports of agricultural products.

Mr. JENSEN. Oh, yes; this last year.

Mr. BAILEY. It probably has over successive years. The gentleman from Iowa in his statement has, in my opinion, pointed out one of the major reasons that has caused these soft spots in our economy. They can be laid right at the door of our trade policy.

Mr. JENSEN. I am sure the Congress of the United States has the responsibility of passing a tariff to protect American industry and American agriculture and American labor. A few years ago I was told that Karl Marx, the daddy of the Communist ideology, stated a short time before he passed on that he favored free trade for all the world. They asked him why. He said, "Because that would be the quickest way to communize the world." They asked, "How?" He said, "By leveling us all out to one standard of living."

Unless we raise this tariff wall I feel that Karl Marx is going to have his way. How long is this House, this Congress, going to sit idly by and let this condition exist? Yes; we have the Smoot-Hawley bill that everybody has criticized—that is, not everybody, but a lot of folks—but we have never repealed that law to this day. We have, however, been chopping away at it with this reciprocal trade treaty which is, in effect, not reciprocal at all. We lower our tariffs and then many of the other nations raise their tariffs to protect their own people, their laboring people.

How much longer are we going to sit idly by? This Congress should, at the first opportunity, and that should be before we adjourn, pass a tariff act, or not a tariff act, but leave the Smoot-Hawley Act as it is, tell the President, the State Department, and everybody else that has anything to do with tariffs that we will from this day on after the law is passed raise the tariffs at least 50 percent on everything that is shipped into this country which is creating all of these depressed areas, or most of them. That would cost us nothing, not a single dime, and most of these depressed areas would become prosperous areas within 6 months after we passed such a law.

How long are we going to sit idly by and let this condition continue to exist?

Mr. BAILEY. I thank the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Iowa.

Mr. GROSS. I thank the gentleman for yielding to me. The gentleman from Iowa [Mr. JENSEN] is saying to the gentleman and those who support this bill that they have the cart before the horse. Let us pass legislation that causes the situation. Let us quit dealing in effects and pass some legislation that deals with causes and not effects.

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. My position, of course, is well known to both gentlemen from Iowa and the gentleman from West Virginia on reciprocal trade agreements. But I cannot yield to the last speaker from Iowa and agree with him that the horse to which my friend from West Virginia refers is dying. I think of the old story of the circus clown. He taught his horse to do all kinds of tricks. Then he thought he would teach the horse not to eat because it was pretty expensive. By golly, he did teach the horse not to eat, but it died.

Mr. BAILEY. I thank the gentleman from Pennsylvania.

May I in conclusion, Mr. Speaker, read just a closing paragraph to pinpoint this matter?

I call the attention of my colleagues to the fact that back as early as 1956 there was legislation considered and passed by the other body to provide in certain areas a redevelopment program. That bill was passed by the Senate, but never got beyond the Rules Committee of the House. Two years ago we succeeded, after the Senate passed a bill, in getting that bill out of the Rules Committee. It was approved by the House, but vetoed by the President.

Now, the Senate has passed an area redevelopment bill. Our bill in the House here is only about half as costly as the one proposed by the Senate. I think maybe in this particular economic situation we can certainly justify giving those things to the people in these soft spots in our economy that we are giving to the peoples of the underdeveloped countries abroad.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. Would it not be more accurate to say that the excess in this bill over the bill recommended by the President comes within a very few million dollars of being the amount which the House trimmed from the President's budget request for foreign aid?

Our action on the reduction of foreign aid would provide additional funds to make up the difference to finance this area redevelopment act.

Mr. BAILEY. I think the figures are somewhat similar, I am pleased to say to the gentleman.

Mr. FLOOD. I might point this out to the gentleman from Oklahoma. The administration of chapter 6 of this bill calling for a $75 million loan in the industrial section only, the technicians advise me under the provisions of the bill, as a revolving fund, will produce, when loaned and revolved and paid, $225 million, which will make the bill, with that one chapter, more than pay for itself, as is the tradition in the FNMA operation of mortgages.

Mr. BAILEY. I thank the gentleman.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that the gentleman from West Virginia [Mr. BAILEY] and I may revise and extend our remarks and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. LIBONATI. Mr. Speaker, I agree implicitly with the gentleman from West Virginia [Mr. BAILEY] that the depressed areas bill is one of the most important pieces of legislation to be acted on by the Congress at this session.

It is ironical that anyone would seek to defeat this much needed legislation for areas that are in distressd circumstances.

The honesty of purpose of a nation lies in its consistency to give to its citizens at least those economy advantages and concern that in its leadership it has provided for and assumed for foreign areas; the freedom loving nations as well as captive nations.

The loans under this bill are an investment in American citizens and their communities. The financial responsibility is guaranteed under the stimulated industrial growth of these communities and the added stability it gives to the economy.

Every American is entitled to employment—this bill will insure that employment. To destroy the chance to bring about this economic stability to insure employment is to weaken the future of our national policy in the foreign mutual security and aid funds that the Congress has falteringly enacted in the past. The decision of the administration should be to favor this legislation.

Mr. WALTER. Mr. Speaker, the House on Wednesday will again take up area redevelopment in the form of S. 722. This legislation is basically similar to my bill, H.R. 1377, which I introduced on January 7, 1959.

In the many conversations I have had on this legislation I found them to be most interested in the economic distress

which the State of Pennsylvania and many other areas of the Nation unfortunately find themselves.

Anyone giving serious study to this problem understands that the economic distress which the workers and the communities are experiencing did not result from recessions. They also understand that these conditions will not be improved by economic boom. Areas of Pennsylvania, some in my congressional district, are the victims of our industrial progress. Where this progress develops diesel engines, as substitutes for steam locomotives, the railroads cease to purchase coal and reduce their working force. As other substitutes for coal are discovered, less and less coal is mined, until a mine is completely abandoned, leaving a large percentage of an area's work force permanently unemployed.

This distressed condition is repeated in an area when an industry like textiles shifts to another part of the United States. This same is true when industries, notably steel, permanently reduce their work force through mechanization.

In 1958 it was argued by the opponents of this legislation that the distress was merely the result of the recession and would be greatly alleviated by the economic boom which was predicted. While there was some improvement by January 1959, we are again reaching the peak of disaster. Chronic area unemployment persists in the midst of national prosperity. In Pennsylvania 18.2 percent of the population are unemployed within the the Uniontown-Connellsville area. Only seven other towns in the entire Nation exceed the 18.2 percent rate.

Presently there are in excess of 150 areas in the United States which have been designated disaster areas. I wish that I could report that these comprise all areas of disaster, but, unfortunately, they do not. Many businesses are suffering because they are located adjacent to disaster areas but within a labor market area in which on the whole unemployment continues to be relatively substantial.

Carbon County, Pa., is divided into two labor market areas. All townships of the county not included in the Lehighton-Palmerton labor market area have disaster designations. While the Lehighton-Palmerton labor market area is not designated as a disaster area, many townships within the area are in great distress. Upon my insistence, many companies in this latter area have been issued official labor surplus area certificates for use in bidding on Government contracts.

Mr. Speaker, I am most serious when I state that this administration does not fully understand the problems which these areas face. This legislation is designed to attract new industry or to expand existing industries in the disaster communities. The administration's lack of understanding results in its failure to include in their program provisions for the rural distressed areas and for the program of retraining. Unless we can train the worker who has spent his working years in the mine in the skills required by other industries, we cannot expect to attract new industries into a mining community. An industry must consider the availability of a qualified labor market and it will not select a community no matter how numerous its advantages if there does not exist an experienced labor market or facilities for training the labor market with the skills the industry demands.

What we are attempting to accomplish through this legislation is less than we have accomplished for our allies abroad. In the case of our allies, we have expended billions in the form of direct gifts with the purpose of putting them back on a sound economic footing. I have supported these programs even though I suspected that when the time came, this administration would not be willing to do for our citizens that which only slightly resembles what the administration has insisted we do for the distressed abroad.

We are doing far less for our citizens by the enactment of S. 722. We are making no Federal handout. We are merely creating revolving loan funds for each industrial redevelopment area, rural development area, and for public facilities to improve commercial opportunities. The Federal Government will be repaid its loans within 30 years and, I might add, with interest. Can an administration which has recommended the gifts of billions of American dollars to alleviate disaster outside the United States again veto a bill which merely authorizes the loan of money to alleviate economic disaster at home?

Mr. Speaker, I urge the passage of S. 722.

LOBBYING AND REPORTING: THE FUTURE OF REPRESENTATIVE GOVERNMENT IN THE UNITED STATES

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Missouri [Mr. CURTIS] is recognized for 40 minutes.

Mr. CURTIS of Missouri. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, for some time I have concluded that the weakest link in representative government today is the reporting back by the people's representatives in the legislative bodies, Federal, Congress, State legislative, and boards of aldermen to the people whom they have been elected to represent.

Like most social developments the credit or blame for a particular development does not rest with any particular individual or group of individuals. The causes are much more complex and impersonal. In the days of the Lincoln-Douglas debates the people's representatives were to a large degree their own reporters to the people whom they represented. The people obtained most of their information of public affairs by word of mouth and attending public meetings and listening to the public speeches and debates of those in political life.

For the past three decades which mark the rise of national magazines, one-newspaper cities with national columnists, radio and TV news reporting with national commentators, a new profession "the media" has arisen which has taken over the reporting back to the people aspect of the political representative's job. The representative today finds this new profession standing between him and the people to whom he owes his responsibility.

The media and the representative seem to be equally taken aback by this development. The media's assumption sense of responsibility to go with this great new grant of power in the workings of representative government has been slow in coming about. In the meantime the responsible representative not realizing his loss of contact with his constituency has been gradually replaced by a new type of representative who relates his responsibility to the media which controls the image the people in his constituency have of his work as a representative rather than to the people themselves.

Today a great deal of representative government revolves around influencing or manipulating the media rather than around the public issues of the day. It is what can be made to appear to be, rather than what is important. What is has bearing only to the extent that it might be easier or harder as the case might be, to present the image desired to be presented to the people.

I do not recite this turn of events out of alarm or pessimism for the future. I have seen in the short 10 years I have been in the Congress some awakening on the part of the media to the responsibility it has had placed upon it in making representative government work. I have also seen develop, as always does in a relative free society, as ours still is, things which compensate for the weaknesses existing elsewhere. Ten years ago it was an exception for a Congressman to write a newsletter to his constituency; today it is an exception for a Congressman not to write a newsletter to his constituency.

However, I do grow concerned about the faulty decisions that are being made on important public issues because of this situation. The Congress, even with its changed complexion resulting from the elimination of representatives feeling a responsibility directly to the people and the substitution of media-oriented representatives is still a much better organization than the image the media have created in the public's mind. Furthermore, the public's thinking on public issues is much sounder than the media-influenced representative thinks it is.

If only the responsible people in the media profession will undertake to introduce the Congress to the people and the people to the Congress we will avoid some of the serious errors we have been making in reaching decisions on important public issues.

I have been inspired to make this speech because of the poor reporting by the media on the Forand bill, or on the

broader subject of the health problems of our aged citizens. This is a serious problem and I am anxious to do everything I can to prevent us from making a very serious mistake which will be very damaging to the welfare not only of our senior citizens, but our entire society. There is no excuse for our making this mistake in light of the information we have. If we make the mistake it will be only because the media has not reported accurately to the people what information the congressional committee assigned to study this problem has found out and made public in its hearings and in the speeches made by members of the study committee on the floor of the House; and because the media has not reported accurately to the media-oriented Congressmen what the public thinking is.

I have previously spoken and written for the CONGRESSIONAL RECORD about the issues involved in the health care of the aged. I can do nothing further to encourage the media to report the truth, or, if the media prefers, my point of view on this subject. The fact remains the media has not reported this point of view to the people. Speaking now only to the responsible members of the media profession of whom there are many, I wish to say, this is a shameful thing.

I am going to devote this discussion to the second phase of the reporting problem—that of reporting what the public thinking is.

U.S. News & World Report begins an article, in its May 2, 1960, issue, entitled "Care for the Aged Is Coming—Question Is, How Much and When?" as follows:

Old people are on the march in this country. What they are after this time is a system of tax-paid medical care for the aged.

Pressure for action in Washington is mounting by the day, assuming the proportions of a crusade. Labor unions, other groups are jumping into the fight on the side of the old folks, organizing campaigns, distributing literature and postcards for people all over the country to mail to their Congressmen.

In the House and Senate Office Buildings in Washington, every day's mail brings letters and postcards by bags full, demanding prompt approval of a system of health insurance.

The New York Times in its Sunday, May 1, 1960, "The News of the Week in Review," under subhead "The Nation—Congressional Pressure," states:

Another controversial issue taking shape involves health care for the aged.

But under the pressure of a heavy mail campaign from the grassroots demanding action, the administration and the Democrats are considering alternative plans.

Life magazine, April 25 issue, begins its editorial "Age, Health, and Politics" as follows:

The hottest political potato so far in this election year is this question: are Americans over 65 entitled to Federal help to meet their hospital and doctor bills?

The Forand bill * * * has produced floods of favorable mail and given the Democrats an unexpected issue. Republicans, while granting the need for aid, are trying to find a more private, voluntary alternative. Since the issue is important let's try to separate its social realities from its politics and facts from principle.

This would have been a worthy objective for the editorial to have begun on and to have followed. The tragedy is that it did not.

Editorial Research Reports had this to say in its April 20, 1960, news brief:

When the Ways and Means Committee of the House of Representatives voted, March 31, to pigeonhole a bill for medical aid to the aged, it stirred up a storm of protest from old people, labor union members, and others. The protest was so strong that House and Senate passage of some kind of aid legislation now looks certain.

These are merely samples of reporting by media that have a better opportunity of learning facts and weighing them than the daily reporters of newspapers, radio, television, and wire services.

Well, is this the truth? We are all Members of Congress. We are the ones upon whom this pressure is supposed to be placed. I am a member of the Ways and Means Committee and the ranking minority member of the Social Security Subcommittee. I am a focal point for all this pressure to be brought to bear, The answer is, this reporting is hogwash and every Congressman who examines his mail carefully knows it is hogwash.

"The old people on the march?" The only old people I have seen in Washington the past 2 months are those touring the city. "Crusade"—no one has called upon me or any Congressman I have heard from about this bill.

What is the truth? The truth is that there was a mail campaign of considerable proportions—not the largest I have seen nor the largest even this year—the Teamsters' inspired mail in behalf of removing the monitors is larger. This mail campaign was in full force before March 31—when the Ways and Means Committee voted down, not "pigeonholed," 17 to 8, the Forand bill and the Boggs bill, a watered down alternative 16 to 9. After these votes the mail dwindled to a trickle and at the present time it is practically nothing. I have checked with many of my colleagues to see if their experience was similar to mine. They say it is the same. Is there anyone here on the floor who has had a different experience?

Incidentally, I reported all of this to various news reporters and asked them to affirm or disaffirm this factual situation. Nothing would have given them greater satisfaction, I am sure, than to have been able to call me to tell me I was wrong.

What then is happening? The media just does not go on a wild reporting spree for no reason at all. The media-oriented Congressmen and administration officials do not get jittery just because the media goes on such a spree—or do they?

No; there is more to it than a wild spree. Here is what I believe is the truth after checking this matter carefully. I have made these statements to members of the press and told them they could quote me on it. Surely by any standards of what is news this is news.

Sometime in January 1960 the COPE of the AFL–CIO concluded that the Landrum-Griffin Labor Reform Act was not going to be the good campaign issue for the fall elections of 1960 they had originally counted upon. My own appraisal of their reasoning was that they saw James Hoffa and the Teamsters were going to work on this issue and COPE did not want to be tied in with Hoffa in the public mind. Whatever the reason—this was the decision. In looking for an issue COPE decided to use the Forand bill, which provided health insurance for the aged through the social security insurance system. COPE had been pushing this issue in a somewhat desultory fashion for the past 2 years.

Until COPE made this decision there were no plans for the Ways and Means Committee to take up social security legislation this election year. Shortly thereafter the chairman of the Ways and Means Committee began talking about taking up social security, but, "No Forand bill," he said. Then about the beginning of March the COPE mail campaign began. It consisted almost entirely of mass-printed postcards requiring the sender only to add his name and address. Most of the cards were "sticker-addressed" to the Congressman. On analysis of my mail and the mail of the Congressmen I checked with at random demonstrated that almost all of it was COPE inspired. Practically none of it came from older people.

Having been tipped off on COPE's decision to try to make this an issue, I early set up a listening post among the organized groups of older people to see, first, whether COPE tried to infiltrate their organization with propaganda; second, whether their organizations were concerned about the Forand bill.

The answer is that though the COPE's planning seemed good because the old people do have a problem which centers around the cost of their health care it was never and has not been to date successful in getting the old people on the march.

I think I know why. On this issue the old people fall into three groups and only one of these groups, the least needy, would find the Forand bill an answer to their problems. The most needy group—those on relief and those not receiving any OASI benefits—about 4.5 million—gain nothing from the Forand bill. The COPE tried to propagandize the Forand bill as if it was to help the needy aged—a quick examination of the bill revealed that it did not intend to help this needy group—only old people receiving social insurance.

The second group, among whom were many of the most needy, though they would benefit from the Forand bill were and are primarily interested in liberalizing the earnings limitation which prohibits them from earning more than $1,200 a year without losing their social security benefits. Rightly so. These old people feel that if they are permitted to earn more they do not need the Forand bill. This group by now has learned that it is their newly professed friends the COPE who have always opposed the liberalization of the work clause and still do. Because it costs too much to liberalize the work clause COPE says. This is a new approach on COPE's part for opposing a desirable social reform.

Furthermore, the main problem of the aged in obtaining health insurance has been corrected, beginning about 2 years ago. It used to be that Blue Cross-Blue Shield and the private insurance companies would cancel people's insurance when they reached a certain age. Today this is no longer so. The few letters my colleagues have received from older people in behalf of the Forand bill which they have called to my attention refer to the fact that their insurance was canceled. It is easy to answer these letters. Almost invariably the experience occurred several years ago—a mere suggestion that they ask for reinstatement of their policy or that they can take out a policy in any one of a number of companies solves their problem.

A further point that should be made to the older people who write—although I have had no occasion to write such a letter—is that the kind of health insurance they most need is now available—catastrophic health insurance. Catastrophic health insurance provides a very generous benefit allowing for prolonged illness which can be offered at a very reasonable premium because it has the deductible feature. In other words, the beneficiary pays for the first few days, which he can afford, then the insurance picks up. The Forand bill works on just the reverse principle. It pays the first 60 days and then the sick person goes on relief, I suppose.

The question arises, Why, if the old people are not writing and aroused, do certain of the Congressmen and Senators act as they do? The answer is relatively simple. One does not court the opposition of the COPE lightly. Certainly, the endorsement of the Forand bill by the various Democratic presidential aspirants of the U.S. Senate at Detroit back in March is understandable. COPE can veto the nomination of any person for President at the Democratic National Convention. Furthermore, COPE has demonstrated quite clearly what it can do with an emotional issue through misrepresenting a Congressman's voting record or position on a public issue during an election campaign.

When it became obvious, as it did quite early in COPE's propaganda campaign that the media were helping COPE's gambit of threatening the Congress, by not reporting the true facts in the issue to the people some Congressmen became panicky. To further complicate the picture it became apparent that the administration spokesman on this issue, the Secretary of HEW, was playing a strange game which many Democratic Congressmen interpreted to be one of political entrapment so that the Republicans could claim to be the friends of the old people instead of the Democrats. Certainly the Secretary of HEW was not helping the cause of those who wanted to get the facts of the problem of health for the aged out to the public. Instead of pointing up the program our society has for health to the aged, the progress it is making, the newly added features to it, he stated, "We cannot sweep the problem under the rug," as if anyone had ever or was advocating that this be done.

Another factor in the picture was the activities of the McNamara committee in the Senate and the inaccurate reporting of the testimony adduced. I shall illustrate the inaccuracy I refer to by just one point albeit a major point, one which the COPE organization picked up immediately and propagandized, along with the press.

One of the witnesses before the McNamara committee was Frank Van Dyke, assistant professor of administration medicine at Columbia University:

Van Dyke told the committee that, despite the claims of the insurance companies, very little adequate health insurance is available to old people. And that which is available, Van Dyke contended, is generally beyond their means.

To support his case—

I am quoting from the Machinist, published by the International Association of Machinists, April 28, 1960—

Van Dyke cited a study made by Columbia University and the New York State Insurance Department.

In fact, Van Dyke's testimony was really a rehash of this study published February 26, 1958, and based upon data largely dating in the year 1956. The progress in the health insurance field has been recent and phenomenal. For example, in 1952 only 22 percent of the old people were covered. At the end of 1959, 49 percent were covered, and by the end of 1960 the figure will be close to 60 percent. By 1965 it will be 80 percent if we can survive the present crisis by beating back the demagogs. It has only been in the past 2 years that Blue Cross and Blue Shield began to remove extensively the age restriction and the private companies to offer individual health policies to old people. Catastrophic health insurance is also a very recent development.

Another factor bearing on the nature of public thinking on this question is the fear of the politician who though he knows from his mail the so-called crusade at this time is unreal, nonetheless he knows from his experience that it is the type of emotional issue that can catch hold. However, they relax once they find out the true story, if they take the trouble to read their own mail and the committee hearings and the CONGRESSIONAL RECORD instead of the media.

There is one group of people who are deeply concerned about the health problem of the aged whom I have not mentioned. These are the sons and daughters and relatives of the older people who are bearing some of the financial burden of caring for them. However, once these people learn that there is good health insurance available for their aged relative, at a reasonable premium, and there is, they become relaxed.

Cheap, adequate facilities and services specially designed for the aged is the real answer to the problems that still exist for our aged citizens. The FHA guarantee for private nursing homes which meet high standards of health, safety, and efficiency, sponsored by Senator SPARKMAN and myself, which became law last August is the greatest step forward in health care by the Federal Government in recent years for the aged. There was no propaganda campaign about this and no help came from COPE. Another area we need help in is more visiting nurse and other home care skills.

I am placing in the RECORD an article I prepared for one of the media which discusses the substantive features of the problem in a succinct way.

I am also placing in the RECORD an article by John D. Morris entitled "Medical Aid: The Pressures on Congress" which appeared in Sunday, May 1, 1960, New York Times. I have had a number of discussions with Mr. Morris about this subject and though his article repeats the basic error being reported by the media, "Pressure and heat from the home precincts have brought the issue of health insurance to the boiling point in Congress," at least he discusses the issue. If I can persuade him to report the real reasons why Congressmen like myself are opposed to the Forand bill or any bill seeking to use Federal funds to pay for health costs of the aged I will be happy.

I can assure you, my colleagues, that the reasons are based upon a desire to help the old people meet their problems and to avoid having them hurt. An honest public consideration of the points of view of those who have studied this matter is the only way to help them and not to hurt them.

HEALTH CARE OF THE AGED

One of the great problems of every society in the past or in the present is the care of the aged members of that society.

It is ironical that the great progress made in one field of the care of the aged, the enhanced efficacy of health care, has brought in its wake increased problems in providing for the economic requirements that attend the resulting lengthened life expectancy so that the overall problem has become more, not less, difficult of solution.

It is almost unbelievable to find a politically motivated body of public opinion castigating the very professions which brought about the great advancement in health care of the aged, by unwarrantedly suggesting these professionals oppose programs which will help the aged.

It is insidious when demagogs present this social problem to the people in a fashion designed to make it appear that they alone are concerned about solving the problem and all other persons are disinterested in solving the problem. So it is with our society in the election year of 1960, and so it is with the demagogs who are promoting the Forand bill which deals in only a partial way with one limited aspect of the problem of the care of the aged, and disregards all other aspects of the problem.

Health is a part of well-being and it is difficult to separate problems relating to health of the aged from other problems involved in care for the aged. However, for the purposes of this commentary, I will direct attention solely to the aspects of the problem of health care for the aged.

The basic aspect has to do with the quality of health care. It has been the advancement of quality of health care in our society which has kept our people alive 10 years longer than was anticipated at the time of their birth, or, indeed, during most of their working years. Distribution of quality health care depends upon available health facilities and skills and poses problems concerned with quantity of care that are apart from quality advancement.

The progress in the field of available health facilities and skills has been considerable, particularly in conjunction with increases in

productivity. However, there has been a considerable lag in available health facilities and skills especially designed to meet the needs of the aged citizen. The aged citizen needs health facilities intermediate to hospitals, which are considerably less expensive. He needs the convalescent or nursing home type facility with a wide variety of choice from which to select the type that meets his particular needs and tastes. The aged and his family also need visiting nurse skills so that where it is desirable, he may be kept in the bosom of the family and yet receive the medical attention he may need from time to time.

Distribution of health care involves the problem of cost, particularly in relation to the personal budgets of our citizens. It is in this area that the promoters of the Forand bill are directing attention, in complete disregard, I might state, of whether this proposal will damage the present and future progress in quality of health care and increased facilities and skills needed to widely distribute this quality.

The personal budget problem of the aged and their families—indeed, of every American family—is a great deal more complicated than the Forand bill proponents seem willing to recognize.

From a personal budget standpoint the aged may be separated into several groups.

1. The indigent aged. The Forand bill makes no effort to do anything for this group. The cost of health care is not a problem of the individual members of this group. It, along with other costs of the care of the indigent aged, is a problem of our society and largely has been met by existing laws and programs. What problem of cost there is relates to the share to be borne by the various taxpaying groups, Federal, State, or local, by our religious and community chest agencies, and by the relatives of the aged person.

The indigent aged health problem relates to availability of facilities and skills, and this problem is shared by all citizens, regardless of age or need.

2. The nonindigent aged retired group who have no unique budget problem. Interestingly enough, the Forand bill would assist almost every single person in this group of relative affluence.

3. The nonindigent group who are able and want to work and who, if they do work to supplement their social security payments, solve any potential budgetary problems. The promoters of the Forand bill are opposed to the proposals to liberalize the work limitation clause of $1,200 a year in the social security program which would help this group and allow it to increase in numbers. From a social standpoint and from a humane personal standpoint, it is very important that this work clause be liberalized. After all, society should gain economic benefit from utilizing the skills and talents of our older citizens which, from a medical standpoint, can now be utilized longer. We should discard the present antisocial policy which drives these people out of the labor market.

4. The nonindigent group who might become indigent if confronted with the cost of a prolonged illness. The primary need of this group and also of group 3 is health insurance which will protect them against the risk of the cost of prolonged illness. It is ironical that the only field that the Forand bill would provide assistance is the very field where the most remarkable progress has been made in recent years through the development of Blue Shield, Blue Cross, and private insurance programs. Incidentally, the Forand bill is designed just the reverse of insurance against prolonged illness. It takes care of only the first 2 months of hospitalization. Major medical or catastrophic insurance on the other hand lets the individual take care of the initial costs of any illness and picks up the tab when the cost gets beyond the means of the person.

5. The near indigent group who cannot fit the cost of the annual premium for their health insurance into their budget. This is a very small group of people. Many people who think they might fit into this category think so only because the variety of insurance policies now available to them at reasonable premiums have so recently come into being that they do not know about them. Essentially, this group should be only those of very limited means who have no immediate relatives. Any relative will see it is economically sensible to himself, if not humanely important, to supplement the difference needed to take care of the premium cost for health insurance of his aged relative.

This remaining small group is presently being cared for through community chest agencies and church groups set up to help people stay off relief by supplementing their budgets in known areas of need, such as the cost of health insurance premiums.

So, upon analysis, the Forand bill at best purports to help a very limited number of people who already are being helped. At the same time it would damage the progress in the health field in improved quality, facilities, skills, and the broad distribution of them.

I saw one place where the Federal Government could further help. It was in increasing the number and quality of facilities specifically designed to meet the needs of the aged. Accordingly, I sponsored the Federal law enacted last August extending FHA guarantees for constructing adequate and healthy private nursing homes. Possibly the Federal Government could assist in developing the visiting nurse type of programs so more of the aged could be cared for in the home. Certainly the Federal Government can help the old folks by avoiding doing what it has done in the immediate past, cutting the purchasing power of the dollar in half through ill-conceived Federal expenditure programs and increasing employment taxes which are passed right on to the consumers.

The problem in our present society may be somewhat more acute than has existed in previous immediate decades because of the impact of inflation on the present-day aged. After all, the great majority of the old people live on fixed incomes and inflation is their greatest enemy.

[From the New York Times, May 1, 1960]

MEDICAL AID: THE PRESSURES ON CONGRESS—PROVIDING CARE FOR THE AGED BECOMES KEY ISSUE AS LEGISLATORS SKIRMISH FOR VOTERS' FAVOR

(By John D. Morris)

WASHINGTON, April 30.—Pressure and heat from the home precincts have brought the issue of health insurance for the aged to the boiling point in Congress. As a consequence, some sort of legislation in this field now seems inevitable before adjournment for the national political conventions in July.

While details of the prospective legislation are still obscure, a much-disputed bill by Representative AIME J. FORAND, Democrat, of Rhode Island, is likely to provide the basic pattern as well as the inspiration. The Forand bill would add hospitalization, nursing home care and surgical-expense benefits to the social security insurance program. It would increase Social Security taxes to finance the cost.

The specter of "socialized medicine" has been raised by opponents on the ground that the Forand approach constitutes compulsory medical insurance in the sense that 58 million workers and their employers would be compelled to pay premiums in the form of higher taxes. The "compulsory" feature of the proposal thus has become the opposition's rallying point.

SOCIAL PROBLEM

Agitation for enactment of the bill and the attendant political pressures nevertheless have sharpened awareness on all sides of the existence of a pressing social problem. The question is how the country's 15,500,000 citizens over 63 years of age are to meet higher than average medical costs on lower than average incomes. It unexpectedly emerged as such a month or so ago under massive pressures generated by some of the country's most powerful lobbying organizations. No other question this session has comfronted legislators with anything approaching the volume, intensity or persistence of mail, petitions, personal approaches and other representations for and against the Forand bill.

With a heavy preponderance of sentiment clearly favoring a health insurance program based on the principles of the Forand bill, Congress has been jolted from an attitude of indifference to one of determination to satisfy the demand.

The transformation provides a classic example of the potency of a technique known as grassroots lobbying—the use of modern public-relations devices in combination with old-fashioned revivalist principles to stir opinion at the local level and influence Members of Congress through their own constituents rather than by direct contact.

Such a grassroots campaign was launched in 1957 on behalf of the Forand bill by the American Federation of Labor and Congress of Industrial Organizations.

The result has been a sustained and increasingly voluminous flow of letters, cards, and petitions to Congress for favorable action. Many of the communications are obviously of the mass-produced variety that ordinarily has little effect. But many others bear marks of reasoned concern and conviction. These are often written in shaky longhand and contain poignant testimony of a need for legislation.

ACTIVE OPPONENT

The most articulate and active opponent is the American Medical Association. Other major elements of the opposition forces include the insurance industry, the National Association of Manufacturers, the Chamber of Commerce of the United States, the American Farm Bureau Federation, and the National Grange.

Like organized labor, groups opposing health insurance legislation are working at the local level to generate pressure on Congress. This is particularly true of the medical association and insurance companies. As a result, State and local medical societies are promoting a heavy volume of mail to Washington from individual doctors. Local insurance agents, at the suggestion of their companies, are also prolific in their protests.

The net impact on Congress of all these pressures and counterpressures is indicated by a recent decision of the Democratic leaders of the House and Senate, Speaker SAM RAYBURN and Senator LYNDON B. JOHNSON, both of Texas. The decision was to seek passage of a bill embodying the basic approach of the Forand plan but restricting the cost and coverage sufficiently to win the votes of a congressional majority.

One of the leaders' problems is to remove the Forand label from any measure that may emerge from the Ways and Means Committee. The problem arises from the fact that many Democrats—possibly including Mr. RAYBURN himself—had privately pledged their opposition to the Forand bill before it became a national issue.

As an aspirant for the Democratic presidential nomination, Senator JOHNSON'S advocacy of the principle, if not the label, of a Forand-type program of health insurance for

the aged places him on the popular side of what may be a crucial election-year issue.

LIMITED PROGRAM

The Democratic leaders have laid down specifications for a limited program within the framework of the social security system, financed by an increase in social security taxes.

Democrats hope to perfect the details and win committee approval of a bill within the next week. The prospects are that some variation of the committee bill will wind up on President Eisenhower's desk, possibly provoking a veto. It is conceivable that a veto would be overridden. In any case, the Democrats are confident of producing valuable campaign material for the presidential candidate in the November elections.

Vice President NIXON, the prospective Republican nominee, has made known his opposition with President Eisenhower to any form of "compulsory" medical insurance under social security such as Representative FORAND proposes.

The Forand bill or comparable measures introduced in the Senate have been enthusiastically endorsed, on the other hand, by the announced candidates for the Democratic presidential nomination—Senators JOHN F. KENNEDY, HUBERT H. HUMPHREY, and STUART SYMINGTON.

Mr. ALGER. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Texas.

Mr. ALGER. As one who has shared the hearings and the work in the Ways and Means Committee, I want to take this opportunity not only to commend the gentleman but to share, if I may, the hotspot and to whatever degree the gentleman feels pressure applied to him I hope he will transfer some of it to me. I can assure the gentleman he does not stand alone in this fight. I will be glad to stump the country or do anything I can to spell out the facts. Does the gentleman think there is any possibility that the press will carry any or all of the material that he has given us today, facts that can be laid before the people?

Mr. CURTIS of Missouri. I regret to say apparently not. I took the floor on March 24 for an hour and tried to give the House, and I hoped to the press because I wanted the public to know, what I thought were the issues involved. This was the result of years of study, not just as a result of public hearings we conducted last July in the Committee on Ways and Means. I went on the Social Security Subcommittee back in 1953. It has been an area I have been deeply concerned about. There are problems in this area, very serious problems, but I think that we need to get them out in the open and distinguish what these problems are from those they are claimed to be. One commentator called my speech a brilliant speech. I wish he would have forgone the adjective and printed what I said. A couple of weeks later I took the trouble to prepare a question-and-answer type information sheet which I put in the CONGRESSIONAL RECORD to try to bring out some of the issues that I thought were involved in this problem of help for the aged. That, too, remains unreported. The press to date have reported this issue to the public as if it were a fight between two groups of political opportunists in the two political parties. The real issue is between the political opportunists, those Members who are claiming they have to do something in order to get some votes this fall, and those of us who feel that what can be done must result only from an honest study.

The Ways and Means Committee did study this matter honestly. We had public hearings on it. We have conducted lengthy executive sessions, and by a vote of 17 to 8 we rejected this idea and we rejected other ideas along the same line.

Mr. ALGER. Based on the facts.

Mr. CURTIS of Missouri. Based on what we thought were the facts. Those facts are what I am asking the press to report to the people, whether they agree with that state of facts or they want to disagree. I am not expressing myself on that subject here. What I say here today is the other side of the coin. Not only has the press failed to report the facts and issues involved, to the people, but it has presented a statement in their reporting as if the people of this country and the old folks were aroused because of the Forand bill on this issue, when that is not the truth. If they would examine the mail of any Congressman they would know better. I have offered to open my files and let them look at the mail I have received. If they can see any crusade in this, or anything other than a propaganda campaign conducted by COPE, they are better than I am. When the Forand bill was defeated the mail almost dwindled down to nothing.

Mr. ALGER. Mr. Speaker, if the gentleman will yield further, I must say that my mail is similar to that of our colleagues that you have talked to. But, back to the point. You have a responsibility as the ranking minority member of the Social Security Subcommittee, and as an active student of this issue for years, as the man who, along with Senator SPARKMAN, got through the FHA guarantee on nursing homes. What more can you do, now that you have made your talks on the floor? You have traveled the country, as some of the rest of us have. Our remarks are not printed in the papers. What more can we do? Does the gentleman have any suggestion?

Mr. CURTIS of Missouri. No. But, I will not give up on this issue, because I believe that the best thing to do for our country is to try to report to the people what the truth is on any issue; I am going to continue to try to do it. It is very true; I have a difficult task in my own community. The press does not report what my views are, yet they report to the people that I am opposed to the Forand bill. It makes it look to an unthinking person that I am not interested in the problem of health for the aged. It is a cruel thing, aside from being a dangerous thing to do for our society, not to give the people the information and the facts, and the points of view, of the various people who have studied these issues. Let the people in on this thing and find out what they think. Let us not restrict this to propaganda-type campaigning. I am satisfied that if America reaches a decision on these issues as the result of this kind of propaganda campaign, it is going to be a sorry day for us.

Mr. ALGER. Would the gentleman feel that those in the administration or those on our side of the aisle, for example, as well as on the other side, ought to consult these hearings. And more particularly it would be my feeling—I do not know that the gentleman shares this—that, for example, the Vice President or anyone else interested in this issue ought to consult with the ranking minority member of the Social Security Committee to as least get some of this material before coming out with new programs.

Mr. CURTIS of Missouri. I am not asking them to consult with me necessarily, although I would hope they would. I just ask them to do one thing, read the hearings that we held in July on this issue which, again, I might say, the press did not report very accurately. The gentleman attended those hearings, and he knows we explored many aspects of this problem. It was not exhaustive; there is a lot of additional information we did not get, but we got some of it. Incidentally, we will have this conference on the aged coming up in January where, I hope, a great deal of information, and information which we lack, on this subject will be brought forth, which will guide us in reaching a proper conclusion as to really what we can do which will be beneficial to the aged.

Mr. ALGER. If I am not mistaken, the White House Conference on the Aged was promoted by those on the other side of the aisle, too, is that not correct?

Mr. CURTIS of Missouri. Yes. The gentlemen on the other side of the aisle were the ones who sponsored it. And, the President was glad to do it. I would think that they, too, if they really meant what they said, would want us to do a little more studying and understanding it before we jumped in. Actually, what I cannot understand about this, we have had such tremendous progress in the area of health; in fact, that is one of the things that creates the problem, the economic problem, of our older people. Due to our enhancement in health, and medical attention, people are living 10 years longer, and it is the financing of those 10 extra years that is creating a great deal of the economic problem, plus this horrible inflation from 1942 to 1953. Roughly, the value of the dollar, the purchasing power of the dollar, was cut in half. That has damaged the old people in their economic problem more than anything else. And, I must say that our colleagues on the other side of the aisle, who are pushing so strongly for all of these Federal programs, must know that this will unbalance the budget and further undermine the purchasing power of the dollar of our older people, and all us and that, in my judgment, is a very shortsighted point of view.

Mr. ALGER. Do I understand the gentleman to have said, at other times, that we on the Committee of Ways and Means, through our deliberations in executive session on the Forand bill and medical aid to the aged, have not even spelled out the area of need from a Federal standpoint?

Mr. CURTIS of Missouri. This statement was made in public hearings. It has been made on the floor of the House by me and has gone unchallenged in

America. I think it is a true statement and that is why it has gone unchallenged.

There is no person, by age or otherwise who, if he needs medical attention, has not gotten it or could not have gotten it if this situation were called to anyone's attention. I have checked that in my community in St. Louis, Mo. I know that is so. It has been checked in the city of New York and in other areas. I believe it is an honest statement.

What we are talking about is not the indigent in this case. We are talking about the people who are trying to provide for their own care, through their own budgets. That is where the insurance aspect comes into this matter. That is where their own budgets bear. The main thing they need—and again I say we still have not gotten them—are sufficient private nursing homes, for example, because the facilities just are not there. It costs one-tenth as much to stay in a nursing home as it costs to stay in a hospital. The other area, which is even less costly than the nursing home, is in the bosom of the family, which the older person could do if we had the visiting nursing skills available to them. I still think, and I know the gentleman from Texas agrees with me, that the adage, "Honor thy father and thy mother" still has meaning in this country.

Mr. ALGER. Mr. Speaker, I simply want to close by telling the gentleman that I think I speak for a number of Members who are not here at this time of the day, regardless of the absence of most of the press, when I say that a great many of us appreciate the work that the gentleman from Missouri has done and the leadership that he has provided. I would be derelict if I did not thank him for it.

For my part I intend to continue to do as I have been doing—what is it?—taking the horse to water. You cannot make him drink, but you can call attention and bring the facts before the public. I feel that if the public had these facts they would understand. As a matter of fact, they are not writing us nearly as much as has been suggested, asking for Federal aid. Maybe they will get the facts and maybe a phony issue like this will boomerang and hurt the very people who are unintentionally misrepresenting what actually are the facts. I am thinking now of the press who, whether they know it or not, are distorting the truth. It may tend to harm them, because they should be championing freedom of the press. They ought to state in the press what is right as to facts. I am sorry that they do not ask for more of these facts. I feel that if the gentleman's speech were printed in every paper tomorrow morning across the country, or even excerpts from it, we would lay this issue at rest right now.

Mr. CURTIS of Missouri. I thank the gentleman. I, too, have the faith that pursuit of the truth will, in the long run, move us forward, and in that faith I shall continue to act at all times in my own personal affairs and as long as I am a Member of the Congress.

NEW FARM PROGRAM

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Minnesota [Mr. ANDERSEN] is recognized for 10 minutes.

Mr. ANDERSEN of Minnesota. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. ANDERSEN of Minnesota. Mr. Speaker, the gentleman from Iowa [Mr. JENSEN] and I have today introduced identical bills to authorize a new farm program which we believe offers great hope for the practical and effective solution of our major farm problems.

The hour is late, Mr. Speaker, as we enter the fourth month of this session of Congress, and no significant farm legislation has yet been brought before us for action. In addition, the great volume of important legislation to be considered in the remaining 2 months raises serious question as to the probability of obtaining final approval of a good farm bill.

As everyone knows, the two big problems facing farm people and our rural economy are the relatively low price level on most agricultural commodities and the accumulation of huge surpluses in which we have invested some $9 billion, which are costing about $600 million a year to store, and which hang as a price-depressing burden over our entire agricultural economy.

The green acres program we are proposing is designed to meet and solve these two big problems. From our study of agriculture we know we cannot solve either of these problems while ignoring the other. Accordingly, we have developed a sensible and practical program which will strike and strike hard on both fronts.

The green acres program incorporates several constructive principles contained in measures advanced by many of our colleagues who are equally dedicated to the solution of these vexing problems. In addition, the cornerstone of the program—which we call the green acres—has been carefully designed to bring about a substantial balance between production and market demands.

Provisions have been included to protect the livestock industry, to enhance wildlife cover, and to treat equally every farmer affected.

We have also taken steps to protect the interests of consumers by assuring an adequate supply of food at a reasonable cost. Moreover, we point out to consumers as well as farm people that our proposal will cost little more to the taxpayers than the costs of administration and the release of surplus stocks already bought and paid for.

It should also be pointed out that I took the basic principles of this proposal to the Midwest and discussed them in general terms with about 400 farmers, leaders of farm organizations, county agents, conservationists, and others. This cross section of opinion gives virtually unanimous support to the green acres proposal and I am pleased to report that a number of questions relative to various details were resolved by the farmers themselves. The bill introduced today represents a large measure of the thinking on the part of Midwest farmers and is a refinement of the proposal I took with me when I left Washington 4 weeks ago for an intensive 2 weeks of meetings with farmers and farm leaders.

I take advantage of this opportunity to call to the attention of our colleagues the fact that I have arranged a 1-hour special order tomorrow at which time I will go into a detailed analysis of the bills the gentleman from Iowa [Mr. JENSEN] and I have introduced. I hope our colleagues will take plenty time tomorrow morning to study the measure as it appears in the CONGRESSIONAL RECORD and that those who share our interest will be able to join us here tomorrow for our discussion. We also invite as many of our colleagues as care to do so to join us in the sponsorship of this measure by the introduction of similar bills.

We are confident, Mr. Speaker, that this is a truly constructive approach to the farm problem on a nationwide basis. Our bill takes nothing whatsoever away from any producer which present laws provide. We believe our measure will prove of considerable economic value to virtually all producers and the rural economy as a whole. We hope favorable action by the Congress will be forthcoming in the interests of our entire national economy.

Mr. Speaker, under unanimous consent I include in the RECORD at this point a copy of the bill introduced by the gentleman from Iowa [Mr. JENSEN] and myself, together with a brief statement regarding the proposal.

Mr. Speaker, I yield back the balance of my time.

A BILL TO AUTHORIZE A PROGRAM OF BALANCED AGRICULTURAL PRODUCTION, TO ASSURE PRODUCERS A FAIR ECONOMIC RETURN AND CONSUMERS AN ADEQUATE SUPPLY OF COMMODITIES AT FAIR PRICES, TO CONSERVE SOIL, WATER, AND WILDLIFE RESOURCES, AND FOR OTHER PURPOSES

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Green Acres Act of 1960".

SEC. 2. As soon as practicable after the enactment of this act, the Secretary of Agriculture, hereinafter called the "Secretary" shall conduct a referendum of producers of wheat, corn, oats, rye, barley, grain sorghums, soybeans, and flaxseed to determine whether such producers favor a program as provided in this Act. To be eligible to vote in such referendum a producer must have produced one or more of such commodities in at least three of the years 1956 to 1960. If two-thirds or more of the producers voting in the referendum favor a program as provided in this act, such program shall be in effect with respect to the 1961 and subsequent crops.

SEC. 3. (a) Beginning with the 1961 crop, producers who have produced one or more of the commodities covered by this Act in at

least three of the years 1956 to 1960 shall divert from the production of nonconserving crops, as determined by the Secretary 20 per centum of the total cropland on the farm (excluding cropland in the conservation reserve program). The land so diverted from production shall be devoted to conserving crops or uses, including wildlife practices, and shall be used only for hay or pasture (such acreage is hereinafter referred to as the "green acres"). Any producer who knowingly fails to comply with the requirements of this section shall be subject to a marketing penalty on the entire production of nonconserving crops on the farm at a rate equal to 50 per centum of the average market price for such commodities for the immediately preceding marketing year. The production of crops on the farm shall be regarded as available for marketing and the amount of the penalty shall be computed upon the normal production of the acreage planted to nonconserving crops.

(b) All penalties provided for in this section shall be collected and paid in such manner, at such times, and under such conditions as the Secretary may, by regulations, prescribe. The Secretary shall provide, through the county and local committees, for measuring farms and for ascertaining whether there has been compliance with this section. Notice of any marketing penalty due under this section shall be mailed to the producer. Any producer who is dissatisfied with his marketing penalty may within 15 days after mailing to him of such notice have such marketing penalty reviewed by a local review committee composed of three farmers from the same or nearby counties appointed by the Secretary. Such committee shall not include any member of the local committee which determined the total cropland, the production of nonconserving crops subject to the penalty, or the marketing penalty for such farm. Unless application for review is made within such period, the original determination of the marketing penalty shall be final. If the producer is dissatisfied with the determination of the review committee, he may within 15 days after a notice of such determination is mailed to him by registered or certified mail file a complaint against the review committee as defendant in the United States district court sitting in the county or the district in which his farm is located, for the purpose of obtaining a review of such determination. Bond shall be given in an amount and with surety satisfactory to the court to secure the United States for the costs of the proceeding. The complaint in such proceeding may be served by delivering a copy thereof to any one of the members of the review committee. Thereupon, the review committee shall certify and file in the court a transcript of the record upon which the determination complained of was made, together with its findings of fact. The review by the court shall be limited to questions of law, and the findings of fact by the review committee, if supported by evidence, shall be conclusive. The jurisdiction conferred by this section to review the legal validity of a determination made by a review committee pursuant to this section shall be exclusive. No court of the United States or of any State shall have jurisdiction to pass upon the legal validity of any such determination except in a proceeding under this section.

SEC. 4. The Agricultural Act of 1949, as amended, is amended by adding the following new section after section 105:

"SEC. 106. Notwithstanding the provisions of sections 101 and 105, beginning with the 1961 crop, the level of price support for wheat, corn, oats, rye, barley, grain sorghums, soybeans, and flaxseed shall be as follows: For the 1961 and 1962 crops, the level of support shall be not less than 80 per centum of the parity price. For the 1963 and 1964 crops, the level of support shall be not less than 85 per centum of the parity price. For the 1965 and subsequent crops, the level of support shall be 90 per centum of the parity price."

SEC. 5. (a) Effective beginning with the 1961 crops and continuing until such time as the Secretary determines that the stocks of wheat, corn, oats, rye, barley, grain sorghums, soybeans, and flaxseed have been reduced to a level required for carryover or reserve (1) to protect agricultural and consumer interests, (2) to meet export demands, and (3) for food for peace, the Secretary is directed to formulate and carry out annually a payment-in-kind program as provided herein with respect to such commodities. After stocks of such commodities have been reduced to the level specified above, a payment-in-kind program as provided herein shall be carried out by the Secretary as may be needed to correct any imbalances in production between such commodities. To be eligible for such payment-in-kind the producer shall reduce the total acreage on the farm devoted to the production of such commodities below the average acreage devoted to the production of such commodities and diverted under this act during the immediately proceding two years. The producer shall specifically designate the land so withdrawn from production, shall establish a protective vegetative cover or other conservation practice, including wildlife practices, on the designated acreage, shall not harvest any crop from or graze such acreage (except that the Secretary may permit the designated acreage to be grazed or hay to be cut therefrom if the Secretary determines that such action is necessary to alleviate damage, hardship, or suffering caused by severe drought, flood, or other natural disaster) and shall prevent the designated acreage from becoming a source of spreading noxious weeds. The acreage diverted under this subsection (a) shall be in addition to the green acres. The acreage diverted under this subsection (a), together with the green acres, shall not exceed 50 per centum of the total cropland on the farm.

(b) The payment-in-kind shall be made by the issuance of negotiable certificates which Commodity Credit Corporation shall redeem in the commodities included in this act in accordance with regulations issued by the Secretary. The amount of such compensation shall be equal to 80 per centum of the average annual yield of the commodity or commodities being reduced times the basic county support rate for the commodity or commodities. The Secretary shall provide for the sharing of a certificate among the producers on the farm on a fair and equitable basis. The commodities redeemable for such certificates shall be valued at the market price thereof as determined by Commodity Credit Corporation. The commodities redeemed with such certificates shall not be eligible for price support. To the maximum extent practicable the commodities redeemed with such certificates shall be from Commodity Credit Corporation stocks in bin sites or other Government facilities before such commodities are redeemed from Commodity Credit Corporation stocks in commercial warehouse facilities.

(c) A producer shall be eligible to receive payments-in-kind as described in subsection (b) on any or all of the green acres if, in addition to complying with the requirements for green acres under section 3, he also complies with the requirements against harvesting or grazing such acreage and of all the other requirements applicable to acreage eligible for payments-in-kind under subsection (a) of this section, except that the rate shall be 25 per centum of the average annual yield of the commodity or commodities being reduced.

(d) Any producer who knowingly grazes or harvests any crop from any acreage for which a payment-in-kind is paid or payable shall be subject to a civil penalty equal to 50 per centum of the amount of the payment-in-kind. Such penalty shall be in addition to the amount of the payment-in-kind which shall also be forfeited or refunded, and shall be in addition to the amount of any marketing penalty required to be paid under section 3.

SEC. 6. The acreage diverted under this Act shall be in addition to any acreage devoted to the conservation reserve program.

SEC. 7. Nothing in this Act shall be construed to impair the eligibility of any acreage diverted hereunder for agricultural conservation progam payments.

SEC. 8. In administering this Act the Secretary shall utilize the services of local, county, and State committees established under section 8 of the Soil Conservation and Domestic Allotment Act, as amended.

SEC. 9. The Secretary shall transmit to the Congress annually a report on the program for the preceding year including an evaluation of the operation of the program together with recommendations as to any necessary adjustments in the percentage of cropland acres required in the green acres program to assure a reasonable balance between annual production and annual demand and consumption. Any increase in the percentage of cropland acres required in the green acres program shall not be put in effect, however, without legislation by the Congress and approval of the increase by producers voting in a referendum as provided in section 2.

SEC. 10. The activities authorized under this Act are supplementary to the acreage allotments and marketing quotas authorized under the Agricultural Adjustment Act of 1938, as amended.

GREEN ACRES PROGRAM PROPOSED BY MIDWEST CONGRESSMEN

A new approach to solution of the vexing farm problem has been proposed by two Midwest farm Congressmen, H. CARL ANDERSEN, of Minnesota, and BEN JENSEN, of Iowa. They call it a green acres program and the two authors, both 22-year veterans in the Congress, say it is the result of many months of study, investigation, and discussion with scores of farmers and farm operators in the Midwest. Bills to authorize the program were introduced in Congress today.

The cornerstone of the green acres program is the requirement, after approval in a nationwide referendum, that every farmer producing corn, soybeans, flax, and other feed grains must have 20 percent of his cropland in grass, hay, or pasture. To protect the livestock industry each farmer would be offered 25 percent of normal yield payment-in-kind out of Government surpluses if he would agree to completely retire that land. Otherwise, he could use it as pasture, hay, and so forth.

Farmers who already have 20 percent or more of their cropland under green cover would be immediately eligible for the green acres program.

Both ANDERSEN and JENSEN are longtime members of the powerful Committee on Appropriations. The Minnesotan is ranking Republican on the subcommittee which appropriates for the Department of Agriculture and all its programs. Neither has been satisfied with the handling of the agricultural program by Secretary of Agriculture Benson.

Earlier this year JENSEN introduced a payment-in-kind bill for corn. It won wide approval, and that acceptance led him into this present collaboration with his neighboring colleague, who represents essentially the same geographical location in Minnesota as

JENSEN does in Iowa; both of them in the southwestern corner.

Congressman ANDERSEN recently spent a concentrated period in his district visiting with farmers in all lines of production. They hailed the green acres program as economically realistic, and predicted success in the referendum.

JENSEN states: "The best experts we know have assured us the green acres program would bring about a reasonable balance between production and consumption of these grains, and the farmer would make his green acres contribution in return for the other benefits provided by our bill."

The authors went on: "To liquidate huge surpluses now stored at public expense, we would provide an additional payment-in-kind equal to 80 percent of each farmer's average yield for other cropland taken completely out of production, not to exceed one-half of the whole farm.

"Outside the green acres, each farmer could produce any and all of these grains he wanted to with a price support of 80 percent of parity the first 2 years, 85 percent the next 2, and 90 percent thereafter. With no surplus production, this price support schedule is expected to cost little or nothing to the taxpayer."

In a few years, after present surpluses have been liquidated, American farmers, except for the green acres, could go back into full production with a parity-market demand for everything they produce. The payment-in-kind provision would remain in effect as a means of maintaining necessary reserves to protect the public and to help farmers make necessary adjustments in production.

Figures, necessary to illustrate any program, are convincingly in favor of the green acres program.

Using a 320-acre farm, with usual deductions for dwellings, outbuildings, marginal wasteland, and other nonproductive acreage, gross income estimated for 1960 under the present farm setup would be $13,800.

Under the green acres program in 1961, at 80 percent of parity, gross farm income would be $15,856, with reduced cost of production.

In 1963, when price supports go up to 85 percent of parity, the same 320-acre farm will again produce no surplus, and will have a gross farm income of $17,139.

Finally, in 1965, the farm will gross $20,766, back in full production, less the green acres. Supports will be at 90 percent of parity, and production will be in balance.

It will be easy for every farmer to calculate his increased income under the green acres program by applying the above figures proportionately to his own operations.

In 5 years the green acres program will raise the gross income on that Midwest farm about $7,000, or 50 percent. It will bring about balanced production at little public cost. And it will secure for the farmer and the rural businessman their fair share of our national income.

ISRAEL'S 12TH BIRTHDAY

The SPEAKER pro tempore (Mr. GRAY). Under previous order of the House, the gentleman from New York [Mr. HALPERN] is recognized for 10 minutes.

Mr. HALPERN. Mr. Speaker, it is fitting, indeed, that the anniversary of the State of Israel comes during the season of spring. For spring is the symbol of rebirth, of the earth returning to life after the slumber of the long, dark winter. Thus, it has been for this young democracy celebrating its 12th anniversary today, its Independence Day, according to the Hebrew calendar, 5 Iyar, 5708.

Created with the endorsement of an outraged world which saw the barbaric excesses of Hitler's savage bigotry uproot countless numbers of human beings, among them 6 million men, women, and children of the Jewish faith, the State of Israel has more than fulfilled its mission as a haven for the homeless and distressed.

Forged from the same amalgam of the human spirit which sent courageous men and women sweeping across the plains of our own Nation, Israel has savored deeply the wine of freedom and created a pattern of democratic life that should be an inspiring example to other nations, particularly those of her neighbors in the Middle East.

By the sweat of her people, by sacrifice, self-discipline, and singleness of purpose, she has cut fertile furrows into the once barren desert; she has built cities, schools, and universities; she has restored human beings to their fullest potential and, most important of all, she has given her people a national integrity, a glorious pride in the free way of life which she so zealously guards against those who unjustly seek to destroy it.

Our own American history teaches us that the road to freedom is not an easy one and that the course that we must follow to preserve this freedom demands our people's eternal vigilance. It is the same with Israel. Hostile foes who have tried to bar her march toward progress and self-sufficiency, have raged at her for 12 long years. But still she survives, rising above these humiliations, reaching into her very heart to find the resources she needs to keep going, to keep moving ahead.

It is with deep pride that I view my own country's acts of friendship toward this young democracy during the 12 years of her life. The American people have often come to her aid and have stood beside her, not merely as a government stands beside an ally of similar objectives, but as a people of faith and courage stand by their peers, out of mutual respect, with honesty and candor.

This bastion of democracy in the Middle East has more than lived up to our confidence in her. It is the vanguard of the democratic process in a section of the world that is still struggling to make secure the highest ethic, the dignity of man. We must continue to help it keep the flame of liberty burning proudly.

Israel has proven herself to us, not only as a full partner in the struggle for human decency, but as a country of fortitude and stamina, and a fortress of freedom.

And so, on this 12th anniversary of the independence of the State of Israel, the spring of May 2, 1960, I offer my congratulations to her Government and people on another momentous year of achievement and wish her well on the road to high purpose which she has chosen to take.

Today, my own city of New York is holding a special ceremony at city hall in honor of the 12th anniversary of the establishment of the State of Israel.

Among the guests will be representatives of the United Nations, the State of Israel, the U.S. Government, and the State and city of New York, as well as leaders of every segment of the New York community.

I congratulate the mayor and the members of the city council on this memorable and historic occasion which will help to reaffirm the strong bonds of friendship between the people of New York and the people of Israel.

Mr. Speaker, May 2, 1960, also commemorates another great date in the history of Israel independence. This day marks the 100th anniversary of the birth of Theodor Herzl, the man whose spirit and inspiration stirred world leaders of all faiths to press for an independent Jewish national state on its own soil as a haven for the homeless and subjugated of his people.

Born in Budapest, he studied in Vienna and devoted himself to freelance writing. In 1896 he published his book, "The Jewish State," in which he supported the founding of a Jewish state, preferably in Palestine, by international agreement. His book rallied support, and he convened the First Zionist Congress at Basle in Switzerland in 1897. Here was founded the World Zionist Organization of which he served as president until his death in 1904 at the age of 44.

Premier Ben-Gurion of Israel wrote in an article in the New York Times of May 1, 1960, dedicated to Theodor Herzl, that—

> In modern Jewish history, Herzl stands alone in living and lasting greatness. * * * For the first time since the Jewish people voyaged into exile, he transformed it into a political force and factor. Herzl recreated Jewish statesmanship and forged the tools and implements the people needed in its fight for liberation and revival: a world platform, the framework of national organization, political representation, the instruments of state finance. * * * Herzl took human dust, at the mercy of any capricious wind, and made it into a nation striving to mold its own destiny and become an independent entity on the stage of international politics.

Theodor Herzl was truly one of the great liberators in history. It is fitting that the centennial of his birth should coincide with the 12th anniversary of the independence of the nation to whose founding he gave unsparingly of his whole life.

Mr. Speaker, I include the article by Premier Ben-Gurion, entitled "Herzl's Dream and the Reality," in the RECORD at the conclusion of my remarks.

HERZL'S DREAM AND THE REALITY—A TRIBUTE TO THE MAN WHO FORESAW ISRAEL BY ONE WHO HELPED MAKE HIS VISION COME TRUE

(By David Ben-Gurion)

JERUSALEM.—The seer of the Jewish state sprang from the Jewish group that lived in a Hungarian borderland between Eastern and Western Europe, between the Middle Ages and the modern era. This Jewry had produced two of the earliest pioneers, Stampfer and Raab, who "went up" to settle in the land of Israel in the generation that preceded Herzl. They founded the first Jewish village of our times, which bore the momentous title of Petach Tikva—the Gateway of Hope. And that same Jewry produced the two great leaders of political Zionism, Herzl and Max Nordau.

In the Exodus from Egypt, it was twin leaders who marched in the van of the Jewish people: the one, Moses, lawgiver, teacher, guide; the other, Aaron, spokesman, clarion, exponent. But in Jewish history Moses was unique, and has no peer. In modern Jewish history, Herzl also stands alone in living and lasting greatness. Only he, by the magic of his personality, his penetrating insight, his prophetic courage, his creative and stimulating inquietude, was privileged to become the focal point of the people's love and pride, the very visage of its secret and sincere longings, the symbol of its redemption and rebirth.

In Herzl's day, two contradictory concepts were current in the relationship between the Jews and the peoples among whom they lived. One was the ghetto concept, which saw an absolute and eternal gulf between the Jews and the other peoples, and held that until the coming of the Messiah, who would restore them by supernatural means to the land of their fathers, Jews must wait, helpless and dependent on alien mercies.

The opposite concept was that of the assimilationists, in whose midst Herzl grew up and was educated—that the Jews were in no sense whatever a nation like all the nations, that only a trifling and transient barrier of superstitions and prejudices divided them from their neighbors, and that if only they could succeed in getting to be like their neighbors in language, in dress and in deportment, the difference would disappear, the peculiar Jewish way of life would cease, and they would be assimilated into the context of their neighbors.

Ever since childhood the ghetto concept had been strange to Herzl. But his feeling for the dignity of man, deeply wounded by the sight of anti-Semitic outrages in France and Austria, challenged the assimilationist concept in him. With his acute vision he beheld the sufferings of the Jews in his time not as just a calamity, which had to be either accepted or escaped, but as a creative momentum impelling the Jews to set up their state again, so that they could be equal to other peoples as a people sovereign in its own right.

In the spring of 1895 Herzl noted in his diary: "I have been working for some little time at a project of incalculable magnitude. Today I do not know how I will finish it. Its image is as a majestic dream. For days and weeks, now, it has filled my soul to the bounds of consciousness and beyond. Its outcome is not yet to be surmised, but my heart tells me that it is a wondrous thing, albeit as a dream, and that on me is laid the task to write of it."

A year afterward he published "The Jewish State.'"

At first it was not clear to Herzl where the Jewish state should be established. In the pamphlet he writes: "Is Palestine or Argentina to be preferred?" As he drew nearer to East European Jewry, he came to understand that the old vision of the rebirth of the Jewish state was bound up wholly and solely with the Fatherland:

"The land of Israel is the land of our fathers, which we shall never forget. In remembering it our people's heart will tremble, at the sound of it many will come. As a neutral state we will preserve our links with all the nations of Europe, which will guarantee our existence there. As for the places holy to the Christian world, a surety will be found in international law and we will be the guard of honor upon those holy places, vouching with our very existence for the fulfillment of our duty. This guard of honor will be the impressive symbol of the solution of the Jewish question, after 1,800 years of our torment.

The notion of the Jewish state was not invented by Herzl. He himself wrote: "I am not propounding any new idea—on the contrary, it is a very ancient one, and it is just there that its great strength lies. Its years are as the years of the nation, which has never ceased to nourish it."

But in writing "The Jewish State" he discovered more than an idea, he discovered himself: seer, leader, great political architect and commander. "Am I forming the idea?" Herzl asked in his diary. And answered, "No, the idea is forming me."

Into the old idea he was able to inject revitalizing strength and a great sweep, for he knew the secret of historic action as not one of those who went before him had. He knew the secret of political accomplishment, revealing it within himself and within the Jewish people.

For the first time since that people voyaged into exile, he transformed it into a political force and factor. Herzl created Jewish statesmanship, and forged the tools and implements the people needed in its fight for liberation and revival; a world platform, the framework of national organization, political representation, the instruments of state finance.

For hundreds of years, throughout the world, the Jewish people had been no more than a pawn and a plaything—for chastisement or for kindness—in the hands of foreign political forces. Herzl took human dust, at the mercy of any capricious wind, and made it into a nation striving to mold its own destiny and become an independent entity on the stage of international politics.

He gave his people not only a political purpose but also the means to fulfill it, and first and foremost the consciousness that the Jewish people, in spite of its dispersion and rootlessness, is a political force, if only it will learn how to use its strength for its own redemption.

Like all great liberators, Herzl grasped the profound yet simple secret that mass suffering need not be solely a source of degradation, of helplessness and decadence, but is apt to be converted into a source of strength and fortitude, of initiative and heroism, if there be linked with it the idea of redemption and liberation and if it thus rouse the victims to rebel against their wretched lot, so that their tribulations take on the forms of creation and salvation.

"No people can be saved except by itself, and the Jewish problem can be solved only by the Jews." So Herzl pleaded.

When Herzl called for the first instrument of political Zionism, the World Zionist Congress, he did not yet know Jewish life as it was lived in the Eastern European countries, steeped in popular Jewish tradition, education, and content. Nor did he yet understand the deep, inner, indissoluble bond between the nation and its ancient birthplace. He was unaware of the treasures of creativeness, hidden in the rank and file and in the youth of the people. But what his knowledge of Jewishness lacked, the intuition of his genius made good through an understanding of human nature.

When, in July 1902, Herzl, as president of the world zionist organization, appeared in London before the Royal Commission on Alien Immigration, he was questioned by the members of the commission on the reason for the failure of Baron Hirsch's colonization experiment in Argentina. He replied:

"It ended in failure for this reason: When a people aspires to colonization, it must have a flag and an idea. You cannot accomplish these things with finance alone. And since these Jews had neither flag nor idea, they could not succeed. With money you cannot set going a movement of large masses. You must implant in them a faith in their future, and then you can even stir them to apply themselves to the most arduous toil."

And when, in 1902–03, he conducted negotiations with the Balfour government on the settlement of Jews in El Arish and Sinai, and the British Foreign Office drew his attention to the difficult conditions that colonization meant, he wrote a letter to Lord Landsdowne, then British Foreign Secretary, saying that "even if the opinion of the experts is not particularly agreeable, Jewish distress can surely constitute such a force as will make colonization feasible even under conditions which in the case of normal settlement would be unacceptable."

The history of our settlement in Israel has verified this simple assumption. The warnings of practical men as to the impossibility of changing townsmen into tillers of the soil, the unsuitability of Jews for a life of sovereignty, our dearth of talent to become seamen or to revive the Hebrew tongue, which was deemed a "dead" language, all have been shown to be false and insubstantial. We have succeeded in settling on the hills and even in the desert, which all the "experts" argued could never be successfully colonized.

The distress of the Jewish people and the creative force of an ideal of liberation and redemption have even disproved one of Herzl's own political assumptions, one on which he insisted with the utmost vehemence at the beginning of his Zionist work, namely, that "the creation of suitable political conditions is a necessary precondition to any settlement activity."

This assumption has been refuted, in the annals of Israel renewed, by another premise, profounder and sounder, which was indeed Herzl's, too—that what iron necessity and the motive force of suffering and of an ideal can do, political logic cannot.

A unique event, to which there was no parallel, was the death of the great leader, the greatest of Israel's leaders and rulers, Moses. He did not have the privilege of reaching the Promised Land—or even of being interred within it. After 40 years' wandering in the wilderness, Moses at the end of his days ascended Mount Nebo—"and no man knoweth of his sepulchre unto this day."

Fifty-six years ago the remains of the seer of the Jewish state in our generation were buried in a foreign land—the land where Herzl saw the vision of the Jewish state, where he created the instruments for its establishment, and where he organized the Jewish people to win its independence.

"I do not know the hour when I shall die," Herzl wrote in 1898, 6 years before his passing, "but Zionism will not die. Since the days of the Zionist Congress in Basle, the Jewish people once again has a national representation and the Jewish state in the homeland will arise."

His prophecy came true, and in the second year of its independence, a year after the end of the War of Independence, the people of Israel brought his remains home and interred them in the city of David, on one of the hills of Jerusalem.

THE HERO

The day of Herzl's death was a day of mourning and grief for Zionists. Ben-Gurion was then 17, and in one of his letters to a friend, a few days after the bitter tidings had been received, he wrote these lines:

"My brother, it is difficult, even impossible, to sit down today and write on other matters, even those nearest to my heart. The disaster is so great, so tremendous, becoming ever more grievous as time passes. * * * Great as the sea is the magnitude of our loss. And yet, today more than ever before, I confidently believe in our victory.

"It is clear to me that a day will come—and it is not far off—when we shall return to the wonderful land * * *. And the visions of the Prophets will be realized; there we shall see wonderful skies shining with the light of purest blue, there we shall hearken to the murmuring of the waves of the sacred river, which long ago heard the song of the shepherd, of innocent and magical love.

"And there a mighty poet will arise and sing an exalted, wonderful song, which will resound in all the strings of our hearts of a small but great people risen to new life, and of the great hero and fighter who with his mighty strength awakened the dwellers in the tomb from the slumber of the shadow of death."

GENERAL LEAVE TO EXTEND

Mr. BURKE of Kentucky. Mr. Speaker, I ask unanimous consent that all Members who desire to do so have permission to extend their remarks in the RECORD concerning the depressed areas legislation, following the remarks of the gentleman from West Virginia [Mr. BAILEY].

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

CONNOLE STILL AWAITS NOTICE HIS FPC CAREER IS ENDING

Mr. BURKE of Kentucky. Mr. Speaker, I ask unanimous consent that the gentleman from Iowa [Mr. WOLF] may extend his remarks at this point in the RECORD, and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. WOLF. Mr. Speaker, the Natural Gas Act was passed to protect the consumer. The Federal Power Commission, the agency responsible for the administration of this act, is years behind in its regulatory work, having as many as eight rate increase applications by a single company pending before it for action.

Under unanimous consent, I insert into the body of the CONGRESSIONAL RECORD an article from the Washington Star of May 1, dealing with the fact that President Eisenhower is looking for someone to replace William R. Connole as Commissioner of the Federal Power Commission.

I leave it to the readers of the RECORD to make their own speculations as to the possible reasons why Mr. Connole's services are no longer desired by the President.

The article referred to follows:

CONNOLE STILL AWAITS NOTICE HIS FPC CAREER IS ENDING

(By Cecil Holland)

William R. Connole yesterday was still awaiting official White House notification that he would not be reappointed to the Federal Power Commission—and, less hopefully, for some reasons why.

Mr. Connole, 37-year-old Connecticut independent who has been a Commission member since 1955, received indirect notice last week that his FPC career was ending. It came when President Eisenhower told his news conference: "I think I can find a better man."

Mr. Connole had been told at the White House that the President was looking for someone else, but the President's statement Wednesday came as something of a shock.

"I understood the President's intentions would be made public in a manner other than an offhand remark at a press conference," Mr. Connole said in an interview yesterday. "But I'm not arguing or quarreling with the President on that point. It's his privilege."

NO REASON GIVEN

At no time, he said, has he been given any reasons by the White House why the President would not reappoint him to the Commission, a regulatory agency with jurisdiction over interstate electricity and natural gas matters.

Sitting in his office at FPC headquarters, Mr. Connole discussed for publication for the first time the events leading up to the President's remarks.

He did so with some reluctance, he said, because of his feeling that conferences with the White House were of a confidential sort. "I considered I was under an obligation not to talk about it," he commented, "and I thought it was reciprocal."

Mr. Connole said that for personal reasons, among others, he brought to the White House's attention last January "as a matter of courtesy" the question of his term expiring June 22. He conferred with David Kendall, one of the President's assistants, and at the time indicated he was willing to accept reappointment.

INFORMED OF DECISION

The next development was in February. Then Mr. Kendall summoned the Commissioner to the White House and informed him the President was looking for someone else.

"I did not ask the reasons why," Mr. Connole said. "I was not told the reasons."

Mr. Connole declined to express his own views on why he will not be reappointed. "It would be pure speculation," he remarked. "It might be argumentative."

However, he did question some of the reasons that have appeared in the newspapers and magazines. One news magazine quoted an unnamed White House source as saying the President had decided against his reappointment because "he does not get along with" other members of the Commission.

Mr. Connole, who has often been the lone dissenter from the Commission's rulings, entered a dissent to this appraisal.

WORKED IN HARMONY

"If I don't get along with the other Commissioners, that's news to me. We have gotten along well, professionally as well as socially. We have worked in close harmony."

The staff has told him, Mr. Connole said, that the present Commission has worked better together than any commission they can recall.

Mr. Connole, a graduate of Georgetown University who was formerly chief legal officer of the Connecticut Public Utilities Commission, has received the backing of consumer groups, a committee of mayors, most of the State utilities commissions, some Members of Congress, including Senator DODD, Democrat, of Connecticut, and a committee of lawyers, only one of whom the Commissioner knows personally.

A trade publication suggested that the pressure in behalf of Mr. Connole was one reason why the President, as some thought, showed irritation in commenting on the matter at his news conference.

Many who have urged Mr. Connole's reappointment have pointed out his stand for the interests of consumers in the question of rates and other matters that have come before the Commission. Mr. Connole, however, is quick to disclaim any knight's role as the champion of any particular group.

RECORD SHOWS 74 DISSENTS

"My position has never been polarized," he commented. "I have no predilection toward one point of view or another."

If his decisions on the Commission have emphasized the consumer interests, Mr. Connole said, it was because the Natural Gas Act was passed to protect the consumer, and the Commissioner noted, "I didn't say that—the Supreme Court did."

"The act was passed," he went on, "because Congress decided that the consumers were not adequately protected by an unregulated industry."

An informal tabulation shows that Mr. Connole has dissented all or in part in 74 decisions since he became a member of the Commission. There were 6 dissents in 1956, 15 in 1957, 25 in 1958, 25 in 1959, and 3 thus far in 1960.

Some of the important dissents have involved what are just and reasonable gas rates, the question of so-called phantom taxes or rates based on taxes not paid, and the rejection by the Commission for intervention in gas rate cases by consumers and State utility commissions.

In at least two major cases Mr. Connole's point of view has been upheld by the Supreme court.

Protection for the public, Mr. Connole said, does not mean that everything a regulated industry does is "wrong or suspect."

The utility industry, he continued, has "matured sufficiently that no given action on its part is necessarily contrary to the public interest." But he said the industry has "the burden of supporting its claims" for increased rates and the Commission itself has the obligation to "examine into these things."

In many cases, he said, it is quite possible that a company requires additional revenue. "When they come in and prove it," Mr. Connole said, "they should be given an increase."

In the 1959 decision in Transcontinental Gas Pipe Line case, Mr. Connole emphasized his concern over having a utility prove the need for rate increases. In a lone dissent to the Commission's ruling, he said:

"Neither do I know whether these prices are too high, too low, or just right, but I think it is inconsistent with commonsense, with plain judicial language from the highest bench in the land and inconsistent with our responsibilities * * * to continue certificating prices at this level until we have some satisfactory showing why consumers should be required to pay for gas at these prices."

Mr. Connole said his work on the Commission has gone beyond just the matter or rates—and dissents. He said he has been interested in the growth of the industry and the direction it will take. In this connection, he said, he has urged the Commission and the industry to undertake to work out with Canadians some ground rules for eventual use of Canada's vast gas reserves.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. KILBURN (at the request of Mr. ARENDS), for an indefinite period, on account of illness.

Mr. CLEM MILLER (at the request of Mr. DOYLE), for balance of week, on account of official business.

Mr. HERLONG, for 4 days, May 2, 3, 4, and 5, on account of official business.

Mr. FOUNTAIN (at the request of Mr. ALBERT), for today, May 2, 1960, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. PORTER, for 30 minutes, tomorrow, May 3, 1960.

Mr. QUIGLEY (at the request of Mr. TRIMBLE), for 45 minutes, tomorrow.

Mr. DOYLE, for 60 minutes, on Thursday next, immediately following Mr. SCHERER.

Mr. CURTIS of Missouri (at the request of Mr. ARENDS), for 40 minutes, today.

Mr. ANDERSEN of Minnesota, for 10 minutes, today.

Mr. HALPERN (at the request of Mr. ARENDS), for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. DINGELL (at the request of Mr. TRIMBLE) and include extraneous matter.

Mr. RODINO (at the request of Mr. TRIMBLE) and include extraneous matter.

Mr. ASPINALL and include extraneous material.

Mr. LANE and to include extraneous material.

Mr. RIVERS of South Carolina and to include a telegram from the Governor of South Carolina.

Mr. WIDNALL and to include extraneous matter.

Mr. TOLL and to include extraneous matter.

Mr. MCCORMACK and to include extraneous matter.

Mr. WILLIS.

(At the request of Mr. CURTIN, and to include extraneous matter, the following:)

Mr. DERWINSKI in two instances.

Mr. HALPERN.

Mr. UTT.

Mr. GUBSER.

Mr. KEARNS.

Mr. SCHWENGEL.

Mr. ALGER.

Mr. CURTIS of Missouri.

(At the request of Mr. BURKE of Kentucky, and to include extraneous matter, the following:)

Mr. PUCINSKI.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 4781. An act to amend the Watershed Protection and Flood Prevention Act to provide that its loan provisions shall be applicable to certain other projects, and for other purposes.

BILL PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H.R. 4781. An act to amend the Watershed Protection and Flood Prevention Act to provide that its loan provisions shall be applicable to certain other projects, and for other purposes.

ADJOURNMENT

Mr. BURKE of Kentucky. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock p.m.), the House adjourned until tomorrow, Tuesday, May 3, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2102. A letter from the Director, Office of Civil and Defense Mobilization, Executive Office of the President, transmitting a draft of proposed legislation entitled, "A bill to extend the Defense Production Act of 1960, as amended, and for other purposes"; to the Committee on Banking and Currency.

2103. A letter from the Associate Commissioner, Indian Claims Commission, relative to reporting that proceedings have been concluded with respect to the following claim: The Confederated Tribes of the Colville Reservation, as the representatives of the Colville, Lake, San Poells, Nespelem, Okanogan, and Methow Tribes, pursuant to the Indian Claims Commission Act of August 13, 1946 (60 Stat. 1055; 25 U.S.C. 70t); to the Committee on Interior and Insular Affairs.

2104. A letter from the Under Secretary of Commerce, transmitting a draft of proposed legislation entitled "A bill for the relief of John Trevor Jefferies; his spouse, Charmian Candy Jefferies; and their minor son, Stephen Reid Jefferies"; to the Committee on the Judiciary.

2105. A letter from the Director, Administrative Office, U.S. Courts, transmitting a draft of proposed legislation entitled "A bill to amend section 376 of title 28, United States Code"; to the Committee on the Judiciary.

2106. A letter from the Director, Administrative Office, U.S. Courts, transmitting a draft of proposed legislation entitled "A bill to provide that the district courts shall be always open for certain purposes, to abolish terms of court and to regulate the sessions of the courts for transacting business"; to the Committee on the Judiciary.

2107. A letter from the executive vice president, National Fund for Medical Education, transmitting a report of an audit of the National Fund for Medical Education for the year ended December 31, 1959, pursuant to Public Law 685, 83d Congress; to the Committee on the Judiciary.

2108. A communication from the President of the United States, transmitting proposed supplemental appropriations for the fiscal year 1960 in the amount of $8 million for the Department of Labor and $256,000 for the Department of State (H. Doc. No. 384); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, pursuant to the order of the House of April 28, 1960, the following bill was reported on April 29, 1960:

Mr. MAHON: Committee on Appropriations. H.R. 11998. A bill making appropriations for the Department of Defense for the fiscal year ending June 30, 1961, and for other purposes; without amendment (Rept. No. 1561). Referred to the Committee of the Whole House on the State of the Union.

[*Submitted May 2, 1960*]

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ZABLOCKI: Committee on Foreign Affairs. House Concurrent Resolution 633. Concurrent resolution relating to restoration of freedom to captive nations; with amendment (Rept. No. 1562). Referred to the House Calendar.

Mr. MILLS: Committee on Ways and Means. H.R. 11405. A bill to provide for the treatment of income from discharge of indebtedness of a railroad corporation in a receivership proceeding or in a proceeding under section 77 of the Bankruptcy Act (11 U.S.C. 205) commenced before January 1, 1960; with amendment (Rept. No. 1563). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'BRIEN of New York: Committee on Interior and Insular Affairs. H.R. 11602. A bill to amend certain laws of the United States in light of the admission of the State of Hawaii into the Union, and for other purposes; without amendment (Rept. No. 1564). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLS: Committee on Ways and Means. H.R. 11748. A bill to continue until the close of June 30, 1961, the suspension of duties on metal scrap, and for other purposes; without amendment (Rept. No. 1565). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H.R. 11761. A bill to simplify, consolidate, and improve the authority of the Secretary of Agriculture with respect to loans to farmers and ranchers, and for other purposes; with amendment (Rept. No. 1569). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. TOLL: Committee on the Judiciary. H.R. 1433. A bill for the relief of Mr. and Mrs. James H. McMurray; with amendment (Rept. No. 1566). Referred to the Committee of the Whole House.

Mr. TOLL: Committee on the Judiciary. H.R. 1721. A bill for the relief of Henry and Edna Robinson; with amendment (Rept. No. 1567). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 1766. A bill for the relief of Mr. and Mrs. Moses Glikowsky; without amendment (Rept. No. 1568). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, pursuant to the order of the House of April 28, 1960, the following bill was introduced April 29, 1960:

By Mr. MAHON:

H.R. 11998. A bill making appropriations for the Department of Defense for the fiscal year ending June 30, 1961, and for other purposes.

[*Introduced and referred May 2, 1960*]

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALBERT:

H.R. 11999. A bill to amend title 23 of the United States Code, relating to highways,

with respect to certain projects constructed on the Federal-aid system by Federal agencies; to the Committee on Public Works.

By Mr. ANDERSEN of Minnesota:

H.R. 12000. A bill to authorize a program of balanced agricultural production, to assure producers a fair economic return and consumers an adequate supply of commodities at fair prices, to conserve soil, water, and wildlife resources, and for other purposes; to the Committee on Agriculture.

By Mr. JENSEN:

H.R. 12001. A bill to authorize a program of balanced agricultural production, to assure producers a fair economic return and consumers an adequate supply of commodities at fair prices, to conserve soil, water, and wildlife resources, and for other purposes; to the Committee on Agriculture.

By Mr. BELCHER:

H.R. 12002. A bill to amend title 23 of the United States Code, relating to highways, with respect to certain projects on the Federal-aid system by Federal agencies; to the Committee on Public Works.

By Mr. BROYHILL:

H.R. 12003. A bill to increase annuities payable to certain annuitants from the District of Columbia teachers' retirement and annuity fund; to the Committee on the District of Columbia.

H.R. 12004. A bill to provide for examination, licensing, registration, and for regulation of professional and practical nurses, and for nursing education in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. FLYNN:

H.R. 12005. A bill to balance domestic supplies of, and domestic demand for, agricultural commodities, and to prevent the loss of soil, farm labor, and farm capital resources, by providing for the withdrawal of up to 80 million acres from agricultural production; to the Committee on Agriculture.

H.R. 12006. A bill to reduce domestic supplies of agricultural commodities and to make land available of educational, rehabilitational, health, or recreational purposes by withdrawal by purchase of agricultural land; to the Committee on Agriculture.

By Mr. GILBERT:

H.R. 12007. A bill to extend the educational materials postal rate to certain printed plastic educational reference charts; to the Committee on Post Office and Civil Service.

By Mr. HERLONG:

H.R. 12008. A bill to permit limited deduction of contributions to political committees; to the Committee on Ways and Means.

By Mr. MACDONALD:

H.R. 12009. A bill to amend the National Defense Education Act of 1958 in order to promote an adequate supply of qualified individuals to serve the Federal Government in foreign countries as employees of the Department of State and the U.S. Information Agency; to the Committee on Education and Labor.

By Mr. RHODES of Arizona:

H.R. 12010. A bill giving the consent of Congress to a compact between the State of Arizona and the State of Nevada establishing a boundary between those States; to the Committee on the Judiciary.

By Mr. BECKWORTH:

H.R. 12011. A bill to amend the act of March 3, 1879, to permit the transmission in the mails free of postage of certain publications mailed to subscribers residing in the county where such publications are prepared in whole or in part for printing; to the Committee on Post Office and Civil Service.

By Mr. EDMONDSON:

H.R. 12012. A bill to amend title 23 of the United States Code, relating to highways, with respect to certain projects constructed on the Federal-aid system by Federal agencies; to the Committee on Public Works.

By Mr. GUBSER:

H.R. 12013. A bill to provide for the termination of programs of price support for agricultural commodities by December 31, 1965; to the Committee on Agriculture.

By Mr. KEARNS:

H.R. 12014. A bill to amend the National Cultural Center Act, as amended, to enlarge the site within which the National Cultural Center may be built; to the Committee on Public Works.

By Mr. MORRIS of Oklahoma:

H.R. 12015. A bill to amend title 23 of the United States Code, relating to highways, with respect to certain projects constructed on the Federal-aid system by Federal agencies; to the Committee on Public Works.

By Mr. STEED:

H.R. 12016. A bill to amend title 23 of the United States Code, relating to highways, with respect to certain projects constructed on the Federal-aid system by Federal agencies; to the Committee on Public Works.

By Mr. BERRY:

H.R. 12017. A bill authorizing the construction, operation, and maintenance of the Pine Ridge irrigation unit, White Division, Missouri River Basin project; to the Committee on Interior and Insular Affairs.

By Mr. GEORGE P. MILLER:

H.R. 12018. A bill to establish within the U.S. Coast and Geodetic Survey a National Oceanographic Data Center and a National Instrumentation Test and Calibration Center; to the Committee on Merchant Marine and Fisheries.

By Mr. BAILEY:

H. Con. Res. 664. Concurrent resolution to create a Joint Committee on a National Fuels Policy; to the Committee on Rules.

By Mr. BARING:

H. Con. Res. 665. Concurrent resolution expressing the sense of Congress that the United States should not grant further tariff reductions in the forthcoming tariff negotiations under the provisions of the Trade Agreements Extension Act of 1958, and for other purposes; to the Committee on Ways and Means.

By Mr. CHIPERFIELD:

H. Con. Res. 666. Concurrent resolution to create a Joint Committee on a National Fuels Policy; to the Committee on Rules.

By Mr. HENDERSON:

H. Con. Res. 667. Concurrent resolution expressing the sense of Congress that the United States should not grant further tariff reductions in the forthcoming tariff negotiations under the provisions of the Trade Agreements Extension Act of 1958, and for other purposes; to the Committee on Ways and Means.

By Mr. JENNINGS:

H. Con. Res. 668. Concurrent resolution to create a Joint Committee on a National Fuels Policy; to the Committee on Rules.

By Mrs. KEE:

H. Con. Res. 669. Concurrent resolution to create a Joint Committee on a National Fuels Policy; to the Committee on Rules.

H. Con. Res. 670. Concurrent resolution expressing the sense of Congress that the United States should not grant further tariff reductions in the forthcoming tariff negotiations under the provisions of the Trade Agreements Extension Act of 1958, and for other purposes; to the Committee on Ways and Means.

By Mr. KITCHIN:

H. Con. Res. 671. Concurrent resolution expressing the sense of Congress that the United States should not grant further tariff reductions in the forthcoming tariff negotiations under the provisions of the Trade Agreements Extension Act of 1958, and for other purposes; to the Committee on Ways and Means.

By Mr. MOORE:

H. Con. Res. 672. Concurrent resolution to create a Joint Committee on a National Fuels Policy; to the Committee on Rules.

By Mr. VAN ZANDT:

H. Con. Res. 673. Concurrent resolution to create a Joint Committee on a National Fuels Policy; to the Committee on Rules.

By Mr. WITHROW:

H. Con. Res. 674. Concurrent resolution expressing the sense of Congress that the United States should not grant further tariff reductions in the forthcoming tariff negotiations under the provisions of the Trade Agreements Extension Act of 1958, and for other purposes; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROOMFIELD:

H.R. 12019. A bill for the relief of Miss Kristina Voydanoff; to the Committee on the Judiciary.

By Mr. DERWINSKI:

H.R. 12020. A bill for the relief of Marian Walczyk; to the Committee on the Judiciary.

H.R. 12021. A bill for the relief of Andrzej Kieta; to the Committee on the Judiciary.

By Mr. EVINS:

H.R. 12022. A bill for the relief of Sgt. Alvin C. York; to the Committee on the Judiciary.

By Mr. FALLON:

H.R. 12023. A bill for the relief of Dr. John A. Kastretsios; to the Committee on the Judiciary.

By Mr. FINO:

H.R. 12024. A bill for the relief of Vincenzo Marzocca; to the Committee on the Judiciary.

By Mr. HULL:

H.R. 12025. A bill for the relief of Petronella Mundhenk; to the Committee on the Judiciary.

By Mr. KILGORE:

H.R. 12026. A bill for the relief of Kim-Ok Yun; to the Committee on the Judiciary.

By Mr. KITCHIN:

H.R. 12027. A bill for the relief of Rear Adm. Carl H. Cotter; to the Committee on the Judiciary.

By Mr. WIDNALL:

H.R. 12028. A bill for the relief of Janina Leibowitz and Teofila Leibowitz; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

446. By Mr. CASEY: Petition of Teamster's Local Union No. 968, Houston, Tex., relative to securing a hearing and investigation before the appropriate committee of the House of the denial, by the Federal court, of their rights to a convention and the need for legislation restricting the conflicting powers of the Federal court; to the Committee on Education and Labor.

447. Also, petition of Teamsters Local Union No. 949, Houston, Tex., relative to securing a hearing and investigation before the appropriate committee of the House of the denial, by the Federal court, of their rights to a convention and the need for legislation restricting the conflicting powers of the Federal court; to the Committee on Education and Labor.

448. By Mr. GROSS: Petition of 25 residents of Charles City, Iowa, and vicinity in support of legislation to increase the minimum wage and extend minimum wage coverage to include retail and service employees; to the Committee on Education and Labor.

449. By Mr. STRATTON: Petition of 141 members of the United Papermakers & Paper-

workers Union, Albany, N.Y., residents of the 32d Congressional District, urging passage of the Forand bill as a minimum first step toward providing decent medical care (hospitalization, surgical services and nursing home care) for those persons eligible (retired or not) for social security benefits; to the Committee on Ways and Means.

450. By the SPEAKER: Petition of Grayford W. Moore, Jackson, Mich., relative to the case of *Grayford W. Moore* v. *The Hon. Theodore Levin, Judge of the United States District Court for the Eastern District of Michigan, Southern Division, located in Detroit, Michigan;* to the Committee on the Judiciary.

451. Also, petition of Morris Miyasato, Occidental Underwriters of Hawaii, Ltd., Honolulu, Hawaii, requesting passage of the Price bill, H.R. 1157, which provides for the promotion of economic and social development in the Ryukyu Islands; to the Committee on Armed Services.

EXTENSIONS OF REMARKS

What Socialized Medicine Means

EXTENSION OF REMARKS
OF
HON. THOMAS B. CURTIS
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. CURTIS of Missouri. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I desire to include a "History of Socialized Medicine in Great Britain":

HISTORY OF SOCIALIZED MEDICINE IN GREAT BRITAIN

The foundations for socialized medicine in Great Britain were laid down on a limited basis with partial Government plans dating back as far as 1911.

Then on July 5, 1948, the National Health Service Act of 1946 went into effect in England, Scotland, and Wales.

The act provided free medical, hospital, and dental care, free drugs, and other appliances. It covered inpatient and outpatient services as well as supplementary services such as midwifery, maternity and child welfare, health visiting, home nursing, domestic help where needed on health grounds, vaccination, and immunization against diseases, additional special care and after care in cases of illness, ambulance service, blood transfusion, and laboratory service and a host of other things.

The national health service was part of Britain's social security system. It called for weekly contributions of over $1 per person and slightly more from the person's employer. British leaders predicted that with these funds, free medical and health care could be given to everyone for £170 million (about $476 million) annually.

In Britain the first full year NHS was in operation (1949–50) the health service cost £440 million or $1,230 million—nearly triple the estimate of the men who originally sold the idea to the people. Of this total, patients paid only £5 million, another £28 million coming from social security deductions. The Government had to pick up the tab on the rest.

What has happened to the cost of NHS 10 years later? A recent issue of the London Sunday Express points out that, "No less an authority that Lord Beveridge had predicted that there would be no increase in the cost before 1965."

In 1958 the NHS bill cost £705 million—an increase from the original £170 million estimated for its yearly operation. The "free" service was costing each British family £50 a year ($140 a year), compared with about half that sum the first year.

British Chancellor of Exchequer, Derick Heathcoat Amory, told the House of Commons in 1958 that the "free health service, whatever it may be doing for the health of Britons, is leaving the Treasury gasping." In 1959 the cost was estimated at £740 million ($2 billion), about five times the original estimate.

One out of every 100 Britishers (400,000) is employed by the Ministry of Health—two and a half clerks for every doctor in the British Isles. In the United States a Governmented-operated medical system would on that basis call for additional employment of 1,740,000 clerks, and it would call for a Washington office building that would make the Pentagon look like an anthill next to a mountain by comparison.

Patients are hospitalized in Britain three times longer than in the United States. The average length of hospitalization for an American patient is 5 or 7 days. In 2,400 hospitals of England and Wales in 1953 the average stay was 20 days.

Hospital construction ceased with the initiation of the National Health Service. Limited funds have been used for the renovation of existing structures. Some new hospital building is finally under way. But there is a waiting list for admissions to hospitals of perhaps half a million persons.

Governor Hollings of South Carolina Defends New York's Right To Handle Its Own Affairs

EXTENSION OF REMARKS
OF
HON. L. MENDEL RIVERS
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. RIVERS of South Carolina. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I include therewith excerpts from a telegram addressed to the chairman and members of the House Judiciary Committee by our distinguished Governor of South Carolina, the Honorable Ernest F. Hollings, as follows:

The Governor of South Carolina is particularly privileged to join Governors Rockefeller of New York, Meyner of New Jersey, and Senators KEATING and JAVITS of New York in their plea and fight for States' rights in preventing congressional interference in the affairs of the Port of New York Authority. I understand * * * House Joint Resolution 615, now before Congress, would require congressional approval of any further State legislation under the Bi-State Port Compact, and would also give Congress or any committee of Congress access to all books, records, and papers of the authority—a right which they do not have even for Federal agencies. * * *

I believe the fundamental questions of Federal-State relations reflected in this proposed legislation merit the special attention of the U.S. Advisory Commission on Intergovernmental Relations, of which I am privileged to be a member. * * *

Mr. Speaker, the worm turns, Governor Hollings is consistent. Governor Hollings has very generously offered to assist the gentleman from New York, the Honorable EMANUAL CELLER, in his effort to retain the right of New York to run its own business. Governor Hollings has always been for States' rights.

It is comforting to see that the State of New York is for States' rights, at least when it is in their own interest. South Carolina will always lend a helping hand to those who want to handle their own affairs whether it be against the Federal Government, the NAACP or the U.S. Supreme Court.

Governor Hollings knows that what is good for South Carolina is good for New York.

The Redefinition of Peace

EXTENSION OF REMARKS
OF
HON. EDWARD J. DERWINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. DERWINSKI. Mr. Speaker, the American University, an outstanding American institution, and the American Peace Society, an organization with a long history of devotion to the principles of a world free from strife are cosponsoring a panel discussion a week from Wednesday, which I feel would be of intense interest to Members of Congress and all people genuinely interested in the problem to be discussed.

"The Redefinition of Peace" will be the theme of a panel discussion to be held in the School of International Service lounge on the American University campus, Massachusetts and Nebraska Avenues NW., on Wednesday, May 11, at 8 p.m.

Sponsored by the American Peace Society and the American University, the forum will cover the nature of peace in the coming years. Dr. Stefan Possony, professor of government at Georgetown University in Washington, D.C., will discuss "The Communist Requirements for Peace." Prof. William Yandell Elliot, a member of the Harvard University faculty since 1925, will cover "Our National Peace Policy," and Dr. Bonaro Overstreet, who has just returned from a trip to Russia, will discuss "New Ways to an American Contribution to Peace." Moderator of the forum will be Judge Homer Ferguson of the U.S. Court of Military Appeals.

Admission to this presummit conference on peace is free and the public is invited.

Diamond Jubilee of St. Joseph's Benevolent Aid Society, Lawrence, Mass.

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include my remarks to the St. Joseph's Benevolent Aid Society at Lawrence, Mass., on the occasion of its diamond jubilee, May 1, 1960:

Greetings, to help those who are in need, and to be kind to the unfortunate, is to live the great Christian virtue of charity.

That is what the members of St. Joseph's Benevolent Aid Society have been doing for 60 years.

As one of the oldest parish organizations in our community, it has given the members of the congregation an opportunity to do good in fulfillment of the inspired teachings of the Catholic Church.

The charter members brought their faith with them from Poland which embraced Christianity as early as year 966. Even though Poland has been separated from the free world by the Iron Curtain and by the Communist puppets who rule the country against the will of the people, her faith grows stronger through persecution.

It is a happy coincidence that your diamond jubilee takes place only 2 days before May 3, which is the anniversary of Poland's Constitution Day.

For the past 20 years the Congress of the United States has observed this day with special tributes and for a twofold purpose: (1) To remind the Polish people that Americans have not forgotten their pledge to help Poland restore her freedom and independence, and to facilitate her return to the western family of nations; and (2) in order to review and place in proper perspective Poland's contribution in the development of Western civilization and culture.

These observances have a beneficial impact on the hopes and aspirations of the Polish people who, through no fault of their own, have been forced to endure Soviet tyranny and to live in a twilight zone between the darkness of spiritual and physical oppression from the East, and, as yet, the unsteadily flickering rays of encouragement and moral and economic aid from the West.

Over 7 million Americans of Polish origin, including a large group in Greater Lawrence, remind us of the generous contributions made by Polish freedom fighters to the winning of American independence.

There are strong ties between the people of Poland and the people of the United States, based upon our mutual respect for the dignity of man.

It is a spirit that is exemplified by St. Joseph's Benevolent Society of Holy Trinity Parish.

Through 60 years of service you have earned the gratitude of those you have helped, and the respect of the entire community.

And you have done this through voluntary cooperation, that reflects credit upon yourselves, your church, your Polish heritage, and your American citizenship.

In honor of this occasion it is my pleasure to present to you a flag that has flown over our Nation's Capitol at Washington, D.C.

I know that you will cherish it, for what it means to all Americans, and for the hope it symbolizes to the captive nations who look forward to the day of their liberation, when all persons everywhere will be free to express the God-given spirit of benevolence that characterizes the members of St. Joseph's Society.

A diamond jubilee is a very special event—to celebrate, and to remember. The program follows:

Opening remarks: Richard M. Pionowski, past president.

Our national anthem: Assembly.

"Boze, Cos Polske": Assembly.

Memorial program: Direction of Benjamin Olenick.

Remarks: Anthony Turkosz, vice president.

Award of past presidents' medals by John Pelczar, past president, to Richard M. Pionowski and Augustyn Stopyra.

Reading of messages: Secretary Julian Michaelwicz and Treasurer John Serwatka.

Invocation: Rev. Stephen Musielak, O.F.M., Conv., pastor and spiritual director.

Dinner.

Toastmaster: Stanley J. Dziadosz.

Introduction of guests at head table.

Presentation of 50-star flag: Congressman THOMAS J. LANE.

Remarks: Massachusetts Executive Councillor Augustus G. Means.

Remarks: Massachusetts Senator William X. Wall.

Remarks: District Attorney John P. S. Burke.

Principal speaker: Rev. Stephen Musielak, O.F.M., Conv.

Introduction of souvenir program book: Chairman Stanley Maciejewski.

Closing remarks: Toastmaster Stanley J. Dziadosz.

Our national anthem and "Boze, Cos Polske."

Kaplan Student Is Louisiana's Homemaker of Tomorrow

EXTENSION OF REMARKS
OF
HON. EDWIN E. WILLIS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. WILLIS. Mr. Speaker, it gives me much pleasure to call attention to the State honors won in Louisiana by a young lady from my congressional district, Miss Vivian Couvillon, of Kaplan.

Miss Couvillon was among the winners from the various States who were in Washington for the final events of the 1960 Homemakers of Tomorrow Search, climaxed by an American dinner table banquet at the Statler-Hilton Hotel. Each received a $1,500 scholarship plus an all-expense trip to Washington, New York, and Williamsburg, Va.

More than 370,000 senior girls in high schools across the Nation took an examination on "Homemaking Knowledge and Attitudes." The contest, sponsored by General Mills, is designed to further the prestige and dignity of the American home and to stimulate interest in the art of homemaking. Another purpose is to emphasize the outstanding contributions being made by high school teachers throughout the United States.

Louisiana's homemaker of tomorrow is the daughter of Mr. and Mrs. Roy Couvillon of Kaplan. Her father is a school principal and her mother a homemaker—both very much interested in the welfare of children. Their daughter's broad knowledge as demonstrated in attaining top honors in Louisiana in the nationwide competition emphasizes the culmination of teachings she has had in home, church, and school.

Mrs. W. E. Douglas, homemaking teacher of Kaplan High School, accompanied Miss Couvillon on her trip to the Nation's Capital and to New York and Williamsburg.

Bureaucracy

EXTENSION OF REMARKS
OF
HON. JAMES B. UTT
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. UTT. Mr. Speaker, under unanimous consent to extend my remarks in the CONGRESSIONAL RECORD, I ask permission to include my newsletter of April 14 to my constituents on bureaucracy.

WASHINGTON REPORT

(By Your Congressman JAMES B. UTT)

Hearings have commenced on several bills relating to the District of Columbia involving home rule, and including the milder approach of granting the residents of the District the right to vote for President and Vice President and have a nonvoting Delegate in Congress.

The battle cry used by the early colonies in the War of Independence, "Taxation without representation is tyranny," is the current slogan of the District citizens. The old bromide comes to mind that if you think taxation without representation is tyranny, just look at the tyranny we have with representation. Actually, the citizens of the District of Columbia have more appellate representation than the average citizen in America, with the exception of voting rights. A citizen here can appeal for redress to the District Commissioners and from there to the House District Committee and the Senate District Committee and to the courts.

The tyranny which we have in this country even with representation is startling. The average citizen will tell you that we have a government of laws administered by elective officers and therefore it is a government of, for, and by the people. This is what it should be, but let's examine the facts.

There is more administrative law on the books governing our citizens than there is statutory law enacted by Congress. This administrative law has the force and effect of statutory law, and while it is supposed to be within the purview of the statute authorizing it, there is no assurance that it will be. As a result, every bureau, board, and commission in Washington writes a set of regulations according to its own interpretation of the Federal statute, places those regulations in the Federal Register, and that becomes the administrative law which governs you. We are rapidly coming to a point where a complete change of your federally elected officers, including both Houses of Congress and the White House, can mean little change in policy. You are governed by people for whom you have never voted, for whom you never will vote, whom you have never seen, and whom you cannot recall by your vote. They are entrenched in the boards, bureaus, and commissions, even at the policy level. For example, you may think that the Secretary of Labor sets the policy of his Department, but I know that much of the policy of that Department is set by civil service employees who have been with the Department for 20 years, and they have no inten-

tion, now or ever, of recommending to the Secretary of Labor any policy which does not fit their personal philosophy of government, and you cannot remove them or replace them by your ballot.

That same situation exists in the State Department, and in fact in every bureau, board, and commission. This is a form of invisible government and can lead to the most oppressive type of tyranny.

Congress must assume a great deal of the blame for constantly delegating powers and duties which rightly belong to Congress. These delegations of power generally take place under a temporary emergency situation, and once delegated they are never returned. We are currently being asked to delegate to the Executive, which in this case actually means the State Department, the authority to allocate sugar quotas to other countries than Cuba, should the State Department see fit to do so. Of course, the temporary emergency is Fidel Castro, but I know that once that authority is delegated it will never return to Congress. Congress generally delegates these powers without sufficient guidelines and limitations so that it is impossible to determine whether the administrative law which follows falls within the intent of Congress.

What we need are 250 Representatives and 51 Senators who will pledge themselves to recapture most of these powers and duties, thereby returning the Government of the United States to its people.

VISITORS

We were happy to welcome the following recent visitors: Mr. Peter Atherton, Mr. George H. Frazier and Miss Gail Frazier, Miss Helen M. Johnson, Mr. James H. Kindel, Jr., with his two sons, Bob and Bill Kindel, Santa Ana; Mrs. Robert J. Hitt, Orange; Mrs. John Barbour, La Mesa; Mr. and Mrs. W. G. Paul, Jr., Yorba Linda; Mr. William Sample, Jr., San Diego; Mr. George Osborne, Fullerton, and Mr. Ray E. Badger, Rancho Santa Fe.

Imported Agricultural Labor Doesn't Take Jobs Away From Our Own People

EXTENSION OF REMARKS
OF
HON. CHARLES S. GUBSER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. GUBSER. Mr. Speaker, many opponents of Public Law 78 base their opposition upon the belief that importation of foreign labor takes jobs away from our own people.

Each week the Gilroy Evening Dispatch prints a news story which clearly shows that this argument is false. In the issue for April 27, 1960, the Dispatch quotes Mr. Arnold Hamilton, manager of the State Department of Employment Office in Gilroy, Calif., as stating that there is an urgent need for men and women to pick strawberries. The Dispatch story further reports the situation as so desperate that housewives and schoolchildren are urged to help in harvesting the berry crop.

Another portion of the same news story reports that during the week previous to April 27 there were 458 continued claims for unemployment insurance and 150 new claims.

The sense of this news story is not unusual; in fact, it is normal during the harvest season in California.

To editorialize on the Dispatch news story I should like to offer this comment: "Isn't it apparent that unemployed domestic workers will not pick strawberries? If this is true then do we not need imported field labor if we are to harvest highly perishable crops?"

Rumanian Independence Day

EXTENSION OF REMARKS
OF
HON. EDWARD J. DERWINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. DERWINSKI. Mr. Speaker, Rumania has always been the breadbasket of southeastern Europe, and its rugged peasants among the hardiest and most productive workers in all Europe. It is one of the larger countries in the Balkan peninsula, and some 17 million Rumanians constitute one of the largest of all ethnic groups in that region. Geography has placed them at the crossroads of Europe and Asia, and Asiatic invaders of Europe have found it convenient to enter Europe via Rumania. Thus Rumanians were fated to defend themselves and their freedom against hordes from the east. Since the beginning of modern times they had faced some formidable and fearless adversaries. Centuries ago the country was overrun and conquered by the Ottoman Turks, and Rumanians were subjected to the conqueror's unrelenting harsh rule. They endured the oppressive rule for hundreds of years, but they never lost sight of their goal—national freedom and independence.

In the course of the last century they staged several revolts with that end in view, but each time they fell short of their goal; and they were ruthlessly punished for their daring attempts. But in the middle of the century the Crimean War provided an opportunity. In 1856, at the conclusion of that war, Eu[illegible]n powers agreed to restrain [illegible] rule Ottoman Sultan over Ru[illegible] autonomous principalities we[illegible] create[illegible] Later these two principalities were united under the rule of a prince. In the Russo-Turkish War of 1877–78, Rumanians had their golden opportunity and they took full advantage of that. On May 10, 1877, when there was little fear of the Turks, they proclaimed their independence, which in a few years, in 1880, led to the founding of the Rumanian Kingdom. Thus the event of 83 years ago today was of such significance to Rumanians that they have always observed its anniversary as their national holiday.

Since those happy days Rumanians have had their ups and downs. Their country grew prosperous at times and they lived in peace and happiness, but at other times it was robbed of its wealth by foreigners and the people were penurious and poverty stricken, as has been their lot particularly since the end of the last war. Unhappy Rumanians endured hardships and suffered during that war, hoping that in the end they would have their reward, but like so many other nations in the region, they were sadly and grievously disappointed. The result has been their enslavement under Communist totalitarianism, which in 1947 forced the abdication of the King and deprived the people of their last traces of free government. Certainly in Rumania we see the stark difference between the soundness of a good constitutional monarchy in comparison with the misrule under the Communist philosophy of government.

Mr. Speaker, it is fitting and proper that we, Members of the Congress of the United States take this opportunity to encourage the brave and rugged Rumanian people to maintain their hope for freedom by clinging to the spirit of May 10, 1877, their true independence day.

Brotherhood in Action—A Significant Occasion

EXTENSION OF REMARKS
OF
HON. SEYMOUR HALPERN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. HALPERN. Mr. Speaker, in my district during Brotherhood Week a distinctive occasion in human relations took place. It truly reflected democracy in action. Its effect is so inspiring and its meaning so significant, especially at this time when the subject of human rights is of such deep concern to the whole world, that I call it to the attention of all the American people through the forum of this House of Representatives.

I refer to a gathering of peoples of all faiths and races, the aged and the young, homemakers, professional people, labor and management, in the true spirit of brotherhood, at a meeting of the Brotherhood Council of Eastern Queens, New York, on February 25, for the presentation of the council's annual Community [illegible]rotherhood Award.

This outstanding organization, of which Mr. Melvin Gerard, a distinguished community leader, is president, is composed of groups comprising a cross section of races, religions, and civic functions. It has dedicated its activities to the furtherance of programs designed to promote greater understanding among peoples—programs of brotherhood.

One of the council's fine activities is the presentation each year of its Community Brotherhood Award to a citizen who has demonstrated through his actions his dedication to the community and to the precepts of brotherhood. This year's occasion marked the fifth annual presentation of the award.

I was privileged to address the ceremony—quoting in part some of my remarks made that same day in this House—and to make the presentation to Mr. Albert Greenblatt, pioneering civic worker and attorney of Floral Park, who has devoted the greater portion of his time to community activities and to providing legal assistance to individuals and

groups regardless of race, religion, or creed.

This inspiring meeting can proudly stand as a model for other communities in America. Because it exemplifies the very essence of our democratic beliefs, I would like to describe the occasion in the permanent RECORD of this Congress.

The event was held in the auditorium of Junior High School 172 and, in spite of inclement weather, more than 300 people turned out to participate.

Although the announcement of Mr. Greenblatt as the winner of the Community Award was the highlight of the occasion, the impressive gathering also included the dramatic presentation of awards to 18 public school children who had been selected as the winners of the B'nai B'rith brotherhood poster contest.

These awards were presented by Mrs. Shirley Brody, chairman of the Anti-Defamation League branch of the independence chapter of B'nai B'rith and corresponding secretary of the Brotherhood Council. Mrs. Brody, incidentally, is an indefatigable worker for good causes and has done much to promote the objectives of the council. She presented the awards to:

Laurie Maloff and Carol Glaser, from Public School 18; Philip Davis and Stephen Karafiol, from Public School 33; Ronald Fromkin and Mark Nerenberg, from Public School 115; Simon Winnik and Donna Schatz, from Junior High School 172; Myra Handelman and Nancy Rudd, from Public School 85; Eugene Giardina and Elissa Lowenstein, from Public School 191; Steve Fromkes and Dominick Durante, from Public School 133; Eileen Burton and Kenneth Fisher, from St. Gregory's; and Veronica Bond and Richard Ohlinger, from St. Paul's.

Throughout the evening the Hillside Junior High School Glee Club, directed by Herman Schuckman and Lillian LeBarbara, gave numerous musical selections. It was literally thrilling to listen to their exceptional harmony and talent. The Human Relations Drama Workshop of Andrew Jackson High School presented a playlet entitled "The Third Defendant." It was magnificently performed, and the entire cast and its direction calls for the highest commendation.

The big moment of the evening was, of course, the naming of Mr. Greenblatt as this year's winner of the fifth annual Community Award. He succeeds four other outstanding advocates of human rights and civic conscious residents of eastern Queens, all previous recipients of the award—Mr. Herman Dunsay, Pastor Paul Lorimer, Mr. Melvin Gerard, and Mrs. Bess Smith. I was truly privileged to be the one to announce the selection of Mr. Greenblatt and to present him with the plaque.

Mr. Greenblatt was well deserving of the honor. He is a leading civic worker in Floral Park, N.Y., president of the Lost Community Civic Association, and past commander of the Stein-Goldie Jewish War Veterans Post 552 in which he is still very active. He has also donated continually of his time and efforts for many years in providing legal counsel and support to the many religious organizations and good causes in the community. He is the legislative chairman of the PTA of Junior High School 172 and is a member of its executive board. He is associated with the Eastern Queens Youth Clubs which sponsor summer dances for teenagers. Added to this are his countless other activities and contributions to community betterment and the ideals of brotherhood.

I would be remiss if I did not cite the names of the runners-up for the award. My one regret is that there were not 10 awards to be given that night, for surely each of the 10 nominees were richly deserving of the honor. Each, in his or her own way, has contributed greatly to every concept and principle upon which the selection was based. These most praiseworthy individuals were Mrs. Sylvia Bachner, Mrs. Shirley Brody, Mrs. Jaye Celano, Mr. Alexander M. Fix, Mr. Martin Hande, Mrs. Henrietta Henschel, Mr. Bernard Krueger, Mrs. Sue Noreika, and Mrs. Adeline Rubin.

The selection of the winner was made by three impartial judges on the basis of community service as expressed by activities in local groups in behalf of community betterment and for the promotion of the ideals of brotherhood, through word and deed, in the interreligious and interracial field on a local level. The judges were Mrs. Harold Prucha, librarian of the Glen Oaks Library; Mr. Nils Mathisen, manager of the Glen Oaks branch of Manufacturers Trust Co.; and Mr. David Allison, editor of the popular community newspaper, the Glen Oaks News.

The impressive ceremonies were under the chairmanship of Mr. Paul Denn, the highly respected principal of Martin Van Buren High School. His comments, along with those of Mel Gerard, contributed greatly to the occasion as did the highly significant speech made by Hon. Louis Wallach, the distinguished New York State assemblyman from the 10th district of Queens, who is honorary chairman of the Brotherhood Council of Eastern Queens. Also most meaningful to the event was the participation of Pa[illegible] Daniel Pierotti, of St. Paul's L[illegible]an Church, and Rabbi Meyer [illegible] delivered the invocation [illegible]nediction respectively.

Mr. Speaker, this inspiring action can proudly stand as a model for other communities in America. It exemplifies the very essence of our beliefs and ideals in free government. It is, as I said earlier, truly democracy in action.

Polish Constitution Day Ceremonies in Philadelphia

EXTENSION OF REMARKS
OF
HON. HERMAN TOLL
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. TOLL. Mr. Speaker, it was my privilege to attend the Polish Constitution Day ceremonies in the city of Philadelphia yesterday, Sunday, May 1, 1960, at St. Adalbert's Auditorium. It was an invigorating and inspiring sight to see nearly 1,500 Polish-American citizens listening to numerous speakers, who in fiery oration encouraged the people in their continued fight for the land of their origin.

It was particularly interesting to hear the Honorable WILLIAM J. GREEN, JR., chairman of the Democratic City Committee and a Member of Congress from the Fifth Congressional District of Pennsylvania, introduce the principal speaker, Maj. Gen. A. J. Drexel Biddle, adjutant general of Pennsylvania. General Biddle delivered an inspiring address.

The chairman of the program was Mr. William F. Siemion, who is to be congratulated for his efforts and presentation of such an outstanding affair.

West Virginia's Coal Resources—A Tremendous Power Potential for New Industry

EXTENSION OF REMARKS
OF
HON. EUGENE J. McCARTHY
OF MINNESOTA
IN THE SENATE OF THE UNITED STATES
Monday, May 2, 1960

Mr. McCARTHY. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a statement by the senior Senator from Minnesota [Mr. HUMPHREY] entitled, "West Virginia's Coal Resources—A Tremendous Power Potential for New Industry."

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HUMPHREY

In my extensive travels throughout the State of West Virginia in the past several days, I have been deeply moved and troubled by the desperate economic conditions which are to be found there.

It is not a pleasant experience to see thousands upon thousands of able workers without jobs, to see families without adequate food and clothing, to see abandoned houses and factories. Yet, this is the situation and we must face up to it. The Federal Government has an obligation to come forth with programs designed to aid in the growth and development of West Virginia's economy. Its people are doing all that they can to improve the economy, but they cannot do it alone.

Today I wish to discuss one particular program which the Federal Government should give top priority to. Namely, the finding of ways to make greater use of coal, West Virginia's greatest natural resource.

West Virginia is by all odds the most important coal producing State in the country, accounting for 30 percent of the total production excluding anthracite. As such, it has shared in the depressed condition of the coal industry during the past decade. Output in both West Virginia and the industry as a whole was down by about one-third in 1958 from the peak year 1947. The State has been hit especially hard, however, by the fact that coal mining is its most important industry.

West Virginia does not lack reserves. According to official Government figures, the recoverable reserves remaining are more than

eight times the total of all the coal the State has produced to date. The important task, then, to aid West Virginia's recovery from the depressed condition of its major industry is to find or create new markets for its coal.

Of particular interest to West Virginia are the technological advances which have taken place in long-distance transmission of electricity. Shipment of coal by wire is now technically and economically possible.

Traditionally, the cost of transmitting electricity over high voltage powerlines more than 200 to 250 miles has been greater than the cost of transporting coal. As a result, electric power for large consuming centers has been generated near those centers, and the coal has been brought to them. With the growth of demand, however, large blocks of power are now required at the big consuming centers, and the combination of this large-scale demand and recent advances in the art of electricity transmission at extra high voltages has created exciting new opportunities. Sweden and the Soviet Union have demonstrated that it is technically feasible to transmit power 500 miles and more at voltages of 500,000 volts and higher. Both countries have ambitious programs for still higher voltages and longer distances. At extra high voltages and with large blocks of power, the cost of long-distance transmission falls below the cost of coal transport over the same distance.

Heretofore, the economics of power and coal transport have meant that West Virginia was too far from main consuming centers to allow power to be generated in its coalfields and transmitted to those centers. This is no longer the case. In fact, West Virginia is ideally located to become the site of power stations situated at the mine mouth and supplying power to many of our great industrial and urban centers.

Half of the American people live within 500 miles of the State. Four out of the five largest cities are within the same area.

The opportunity to aid West Virginia's depressed coal industry is evident, but large obstacles are in the way. Existing power systems are not set up to take advantage of this situation, and legal and administrative difficulties must be cleared away. The solution to West Virginia's problem is clear, however: There must be a concerted Government program to encourage the location of industry in West Virginia to take advantage of "mine-mouth" power, and to assist the development of "mine-mouth" power stations whose electricity will be sent to major consuming centers in the eastern half of America. This would not be a program involving large expenditures of public funds. What is needed is leadership, encouragement and stimulation for private enterprise to take advantage of cost-saving opportunities. This is a way to get West Virginia's coal industry back on its feet so that it again becomes a source of strength in the economic life of the State. It is a bold program that puts to work our country's technological prowess.

There is a need for close Federal-State and private industry cooperation because the market for West Virginia power will lie in the huge metropolitan areas from the Mississippi River to the Atlantic Ocean. This means Federal leadership in the joint effort because the program involves interstate cooperation, Federal Power Commission rate structures and probably partial Federal financing.

The distinguished chairman of the Committee on Interior and Insular Affairs, Mr. MURRAY, has introduced a resolution, S. Res. 71, calling for a study of the electrical power supply situation of the United States with the view in mind of recommending legislative proposals to assure development and organization of bulk power supply to enable our country to maintain an expanding economy, higher standards of living, and the strengthening of our position in the world.

This is an excellent and timely resolution and I hope that it will be approved in this session. And I would hope that if such a congressional study is undertaken that this subject of the transmission of electrical power by way of high-voltage transmission lines directly from the coalfields will be fully explored, and recommendations for legislation to encourage its development set forth.

The development of huge, new, low-cost energy resources in West Virginia, can be the single greatest attraction to new industries in many parts of the State. The paper and chemical industries which consume large quantities of electrical energy and use coal, water, and forest products as basic raw materials could not resist the powerfully attractive combination of inducements which would mean more jobs.

The National Cultural Center

EXTENSION OF REMARKS

OF

HON. CARROLL D. KEARNS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 2, 1960

Mr. KEARNS. Mr. Speaker, the National Cultural Center Act—approved in September 1958—specifies a narrow and somewhat awkwardly placed plot of land in the Nation's Capital on which the National Cultural Center is to be built.

Part of the land within this site description is already owned by the U.S. Government, and part of the land is held by private owners. In order to carry out the intent of the National Cultural Center Act—namely, that the Government provide the land on which the building would be built, and the building itself would be paid for by private contributions—the Board of Commissioners of the District of Columbia allocated $705,000 of Capper-Cramton Act appropriations for the purchase of the privately held land within the site described in the law.

The board of trustees and their architect adviser tried to work out a design for facilities on this site but concluded that real justice could not be done in this way to the objectives of the National Cultural Center Act.

Accordingly, in conversations with Conrad L. Wirth, Director of the U.S. National Park Service, the idea arose for placing the National Cultural Center partly on land within the original site description and partly on U.S. Park Service land in order that a park and river setting could be achieved for the National Cultural Center.

Incidental to such a shift in the location of the building would be the relocation of Rock Creek-Potomac Parkway so that it is moved out of the way of the proposed building. This shift of the parkway necessitates the acquisition of certain small parcels of private land not already included within the original site description in the act.

At the time this site shift was considered in 1959, it was generally believed that the $705,000 of Capper-Cramton money would cover most of the cost of buying the privately held land, and that any small balance would be covered by funds collected from fund raising. On this basis then, the board of trustees approved an architectural concept which, in accordance with the law, was submitted, for approval, to the Commission of Fine Arts, with a full explanation of the change in plans. The Commission of Fine Arts enthusiastically endorsed the building plan, as did the National Capital Planning Commission and the District of Columbia Board of Commissioners.

PROBLEM

In the past year, active work has been proceeding in redeveloping the Foggy Bottom area of the Nation's Capital. This factor, as well as announcement of plans for a National Cultural Center in this area, have caused land values to nearly triple. Informal appraisals by the appraisers employed by the National Capital Planning Commission, indicate that the $705,000 of Capper-Cramton money is no longer adequate to complete the purchase of the privately held land.

The trustees are beginning to experience fund-raising difficulties because of inability to show that they have a clear title to the land on which the Center is to be built, and no funds are available with which to buy the land. Part of the difficulty is that prospective donors do not want to give to a project which does not have a clear title to the land, and they had understood that the Government was providing the land.

In the second place, the National Cultural Center Act limits the life of the Board of Trustees to 5 years. In the event that the National Cultural Center project fails, all lands acquired for this purpose revert to the U.S. Government. Hence, prospective donors are either refusing to give in the face of this uncertain situation, or they are exercising their rights under the section of the law which provides that they may designate an alternative beneficiary for their donations in case the National Cultural Center project fails. As a consequence of these reservations, no funds are available with which to buy land.

The Board of Trustees is not even in a position to go to a bank and obtain a mortgage on the U.S.-owned land earmarked for the Center because of the 5-year death sentence in the act. In other words, no bank will give a mortgage on a piece of land which reverts to the U.S. Government in 1963.

In the face of these problems, the Board of Trustees authcrized its officers on March 31, 1960, to explore with the appropriate Members and committees of Congress the possibility of:

First. Amending the National Cultural Center Act in order to enlarge the Center site so that the structure can be built in accordance with the approved plan as shown in the National Capital Planning Commission File No. 1–8–618.

Second. Obtaining from the Congress an appropriation of such funds as would be required to secure all of the private lands needed to build the Center in accordance with the approved concept.

In seeking this appropriation, the Board of Trustees notes that the expenditure of the additional funds may be considered a prudent investment for the U.S. Government for the following reasons:

First. Purchase of the privately held land as soon as possible will halt the rising value thereof at 1960 prices.

Second. Even should the National Cultural Center project fail by 1963, the land which will revert to the U.S. Government can be used for another governmental purpose, and the price of the land would have been held to the 1960 price.

Third. Should the United States desire to sell the land for a nongovernmental purpose in 1963, the Government could profit from the general rise on land values in the Foggy Bottom area and make the sale at a higher price than the 1960 purchase price.

Grazing Fee Study Initiated

EXTENSION OF REMARKS

OF

HON. WAYNE N. ASPINALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 2, 1960

Mr. ASPINALL. Mr. Speaker, under leave to extend my remarks in the RECORD, I include extracts from a report of the Comptroller General and portions of an exchange of correspondence from which there has been generated an interdepartmental study of inconsistencies in grazing fees on Federal lands.

I appreciate the cooperation of the Departments of Agriculture and the Interior in undertaking the study as proposed by the Comptroller General.

It is my hope that through this study unjustifiable inconsistencies can be removed and the grazing administration of Federal lands can be strengthened.

The extracts and letters follow:

EXTRACTS FROM REPORT TO THE CONGRESS BY THE COMPTROLLER GENERAL, SEPTEMBER 1959, ON REVIEW OF ACTIVITIES IN NORTHERN REGION (REGION 1), ROCKY MOUNTAIN REGION (REGION 2), CALIFORNIA REGION (REGION 5), FOREST SERVICE, DEPARTMENT OF AGRICULTURE, SEPTEMBER 1958

In our report to the Congress dated June 7, 1957, on the audit of the Forest Service for 1955–56, we recommended that the Service reexamine its policies and practices with the objective of obtaining fair compensation for the use of its lands. This matter was also included in our January 1959 report to the Committee on Appropriations, House of Representatives, on significant findings developed during the course of audits and other examinations. It is repeated in this report because as yet there are no firm plans for revising grazing fees.

In our fiscal year 1958 audits, we found that Forest Service grazing fees were still greatly below fees charged on comparable State and private lands. There is also a wide variation in charges made by the Federal land managing agencies for grazing on Government range land.

Forest Service and Department of Agriculture officials believe that comparable rates among all Federal land managing agencies are desirable and that any fee study undertaken by the Service should be made simultaneously and on a coordinated basis with studies conducted by other Federal agencies. In letters dated February 10 and April 24, 1958, in response to Bureau of the Budget Bulletin No. 58–3 concerning user charges for certain Government services, the Department stated that there is currently a wide variation in charges made by Federal agencies for grazing privileges on similar range land, that present inconsistent practices should be made uniform, and that joint action within the executive branch is needed. To advise the Congress and obtain its support, the Department suggested that the Bureau of the Budget initiate a joint resolution endorsing cooperative study by the Departments of Defense, Interior, and Agriculture. However, in its reply dated July 25, 1958, the Bureau of the Budget took the view that the agencies concerned should work out mutually agreeable procedures. In a letter dated August 25, 1958, to the Budget Director from the Under Secretary of Agriculture, the Department again suggested that prior congressional concurrence in the form of a joint congressional resolution might be desirable for the executive branch study.

As of July 1, 1959, no further action has been taken on the matter by either the Department of Agriculture or the Bureau of the Budget.

To eliminate present inconsistencies in charges for grazing on Government lands managed by different Federal agencies, and to obtain fair compensation for use of these lands, we recommend that a joint study be undertaken with the objective of arriving at a uniform basis for establishing grazing fees. We believe that the study will not be undertaken without congressional sanction.

COMMITTEE ON INTERIOR AND INSULAR AFFAIRS,
Washington, D.C., March 4, 1960.

Hon. FRED A. SEATON,
Secretary of the Interior, Department of the Interior, Washington, D.C.

DEAR MR. SECRETARY: This refers to Under Secretary Elmer F. Bennett's letter of February 4 in which it is stated that the Department of the Interior would be pleased to cooperate in a joint study directed toward the objection of eliminating certain inconsistencies between Federal agencies with respect to grazing fees.

You have already been provided with a copy of a letter dated November 25 from the Department of Agriculture in which it is stated that that Department believes that practices among Federal agencies should be made uniform and that any adjustments in grazing fees should be based on a joint study by the Federal Departments (Agriculture, Defense, and Interior).

In view of the conclusion of both Departments that this study would be beneficial, I would suggest that the study be initiated and carried out at the earliest convenience of the Departments concerned. At the completion of the study a copy of the resulting report should be furnished to the committee and at that time consideration will be given to the possibility of printing it as a congressional document.

Please advise me from time to time on the progress of the study.

Sincerely yours,

WAYNE N. ASPINALL,
Chairman.

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., April 25, 1960.

Hon. WAYNE N. ASPINALL,
Chairman, Committee on Interior and Insular Affairs, House of Representatives, Washington, D.C.

DEAR MR. ASPINALL: Your letter of March 4 suggests that a joint study directed toward the objective of eliminating certain inconsistencies between Federal agencies with respect to grazing fees be initiated and carried out at the earliest convenience of the Departments concerned. This Department is currently engaged in informal discussions with the Departments of Agriculture and Defense designed to initiate such a study.

We will keep you advised from time to time relative to its progress and upon completion of the study furnish your committee with a copy of the results.

Sincerely yours,

ELMER F. BENNETT,
Under Secretary of the Interior.

The Balance of Payments Problem

EXTENSION OF REMARKS

OF

HON. WILLIAM B. WIDNALL

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 2, 1960

Mr. WIDNALL. Mr. Speaker, I am pleased to call to the attention of the Congress the excellent article by Secretary of the Treasury Robert B. Anderson, entitled "The Balance of Payments Problem," which appeared in the April 1960 issue of the magazine, Foreign Affairs. The Nation is confronted with a balance-of-payments problem that must be resolved if we are to fully and effectively discharge our responsibilities of free world leadership. Secretary Anderson's article presents an analysis of the causes of the deficit and, noting that the dollar has become the reserve currency of the world, stresses the vital importance of moving to correct the imbalance.

The solution is by no means simple, and Secretary Anderson proposes a firm, many-faceted attack combining sound domestic fiscal policies directed at keeping the dollar stable, with a foreign exchange policy that will maintain international confidence in our currency. Rejecting the temptation to solve the problem by restrictive action in our international economic policy, Secretary Anderson cites the role of both the Government and the private sector of the economy in resisting inflationary pressures, and describes the need for a united effort by the whole American economy to seek foreign markets on an increasingly intensive scale. The article is appended under unanimous consent:

THE BALANCE OF PAYMENTS PROBLEM

(By Robert B. Anderson)

It is a new thing for Americans to be concerned with our balance of payments. We are accustomed to thinking of ourselves as a Nation with almost limitless productive resources—a Nation capable of turning out goods and services sufficient for our own needs and for a sizable foreign demand, without undue monetary strain. After all, didn't World War II demonstrate that the United States, with a very small proportion of the world's population, could produce much of the material needed to win a world war, maintain high living standards at home, and afterward provide an unprecedented amount of assistance to war-torn countries elsewhere?

All this is true. But time moves swiftly. Our resources did in fact make it possible for us to act quickly after World War II in

easing the balance of payments problems of others. The destruction and economic dislocation of the war had wiped out much of Western Europe's monetary reserves. Export earnings had greatly diminished. The United States recognized that the war-devastated countries had little ability to pay for imports of food, materials, and equipment—the foundations on which swift and effective rehabilitation had to be built.

It was clear that capital was required in the underdeveloped areas of the world also. During the war and afterward, people in many formerly isolated areas were brought into abrupt contact with both the institutions and the advanced technology of the West. Not only were old customs and allegiances weakened; there was an urge, stronger than any ties with the past, to achieve the conditions making for improved standards of living. For this, too, capital was needed.

It was against this background of rehabilitation needs in Western Europe and the thrust toward economic advancement elsewhere that the United States supported the International Bank for Reconstruction and Development and the International Monetary Fund, devised the Greek-Turkey aid program and the European Recovery Program, and has continued during the postwar period to participate actively in broad programs of aid and foreign loans. As a result of all of these efforts the balance of payments problems of many countries have been reduced to manageable proportions; indeed, in some cases, they have been eliminated. What is new in our present situation is the realization that we now have a balance of payments problem of our own.

This recognition has been forced on us by the sudden and substantial increases in the deficits occurring in our balance of payments during 1958 and 1959. Deficits had occurred earlier. But it is the sharp recent uptrend which has caused concern—and rightly so. The events of the postwar period have made the U.S. dollar the major reserve currency of the world. Never before has it been so important to us and to our friends abroad that the balance of payments should be in a healthy equilibrium so that the dollar can continue to be a strong currency fully justifying the confidence of our own and other countries.

In brief, one can say that if excess drawings on reserves are to be avoided over a period of time, total outpayments must equal total inpayments (both on current and capital account). In this respect, there is a certain analogy between the situation of a nation and of a region within a nation or of an individual. Mr. Micawber, in one of his more reflective moods, remarked that a person who persistently ran a deficit in his monetary affairs was doomed to misery. Not dissimilarly, a community which does not currently "earn its way" in transactions with the rest of the country will soon feel the adverse effects of the deficit in its balance of payments. Both the individual and the community can borrow to offset the deficit in their current account, and this is constructive if the borrowed funds are wisely used, and it can continue for a long time. But neither can expect for very long to solve the problem of deficit by borrowing for consumption or by using up reserves. However, it is not wise to push these analogies very far, because there are two important differences between the balance of payments of an individual or a part of a nation, and of the nation itself. These differences are the separate monetary systems of nations and the problem of transferring funds from one country to another to which this gives rise.

The mechanism of adjustments by which a balance of payments tends toward equilibrium is a complex subject on which many books have been written. But before turning to an examination of the U.S. balance of payments, it may be useful to summarize some general conclusions:

(1) Large deficits or surpluses in the balance of payments should not persist.

(2) The reason for this is that large one-way movements of gold or large increases in foreign short-term holdings of a given currency will not continue indefinitely.

(3) While there is a tendency toward equilibrium in the balance of payments, the rapidity and effectiveness with which a country moves from unbalance back to balance varies from case to case.

(4) Over a period of time, net movement of capital into or out of a country is made possible by appropriate shifts in the current account of the balance of payments. The ways and means of bringing about these shifts comprise the balance-of-payments problem.

(5) There need not—and generally will not—be a balance in any single year; that is, some movement of short-term funds or gold is normal. But how much movement is normal and sustainable and how much is abnormal and unsustainable cannot be laid down by rule.

II

Let us now examine the balance of payments of the United States.

Table I gives a summary of our balance of payments since 1946; and table II gives greater detail for the years since 1950. In the 14 years shown in table I, the total payments of the United States increased greatly, from about $13 billion in 1946 to more than $28 billion in 1959. The current account was in surplus every year before 1959, but there were wide fluctuations in the surplus, and in 1959 there was a small deficit for the first time since World War II.

Notwithstanding the surpluses on current account, there was an overall deficit (as measured by recorded foreign gains of gold and liquid dollar balances in transactions with the United States) beginning in 1949 and running every year since then except in 1957. This deficit averaged $1.3 billion, 1950–57, and was $3.4 billion in 1958 and about $3.7 billion in 1959.

In every year shown in table II, total U.S. payments exceeded total receipts. Consequently, in every year except 1957 (when the balance of payments and receipts was very close), foreigners increased their gold and liquid dollar assets. In 6 of the 10 years foreigners gained both gold and dollars. In 3 years the United States gained gold, but foreigners' gains in dollars exceeded U.S. gold gains. In 1957 alone, U.S. gains in gold exceeded increases in foreign dollar holdings.

How does it happen that the United States has had a current account surplus year after year and still has an overall deficit in the balance of payments? Table II supplies the answer.

TABLE I.—*United States balance of payments, 1946–59* [1]

[In billions of dollars]

	Total U.S. payments [2]	Foreign payments in United States [2]	Net U.S. receipts on unrecorded transactions (errors and omissions)	Recorded gold and liquid dollar gains by foreigners	Current account—goods and services		
					U.S. exports	U.S. imports [3]	Balance
1946	[4] 13.3	14.4	0.2	[4] −1.3	14.7	7.0	7.7
1947	[4] 18.8	19.6	.9	[4] −1.8	19.7	8.2	11.5
1948	16.8	16.6	1.2	−1.0	16.8	10.3	6.4
1949	16.5	16.0	.8	−.2	15.9	9.7	6.1
1950	17.5	14.0	[5]	3.6	13.9	12.1	1.8
1951	19.9	19.0	.5	.3	18.9	15.1	3.7
1952	19.8	18.2	.5	1.1	18.1	15.8	2.3
1953	19.7	17.3	.3	2.1	17.1	16.6	0.4
1954	19.9	18.2	.2	1.5	17.9	16.1	1.9
1955	21.9	20.3	.4	1.1	20.0	17.9	2.1
1956	25.8	24.2	.6	1.0	23.7	19.8	3.9
1957	27.4	27.1	.7	−.5	26.7	20.9	5.8
1958	27.1	23.2	.4	3.4	23.2	21.0	2.2
1959	[6] 28.5	23.9	.9	3.7	23.4	23.5	−.1
(estimate)							

[1] Excludes grant-financed U.S. military supplies and services.
[2] Public and private U.S. capital outflow and remittances are entered net in U.S. payments; foreign payments in United States include foreign long-term investment here.
[3] Includes military expenditures shown separately in table II.
[4] Includes subscriptions to the International Monetary Fund and the International Bank amounting to $300,000,000 in 1946 and $3,100,000,000 in 1947.
[5] Less than $50,000,000.
[6] Excludes $1,375,000,000 subscription to International Monetary Fund.

Source: U.S. Department of Commerce, (Detailed figures may not add to totals because of rounding.)

First, the net outflow of U.S. private capital was large throughout the period, and in 1956–58 averaged $3 billion. In 1959 it decreased to $2.3 billion. Second, U.S. Government nonmilitary loans and grants (minus repayments) averaged $2.5 billion during the 10 years, and would have been close to that level in 1959 except for some exceptional repayments received. Third, the surplus of exports of goods and services over imports of goods and services fell short of covering these capital outflows. As table II indicates we normally include in imports of goods and services not only merchandise brought into the United States and payments for services performed for us here by foreigners, but also various payments abroad such as our tourist expenditures and our military expenditures in various countries for services and goods used to support our troops stationed there. These military expenditures were determined by national defense considerations rather than by economic forces of demand and supply; they increased steadily from $576 million in 1950 and exceeded $3 billion a year in 1957–59.

If we add together military expenditures abroad, net private capital outflows and net Government nonmilitary loans and grants, we find that they averaged $6.3 billion in the years 1950–57. They amounted to almost $9 billion in 1958. They were greater than the excess of U.S. exports of goods and services over imports of goods and services (excluding from our imports in this calculation our military expenditures abroad). In 1959, although they were smaller ($7.5 billion) because of special debt prepayments to the U.S. Government and the reduction of private capital outflow, they still exceeded the export surplus which dropped sharply for the second consecutive year. Consequently, foreigners again greatly increased their holdings of liquid dollars although they converted a smaller portion of these dollars into gold in 1959.

III

Two principal facts emerge concerning the balance of payments of the United States. We have been running an overall deficit for 10 years and it has become relatively large in the last 2 years. This overall deficit results from a net outflow of public and private capital larger than the surplus on current account—and it should be kept in mind that military expenditures abroad are included in the current account.

But after these facts are established, we still have the question of why there is currently a "problem" connected with our balance of payments. After all, the economy of the United States is very large, the gross national product is currently running around $500 billion per year, and our total merchandise exports are little more than 3 percent of GNP. Why need we be concerned about so small a segment of our total economic activity?

Or can it not be argued that, with a gold reserve of more than $19 billion, and with foreigners continuing to show a willingness to hold increasing amounts of dollar deposits, even a relatively large deficit in the balance of payments should cause no trouble?

TABLE II.—*U.S. balance of payments, 1950–59* [1]

[In millions of dollars]

	1950	1951	1952	1953	1954	1955	1956	1957	1958	1959 [2]

Finally, even if it has to be concluded that the deficit was too large, wouldn't it be simple enough merely to cut back on imports or to decrease the outflow of capital and take care of the deficit in this way?

It would be comforting to reason the balance of payments problem out of existence by those arguments. Unfortunately, however, none of them can be accepted. The United States must be able to sustain an increasing amount of international payments and obligations as the years go by for several reasons.

First, merchandise imports have become increasingly essential to the United States. As our economy grows, our demand for imports will also grow. It is, of course, evident that our capacity to pay for imports is basically dependent on the foreign exchange earnings which we receive from our exports of goods and services.

Secondly, as a great power with far-flung responsibilities and with worldwide financial and economic interests, both public and private, the United States to a surprising extent must depend on a reasonable equilibrium in its balance of payments to carry out its responsibilities and to acomplish its political and economic aims. We make military expenditures abroad, we carry on private investment in foreign countries, and we extend grants and loans with public funds, not as a matter of chance and relative indifference but because these activities are important to us and to the rest of the free world. We can carry out these activities on a large and continuing scale only if we have a reasonable equilibrium in our balance of payments.

Moreover, this equilibrium should in large part be achieved through a surplus on current account of substantial size chiefly by an expansion of exports. Large and continuing outflows of gold and long-continued and substantial increase in foreign holdings of U.S. dollar balances cannot be relied on as the way to deal with the balance of payments deficit of the United States.

It has long been a truism of international economics that a capital-surplus country which is to transfer savings to capital deficit areas over a period of years must do so primarily by means of a surplus in the current account. Within reasonable limits the United States can export long-term capital and solve the transfer problem by an offsetting inflow of short-term funds. This has happened since the war on a large scale as table II shows. In fact, since 1949 foreign holdings of short-term dollar balances and other liquid dollar assets have increased from $6.4 billion to approximately $18 billion.

On the whole this has not been an undesirable development. Foreigners have been prepared to hold dollars, especially in view of the status of the dollar as a reserve currency and the reassurance of a large U.S. gold reserve. These dollar balances have comprised a considerable part of the foreign exchange reserves of other countries, and are an important means of economizing the gold reserves of the free world. However, at least in the intermediate term the amount of foreign liquid dollar holdings which can with confidence be maintained is not unlimited. The increase in such balances under the impact of overall balance of payments deficits of the size of those of 1958 and 1959 would certainly threaten to reach that limit if so rapid a buildup continued much longer.

The same considerations serve as limiting factors on gold outflows. The U.S. gold reserve is large, exceeding $19 billion. But it should be large in order to provide a cushion against various contingencies and to secure our short-term liabilities. It seems to me that substantial changes in that reserve can be viewed with equanimity only if they are likely to be of relatively short duration and not persistently in one direction. It does not seem that the proper function of our gold reserve is to be heavily drawn down on a large scale over a period of years to transfer capital to the rest of the world.

Overall deficits in the balance of payments of the United States in 1958 and 1959 clearly were too large to be safely sustained for very long. Moreover, the circumstances which have led to a persistent balance of payments deficit for 10 years and a sharp worsening of that deficit in the past 2 years have certain qualities of persistence which must be given serious consideration. What seems to have occurred is a coincidence of several developments.

There has been a reemergence of the competitive strength of the other industrial countries. This is not a surprising development. The political, economic, and defense policies of the United States since the war have been aimed at this rehabilitation of the other industrial countries, most of which had suffered tremendous damage.

The success of these policies has been outstanding, and is shown in the statistics. Between 1952 and 1958 Germany's share of total world exports of manufactured goods increased from 12 percent to 18.6 percent, and Japan's from 3.8 percent to 6 percent;

while the share of the United States declined from 26.2 percent to 23.2 percent. The United States share of total world exports was 17.3 percent in 1958, which is about the same as the figures for 1950, 1953 and 1955, but below the figures for 1951, 1952 and 1956, which ranged from 18.2 to 18.6 percent, and much below the peak of 19.6 percent in 1957 which was due to very special factors.

Detailed analyses have been made by the Department of Commerce of changes in our share of major world export markets. On the whole, these analyses have been encouraging because they showed that serious reductions in our share of export markets have been confined to comparatively few classes of goods, especially motor vehicles and steel. Nevertheless, the aggregate losses in these classes have been substantial and they have occurred at a time when the need is to expand our current account surplus rather than to allow that surplus to shrink.

Another development has been the continuous increase in our merchandise imports. In 1955 imports were $11.5 billion, while in 1959 they reached slightly more than $15 billion. In the same 5 years, exports increased by about $2 billion. As our economy grows, there is reason to expect a rising trend in imports.

Unofficial estimates for 1960 are for an increase in our exports; and while our imports are also expected to expand, the improvement in the current account will reduce the year's overall deficit in the balance of payments below the 1958–59 levels. This, of course, is all to the good. But the deficit will still be large—probably substantially larger than the 1950–57 average. Moreover, in a year of boom conditions abroad, when foreign demand for our exports should be high, it seems particularly unsatisfactory that the deficit be so large.

IV

The conclusion is quite clear: We have a balance of payments problem. The essence of it is how to bring our total international transactions into a reasonable equilibrium which will enable the United States to carry out its responsibilities in the world without provoking large and persistent gold outflows or excessive increases in foreign holdings of dollar balances. However, I do not feel we are confronted with an emergency. We have time to find a proper solution and I am confident we will.

Our solution must be found along lines consistent with our international economic policy, which emphasizes the expansion of world trade on a multilateral basis and a continuing attack on barriers to trade. In terms both of our own economic interest and our responsibility as a leader in the free world, we must set ourselves resolutely against any temptation to solve the balance of payments problem by restrictive action. Of course, any country can tackle its balance of payments problem by deliberately cutting imports or by imposing restrictions on capital outflows. But the kind of balance which would result from such measures would be based on contraction and not expansion. It would push us back into the beggar-my-neighbor policies which were so disastrous in the great depression of the 1930's. It would mean an abdication of our role of leadership.

Within the framework of broad and established U.S. foreign economic policy, we must pursue our task from many sides. Our balance of payments problem is not simple in its causes and we are going to find that the solution will not be simple. I suggest that this many-sided attack can proceed along several lines.

We may expect that to some extent corrective forces are at work and will continue to be at work. Our balance of payments deficit itself results in the transfer of purchasing power to surplus countries and there will be a tendency for this increased purchasing power to have an expansionary effect on total economic activity in those countries. Some of this increased activity should be reflected in increased purchases in the United States. In addition, import competition is undoubtedly exerting an influence on product design and prices in the United States.

However, we cannot comfortably relax, hoping that automatic correction of our balance of payment deficit will solve the problem. We must take the actions on the domestic front which will not only help preserve the value of the dollar but let the nations of the world who have such a real interest in how well we manage our affairs know that we intend to do everything to keep the dollar stable. We must maintain sound fiscal policies with a budget surplus in times of prosperity, as the most recent budget submitted by the President proposes. We must have flexibility and freedom from artificial restrictions in the management of our debt so that the world will know that we can handle it in the least inflationary manner. Our monetary policy must be keyed to the containment of the strong demand for capital which otherwise might break through as a major inflationary pressure. And certainly we must do all in our power to maintain the proper relationships between wages, prices, and productivity so essential to our competitiveness in world markets.

These domestic actions, coupled with a foreign exchange policy which would leave no one at home or abroad with any doubt concerning our intent or capacity to maintain the dollar as a fully convertible currency at the existing official price for gold, should bring about two good results.

Producers in the United States will be assisted in competing abroad. There has been much concern of late as to the competitive position of our goods in world markets. An examination of price and wage trends and of changes in our share of world trade (especially in manufactures) does not provide clear evidence that the United States has priced itself out of world markets. However, there are examples which can be cited on the other side; and there is ample indication of intensified competition in world markets and of increased world capacity to produce goods for export. What we can conclude is that the United States has little margin of competitive superiority. This means that we cannot risk any erosion in the stability of U.S. prices if American producers are to succeed in expanding their exports.

Foreigners will have no reason to lose confidence in the dollar as a reserve currency. Confidence in a currency, particularly so far as concern persons outside of the country, is not something which is won by promises of pleas. Confidence is based on evidence and expectation that the purchasing power of the currency is—and will be—dependable.

American producers must seek foreign markets on an increasingly intensive scale if our exports are to expand to the extent called for to correct our balance-of-payments deficit. It will not be enough to maintain our exports at their 1959 level of about $16 billion. They should increase at least by some billions of dollars if the United States is to maintain a net outflow of capital and to make military expenditures abroad in the amounts of recent years. For some time following 1946 other countries—and especially other industrial countries—undertook export drives of great intensity, and they have shown that even in the United States market, so long thought to be a hard nut to crack, there is great room for success. The time has come to mount our own export drives; no American producer who has a product susceptible of export should fail to explore the possibility of expanding foreign sales. The Government is examining the facilities available to American exporters, in comparison with those enjoyed by their foreign competitors, to determine whether or not improvement is needed particularly in the field of export credit and export insurance. The administration also is working to improve the factfinding facilities of our Foreign Service and the services of Washington agencies in analyzing foreign trade information so as to enable more American businesses, large or small, to participate in export sales.

But we cannot rely solely on Government action to increase our exports on the substantial scale which is going to be needed. This requires the united effort of all American industry, labor, and agriculture—the whole American economy.

V

Developments in the other industrial countries may help us in our task. Europe is in the middle of a very substantial boom and some of this surge of economic activity is likely to be reflected in the demand for American goods. Moreover, in Europe and in other parts of the world we can expect that during 1960 most of the task of dismantling discrimination against American goods will be completed. The timing of this action is fortunate, because it coincides with our own need to leave no opportunity lost to expand our export business.

At the annual meeting of the International Monetary Fund in Washington in September 1959, I suggested the need to look at the world payments situation as a whole and not exclusively at the balance of payments of the United States.

In 1958 and 1959 (basing the latter on figures for the first 9 months at an annual rate) acquisition of gold and liquid dollars by Western Europe was roughly $3¾ billion in each year.[1] For the 2 years taken together, about half of this amount was obtained through direct transactions with the United States. For the same period, Canada lost gold and dollars in transactions with the United States, but more than offset this by gains in transactions with other areas. The rest of the world was in balance in 1958, when large receipts from the United States were offset by payments to Western Europe and Canada. But it gained heavily in 1959 when net receipts from the United States exceeded losses to Western Europe and Canada by over $800 million. This net gain in 1959 for the rest of the world in considerable part reflects the gain of over $450 million by Japan.

This broad picture of the structure of world payments indicates to thinking persons that two developments seem necessary if the United States is to eliminate its own deficit through an enlargement of exports. First, in the long run there should be a more than cyclical expansion in the imports of Western Europe both from the United States and from the rest of the world, particularly by the countries grouped in the Common Market. Second, there should be an enhanced flow of capital from the European industrial areas to the less developed areas.

VI

It is my firm conclusion that we can bring our balance of payments into reasonable equilibrium. But the task is formidable.

Competition in world markets is sharp and there is no reason to assume that it will become milder. The manufacturers in the other industrial countries have reached the point in their technological advance where they are at little if any disadvantage

[1] The figure is adjusted to exclude transactions between I.M.F. and member countries in gold and dollars.

in competing with the best which American technology can offer. It will require good will on an international scale, persistent and sober efforts by governments, and enlightened as well as energetic action by business and labor to bring about, over time, a better balance in the world's payments system.

The recent change in the Development Loan Fund policy, putting primary emphasis on financing the procurement of U.S. capital goods, should be interpreted in the light of the need to move on many fronts in seeking to bring our balance of payments into reasonable equilibrium. I would certainly oppose any limitations on the freedom of U.S. private capital to go abroad or for our capital market to extend credits to foreign borrowers under terms which seem reasonable to lender and borrower. When a foreign borrower approaches private lenders in the United States he should not be told that the proceeds of any loan would have to be spent on U.S. goods. However, the United States through the Development Loan Fund, makes public funds available on long term to underdeveloped countries on a basis unequaled by any other industrial country. The terms offered by the DLF, including repayment in local currency, represent very substantial and generous U.S. public assistance. It is important, for the reasons put forth throughout this discussion, for the United States to continue to be in a position to provide capital on a large scale to underdeveloped countries. I have also made clear that we can do so as a practical matter only if we solve our balance-of-payments problem.

Moreover, other industrial countries also are recognizing the importance of their providing increased amounts of public financing on a long-term basis to underdeveloped areas. They are now in position to do this and may be encouraged in this direction by the realization that DLF dollars are not generally available for financing portions of their exports to underdeveloped countries. In like manner, they may be encouraged to give long-term loans for capital export items which heretofore, in some cases, have been financed with short-term credits that are more appropriate to the financing of consumer items.

I have made the point that we must achieve a reasonable equilibrium in our balance of payments, and must do so in a constructive way, not only for reasons of self-interest but because of the broad and vital requirements imposed on us by the role of leadership which we have assumed and which we must fulfill. The United States finds itself in an international financial position which is at least as much the consequence of the long course of world development as it is of our deliberate choice. We have become the leading reserve banker in the free world and the dollar has become the principal reserve currency. Moreover, we and the countries associated with us are committed to the progressive and sound expansion of production and world trade.

The conclusions to be drawn are clear and evident. There is a discipline from which we cannot escape. It is our continuing task to maintain the purchasing power of our currency and to merit unfaltering world confidence in the dollar. Our fiscal and monetary policies, our approach to the question of the proper relationship between wages, prices and productivity, and the consequent competitive vigor of our industry and agriculture are all essential components of the solution to our balance-of-payments problem. In that solution the other countries of the free world have a stake scarcely less vital than our own. I am confident that with prudence and understanding the right solutions will be found.

Medical Needs

EXTENSION OF REMARKS
OF
HON. JOHN D. DINGELL
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. DINGELL. Mr. Speaker, time marches on. There appears to be very little disagreement that our older citizens cannot afford the minimum adequate care they need. It is an accepted fact that medical attention costs considerably more these days, particularly hospital care. No one will argue that older persons have larger medical needs or that their incomes are lower than those of our younger, employed citizens. It is also generally recognized that both the number and proportion of older people are rapidly increasing.

Obviously, a sensible solution to the pressing problem of adequate medical care for our older citizens is imperative.

Private health insurance plans are not the answer for the simple reason that the aged are in a high-risk, high-cost group and the premium that might be charged to provide them with the necessary medical benefits is far more than most of them can afford to pay.

There are over 15 million citizens 65 years of age or older. Every 3 years a million more people become 65 years of age. How can these people meet the cost of increased medical needs at a time when their incomes are lowest? The tragic answer is all too often they cannot. Moreover, our aged population contains a great many widows and widowers. Of all women 65 and over, more than half—55 percent—are widows; of all men 65 and over, about one-third are widowers. How much income do they receive? To get an accurate view of the income of the aged, it must be realized that only one in every five of them have any kind of paying job whatsoever, and this includes part time and intermittent work. That is why 3 out of 5 people 65 and over have less than $1,000 in income per year, and only 1 in 5 has more than $2,000 in income per year.

I believe our aged should have the benefits of the recent advances in modern medicine. There was a time when chronic illness, epidemics, diseases and the illnesses of old age, were more fatal to elderly people than they are today. Older persons can benefit from the new developments in the field of medicine only if they can afford the cost of the hospital and medical care involved. Surveys show that older folks recover from illness more slowly and often require more involved types of medical care.

The cost of hospital care has skyrocketed. The Consumer Price Index, used by the Bureau of Labor Statistics, shows that over a 20-year period, the price of hospital care has tripled. Although much of this increase reflects a change in the character of hospitals, as well as a greater utilization of hospitals occasioned by the growth of health insurance, the increased cost of medical care falls heaviest upon those who need it most and can afford it least—the aged.

Legislative proposals for governmental assistance to the aged for health care have been increasingly numerous in recent years. They range from my own bill for a national health insurance program (H.R. 4498) to Federal loans to health service organizations (S. 2009—Senator HUMPHREY). Perhaps the most discussed proposal is the Forand bill, H.R. 4700, which would provide social security recipients with up to 60 days of hospitalization per year and some nursing home care and surgical benefits. I am the sponsor of an identical bill H.R. 5923.

Every industrialized nation in the world provides medical care in some form or another for all or most of its citizens. All European countries, except Finland, have some type of governmental health and maternity program in operation. Most of the 59 countries of the world which have such programs provide medical benefits under a social insurance system. Some countries, like Australia, Sweden, U.S.S.R., and England provide medical services under a separate governmental program covering all its citizens. In countries like Belgium, Denmark, and Japan, the government subsidizes private mutual sickness funds.

It seems inconsistent to me that the United States the champion of human dignity, possessor of a vast economic system second to none, and leader of the Western World, should fail to quickly resolve this problem so fundamental to every human being in our Nation. How can our Federal Government respond to the needs of its citizens, when there are those in the Congress and the executive branch who drag their feet and raise academic questions regarding the necessity of a program for which the need is obvious to all who have studied the problem?

I know not what logic or reasoning can successfully be employed to move those who would delay passage of the Forand bill. Our older citizens are deserving in their autumn years of receiving the modest medical benefits this bill would provide.

Now is the time. We must expend our every effort to secure passage of this legislation which deals with a human consideration more powerful than any other measure to come before this session of Congress.

Loyalty Day

EXTENSION OF REMARKS
OF
HON. PETER W. RODINO, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. RODINO. Mr. Speaker, under leave to extend my remarks, I should like to pay tribute to Loyalty Day, 1960.

The establishment of Loyalty Day is another of the significant contributions of the Veterans of Foreign Wars. It was the VFW who, some years ago, began the commemoration of May 1 as Loyalty Day as a positive and highly effective countermeasure to the May Day celebrations of the Communists. Since then the idea has spread rapidly throughout the Nation. Numerous Governors and mayors have issued Loyalty Day proclamations, and, in 1959, the President gave the day national recognition.

Americans throughout the Nation, under the leadership of the VFW and other patriotic organizations, take this occasion to sponsor parades and demonstrations. It is on this day that we express our loyalty to our great Nation and to the great ideals of freedom and democracy which make up our American way of life.

Needless to say, Loyalty Day falls not only on May 1 but on every single day of the year. Only if we constantly rededicate ourselves to our country and to the ideals which she represents can we expect to strengthen our national purpose and retain our greatness as a world leader.

Dr. Virgil Hancher Honored for 20 Years' Service as President of the State University of Iowa

EXTENSION OF REMARKS
OF
HON. FRED SCHWENGEL
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. SCHWENGEL. Mr. Speaker, on April 20, Dr. Virgil Hancher, president of the State University of Iowa, was honored by the alumni association of the university for his 20 years of service as president of this renowned institution.

Those who gathered to pay tribute heard President Hancher, who has headed the university for a longer period than any other man, described as an "educational statesman" by Arthur S. Adams, president of the American Council on Education.

Others speakers included two men who were college classmates and later served on the university's governing board when it was known as the State board of education. They are W. Earl Hall, managing editor of the Mason City Globe-Gazette, and Dwight G. Rider, Fort Dodge attorney.

Another part of the tribute was formal presentation to the university of a portrait of President Hancher, painted by William F. Draper, of New York. The portrait, a gift of the SUI Alumni Association, will hang in the memorial union until June when it will be moved to the board room in Old Capitol where portraits of SUI presidents are located.

In paying tribute to Dr. Hancher, Judge Rider said that he and Mr. Hancher both were law students at the university but their contacts at that time were not very close because Hancher was a campus leader while he was only a student.

Mr. Rider said that later when Hancher became SUI president—

I thought that all college presidents did was to make speeches and meet prospective football players at the airport.

I found out different—

He said—

when the time comes for Dr. Hancher's retirement we can all say, "There was a man—we will not see his likes again."

An educational statesman—

Said Mr. Adams—

is not simply versed in the principles of art and government of an educational institution nor is he simply one who shows unusual wisdom in treating or directing public matters.

Over and beyond these two estimable qualities is the rigid discipline he imposes upon himself to push forward with zeal the high and broad objectives he sees so clearly. He is a man who thinks straight, who feels deeply, who reasons carefully and who acts courageously even in the face of great obstacles.

Virgil Hancher is such a man. He is known nationally and internationally as an educator of discerning judgment, of enduring patience, and of effective action.

Another tribute came in a letter from Henry Cabot Lodge, U.S. Ambassador to the United Nations, who said that President Hancher gained friendship for the United States when he served recently as a delegate to the world organization.

In responding, President Hancher thanked the speaker for the deserved or undeserved tribute.

He expressed the hope that "the spirit of excellence will so pervade this university in the years to come that it will continue to be a source of strength for the students, the community, the State, the Nation, and men of good will everywhere."

A tribute from the alumni association declared that few universities today reflect more widely the cumulative administrative impact of one man than does the State University of Iowa.

The program for the occasion noted that President Hancher has awarded 33,400 of some 79,300 degrees granted by the university in the past 102 years. He has named all but one of the university's 13 incumbent deans.

President Hancher has achieved an economy and efficiency in the operations of a complex institution of higher learning that has caused distinguished heads of other universities to ask how it could be done, the program stated. It cited his skill in inspiring interdepartmental cooperation as one explanation of how he has been able to accomplish much with comparatively modest sums available.

"Where dollars lacked, determination and desire have helped to obviate some of the need for them. What one department could not have accomplished alone, two or three or a half dozen have accomplished in partnership," the program continued.

Breaking away from a longtime semidetachment of the university from the world of other Iowans, the university under President Hancher has been woven more directly into the fabric of the State's own changing life, becoming more surely the architect of its spirit and outlook, the program explained.

"Such areas as the bureau of business and economic research, the bureau of labor and management, the institute of public affairs, and the school of social work are oriented strongly to the Iowa scene," it pointed out, also citing the development of broad programs in university and alumni relations, the first such formalized programs in the university's history.

Not only has President Hancher strengthened immeasureably the resident faculty and staff, but he has demonstrated the ability to stimulate their productivity, the tribute pointed out.

Recounting some of the major problems which President Hancher has faced in his 20 years at Iowa, the program recalled the great variations in enrollments for which plans had to be made during and after World War II. It also pointed out that money for building and improvements has not only been "hard to come by" in these years, but "it was a constant race with time to turn it into bricks and mortar fast enough to preserve something resembling the value of the original allocation."

Loren Hickerson, executive director of the alumni association, presided at the dinner. The invocation was offered by Professor Emeritus M. Willard Lampe, former director of the school of religion, and the portrait was presented by S. David Peshkin, of Des Moines, president of the alumni association.

In recounting the highlights of this tribute to Dr. Hancher, I have quoted liberally from a news story appearing in the Iowa City (Iowa) Press Citizen.

In further recognition of Dr. Hancher's great contributions, not only to the University of Iowa and the thousands of students and faculty members with whom he has come in contact, but to the entire field of college administration as well, I would like to call attention to an editorial which appeared in the Iowa City (Iowa) Press Citizen on Thursday, April 21. The editorial follows:

HANCHER: SYMBOL OF IOWA

"For almost 20 years, Virgil Hancher has symbolized the University of Iowa. He has been at once the chief architect of its contemporary spirit, and a bright and constant reflection of its spirit in the world. During much of that time, the university's affairs were marked and marred by wars and violence abroad, and by regional dissonances and frustrations at home in Iowa. These were fractious years in the university's life, and throughout their course, Virgil Hancher has given the university a continuum of integrity, devotion, and faith.

"Of itself, the president's service in the cause of Iowa and her people has been rich and abundant. It continues, and the values of it will last into the distant future. But not in Iowa alone; for the president of the University of Iowa is known and highly respected in every corner of the world of learning. In the course of his distinguished service in American higher education, he has joined the select company of the leading educational statesmen of his time."

Thus begins a stirring and all-encompassing tribute to President and Mrs. Hancher

contained in the program for the University of Iowa alumni association's dinner held Wednesday evening honoring President Hancher. The occasion marked his 20 years as president of the University of Iowa.

President Hancher's tenure, the longest any university president has so far served, covers the most significant years of the university's 102-year growth and development. There may have been greater short-term strides in some years before 1941, but certainly there never have been any greater university accomplishments or developments in a similar two-decade period that would have had to include more than one university administration.

President Hancher now has brought the university to the threshold of what is sure to be another era of great expansion, an era during which he continues to serve the institution. That the university stands ready to meet its grave new challenge is a solid tribute itself to the administration of President Hancher over these important developing years.

It is especially fitting that President Hancher's distinguished service to the university and the State of Iowa be recognized at this time, the 20-year milestone, with the grateful appreciation of university alumni and associates.

The High Cost of Drugs

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 2, 1960

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include a letter that I have sent to the Honorable Patrick A. Tompkins, commissioner, Department of Public Welfare of the Commonwealth of Massachusetts, in which letter I sought certain information. In my remarks I include a most interesting and amazing reply that I have received from Commissioner Tompkins, showing that a sharp increase to recipients of old-age assistance in Massachusetts on fair trade prices established by manufacturers for medication and drugs prescribed by physicians over a 3-year period.

If this charging of unreasonable prices for fair trade medicine or drugs for which a physician's prescription exists in Massachusetts to the extent that it does, certainly, a similar condition probably exists in other States of the Union, and the proper official of such States should make a special survey and investigation.

Furthermore, if such a situation exists among recipients of old-age assistance, to what extent does it exist among persons not receiving old-age assistance. As Commissioner Tompkins said in his letter:

I have officially concluded that these markups generally are unconscionable and indefensible, not only as related to public welfare recipients, but also as related to the general sick public who, in absolute fact, have no choice when medication is prescribed for a sick relative. They must purchase the unknown prescription at the price charged by the druggist.

The letters follow:

CONGRESS OF THE UNITED STATES,
Washington, D.C., March 26, 1960.

PATRICK A. TOMPKINS,
Commissioner, Department of Public Welfare, Boston, Mass.

DEAR COMMISSIONER: You will remember a few years ago, after consultations you had with me, I introduced a bill to permit Federal grants and aids for all public welfare vendor medical care payments. I will appreciate it if you will advise me as to the result of the passage of that bill insofar as Massachusetts is concerned, and the result outside of Massachusetts of which you have knowledge.

During our talk you mentioned to me, as I remember it, that charges were being made for medicine on prescription where the person or patient was charged a higher amount than where they could purchase the same medicine at the fair trade prices and where a prescription was not essentially necessary. At that time you told me the passage of the bill that I introduced, would enable you to make a thorough survey of this situation particularly in relation to Massachusetts and the facts (1) in relation to extra charges and (2) the saving the same might bring to the Commonwealth in connection with the payments made by the Commonwealth for persons receiving public assistance.

If you have made any study of the latter, I will appreciate it if you will convey to me such information you have on same.

With kind regards, I am,

Sincerely yours,

JOHN W. McCORMACK.

THE COMMONWEALTH
OF MASSACHUSETTS,
DEPARTMENT OF PUBLIC WELFARE,
Boston, April 8, 1960.

The Honorable JOHN W. McCORMACK,
House of Representatives,
Office of the Majority Leader,
U.S. Congress, Washington, D.C.

MY DEAR CONGRESSMAN: I regret the delay in responding to your letter of March 26, 1960, seeking information as to the efficacy of the operation of the public assistance titles of the Federal Security Act with particular reference to the vendor medical care payments which were made possible by the successful enactment of legislation which you so graciously introduced at my request in 1957 and 1958.

The immediate result was to permit the Massachusetts public welfare system to introduce, effective October 1, 1958, a universal mandatory vendor payment system for all medical services. This also made possible, of course, the kind of cost research and medical social research that the Federal Government's sponsored legislation of 1956 not only prevented but militated against in a very positive manner. There should hopefully never be a return to special matching formulas for vendor medical care payments because of the unfair discrimination financially and in terms of long-range planning and medical research that results in those States which have, in fact, by policy established a comprehensive and adequate medical service program.

For example, because of our long concern over the mounting cost of medication and drugs prescribed by physicians over a 3-year period in old-age assistance, this department conducted a massive cost study of all prescriptions paid for in the 12 largest municipalities of the State during the month of May 1959. It should be noted that only by the enactment of your medical care public welfare bill was it possible to initiate and conduct such a study in the first place. The general data secured from this study of drugs for old-age assistance has reflected the following specific information:

1. The average cost per month for drugs for each old-age assistance recipient rose from $3.48 per case in January 1957 to $5.16 per case in December 1959—over a 40-percent increase.

2. For the same strength quantity prescriptions, different and extremely disparate prices were paid for over 40 percent of all such prescriptions. (This pattern even prevailed on numerous occasions with respect to the same patient purchasing the same drugs in the same drugstore.)

3. Of the 250 most frequently prescribed drugs, 70 percent had fair-trade prices established by manufacturers. Despite this fair-trade price, 45 percent of all prescriptions for such fair-traded drugs were paid for at prices from moderately to excessively higher than the established fair-trade prices.

4. Of the 50 most frequently prescribed drugs and the 20 most expensive prescribed drugs, the price paid to the drugstore consistently exceeded 100 percent of the wholesale cost, and, with some rare exceptions, ranged upward to 300 percent markup over wholesale cost to the druggist.

I have officially concluded that these markups generally are unconscionable and indefensible, not only as related to public welfare recipients, but also as related to the general sick public who, in absolute fact, have no choice when medication is prescribed for a sick relative. They must purchase an unknown prescription at the price charged by the druggist.

Lastly, we have discovered that unfortunately many prescriptions are written for such normal over-the-counter purchases as aspirin and aspirin derivatives, such as Bufferin and Empirin compound; antacids, such as Maalox and Milk of Magnesia; and the price markups for small quantities, because of the fact that a prescription was written, ranged fantastically into the thousands of percent.

This department has presented to a committee of the Massachusetts Pharmaceutical Association a more modest and, in our judgment, reasonable price schedule which is basically predicated on the principle that under no circumstances do we pay more than the established fair-trade prices for fair-traded drugs, plus for non-fair-traded drugs a 50-percent markup over wholesale costs with a small breakage fee for broken packages of either capsules or liquids.

May I additionally point out that there is no way presently of determining whether a fair-trade price for retail sales of drugs is, in fact, a fair price, as the price is established by the manufacturer and his profit over his cost in his sale to the retailer is, of course, unknown.

Since this study of drug prices is probably the most massive and detailed such study in any public welfare department covering as it did 1,634 different drugs and 30,000 prescriptions, we are hopeful of constructive results representing high-quality service to sick recipients of public welfare and substantial dollar savings to the municipalities of the Commonwealth and the Commonwealth itself.

Very truly yours,

PATRICK A. TOMPKINS,
Commissioner.

STATEMENT OF COMMISSIONER TOMPKINS ON STUDY OF INCIDENCE, PRICE MARKUPS, AND GENERAL TREND OF DRUG PRICES PURCHASED BY OLD-AGE ASSISTANCE RECIPIENTS

Because of the widespread concern over the continued rise in the cost of drugs per case and the percentage of assistance dollar allocated to drugs, the Department undertook a massive study of all prescriptions paid for on behalf of old-age assistance recipients in the following 12 communities for the month of May 1959: Boston, Brookline, Ev-

erett, Somerville, Brockton, Quincy, Fall River, Haverhill, Worcester, Fitchburg, Springfield, and Holyoke.

On the four programs of public assistance for which the State department of public welfare exercises by statute some responsibility, 1,500,000 original prescriptions are being authorized by attending physicians. Many of these prescriptions, particularly for the chronically ill or long-term illness case, are subject to automatic and authorized refill. The total payment to retail pharmacists for drugs for public assistance recipients has been running at an annual rate of $5,900,000 to over $6 million annually. Approximately $4,400,000 of this amount is spent for prescription drugs for old-age assistance recipients; the remaining $1,500,000 to $1,600,000 is spent on recipients of disability assistance, aid to dependent children, and general assistance. Because of the tremendous expense in old-age assistance, this category of public assistance was selected for a specific study.

The sample of these 12 communities represented 25 percent of the caseload of the State for 1 month; 29,916 prescriptions paid for in the month of May 1959 were analyzed; 93 percent of all the prescriptions paid for were for drugs prepared for by the manufacturer and requiring no further compounding by the retail pharmacist; 2 percent of these prescriptions were for supplies; 5 percent of the prescriptions were for drugs which had to be compounded by the druggist.

Of 1,634 different drugs prescribed, 205 drugs represented 67 percent of the prescriptions studied, and the 50 most frequently prescribed drugs represented 40 percent of all prescriptions studied.

The attached material indicates item by item the major findings and the price plan that has been presented and will be distributed to the cities and towns of the Commonwealth for payment of drugs prescribed in the future.

FINDINGS OF DRUG STUDY

1. The average cost per old-age assistance recipient for a month for drugs has risen from $3.48 per case in January 1957 to $5.16 per case in December 1959.

2. For the same strength quantity prescriptions, different and extremely disparate prices were paid for 40 percent or more of all such prescriptions. (This pattern even occurred on numerous occasions with respect to the same patient purchasing drugs in the same drugstore.)

3. On the 50 most frequently purchased drugs and the 20 most expensive drugs, the price paid to the druggist consistently exceeded 100 percent over the cost of wholesale and, with some few exceptions, ranged upwards to 300 percent markup over wholesale.

A small group of drugs—namely, the aspirin and barbiturate derivatives and digitalis—reflected price markups over wholesale that ranged into the thousands of percent.

4. Of the 200 most frequently prescribed drugs, 70 percent were fair-traded-price drugs. Of these, 45 percent of the prescriptions on such fair-traded-price drugs were paid for at prices from moderately to excessively higher than the fair-trade price.

CONCLUSION

The continuing rise in the average cost per case for drugs in 3 years, the fact that on 40 percent of the prescriptions on the same quantity strength dispensed were paid for in 40 percent of the cases at unexplainable different and disparate prices, the fact that in 45 percent of all fair-traded drugs higher than fair-trade price was charged and paid, the further fact that in only 5 percent of all the prescriptions studied were the drugs compounded by the retail pharmacist, and the further fact that unusual and unjustifiable price markups were charged in the most frequently dispensed prescriptions (fair-traded or otherwise), is a clear mandate to the Commonwealth to establish a reasonable and uniform price formula for all drugs authorized for and purchased by recipients of public aid. The following price formula is presented and will be developed in chart form and distributed to all local boards of public welfare for purposes of auditing for payment of drug bills to retail pharmacists:

(a) All fair-traded drugs are to be paid for at the fair-trade price.

(b) The minimum payment for prescription is 50 cents.

(c) On all prescribed drugs which cost the druggist $5 or less the price markup over cost to be paid to the druggist will be 50 percent.

(d) On all prescribed drugs which cost the druggist from $5.01 to $10 the price markup to be paid to the druggist will be one-third.

(e) On all prescribed drugs which cost the druggist in excess of $10 the price markup to be paid will be 25 percent.

(f) Since only 5 percent of all the drugs purchased were compounded, no professional fee will be paid.

(g) Since the volume of repetitive business in the same quantity strength drugs is so massive, there will be no special allowance for broken packages.

PATRICK A. TOMPKINS,
Commissioner.

Twentieth Anniversary of the Tragic Katyn Forest Massacre

EXTENSION OF REMARKS
OF
HON. ROMAN C. PUCINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 2, 1960

Mr. PUCINSKI. Mr. Speaker, the spring of 1960 marks the 20th anniversary of the Katyn Forest massacre, in which 15,000 Allied soldiers were brutally murdered by the Communist Secret Police.

This monstrous crime shocked the entire world and let to a special investigation by the Congress of the United States in 1952, which was headed by the Honorable RAY J. MADDEN, Congressman from Indiana.

Last week I participated in a memorial tribute, sponsored by the Illinois Division of the Polish American Congress in Chicago, to these gallant Polish officers who were the victims of this massacre. I had served as chief investigator for the Select Committee of the House of Representatives To Investigate the Katyn Forest Massacre in 1952.

The Illinois Division of the Polish American Congress is to be commended for arranging last week's memorial service to the memory of these Polish soldiers. Through this tribute, the Illinois division has manifestly demonstrated again how dangerous it is for American leaders today to deal with Soviet leaders at face value.

Investigation by Mr. MADDEN'S committee in 1952 clearly demonstrated, beyond an iota of doubt, that Soviet Premier Stalin had ordered the execution of these Polish officers, whom we proudly listed as our most gallant allies. Our evidence clearly showed that Stalin brazenly lied to President Roosevelt on repeated occasions when the President tried to learn the fate of these men, after they had been deported to the Katyn Forest in the Soviet Union by Communist forces.

Despite the fact that Stalin ordered these Polish soldiers executed in Katyn in the spring of 1940, he repeatedly kept assuring President Roosevelt he did not know the whereabouts of these men until Stalin's lies became apparent to the entire world when the mass graves of the Polish officers were discovered in 1943.

President Eisenhower would do well today to recall this treacherous aspect of Soviet diplomacy when he sits down with Stalin's successor at the summit later this month.

Mr. Speaker, I should like to include in the RECORD today my own remarks delivered in Chicago last week in tribute to these Polish officers and also the remarks of Congressman MADDEN, who was the principal speaker. I should also like to include the resolution adopted at this mass memorial service, which was attended by 1,000 Chicagoans.

I hope that the conscience of this Congress can be sufficiently aroused to demand that the President of the United States carry out the recommendations of the House select committee, which were included in its final report filed here in this House of Representatives on July 4, 1952. Not until those recommendations are carried out by the Government of the United States can we, as Americans, satisfy our conscience that we have done everything possible to properly recognize the great sacrifice these Polish officers made in Katyn.

The remarks and the resolution follow:

Mr. Chairman, may I take this opportunity to commend the Illinois Division of the Polish American Congress for arranging this 20th anniversary memorial service to the victims of the Katyn Forest massacre.

The brutal assassination by Communist troops of 15,000 of Poland's army officers in the spring of 1940 in the Katyn Forest marks one of the most scandalous pages of civilized history. By this tribute tonight, the Illinois Division of the Polish American Congress has again demonstrated that we shall not let the conscience of the world rest until the perpetrators of this monstrous crime against the Polish Nation and its gallant soldiers are brought to the bar of justice.

The Congress of the United States in 1952, after a most thorough investigation, which I had the honor to head as chief investigator of the Select Committee of Congress To Investigate the Katyn Massacre, had clearly and unequivocally proven that this horrible massacre was perpetrated by the Soviet Union. Our investigation conclusively proved that these heroic Polish officers were murdered by the Communists in the Katyn Forest in order to pave the way for the eventual occupation of Poland by a puppet Communist government, which to this very day still holds the gallant Polish people in bondage.

Despite the overwhelming proof we presented to the world at the conclusion of this congressional investigation that the Soviet Union was guilty of this barbaric act, little, if anything, has been done to bring those guilty for this crime to justice.

It is conclusively clear to me that certain elements in our own Government to this very

day oppose any effort to carry out the recommendations of our congressional committee in 1952, which included a strong plea that the Soviet Union be cited before the International Court of Justice for conduct contrary to that recognized by civilized countries. Despite the fact that the congressional committee had demonstrated unequivocally that there is sufficient language in the present Charter of the United Nations dealing with the World Court to bring such an action against the Soviet Union before that tribunal, both the present administration and the State Department have refused to initiate such action.

There is no question in my mind that if the American people and the President of the United States had been given all the details of the Katyn massacre when they first became known in 1943, including indisputable proof that Communist troops on orders of Premier Stalin had massacred these Polish soldiers, this Nation would have taken an entirely different attitude toward the Soviet Union in its wartime dealings.

However, regardless of how logical our position may be today, it is clearly apparent that any redress for this hideous crime to the Polish Nation can come only when the Polish people again have a free government, unshackled from the influence of Moscow, and are able themselves to demand justice before the World Court.

Because I believe this to be so true, it gives me great pleasure today to disclose to those of you assembled here the fact that the House Committee on Foreign Affairs this morning approved a resolution which I had the pleasure of introducing, along with Congressman ZABLOCKI and other Members of Congress, urging President Eisenhower to demand free elections for the people of Poland and all the other captive nations when he meets with the Soviet leaders at the summit on May 16.

I think that the Foreign Affairs Committee has taken a historic step toward restoring justice and liberty to the enslaved people of the captive nations. I have every reason to believe that this resolution will be confirmed by the House of Representatives on Monday when it comes up on the Consent Calendar. I strongly hope that the Senate will concur in the spirit of this resolution, and I pray that the President of the United States will respect the wishes of Congress and make this demand for free elections in the captive nations when he meets with Mr. Khrushchev.

It is clear to me that justice in Eastern Europe regarding not only redress for this monstrous Katyn massacre, but also all the other crimes that the Communists have perpetrated against the people of these captive nations, can be realized only when these nations are again free and able to demand their proper rights before the World Court.

Those of you assembled here tonight have played a most important role in helping keep alive the demands for ultimate justice for these captive nations. Your voice is being heard in Congress, and I hope the action of Congress will be heeded by the President.

We know one fact is indisputable: There can be no lasting peace so long as this vast population of people traditionally dedicated to freedom are held captive behind the Iron Curtain. We know that the key to lasting peace, to disarmament, to ultimate justice lies in the liberation through peaceful means of these postwar victims of Soviet aggression. Only when our foreign policy becomes based on a firm demand that these captive nations must be permitted to take their rightful place in the family of free nations will we, indeed, inspire the entire world to follow our leadership. In this great struggle for the minds of men throughout the world, the United States can provide the leadership by demanding justice and freedom for those in Poland, Czechoslovakia, Lithuania, Estonia, Latvia, Hungary, Rumania, and Bulgaria, now being held captive by their Soviet oppressors.

This year, Americans of Polish descent are going to pay tribute to the 100th anniversary of the birth of Ignace Jan Paderewski as one of the great sons of Poland, who to his dying day fought for freedom. I am happy to inform you this evening that within the next few days the U.S. Post Office will announce issuance of a commemorative stamp under the champions-of-freedom series in tribute to Paderewski. We here tonight, in paying tribute to the victims of Katyn, in demanding freedom and justice for the captive nations, are indeed upholding the highest principles for which Paderewski lived and died.

Thank you.

SPEECH OF RAY J. MADDEN BEFORE THE ILLINOIS DIVISION OF THE POLISH AMERICAN CONGRESS, CHICAGO, ILL., APRIL 29, 1960

The Polish American Congress and especially the Illinois division must be commended for calling this mass meeting to memoralize the thousands of Polish patriots who were massacred in the Katyn Forest 20 years ago this spring. The Katyn massacre has already been recorded as one of the most barbarous international crimes in world history.

At the outbreak of World War II and during the winter of September 1939 and 1940, over 15,000 Polish army officers and intellectual leaders were taken prisoners by the Soviets when Stalin invaded Poland. These officers and Polish leaders were interned in three Soviet prison camps in the territory of the U.S.S.R. The incarceration of these prisoners and their mass deaths took place during the first 4 months of 1940. All traces of these men were lost and the Soviet leaders denied any knowledge of their whereabouts and their disappearance was a mystery up until April in 1943. At that time, the Nazi troops had invaded the Katyn Forest area near Smolensk which was under the complete domination of the Soviets. Upon discovery of the mass graves by the Hitler forces, word was sent out by the German propaganda minister exposing the international crime that had been kept secret for almost 2 years. Stalin and his Communist leaders immediately accused the Nazis of the deplorable crime committed in the Katyn Forest.

In 1952 the Congress authorized a special committee to investigate and hold hearings both in this country and in Europe for the purpose of placing the guilt for this international crime. For the first time in history, an international crime was committed wherein one nation accused the other and vice versa. The world knows that before, during and after World War II, the Communists in their infiltration and aggressions committed many deplorable mass murders, massacres, and campaigns of starvation against enslaved peoples in Poland's neighboring nations.

The special congressional committee held hearings over a period of many months both in this country, London, and Europe. Over 250 witnesses and hundreds of exhibits and depositions were taken by this committee, revealing the true facts regarding the Katyn Forest massacre. On December 22, 1952, the committee submitted to Congress its final report establishing beyond any question of a reasonable doubt that the Soviets committed the mass murders of over 14,000 Polish officers and intellectual leaders in the spring of 1940. The leaders of the Soviets, their Ambassador in Washington, and any one whom they would designate were invited to appear before our committee to submit facts regarding this crime, but they refused to participate in the hearings. Throughout the entire proceedings, there was not a scintilla of proof or even remote circumstantial evidence presented that could indict any other nation but Russia for this international crime. News services, radio, television, and other publicity mediums in England and in Europe covered the testimony and hearings, and dispatches were sent throughout the world exposing the true blueprint of Communist aggression, brutality, and methods used in the enslavement of a nation and its liberty loving people. The world knows now that the same duplicity and methods of aggression were used by the Soviets in enslaving the Balkans and other neighbor nations surrounding the borders of the Soviets. The members of our committee were informed while holding hearings in Europe that the facts revealed by the special congressional committee for the first time, placed the Soviet propaganda machine on the defensive. Stalin and his lieutenants and his successor Khrushchev have to this day no answer to the facts and testimony revealed in the Katyn Forest massacre investigation. Khrushchev in his visit to this country, exhibited agitation and anger when even remote inferences were made concerning the Communist crimes of aggression and tyranny in keeping small nations under their enslavement. The Communist leaders are very anxious to have their criminal records of the past buried from the minds of the present generation and generations to come. The Soviet propaganda broadcast today in Africa, Asia, South America, Cuba, and other areas, emphasizes that captive nations were anxious to come under their sphere of the Communist government, and that their present status was voluntary cooperation with the Kremlin.

I might state here that the special congressional Katyn committee received the praise and commendations for the outstanding success of its hearings by the State Department, congressional leaders, Ambassador Lodge of the United Nations, and all of the former leaders of satellite nations now under the Communist yoke. My office in Washington has received requests for copies of the Katyn report, recommendations, and findings, from the leaders in most of the free nations throughout the world and we still receive requests from individuals and organizations throughout the world.

I should mention here that the Polish-American Congress, through its president, Charles Rozmarek, should be given major credit for arousing public opinion and aiding in securing congressional action to act favorably on my resolution to authorize the congressional investigation of this international crime. I wish to further state that Congressman ROMAN PUCINSKI, of Illinois, contributed great work as a special investigator, interpreter, and adviser to the Katyn committee during its long months of hearings and that this work he performed proved to be a major contribution to the success of the committee.

It is highly important that our Nation and the nations of the free world should constantly remind the peoples of neutral and undeveloped countries, the true facts as to how the Soviets succeed in enslaving neighbor nations against the will of the conquered. When the Katyn congressional committee was holding hearings in Europe, Pravda and the Soviet propaganda broadcasts devoted daily charges ridiculing the purpose and work of our committee as being a malicious committee disseminating capitalistic propaganda against communism.

Most of the people of the world now realize that the international crimes occurring before and during World War II by the Soviets were repeated only by a different pattern during the Hungarian and East German uprisings. Unless our Nation and the free nations of the world continue to keep the facts alive and send forth the truth to all people about communism, future Katyn massacres will take place in countries that today are enjoying freedom and self-government.

The Polish-American Congress is contributing greatly to future world freedom and the eventual reestablishment of freedom in captive countries by holding this great mass meeting memorializing the thousands of Poles who sacrificed their life in the Katyn Forest.

The former leaders of Poland who testified before our committee, warned against the future coexistence moves and peace overtures which the Communists will make at strategic times in order to carry out their program for world conquest. It was only a few years ago in Geneva when President Eisenhower, Secretary Dulles, Anthony Eden of Great Britain, and other representatives of free nations met with Khrushchev, Bulganin, and the Chinese Communists. The former leaders of Poland and other satellite nations all realized at that time that the Geneva meeting was another strategic move on the part of Khrushchev to use that summit meeting as a propaganda platform to mislead the people of the world that they were fighting for world peace.

The leaders of Poland and the leaders of the former free nations now enslaved, call all to testify that treaties, pacts, summit meetings, etc., mean nothing, as far as the sincerity and reliability of the Communist mind is concerned, when they see fit to move in their well-planned aggressions.

The No. 1 program on the agenda for the coming summit meeting should be to review the methods and facts concerning the enslavement of Poland and other satellite nations, and demand that immediate steps be taken to inaugurate free and uncontrolled elections in the enslaved nations today under the Communist yoke. I firmly believe that world public opinion, if the true facts on Communist aggression were made known in all neutral and backward nations, would some day free enslaved nations so that they would again enjoy liberty and free government.

POLITICS IN FOREIGN POLICY

Back in 1952, after the Katyn hearings were officially completed, it was heartening to hear General Eisenhower and his advisers during his campaign advocate that our Government take rigid steps to liberate satellite nations. It was indeed disappointing to the members of the Katyn committee that within the short space of 1 year, Secretary Dulles and the State Department actively opposed a congressional resolution sponsored by the members of the Katyn committee that the Congress recommend to the United Nations that affirmative action be taken by that international body dealing with international crime committed by the Soviets in the Katyn Forest.

The members of the Katyn committee were again optimistic when 2 years later on July 6, 1955, Charles Rozmarek, the president of the Polish American Congress and Rev. Valerian Karcz, the secretary, along with other officials, and Congressmen MACHROWICZ, SADLAK, and LESINSKI, personally visited the White House and requested the President to present the satellite nations' case before the then pending conference of the Four Great Powers. The resolution submitted to the President at that time offered a number of convincing reasons why it was proper to insist at the Geneva Conference that if the Soviets were sincere in their peace overtures that they should allow captive nations the freedom of uncontrolled elections and self-government. The Geneva Conference resulted in nothing more than a strategic propaganda platform for the Soviet leaders to broadcast untruths and lies to the neutral and backward nations of the world. Communist leaders in 1955 or today are not prepared militarily to start their program for world conquest. They want to complete their communization of the enslaved nations to strengthen their own war potential and economy. This task will take several years in the future for the Soviets to accomplish world superiority before they strike. Khrushchev and his leaders have not changed one step from the words of Lenin when he said: "The permanent existence of the Soviet Republic with the captive countries side by side is unthinkable. One or the other must eventually triumph."

Our country is in the same position today as far as successfully curbing the Soviets' goal as we were before the Geneva Conference. Two months after the Geneva Conference, Khrushchev and Bulganin majestically toured the Middle East and Asia calling our President and Secretary of State "warmongers." It is our earnest hope that a different strategy will be used by the leaders of the free world at the coming summit conference. If the Soviets are sincere in their peace proposals, they should demonstrate good faith by allowing captive neighboring nations free elections to assume their former status as independent free people.

Stalin and Khrushchev made great success through bluff and false propaganda and it is high time that the leaders of the free nations demand affirmative action from the communistic dictators. Demands must be made that they stop their infiltration and aggressions throughout the free world; and also, restore freedom to the millions whom they have reduced to enslavement under the communistic tyranny.

RESOLUTION ADOPTED BY THE ILLINOIS DIVISION, POLISH AMERICAN CONGRESS, IN CHICAGO ON APRIL 29, 1960

The month of April 1960 marks the 20th anniversary of the massacre of Polish officer prisoners of war committed by Soviet Russia in the Katyn Forest.

These prisoners were active and reserve officers of the Polish Army—physicians, teachers, lawyers, and, as chaplains, priests, and rabbis—assembled in the camps at Ostaszkow, Starobielsk, and Kozielsk.

By executing Polish intelligentsia, Soviet Russia hoped to weaken the resistance of the Polish Nation.

In 1943 the advancing German troops discovered the mass graves of the Polish officers in the Katyn Forest. At that time the Soviet Government accused the Germans of committing the crime.

Thousands of similar crimes had been committed by the Germans during the last war. The Katyn massacre, however, is a deed of Soviet hands.

The International Tribunal for War Crimes at Nuremburg convicted many German war criminals, yet those guilty of the Katyn massacre escaped unpunished. Moreover, under Soviet pressure, the whole civilized world seemed to forget that the massacre was a war crime and that the guilty should be punished.

The free world chose silence rather than confronting Soviet Russia with the facts.

In 1952 an investigation of the Select Congressional Committee To Investigate the Katyn Massacre clearly proved that Soviet Russia is responsible for this crime.

The committee concluded its investigation by recommending that details of the Katyn massacre be presented to the United Nations by the U.S. delegation and that the Soviet Union be cited before the International World Court for this horrible crime.
